Morning, daytime and nighttime rocket measurements of electron flux in upper atmosphere at 80-165 km altitudes, noting energy flux

15 p2677 A69-31413

ISIS A satellite fixed and sweep frequency ionograms indicating electron density variations, ionospheric resonances and Cerenkov radiation

15 p2604 A69-31416

Simultaneous middle and low latitude Thomson scatter measurements, comparing electron density, temperature and exospheric temperature data on quiet and disturbed days

15 p2604 A69-31418

Gyroplasma probe data from rocket observations, determining winter ionospheric electron density profiles, electron temperature and electrostatic cyclotron waves effect

15 p2606 A69-31446

Ground based partial reflection and cross modulation or wave interaction techniques compared for studying D region electron densities

15 p2606 A69-31537

Rocket measurements of upper F region electron temperature and density profiles, for particle and energy balance of ionosphere topside, noting diffusive equilibrium

16 p2848 A69-31975

Polar Ionosphere Beacon Satellite S-66 signals measured for large scale horizontal gradients in total electron content of Antarctic ionosphere at sunspot minimum and maximum

16 p2774 A69-31989

Lunar tidal variations of electron concentration in F 2 region near magnetic equator showing large latitudinal dependence

16 p2776 A69-32090

Nighttime decreases in F 2 layer heights at near conjugate stations in low latitudes, using electron density profiles

16 p2778 A69-32186

LF ground based absorption results compared with rocket measured D region electron density profiles

16 p2778 A69-32188

F 2 critical frequency data at Hawaii for clarifying total electron content data obtained by geostationary satellite measurement of Faraday signal rotation

16 p2779 A69-32196

Decameter waves Doppler shift shown inversely proportional to wave frequency from electron density variation caused by acoustic wave propagation in ionosphere

16 p2755 A69-32610

First order Doppler shift in ionosphere and horizontal gradients influence, discussing total electron content determination method made from geodetic satellites using two coherent frequencies

16 p2755 A69-32614

Doppler shift measurements at two coherent frequencies from Diadem satellites to determine ionospheric electron content, discussing accuracy and parameters defining satellite passage

16 p2785 A69-32615

Electron production rate in low ionosphere, discussing parameters of ionizing solar cosmic rays and earth environment

17 p3022 A69-33035

Rocket-borne AM radio receiver for Faraday rotation experiments to measure lower ionosphere electron density, giving circuit diagrams

17 p2936 A69-33062

Spectrum and cross section of radio wave scattering in two temperature plasma, relating differential backscattering cross section to ionospheric electron density fluctuations

17 p2930 A69-33895

High latitude geomagnetic disturbances, incoming electron fluxes and riometric absorption relationship in lower ionosphere studied by X ray bremsstrahlung with sounding balloons

17 p2964 A69-33961

Unsteady model taking into account photoionization, neutralization and diffusion, describing electron concentration diurnal and seasonal variations in ionosphere F 2 region at midlatitudes

17 p2966 A69-33978

Traveling ionospheric disturbances in form of large scale electron concentration discontinuities created by propagating internal gravitational waves

17 p2966 A69-33980

Lower ionosphere electron concentration confirmed as function of electron and ion temperature by satellite and probe data

17 p2966 A69-33981

Postsunset apparent reflection height and electron density variability in equatorial F 2, discussing singularities of diurnal variation in November-January

17 p2967 A69-33984

Ionospheric electron concentration variation during positive perturbation based on N/h profiles

17 p2967 A69-33986

Planetary ionospheric effect of 15 July 1959 sudden commencement magnetic storm based on N/h profiles of earth day and night sides

17 p2967 A69-33987

Solar flares with subcosmic radiation in proton active region of May 1967, discussing X ray emission effects, calculating D region recombination coefficient and electron concentration

17 p3025 A69-34226

Ionospheric absorption and virtual heights relationships for electron density distribution in lower ionosphere, computing model profiles

18 p3125 A69-34248

Irregularities distribution in antarctic ionosphere from polarization angle fluctuations of satellite S-66 radio signals, discussing diurnal magnetic and solar cycle effects

18 p3125 A69-34249

Reexamination of polar F region electron density diurnal variation data contradicting King-Kohl theory of rotating neutral winds role

18 p3125 A69-34255

Anomaly of F region electron content vs polar geographic latitude and local mean time

18 p3126 A69-34257

Lower ionospheric electron concentration and collision frequency measurements by Nike-Apache rockets, suggesting geomagnetic anomaly in D region

18 p3127 A69-34798

D region electron densities from multifrequency absorption measurements by proton spectra analysis, noting cubic approximation

18 p3127 A69-34799

Equatorial electrojet current distribution determined using equivalent circuit method and magnetic force model, noting electron density profile influence on current density

18 p3130 A69-35186

Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves

20 p3519 A69-37022

Ionospheric electron content and concentration variations analysis based on data of radio waves propagating from satellite, considering Doppler shift and Faraday effect

20 p3486 A69-37027

Simultaneous ionospheric ion and electron measurements by various radiophysical methods, relating results to period of flight of vertical space probe

20 p3486 A69-37028

F region electron and ion concentration vertical distribution, discussing various ionization reactions

20 p3520 A69-37030

Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations

20 p3590 A69-37558

Predawn F 2 layer critical frequency enhancement at Johannesburg, discussing electron density hump from corpuscular ionization increase

20 p3523 A69-37576

Electron-ion gas ambipolar diffusion effect on F 2 layer electron density vertical distribution variations

20 p3525 A69-37655

Temperature effect on electron concentration steady distribution in F 2 layer

20 p3525 A69-37657

Altitude variations at and near maximum electron concentration in quiet F 2 layer during solar activity maximum from sounding at southern geomagnetic pole

20 p3526 A69-37662

Electron density distribution in northern and southern polar regions ionosphere based on 1958 and 1959 observations at high geomagnetic relatively low geographic latitudes

20 p3526 A69-37664

Occurrence, development and disappearance of diffused reflections, relating dynamic behavior to ionospheric electron concentration

20 p3529 A69-37687

RF impedance probe digital system for ionospheric measurements based on antenna resonance phenomena

20 p3542 A69-37791

Doppler technique for ionospheric electron density measurement by VLF ground based radio transmitter noting HF method

20 p3542 A69-37792

Topside ionogram reduction for ionospheric electron density determination, using geomagnetic strength at all heights, iteration and change of variables

20 p3529 A69-37864

Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections

20 p3495 A69-37865

Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms

20 p3530 A69-37867

Ionospheric electron density irregularities observed by topside sounders showing shape, dimensions across magnetic field and variation percent, discussing resulting radio echoes

20 p3530 A69-37870

Upper ionosphere Thomson scatter, electron number density measurements and topside sounding results during geomagnetic storms using electrodynamic drift theory

20 p3530 A69-37872

Cylindrical electrostatic probes on Alouette 2 and Explorer 31 satellites used in intersatellite comparison of directly measured ionospheric electron temperature and density

20 p3544 A69-37876

Explorer 31 ion mass spectrometer calibrated in flight and compared with Alouette 2 topside electron concentration data

20 p3545 A69-37879

Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite

20 p3531 A69-37882

Ionospheric electron and ion concentration and temperature by Langmuir plate and spherical ion probe on Explorer 31 and ionosonde on Alouette 2

20 p3531 A69-37883

Auroral midlatitude red arcs ground and satellite data, noting field aligned electron density depression, plasma temperature increase and O plus-H plus transition altitude

20 p3532 A69-37897

Ionic composition determined by combining Alouette topside sounder electron density profiles with electron and ion temperatures measured by ground based Thomson scatter sounder

20 p3532 A69-37898

Rocket observation of ionospheric electron and positive ion densities and dayglow emission intensities in twilight conditions

21 p3702 A69-38355

Nocturnal electron/ion density balance in F region ionosphere from examining 6300 A emission

21 p3712 A69-38518

Daytime electron and ion composition model for height range from 150 to 1500 km at moderate latitudes and minimum solar activity

21 p3714 A69-38555

Ionospheric electron density and collision frequency profiles examined for changes during December 1967 to January 1968 stratospheric warming

21 p3714 A69-38556

Direct detection of ionospheric irregularity by device onboard San Marco satellite, utilizing antenna impedance fluctuations

21 p3715 A69-38562

Ariel 3 satellite observations, including topside ionospheric variations with time and solar activity, electron density, temperature measurements, etc

21 p3716 A69-39257

Explorer 22 observations of ionosphere electron content, describing measuring equipment and data evaluation

22 p3935 A69-39977

Ionospheric vertical columnar electron content at midlatitudes near solar cycle minimum based on Faraday rotation data from Explorer 22

22 p3939 A69-40505

Faraday effect measurements by polar orbiting satellites for vertical distribution of ionospheric electron density

22 p3941 A69-40718

Ionospheric electron content satellite measurements during 20 May 1966 annular solar eclipse

22 p4007 A69-40916

- Midlatitude F region continuity equation solutions, including eastward electric field effects on electron density
22 p3941 A69-40917
- Midlatitude ionospheric electron density rocket data survey, including nighttime and daytime N/h profiles for specific solar activities
23 p4155 A69-41563
- Electron concentration vertical profile in ionosphere in presence of horizontal wind shifts determined using E layer charged particle redistribution approximation
23 p4155 A69-41840
- Magnetic activity effect on electron density in topside ionospheres determined from Alouette 1 data statistical analysis
23 p4156 A69-41856
- Ionospheric F region equatorial anomaly in electron density showing high correlation with equatorial electrojet range and poor correlation with Fugene range
23 p4160 A69-42432
- Faraday rotation diurnal variation plotted by analyzing radio transmissions from Canary Bird geostationary satellite, considering ionospheric electron density peak
23 p4160 A69-42433
- Ionospheric electron content measurement from Faraday fading on satellite BE-B, using computer program for data reduction as function of latitude
23 p4160 A69-42434
- Ionospheric electron content measurements at low latitudes close spaced frequency and differential Doppler shift technique, using BE-B and BE-C satellite transmission
23 p4161 A69-42435
- Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements
23 p4161 A69-42438
- Ionospheric range difference errors after correction for position fixing from satellite, considering elevation angle, latitude, day time, spatial and time electron content correlation
23 p4128 A69-42505
- Ionospheric electron content and distribution at low altitudes from satellite S 66 data, describing seasonal variations of equatorial anomaly peak
24 p4367 A69-43010
- ### IONOSPHERIC F-SCATTER PROPAGATION
- Statistical characteristics of magnetoionic components of obliquely incident waves, obtaining envelope distribution of signal reflected from F 2 layer
02 p0314 A69-11691
- E layer fine scale structure, F 1 reactions and F 2 reflected signals analysis during 20 May 1966 solar eclipse
13 p2255 A69-28541
- Statistical characteristics of magnetoionic components of obliquely incidence waves, obtaining envelope distribution of signal reflected from F 2 layer
13 p2355 A69-28722
- Radio signals F region scattering related to electron density fluctuations in ionosphere
14 p2444 A69-29870
- Cosmic radio emission absorption during IQSY at 24.6 MHz, relating diurnal variation of absorption and geomagnetic index F scatter occurrence
17 p2968 A69-33992
- Supercritical frequencies horizontal gradient ducting effects on backscatter sounding of F region magnetic field aligned irregularities
22 p3941 A69-40913
- Radio wave scattering cross section in wake of body moving in ionosphere, using simplified procedure with asymptotic expressions
22 p3901 A69-41094
- ### IONOSPHERIC HEATING
- Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation
02 p0237 A69-11664
- Oxygen electron cooling effect on ionospheric electron temperatures, noting discrepancy removal throughout day at all altitudes
02 p0245 A69-12739
- Reversible ion heating by atmospheric tides, noting radar Thomson scatter observations of E region ion temperature height profiles
11 p1879 A69-25159
- Joule heating role in generating internal gravity wave energy in auroral electrojet region, using linear model
12 p2064 A69-26010
- Energy loss during inelastic collisions between electrons and ionospheric particles, determining ionospheric heating by UV radiation
13 p2252 A69-27614
- Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation
13 p2257 A69-28695
- Ionospheric heating and velocity dependence of collision cross sections on transversely propagated equatorial hydromagnetic waves, discussing ordinary and extraordinary modes
23 p4161 A69-42437
- ### IONOSPHERIC ION DENSITY
- Ionospheric negative ion coefficient variations, analyzing formation microprocesses
01 p0066 A69-10599
- Spacecraft ionospheric probe for simultaneous measurement of electron temperature and density, plasma space potential, ion composition, etc
01 p0081 A69-10760
- Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
02 p0239 A69-11686
- Topside ionosphere composition data by energy spectrometer on satellite Ariel 1, discussing positive ions and diurnal, seasonal and secular variations
03 p0424 A69-13806
- Solar X ray source identification using D layer ionization behavior during eclipse
04 p0650 A69-15533
- Rocket measured profiles of electron density and ion abundances in E region, discussing role of minor atmospheric constituents
05 p0757 A69-16408
- Atmospheric helium normal thermal escape mechanisms, noting ion loss from polar ionosphere
07 p1125 A69-18946
- Nighttime Venus ionosphere models compared with Mariner 5 observations, discussing implications with regard to He and H abundance consequences and nightglow
09 p1594 A69-21695
- Hourly N/h profiles of F region calculated from nomograms by normal integral method during magnetic disturbance, measuring region temperature
10 p1687 A69-23928
- Molecular reaction rates and ion/electron vertical profile and concentrations in equatorial ionosphere, applying computer simulation to numerical solution of continuity equations
10 p1688 A69-23929
- Ionospheric molecular ion concentration vertical profile analysis for verifying neutral gas temperature maxima in connection with two ion production maxima
10 p1688 A69-23930
- Nighttime distribution of nitrogen ion and lambda 5755 emission in ionosphere with incidence of aurora
12 p2066 A69-26110
- F 1 layer formation relationship to height variations in ionic concentrations, determining different ion concentration combinations
12 p2071 A69-26702
- Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
13 p2258 A69-28717
- Ionized gas height scale changes in polar ionosphere obtained, assuming Chapman type ionization distribution
14 p2436 A69-29052
- Horizontal electric fields relations to charged particle fluxes in polar auroral ionosphere
14 p2437 A69-29070
- Vertical motion of ionized formations in ionospheric F region related to sporadic E layer
14 p2437 A69-29074
- Diurnal variations of atmospheric ion composition at 100-200 km from rocket experiments
15 p2603 A69-31401
- Ion whistlers recorded by Alouette 2 VLF receiver providing information on ion composition of terrestrial ionosphere, showing variation with latitude and relationship to solar cycle
15 p2604 A69-31410
- Nighttime, twilight and daytime rocket experiments for ion composition of polar ionosphere at 100-180 km
15 p2604 A69-31414
- Lyman alpha radiation ionization rate in lower ionosphere, noting various charged particle concentration parameters
15 p2605 A69-31438
- Spectrometric rocket measurements of ion concentrations between 200 and 630 km
16 p2774 A69-31974
- Rocket measurements of upper F region electron temperature and density profiles, for particle and energy balance of ionosphere topside, noting diffusive equilibrium
16 p2848 A69-31975
- Ionization troughs below F 2 layer maximum due to ionospheric disturbances detected by Antarctica ionograms direction of arrival data
16 p2775 A69-32080
- Ionization density, velocity and temperatures oscillations revealed by Thomson scatter observations of gravity waves in F regions
16 p2779 A69-32198
- Sporadic E ionization by rocket sounding, comparing positive ion density measurements with separate wind shear observations
16 p2780 A69-32310
- Relationship between sporadic E and 5577 A nightglow emission attributable to ionization redistribution in E region due to dynamic processes
16 p2788 A69-32782
- Geomagnetic control of geographic distribution of F 2 layer midday ionization based on data from ionospheric vertical sounding stations
17 p2966 A69-33982
- Reflection and ionization heights diurnal variations in F region, obtaining data for sporadic E formation
17 p2968 A69-33995
- Vertical ionization displacements in F region as trace distortions on ionograms observed at low, mid and high altitudes during daytime
17 p2969 A69-33998
- Positive ion concentration in D region, using spherical stationary electrostatic probe in weakly ionized collision dominated gas
18 p3128 A69-34804
- Ion depletion in high latitude exosphere, considering OGO 2 simultaneous observations of positive ion concentration, VLF signal propagation and whistlers
18 p3187 A69-34939
- Field aligned ionospheric F layer ion density irregularities, using simultaneous hourly radar echo and spread F data and detailed ray path calculations
18 p3129 A69-34958
- Solar flares less than 10 A X rays effect on ionospheric ionization between 60 and 100 km
19 p3397 A69-36754
- Molecular ion concentrations determined using flat probe collector trap on Cosmos 5 satellite at 200-300 km
20 p3519 A69-37021
- Simultaneous ionospheric ion and electron measurements by various radiophysical methods, relating results to period of flight of vertical space probe
20 p3486 A69-37028
- F region electron and ion concentration vertical distribution, discussing various ionization reactions
20 p3520 A69-37030
- Inhomogeneities time buildup in lower ionosphere weakly ionized plasma during charged particle concentration perturbations and source temperature variations
20 p3525 A69-37658
- F 2 critical frequency meridional cross sections latitude profiles based on global network ionospheric stations observations, confirming daytime Northern Hemisphere ionization maximum
20 p3526 A69-37661
- Solar activity effect on F 2 layer geometrical parameters, plotting prognostic maps using nomographic methods
20 p3526 A69-37663
- Diurnal, seasonal and cyclic altitude and maximum ionization median value variations of undisturbed ionosphere from vertical sounding data obtained at Yakutsk, Siberia
20 p3527 A69-37668
- Cosmic radio emission absorption in D, E region and in F 2 layer above and below electron concentration maximum from vertical ionospheric sounding 1959 over Moscow
20 p3590 A69-37676
- Alouette satellite VLF observations data of ionosphere ion composition determined from ion whistlers and noise bands with LF cut-off
20 p3530 A69-37873
- Explorer 31 ion mass spectrometer calibrated in flight and compared with Alouette 2 topside electron concentration data
20 p3545 A69-37879
- Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite
20 p3531 A69-37882

Ionospheric electron and ion concentration and temperature by Langmuir probe and spherical ion probe on Explorer 31 and ionosonde on Alouette 2
20 p3531 A69-37883

Plasma temperature and ion concentration profiles determined from simultaneous measurements by Alouette 2 and Explorer 31 satellites of electron density, temperature and ion abundance
20 p3532 A69-37896

Auroral midlatitude red arcs ground and satellite data, noting field aligned electron density depression, plasma temperature increase and O plus-H plus transition altitude
20 p3532 A69-37897

Diurnal and seasonal variations of primary atmospheric ions in topside ionosphere correlated with solar zenith angle, using ion mass spectrometer on Explorer 32
20 p3534 A69-38087

Ion layer separation in temperate-zone sporadic E, obtaining layer shape by superimposition of density distributions
20 p3535 A69-38106

F region vertical density profiles for positive ions and neutral molecules of various gases determined from rocket-borne mass spectrometer data
21 p3702 A69-38354

Rocket observation of ionospheric electron and positive ion densities and dayglow emission intensities in twilight conditions
21 p3702 A69-38355

Distributions, seasonal variations and ionospheric implications of mesospheric nitric oxide concentration
21 p3703 A69-38364

Lower thermosphere ion and neutral minor constituent concentrations in nighttime auroral zone, considering ionization due to electron precipitation and bremsstrahlung
21 p3704 A69-38365

Nocturnal electron/ion density balance in F region ionosphere from examining 6300 Å emission
21 p3712 A69-38518

Daytime electron and ion composition model for height range from 150 to 1500 km at moderate latitudes and minimum solar activity
21 p3714 A69-38555

Magnetic activity effects on horizontal drifts, anisotropy and random change characteristics of E region ionization irregularities
21 p3715 A69-38561

Solar L alpha and X ray emission contribution to lower ionosphere ion production, discussing altitudinal, latitudinal and temporal variations
22 p4008 A69-41096

Ionization irregularities in equatorial E region observed in various scale sized by rocket-borne Langmuir and plasma-noise probes
23 p4160 A69-42430

IONOSPHERIC NOISE NT WHISTLERS

Large amplitude Pc 1 events at College, Alaska, noting more ionospheric cosmic noise absorption accompanying large events
[AFRL-69-0059] 02 p0244 A69-12397

Ionospheric LF radio noise cut-off near proton gyrofrequency, discussing satellite ELF and VLF observations
03 p0399 A69-14021

Continuous and triggered audio frequency noise bands associated with ionospheric lower hybrid resonance frequency observed on OGO 2
05 p0754 A69-16257

Ionospheric background noise levels and sources determined from Alouette data
20 p3495 A69-37874

Ionospheric lower hybrid resonance (LHR) noise discovered by Alouette 1, describing possible mechanisms for origin
21 p3702 A69-38358

VLF and LF emission characteristic features and origin mechanism in auroral regions of ionosphere, discussing satellite observation of noise spectrum in space
21 p3708 A69-38495

Ionospheric VLF electrostatic noise observed by sounding rocket, noting proton gyrofrequency harmonics effects within emission attenuation bands
21 p3714 A69-38550

IONOSPHERIC PROPAGATION

Radio wave abnormal absorption in auroral zone of ionosphere, investigating index of frequency dependence in absorption vs frequency relation
01 p0063 A69-10425

Ionospheric inhomogeneities vertical and latitudinal distributions and diurnal variations, measuring Explorer 22 signals Faraday fading with space diversity reception
01 p0064 A69-10446

Signal absorption in negative ionospheric ions effect on maximal frequency for space radio communication [UN PAPER 68-95272]
01 p0029 A69-10529

Ducted echoes on topside ionograms and whistler diffuseness at midlatitudes, noting common occurrence of phenomena
01 p0029 A69-10551

Coherence ratio of ionospherically propagated radio waves measured for phase difference between pairs of antennas
01 p0032 A69-10967

Specular component of ionospherically reflected radio waves between antenna array elements measured for statistical variations
01 p0032 A69-10968

Hydromagnetic wave propagation in current carrying regions of ionosphere and magnetosphere using macroscopic equations, deriving dispersion relation
01 p0067 A69-10972

Electrostatic polarization field formation by acoustic wave propagation through ionosphere, calculating effect on ionization drift velocity
01 p0068 A69-11110

Optical path variations and angle of emergence calculation in dynamic ionosphere
01 p0068 A69-11111

Numerical maps of sporadic E critical frequency for solar cycle maximum and minimum to estimate propagation
01 p0070 A69-11160

Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail
01 p0075 A69-11226

LF continuous wave rocket propagation in D region presented in terms of electron density profiles
01 p0076 A69-11232

Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
02 p0206 A69-11661

Sudden cosmic noise absorption in ionosphere confirms relationship with solar chromospheric flares
02 p0306 A69-11667

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
02 p0207 A69-11669

Ionospheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency
02 p0207 A69-11684

Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics
02 p0207 A69-11688

Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength
02 p0207 A69-11689

Ionosphere studies in France noting lower ionosphere dynamics, ionospheric winds, plasma electron densities, electron and ion temperature and ion-neutron collision frequency
02 p0242 A69-11903

Polarization rotation and phase delay effects as function of frequency for ionospherically propagated HF signals
02 p0208 A69-12331

Ionospheric radio signal reflection measurements based on ground to rocket pulse propagation
02 p0245 A69-12736

Ionospheric absorption measurements using beacon satellite emission compared to Kazantsev results
02 p0246 A69-12742

Sunrise effects in lower D region by solar eclipse, discussing anomaly in ionospheric absorption due to negative ion factor or recombination coefficient
02 p0246 A69-12767

Narrowing of ionospheric absorption anomaly in D region during solar eclipses in long and medium wave ranges due to recombination equation variability
02 p0246 A69-12770

Decameter wideband directional antenna system for investigation of ionosphere by retrodiffusion method
03 p0402 A69-12860

ELF radio wave propagation characteristics using two layered ionospheric model, noting deeper penetration than VLF
03 p0421 A69-13326

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
03 p0394 A69-13378

Stationary and nonstationary weak discontinuity surfaces propagation for ideal and viscous compressible conductive atmosphere with regard to heat flux, using Hadamard method
03 p0422 A69-13511

Ionospheric midday radio wave absorption as function of geomagnetic latitude, season and solar activity from pulsed vertical radar sounding data
03 p0394 A69-13521

Absorption as factor influencing correlation between solar activity, sporadic E layer probability of occurrence and reflection stability
03 p0423 A69-13537

Radio wave absorption in ionosphere at five fixed frequencies for determining correlation with changes in sporadic E layer parameters
03 p0423 A69-13539

Ionospheric beam deflection maximum and minimum levels, deriving equations for maximum usable frequency at given ionization conditions and radiation angles
03 p0424 A69-13540

Horizon focusing gain for radio waves reflected obliquely from ionosphere, noting effects of transmitter location and ionosphere geometry
03 p0395 A69-13627

Propagation of long electromagnetic waves in ionosphere and exosphere, discussing thunderstorm noise spectrum
03 p0396 A69-13702

Statistical characteristics of multibeam signals reflected obliquely from ionosphere
03 p0396 A69-13708

LF hydromagnetic waves propagation in ionospheric waveguide duct resulting from minimum in Alfvén speed near F 2 ionization peak
03 p0399 A69-14023

Correlation of received signals with diversified angles of arrival due to scattering by turbulently excited ionosphere
03 p0399 A69-14129

Bearing deviation in model HF transionospheric propagation with three dimensional electron density variation and no magnetic field
04 p0559 A69-15209

Equivalent hop and equivalent ionospheric parameters for short wave long distance radio links in ionospheric radio propagation
04 p0560 A69-15402

VLF phase measurements for apparent and equivalent diurnal height variation for lower ionosphere waveguide
05 p0752 A69-15666

Sudden VHF phase anomalies produced by solar flare induced ionospheric disturbances during July 1968
05 p0719 A69-15980

Ionospheric models for studying nature of difference in relationships between HF radio waves Doppler shifts and changing ionosphere
05 p0755 A69-16269

Bandwidth effect on wave recordings cross spectra interpretation from spatially separated sites, deriving relationship between propagation velocity and velocity bandwidth
05 p0756 A69-16272

Internal atmospheric gravity waves in F region observed with electron density profiles deduced from vertical incidence ionograms, obtaining phase velocities
05 p0756 A69-16402

Ray tracing of Z-mode in tilted layer ionosphere to explain Z-mode echoes in ionograms
05 p0758 A69-16412

Whistler mode propagation in homogeneous electron plasma situated in longitudinal electrostatic field, using Fokker-Planck model
05 p0758 A69-16417

Electrostatic ionospheric waves excited around lower hybrid resonance frequency by high energy electrons
06 p0918 A69-17381

Cosmic radio noise absorption in ionosphere, discussing diurnal, seasonal and longer variations of integral absorption
06 p1008 A69-17727

Numerical methods for VLF electromagnetic wave propagation in earth-ionosphere waveguide, discussing boundary conditions assignment effect at ionosphere on eigenvalues
06 p0920 A69-17732

- Multichannel HF resolution spectral analyzer of pulses reflected from ionosphere applied to dependence of cross correlation coefficient on frequency separation
06 p0897 A69-17740
- Long wave radio stations field intensity spectral analysis data evaluated to determine vertical ionospheric displacements at sunset and sunrise
06 p0922 A69-17752
- Meridional radio communication between radio station at South Geomagnetic Pole and amateur SSB radio stations in U.S.S.R.
06 p0889 A69-17753
- Coherent frequencies method for irregular component of satellite signal phase lead due to ionospheric inhomogeneities between satellite and ground station
06 p0890 A69-17799
- Induced and combination scattering of high HF radio waves in ionosphere and magnetosphere
07 p1076 A69-18521
- ELF radio waves reflection coefficients calculated from two layer ionospheric model, noting ion collision frequency effect in Schumann resonance frequency band
07 p1124 A69-18820
- Plasma frequency resonances observed by topside sounders interpreted as slowly propagating waves suffering oblique reflection, noting effects of nonhorizontal magnetic field
07 p1124 A69-18837
- Formulas for ray paths in ionized layers with application to oblique ionograms and duct modes
07 p1078 A69-18913
- Polarization of ionospherically propagated HF radio waves for various times, frequencies and path azimuths applied to distortion in radio communication
07 p1078 A69-18916
- Earth dipole magnetic field effect on bearing deviation in HF transionospheric propagation analyzed by computer ray tracing
07 p1086 A69-19224
- Reflected radio wave amplitude distributions related to distributions of curvature at reflector
07 p1086 A69-19225
- Nonlinear modulation distortions of high power radio waves propagating in ionosphere, noting electron temperature increase from radio wave
07 p1088 A69-19746
- Reflection and transmission scattering coefficients for step type transition between two uniform waveguides with surface impedance boundaries, discussing coupled differential equations
08 p1272 A69-20020
- Lower ionosphere and earth-ionosphere waveguide effects on polarization characteristics of transmitted radio whistlers
08 p1306 A69-20181
- Long range HF propagation in equatorial zone observed with San Marco 2 satellite, discussing overall conditions of ionosphere
08 p1276 A69-20593
- Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity
09 p1453 A69-21525
- Ionospheric scattered radio wave field amplitude and phase variations assessed for diffraction at regular phase screen
09 p1453 A69-21526
- Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
09 p1453 A69-21527
- Lower ionosphere effect on LF electromagnetic disturbances, comparing propagation and damping of clockwise and counterclockwise polarized waves
09 p1487 A69-21637
- HF ionospheric radar ground scatter map showing separated land-sea backscattered radio waves by Doppler technique
09 p1454 A69-21681
- Doppler effect in ionospheric acoustic perturbations caused by strong ground explosion, noting accord with nonlinear acoustic wave propagation theory
09 p1488 A69-21694
- VHF satellite signal scintillation by ionospheric irregularities with sharp boundary /such as sporadic E/, noting diffraction pattern dependence on phase shift
09 p1489 A69-21713
- VLF electromagnetic wave propagation in earth-ionosphere waveguide with reflections from ionosphere, noting TE and TM mode coupling and mode conversion
09 p1460 A69-22699
- Transequatorial propagation mode for waves in VHF band twice scattered by field aligned irregularities in electron density
10 p1653 A69-23192
- Magnetoionic formulas similarity in ionospheric radio propagation and atmospheric acoustic gravity wave propagation above electron gyrofrequency
10 p1655 A69-23419
- One way measurement of dual inband frequency diversity improvement on HF ionospheric path with frequency division multiplexed FSK modulation
10 p1656 A69-23536
- Low energy particle effects on midlatitude lower ionosphere conditions after July 7, 1966 proton flare, using ground based measurement
10 p1684 A69-23782
- Phase fluctuations measurements of obliquely incident signal reflected from ionosphere performed over distance of 1300 km, showing amplitude dependence
10 p1657 A69-23913
- Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere, noting inhomogeneous conductivity, Hall effect and lines of forces role
10 p1687 A69-23926
- Vertical probe observations of short radio waves propagation through sporadic E at various frequencies and path lengths
10 p1657 A69-23933
- Radio signals and concentrated noise amplitudes probability distributions reflected from ionosphere and scattered in troposphere calculated for Rayleigh and log-normal fading
11 p1833 A69-24440
- Propagated ray paths plotted as functions of frequency and launch angle to predict signal dispersions
11 p1837 A69-25003
- Iono-index about hard emission of solar active regions, analyzing field fluctuations and SID in D region under daytime conditions
12 p2148 A69-26107
- Pulsed radio waves for measuring phase height in E region, showing short period fluctuations
12 p2066 A69-26111
- Ionospheric plasma density vertical profile by measuring reflected radio waves phase frequency characteristics
12 p2070 A69-26685
- Refractive index and attenuation factor of ionosphere
12 p2070 A69-26689
- Antenna suspension height variation effects on HF signals in ionospheric scattering lines
12 p2032 A69-26705
- Differential absorption by measurement of phase difference of ionospherically propagated incoherent radio wave signals under quasi-longitudinal conditions
12 p2032 A69-26857
- VLF wave propagation along mixed path in curved earth-ionosphere waveguide, considering reflection and transmission coefficients of modes
12 p2032 A69-26858
- Auroral and polar zone ionosphere effects on propagation in HF through low VHF spectrum, considering nongreat circle mode, sporadic E ionization, etc
12 p2032 A69-26859
- Pi 2 micropulsations at African low latitude stations, considering damping effect on ionospheric micropulsation transmission signal dispersion and SNR
12 p2074 A69-26959
- Electromagnetic step-function plane waves propagation in ionosphere using Fourier transform and Bessel functions
12 p2034 A69-27132
- Errors in Appleton-Bayton equation for skip distance of radio waves in ionosphere
13 p2218 A69-27214
- Numerical integration for coupling between two modes of propagation /electron and proton whistlers/
13 p2254 A69-27981
- F cosine i theorem validity for VLF radio wave absorption in ionosphere tested using exponential electron density models, noting Brewster angle influence on reflection coefficient
13 p2222 A69-28473
- Long range ionospheric propagation of ultrashort radio waves, obtaining diurnal and seasonal characteristics of reflected signals amplitude and duration
13 p2255 A69-28543
- Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
13 p2224 A69-28692
- Sudden cosmic noise absorption in ionosphere confirming relationship with solar chromosphere flares
13 p2334 A69-28698
- Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
13 p2224 A69-28700
- Ionospheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency
13 p2224 A69-28715
- Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics
13 p2224 A69-28719
- Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength
13 p2224 A69-28720
- Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
14 p2410 A69-28829
- Ion drag effects on acoustic gravity waves propagation in isothermal F region, discussing indicated wave damping
14 p2434 A69-28944
- Latitudinal cut-off of manmade VLF signals in short path through ionosphere to OGO 2 satellite, noting strong noise following signal cut-off
14 p2434 A69-28958
- Forward and backscatter soundings compared to verify focusing mechanism of HF sky waves
14 p2435 A69-28967
- Ionospheric horizontal discontinuities of electron density distribution parameters effect on penetration frequency, skip distances and arrival angles
14 p2436 A69-29057
- Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability
14 p2436 A69-29058
- Seasonal variation in ionospheric radiation absorption related to time variation between sunrise and constant angle attainment of sun
14 p2437 A69-29072
- Radio wave absorption coefficient in lower ionosphere related to total radiation absorption and electron concentration profile
14 p2411 A69-29075
- Noon ionospheric absorption data for Freiburg on different frequencies for lunar variation of ionospheric absorption of radio waves
14 p2438 A69-29104
- Satellite 40 mc signal scintillations near sunspot minimum, noting scintillation index dependence on angle between radio ray and magnetic field
14 p2439 A69-29114
- Fourier analysis of ionospheric wave reflection pulses for frequency contents and relative phase angles
14 p2440 A69-29351
- Ionospheric radio wave absorption at midlatitude, noting mesospheric zonal wind inversion
14 p2441 A69-29418
- Bearing errors reduction in vertical loop HF direction finders for ionospherically propagated signals in dual channel system
14 p2413 A69-29493
- Radio wave reflections from edge of large scale depressions of ionospheric electron density observed by topside sounding satellites, discussing ionogram recordings
14 p2415 A69-29521
- Inhomogeneities effect on polarization of radio waves reflected from ionosphere, based on permittivity tensor
14 p2417 A69-29862
- Tide dependent variations of critical frequencies of ionospheric layers minimal heights and maximum height of F 2 layer reflection
14 p2444 A69-29871
- Random motions velocity of ionospheric inhomogeneities by extreme lines delineation of diffraction pattern during amplitude recording of reflected signal
14 p2444 A69-29872
- Recording installation of ionospheric reflected radio signal fluctuations and amplitudes of resulting signals simultaneously at three points, discussing antenna commutator circuit
14 p2452 A69-29874
- Solar X rays intensity and spectrum effects on E layer critical frequency and D region ionospheric absorption
15 p2677 A69-31346
- Doppler geodetical measurements, emphasizing relative orientation between station and orbit influence on

coordinates determination accuracy, presenting electromagnetic wave propagation theory
15 p2601 A69-31375

Fresnel irregularities calculated from radio wave partial reflection from lower ionosphere measured by rocket probes
15 p2604 A69-31420

Ground based partial reflection and cross modulation or wave interaction techniques compared for studying D region electron densities
15 p2606 A69-31537

Auroral absorption influence on ionospheric wave propagation calculated for distances over 4000 km
16 p2749 A69-31603

Book on ionospheric radio waves covering geomagnetism and sun, whistler propagation, oblique propagation, satellite sounding, etc
16 p2749 A69-31715

Earth ionosphere cavity model for atmospheric waveform shape, considering ELF pulse distortion after propagation through antipode
16 p2750 A69-31978

VLF radio wave propagation in waveguide channel formed by earth and inhomogeneous anisotropic ionosphere
16 p2751 A69-32032

Partial reflections method of Gardner and Pawsey for determining vertical profile of electron collision frequencies in lower ionosphere and upper D layer
16 p2775 A69-32034

Second order correction to first order Faraday rotation equation for quasi-transverse propagation of ionospheric radio waves obtained from Appleton-Hartree equation
16 p2777 A69-32101

Atmospheric absorption calculations, noting direct D layer reflection effects on lower HF oblique propagation
16 p2752 A69-32389

Numerical method based on thin film optics to determine ionospheric electromagnetic transmission and reflection coefficients for vertical incidence
16 p2752 A69-32392

Thin film optical method generalization accounting for intermode coupling and oblique incidence in plane stratified magnetoionic medium applied to ionospheric LF and hydromagnetic propagation
16 p2753 A69-32393

Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity
16 p2754 A69-32520

Ionospheric scattered radio wave field amplitude and phase variations assessed for diffraction at regular phase screen
16 p2754 A69-32521

Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
16 p2754 A69-32522

Decameter waves Doppler shift shown inversely proportional to wave frequency from electron density variation caused by acoustic wave propagation in ionosphere
16 p2755 A69-32610

Radio waves ionospheric absorption dependence on equivalent frequency, showing marked difference for summer and winter conditions
17 p2918 A69-32927

Sudden phase anomalies on radio paths compared with calculated results for satellite observed solar X ray flux intensities to explain sudden ionospheric disturbances
17 p2959 A69-33006

Ionosphere depression influence on VLF signals phase and amplitude calculated by mode theory and integral equations system representing aperture fields
17 p2920 A69-33418

Ray methods application to partial differential equations for electromagnetic wave propagation in ionosphere, discussing strongly and weakly anisotropic inhomogeneous plasma
17 p2925 A69-33840

Scattered ionospheric reflection distribution at evening/morning periods showing deviation, using coherent method
17 p2927 A69-33860

Radio wave propagation in homogeneous turbulent gyrotropic medium, presenting solution for fluctuations in direction of wave scattering by geometrical optics approximation
17 p2927 A69-33861

Horizontally stratified ionosphere radio wave reflection and transmission properties, calculating full wave by differential equations
17 p2927 A69-33862

Complex refractive index profiles and wave polarizations calculated for electromagnetic waves transmission through ionosphere at micropulsation frequencies
17 p2927 A69-33864

Earth-ionosphere waveguide excitation by lightning discharges and geomagnetic field influence on ELF noise spectrum
17 p2928 A69-33865

LF radio waves propagation in ionosphere by combining ray tracing in complex space with geometrical theory of diffraction, including diffraction by earth
17 p2928 A69-33866

High latitude geomagnetic disturbances, incoming electron fluxes and riometric absorption relationship in lower ionosphere studied by X ray bremsstrahlung with sounding balloons
17 p2964 A69-33961

Ionospheric radio wave absorption measurements by A1 method at 2.2 MHz, showing height estimates of absorption region and winter anomaly
17 p2968 A69-33993

Reflection and ionization heights diurnal variations in F region, obtaining data for sporadic E formation
17 p2968 A69-33995

Time dependent diffuse reflections related to solar activity, showing diffusion intensity variations with sporadic E layer height and electron concentration
17 p2968 A69-33997

VLF wave propagation phase velocity prediction for airborne Omega computer, using scatter model based on abnormal ionosphere
17 p3002 A69-34077

Ionospheric absorption and virtual heights relationships for electron density distribution in lower ionosphere, computing model profiles
18 p3125 A69-34248

ELF and VLF wave propagation examined for heavy ions and lower ionospheric disturbance effects using numerical integration, noting standing wave field role for interpretation
18 p3125 A69-34254

Anisotropic ionospheric model for VLF TM and TE modes excitation, noting nighttime phase velocity variations
18 p3101 A69-34797

ELF wave propagation in earth-ionosphere waveguide, considering ionospheric vertical inhomogeneity and models for ambient and disturbed /PCA/ conditions
18 p3101 A69-34949

Antarctic VLF emissions observations at 12 kHz, showing dependence on geomagnetic disturbances, auroras and radio absorption in ionosphere
18 p3102 A69-34964

Ion and temperature effects on lower ionosphere refractive index for VLF radio wave propagation
18 p3102 A69-34971

Whistler vertical propagation downwards through inhomogeneous ionosphere in vertical magnetic field, deriving wave equation, calculating transmission and reflection coefficients
18 p3130 A69-34972

Ionospheric radio propagation, considering D and F region theory and ionospheric disturbances
19 p3303 A69-36428

Scattering cross sections of radio waves at wake of vertically moving body near reflecting ionospheric layer, noting wave sphericity influence
20 p3486 A69-37023

Electromagnetic field of horizontal LF electric dipole formed by thin ionosphere layer between anisotropic planes
20 p3521 A69-37047

Perturbed ionospheric regions acting as radio wave focusing lens, discussing frequency, power and pattern selection
20 p3486 A69-37048

Recording technique for measuring short period variations of radio signal reflections altitudes from ionosphere applicable to fast ionospheric processes
20 p3521 A69-37054

ELF radio wave propagation characteristics analyzed by two layer ionosphere model
20 p3488 A69-37285

Soviet collection of papers on ionospheric studies covering ionospheric composition, propagation, disturbances, sounding, etc
20 p3523 A69-37654

Lower ionosphere radiation absorption at 4.01 MHz determined using A-3 method in measuring radio wave field between radio transmitters
20 p3528 A69-37675

Ionospheric radio wave absorption seasonal and diurnal variations over Tiflis from pulsed ionospheric sounding at 2.2 MHz
20 p3491 A69-37677

Residual nighttime radio wave absorption in ionosphere, noting absorption-magnetic activity relation existence
20 p3528 A69-37678

Frequency dependence of radio wave absorption in ionosphere at 2.2-4 MHz by impulse method, noting effect of sporadic layer
20 p3491 A69-37680

Short radio wave damping of earth satellite transmitter due to ionospheric diffraction resulting from increasing satellite-ground station distance
20 p3491 A69-37689

High latitude stations vertical ionograms in absence of ionospheric reflections due to low solar activity periods, discussing interpretation methods
20 p3529 A69-37690

F layer penetration frequencies predictions compared with Alouette topside data
20 p3530 A69-37871

Ionospheric topside plasma resonances observed by fixed and swept frequency satellite-borne sounders
20 p3531 A69-37884

Topside ionospheric magnetic field aligned irregularities using satellite observations of nonvertical electromagnetic wave propagation and delayed echo generation
20 p3495 A69-37885

Ionospheric resonances due to plasma nonlinearities near spacecraft, noting effects on radio signal propagation
20 p3495 A69-37886

Two-hop signals observed on high latitude Alouette 2 topside ionograms found propagating in field aligned cylindrical ionospheric ducts
20 p3531 A69-37890

Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
20 p3531 A69-37893

Sudden frequency deviations of HF radio waves propagated through ionosphere correlated with solar microwave bursts and optical flare events
20 p3592 A69-38101

Rocket observations of VLF ionospheric resonances, noting artificial stimulation of detectable amplitude noise with cut-off at low hybrid resonance frequency
21 p3671 A69-38356

Auroras and VLF emissions observations at ground stations to correlate emissions with auroral displays, noting low ionospheric absorption role
21 p3708 A69-38494

Phase amplitude recording of radio waves reflected from D and F regions of ionosphere, reversing smoothing process by Fourier methods
21 p3672 A69-38558

Electron collisions effect on polarization of waves reflected from ionosphere
22 p3941 A69-40922

Nighttime atmospherics shape analysis created by lightning and propagating in earth lower ionosphere waveguide
22 p3941 A69-40961

HF radio waves auroral absorption in ionosphere reviewed for first decade of riometry
22 p3902 A69-41218

Circular or linear polarization diversity reception for VHF earth-station-satellite communications through turbulent ionosphere, assuming Rayleigh distribution fading
23 p4115 A69-41585

MHD waves attenuation in ionosphere due to gyrorelaxation, reducing analysis to determination of anomalous absorption of acoustic waves
23 p4155 A69-41841

Cosmic radio emission anomalous absorption measurements during PCA following July, August, September 1966 proton flares
23 p4156 A69-41845

Ionosphere reflected radio waves field strength measurements, obtaining formula for ground wave discrimination
23 p4123 A69-41861

Approximate expressions derived from Appleton-Hartree magnetoionics formula tested for validity in computation of radio wave absorption in model ionospheric layers
23 p4126 A69-42354

Ionospheric radio waves constant absorption term obtained from sunrise and sunset data

23 p4127 A69-42424

Ionospheric nondeviative radio wave absorption, noting roles of collisional and working frequencies and solar zenith angle

23 p4127 A69-42425

Ionospheric range difference errors after correction for position fixing from satellite, considering elevation angle, latitude, day time, spatial and time electron content correlation

23 p4128 A69-42505

Ionospheric absorption relationship to major stratospheric sudden warmings, considering regional coincidence and interaction mechanism

24 p4306 A69-42680

Auroral VLF emission bursts simultaneous with sharp ionospheric absorption dip and SC deflections in geomagnetic H, noting corpuscular ionization

24 p4308 A69-43001

Proton cyclotron echoes on ionograms obtained from topside ionosphere by Alouette 2 satellite

24 p4310 A69-43189

Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models

24 p4373 A69-43621

IONOSPHERIC SOUNDING

Artificial visible plasma clouds in space interacting with electric and magnetic fields around earth

01 p0151 A69-10533

Inner and outer meteorological balloon assembly for fast rising and high altitude sounding

01 p0010 A69-10541

Scattered solar Lyman alpha radiation measurement by Vertical Space Probe station in upper atmosphere including UV radiation

01 p0152 A69-10577

Spacecraft ionospheric probe for simultaneous measurement of electron temperature and density, plasma space potential, ion composition, etc

01 p0081 A69-10760

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results

02 p0237 A69-11668

Ion formation rate in F 2 layer in southern polar cap, noting effect of season, latitude and solar activity

02 p0238 A69-11679

Ionosphere studies in France noting lower ionosphere dynamics, ionospheric winds, plasma electron densities, electron and ion temperature and ion-neutron collision frequency

02 p0242 A69-11903

Ionosphere structure, properties and research techniques

04 p0594 A69-15166

Multielectrode analyzers for measuring properties of ionospheric charged particles

05 p0761 A69-15702

Nonvertical propagation effects on high altitude topside ionosphere sounder data reduction, using ray tracing

07 p1124 A69-18838

Ion composition and charged particle temperatures at 300-600 km from sounding rocket and topside sounder Alouette 2 measurements

07 p1124 A69-18839

Hydrogen concentration above earth surface during minimum solar activity from ionospheric rocket and satellite measurements

07 p1129 A69-19612

F2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner

09 p1486 A69-21548

Vertical ionospheric motions near magnetic equator measured by Doppler shifts of incoherent scatter frequency spectra

09 p1489 A69-21704

Fast Ba ion filament cloud injection into ionosphere using explosive shaped charge technique, noting application to ionospheric electric field measurement

09 p1539 A69-21752

Ionospheric movements from sampling radio diffraction pattern at 89 points and conversion into visible pattern

09 p1492 A69-22756

Upper hybrid and modified plasma resonance on basis of rocket-borne gyroplasma probe data

10 p1726 A69-22807

Graphs of ionospheric measurements by vertical incidence sounding during Antarctic expedition, describing instrumentation and sounding techniques

10 p1681 A69-23315

Ionospheric conditions following solar proton flare observed with topside sounders of Alouette satellites, showing electron density depletion and hydromagnetic wave relationship

10 p1684 A69-23781

Ionospheric slopes and range frequency characteristics obtained from oblique incidence sounding of horizontally nonuniform ionosphere

10 p1686 A69-23914

Polar cap sporadic E investigation with backscatter at 28 MHz, noting geographic distribution, annual and diurnal variations

12 p2069 A69-26464

Soviet rocket and satellite studies of upper atmosphere and ionosphere

13 p2251 A69-27347

Soviet satellite-borne radio waves studies of ionosphere, considering wave amplitudes, Doppler frequency shifts and outer ionosphere properties

13 p2252 A69-27349

Automatic recording and data processing for ionospheric radiosonde observations from ground stations, giving block diagrams and subsystems

13 p2225 A69-27610

Trapped aerosols below temperature inversions causing lidar echoes in troposphere layers, discussing simultaneous balloon refractometer, thermometer and ground based lidar soundings

13 p2254 A69-28475

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results

13 p2257 A69-28699

Ion formation rate in F 2 layer in southern polar cap noting effect of season, latitude and solar activity

13 p2257 A69-28710

Ionospheric electron and ion temperatures correlated with electron concentration profile as measured by rockets and satellites

14 p2510 A69-28942

Ionograms for nonmonotonic vertical distribution of electron concentration in ionosphere from rocket and ground sounding

14 p2437 A69-29071

Rocket and satellites topside sounding of earth ionosphere, determining magnetoplasma structure and resonance

14 p2438 A69-29101

Radio pulse sounding of ionospheric structure and motions, discussing digital ionosonde, data analysis methods, etc

14 p2415 A69-29519

High resolution azimuth and elevation arrays sensing remote ionosphere and sea surface characteristics, discussing backscatter data for ionosphere and sea scatter

14 p2448 A69-29520

Radio wave reflections from edge of large scale depressions of ionospheric electron density observed by topside sounding satellites, discussing ionogram recordings

14 p2415 A69-29521

Incoherent scatter observations of ionosphere, discussing radar equipment and measurement of electron density and temperature, ionic temperature and composition, etc

14 p2415 A69-29522

Multiple ground based geophysical sensors for detecting ionospheric phenomena, discussing continuous magnetic tape data recording, common time base and station operation

14 p2448 A69-29526

Reference oscillator frequency instability effect on radio signals phase shift in ionosphere measurements, evaluating errors

14 p2444 A69-29873

Satellite radio observation for ionospheric parameters, utilizing Doppler and Faraday phenomena, signals fluctuations and sporadic phenomena

15 p2594 A69-30028

Scattered solar Lyman alpha radiation measurement by Vertical Space Probe station in upper atmosphere including UV radiation

15 p2691 A69-30747

ESRO 1/Aurora scientific satellite for ionospheric phenomena observation, discussing management structure and development process

15 p2702 A69-31080

ESRO 1/Aurora satellite for Arctic ionosphere and aurora observation, discussing electrons and protons measurements and auroral photometry

15 p2702 A69-31081

D region ionizable constituent density /presumably nitric oxide/ measured, using blunt probe to detect

changes in conductivity produced by Lyman alpha ionizing radiation

15 p2598 A69-31316

Diurnal variations of wind velocity, temperature and density at high altitude measured by Skylark rockets

15 p2598 A69-31319

IR horizon of earth from ionospheric IR emission spectra obtained by sounding capsule, discussing earth geometric horizon and particular spectral bands [ONERA-TP-709]

15 p2601 A69-31370

Ionospheric VLF emission and particle measurements, discussing energy, distribution and flux of protons and electrons

15 p2605 A69-31425

Gyroplasma probe data from rocket observations, determining winter ionospheric electron density profiles, electron temperature and electrostatic cyclotron waves effect

15 p2606 A69-31446

Vertical incidence pulse dispersion with application to Alouette 1, discussing echo width, sounder system bandwidth and frequency gradient of ionospheric virtual height

16 p2750 A69-31977

Low latitude sporadic E layer associated with geomagnetic activity studied in Hong Kong using proton precession magnetometer and standard ionosonde

16 p2779 A69-32195

Electronic collision frequency measurement at F layer peak near ground sunrise time

16 p2779 A69-32197

Sporadic E ionization by rocket sounding, comparing positive ion density measurements with separate wind shear observations

16 p2780 A69-32310

F 2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner

16 p2784 A69-32543

First order Doppler shift in ionosphere and horizontal gradients influence, discussing total electron content determination method made from geodetic satellites using two coherent frequencies

16 p2755 A69-32614

Doppler shift measurements at two coherent frequencies from Diadem satellites to determine ionospheric electron content, discussing accuracy and parameters defining satellite passage

16 p2785 A69-32615

NonMaxwellian electron velocity distribution influence on ionospheric measurements by Thompson scattering, explaining disagreement between scattering and probe measurements of electron temperature

16 p2788 A69-32647

Ionospheric data acquisition and utilization for improved radio communications, considering contact between engineers and physicists, ionosondes, data reliability for prediction, etc

17 p2961 A69-33402

Absolute phase heights measurements in ionosphere for geometrical optics conditions, noting accuracy

17 p2927 A69-33859

Polar ionosphere investigation based on vertical sounding and riometric observations, earth electromagnetic field and polar auroras spectrum intensity variations

17 p2963 A69-33950

Latitude variations of day and night ionospheric critical frequencies, inhomogeneity and ionization, discussing generation of r type sporadic E layer in auroral zone

17 p2964 A69-33963

Geomagnetic control of geographic distribution of F 2 layer midday ionization based on data from ionospheric vertical sounding stations

17 p2966 A69-33982

Ionospheric parameter recording accuracy by vertical sounding, discussing errors in frequency-height curve

17 p2969 A69-34002

Midday aurora oval and polar cap region airborne observation, noting relation to sporadic E layer

18 p3126 A69-34258

Earth albedo effect on ionospheric D layer determined from aircraft sounding of E layer echo amplitude above reflecting cloud cover

18 p3127 A69-34800

Franco-Soviet rocket probe launches for measuring daytime/nighttime ions and neutrals

18 p3210 A69-35282

Gas dynamics of interactions of tenuous ionosphere with moving satellites and diagnostic probes, using collision-free plasma kinetics methods

18 p3132 A69-35409

OGO-F electric and electromagnetic fields measurement for ionosphere using dipole antenna, emphasizing broadband observation covering whistler mode waves
19 p3284 A69-36677

Molecular ion concentrations determined using flat probe collector trap on Cosmos 5 satellite at 200-300 km
20 p3519 A69-37021

Ionosphere absolute phase height measurement methods independent of virtual height, using fixed frequency CW emission and pulsed sounding
20 p3520 A69-37032

Positive and negative correlations in F 2 layer perturbations observed by network of paired conjugate ionospheric stations at low latitude
20 p3521 A69-37050

Soviet collection of papers on ionospheric studies covering ionospheric composition, propagation, disturbances, sounding, etc
20 p3523 A69-37654

F 2 layer seasonal anomaly, discussing global distribution observed by network of ionospheric stations
20 p3526 A69-37666

Diurnal, seasonal and cyclic altitude and maximum ionization median value variations of undisturbed ionosphere from vertical sounding data obtained at Yakutsk, Siberia
20 p3527 A69-37668

Sporadic E layer structure and behavior during solar cycle from vertical sounding, discussing semiopaque region, reflection multiplicity, active height, wind effects, etc
20 p3528 A69-37681

Sporadic E layer large scale irregularities direction and velocity determined by inclined backscatter method, using plan position indicator
20 p3528 A69-37682

Data acquisition amount estimation technique for vertical panoramic sounding of ionosphere
20 p3492 A69-37692

RF impedance probe digital system for ionospheric measurements based on antenna resonance phenomena
20 p3542 A69-37791

Ionospheric satellites objectives and development resulting from topside sounder and ISIS programs
20 p3529 A69-37855

Ionospheric satellite series Alouette-ISIS, discussing successive engineering and management constraints leading to ISIS-C design
20 p3618 A69-37856

Explorer 20 satellite for obtaining fixed frequency pulse soundings of ionospheric topside, discussing transceiver-dipole antenna instrumentation and payload
20 p3618 A69-37857

Sweep frequency ionospheric topside sounder design for Alouette and ISIS satellites, discussing influence of experiment requirements and spacecraft limitation and environments
20 p3507 A69-37859

Real time pulse frequency modulation telemetry receiving system for direct readout of ionograms from topside sounders, using off-shelf components
20 p3508 A69-37862

Alouette 1 and 2 topside sounder ionograms analyzed with emphasis on low electron density, spread F and field aligned propagation
20 p3529 A69-37863

Ionospheric electron density irregularities observed by topside sounders showing shape, dimensions across magnetic field and variation percent, discussing resulting radio echoes
20 p3530 A69-37870

Cylindrical electrostatic probes on Alouette 2 and Explorer 31 satellites used in intersatellite comparison of directly measured ionospheric electron temperature and density
20 p3544 A69-37876

Plasma temperature and ion concentration profiles determined from simultaneous measurements by Alouette 2 and Explorer 31 satellites of electron density, temperature and ion abundance
20 p3532 A69-37896

Ionic composition determined by combining Alouette topside sounder electron density profiles with electron and ion temperatures measured by ground based Thomson scatter sounder
20 p3532 A69-37898

Corpuscular radiation indicated as ionization source in lower ionosphere from rocket sounding data, noting role in D region formation
21 p3787 A69-38352

Lower ionosphere over geomagnetic equator during evening twilight characterized by solar disturbances, using rocket-borne Langmuir and plasma noise probes
21 p3702 A69-38353

Diurnal intensity variations in OI 5577 A line emission connected with vertical movements in 90 km level of atmosphere
21 p3713 A69-38525

Ionosphere drift measurements in LF range, noting relationship between correlation and similar-fade analyses for velocity data
21 p3714 A69-38557

Radio FM pulse compression for vertical ionosphere sounding
21 p3674 A69-39082

Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period
22 p3934 A69-39964

Ground antenna array for ionospheric physics experiments, consisting of wire dipoles connected to receive circular or linear polarization
24 p4286 A69-42607

Atmospheric density above 158 km altitude measured near equator with cold cathode magnetron pressure gage on satellite OV1-15
24 p4310 A69-43179

IONOSPHERIC STORMS

NT SUDDEN IONOSPHERIC DISTURBANCES

Latitudinal variations in auroral and subauroral region F layer diurnal and magnetic storm pattern shown by scintillation measurements
01 p0069 A69-11127

F region response to solar proton flare characterized by two phase ionospheric storm as measured at ground base stations
10 p1684 A69-23783

Initial phases of ionospheric and magnetic storms compared from data, noting good correlation due to ionospheric fields influence
17 p2967 A69-33988

F region during earth passage through solar corpuscular stream, analyzing critical frequencies, virtual height, magnetogram H component and ionospheric storm effects attributed to downward drift
17 p2967 A69-33989

Upper ionosphere Thomson scatter, electron number density measurements and topside sounding results during geomagnetic storms using electrodynamic drift theory
20 p3530 A69-37872

Alouette topside ionograms of ionospheric storms at midlatitudes indicating critical frequencies difference between F 1 and F 2 layers
20 p3532 A69-37894

IONOSPHERIC TEMPERATURE

Neutral gas temperature variations effect on electron-ion temperature height profile in tidally generated sporadic E layer with wind shear of gravity wave origin
01 p0073 A69-11176

Ionic composition and temperature of nighttime topside ionosphere from analysis of incoherent backscatter spectra, discussing solar activity effects
01 p0076 A69-11233

Oxygen electron cooling effect on ionospheric electron temperatures, noting discrepancy removal throughout day at all altitudes
02 p0245 A69-12739

Middle ionosphere temperature diurnal variations analyzed on basis of rocket experiments and electron density asymmetry
02 p0246 A69-12768

Ionospheric electron temperature probe analysis based on Japanese Kappa rocket data
05 p0761 A69-15701

Gravity waves observed by ionospheric temperature measurements in F region
05 p0754 A69-16262

Diurnal variations of neutral and charged particle temperatures in equatorial F region
05 p0755 A69-16270

Langmuir probe experiment measurement of upper region electron temperature on Explorer 32 conflict with Jicamarca Radar Observatory measurements
05 p0756 A69-16283

Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
05 p0757 A69-16407

Simultaneous rocket measurements of D region temperatures and electron densities on anomalous winter day
05 p0758 A69-16411

Maximum ionization altitude, thickness, electron density profile and temperature mean variations in summer of IGY and IQSY at Moscow station
09 p1486 A69-21544

Electron gas heating at E region altitudes as function of ionization of atmospheric gases, noting rocket experiments during solar eclipse
09 p1490 A69-21772

Ionospheric molecular ion concentration vertical profile analysis for verifying neutral gas temperature maxima in connection with two ion production maxima
10 p1688 A69-23930

Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements
11 p1951 A69-25162

Global coverage of positive ion composition and temperature, and electron density and temperature measurements during AURORAE mission of ESRO 11 satellite
13 p2253 A69-27753

Electron temperature observation in daytime ionosphere, considering energy loss to ions and neutral particles
15 p2603 A69-31402

Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects
16 p2849 A69-32082

Maximum ionization altitude, thickness, electron density profile and temperature mean variations in summer of IGY and IQSY at Moscow station
16 p2783 A69-32539

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data
19 p3304 A69-36623

Topside ionospheric structure from Alouette 2 data, discussing thermopause temperature, plasma temperature, electron density profiles, satellite plasma frequency, etc
20 p3532 A69-37895

Auroral midlatitude red arcs ground and satellite data, noting field aligned electron density depression, plasma temperature increase and O plus-H plus transition altitude
20 p3532 A69-37897

Ionospheric electron temperature profiles for midday equinoctial conditions noting protonospheric and conjugate heating effects
22 p3939 A69-40506

Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
22 p3939 A69-40515

Conjugate regions 6300 A airglow enhancement during predawn, noting photoelectrons role in heating dark ionosphere region by producing fast electron flux
24 p4308 A69-43011

IONOSPHERICS

NT DAWN CHORUS

NT HISS

Aeronomic parameters effect on ionospheric effect of SC magnetic storm, calculating maximum ionization levels, F layer ionization and vertical ionization profile parameters
09 p1486 A69-21546

Proposed index for measuring ionospheric scintillations, describing simplified scaling method
16 p2752 A69-32106

Aeronomic parameter effect on ionospheric effect of SC magnetic storm, calculating maximum ionization levels, F layer ionization and vertical ionization profile parameters
16 p2783 A69-32541

Phase modulation in pseudo-noise ionospheric communication system for reducing F region CW signal fading
18 p3104 A69-35308

Lower ionosphere over geomagnetic equator during evening twilight characterized by solar disturbances, using rocket-borne Langmuir and plasma noise probes
21 p3702 A69-38353

IONS

NT ANIONS

NT ANTIPROTONS

NT CATIONS

NT CESIUM ION

U COMPUTERIZED SIMULATION
QSY [INTERNATIONAL QUIET]
U INTERNATIONAL QUIET SUN YEAR
- RASERS**
U INFRARED LASERS
IRIDIUM
- Chemical vapor deposition of iridium coatings on graphites for high temperature oxidation protection, discussing parameters for iridium compounds and optimum depositing conditions
01 p0097 A69-10643
- Gold and iridium concentrations in meteoritic and terrestrial materials by neutron activation, discussing chondrules, meteoritic troilite and metallic spherules
08 p1404 A69-20918
- RISES [MECHANICAL APERTURES]**
- Reflection coefficient of double discontinuity consisting of two closely spaced inductive irises in rectangular waveguide
09 p1453 A69-21444
- Iris beam waveguide transmission loss as function of irises alignment, iris frame width and guide axis curvature
13 p2233 A69-28070
- Wave propagation in open periodic two dimensional iris waveguide and beam reconstruction by diffraction, considering existence and character of modal fields
16 p2753 A69-32394
- RON**
- Dynamic tensile stress-strain curves for annealed Al, Cu and Fe at constant strain rates, describing experimental method
03 p0524 A69-13065
- Galvanostatic transients of iron passive in 2N sulfuric acid, noting space charge effects and zero field current variation
[ECS PAPER 84] 03 p0382 A69-13858
- Solar Fe abundance from photospheric permitted Fe and forbidden Fe II lines, noting equivalent widths of two Fe II lines
03 p0515 A69-14036
- Si and iron impurities effects on duraluminum alloy structure and mechanical and plastic properties for fabrication from granules and rolling from ingots
03 p0452 A69-14120
- Collisional ionization cross section for Fe ions evaluated to estimate solar corona temperature
04 p0651 A69-13465
- Residual gas effect on fatigue behavior of pure iron subjected to alternating bending load in ultrahigh vacuum
04 p0616 A69-14846
- Fe doped Ga-as p-i-n structure electrical conductivity, Hall effect, thermally induced currents, space charge bounded currents and current instability
04 p0643 A69-15263
- Trivalent iron doped andalusite crystals dielectric and maser properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio
[IEEE PAPER C-2] 07 p1150 A69-19049
- Mean square radii for assigned terms of Fe I energy diagram for Van der Waals line broadening
08 p1392 A69-20559
- Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
09 p1580 A69-22231
- O, Ne, Si and Fe ionization equilibria in low density plasma, including dielectronic recombination and autoionization processes in calculations
09 p1543 A69-22404
- Neutrino loss effects on evolution of pure iron stars, considering white dwarf, presupernova models and iron-helium transition
09 p1606 A69-22420
- Spatial distribution of residual nuclei produced in thick Fe targets by one and three GeV protons, noting total production and longitudinal variation of production
10 p1760 A69-23411
- Transport equation describing drift, diffusion and reaction of iron swarm influenced by electric field in gas
13 p2306 A69-27457
- Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra
13 p2326 A69-27554
- Fe III line profiles and equivalent widths from spectrograms of zeta Cas and gamma Peg for Fe abundance, using model atmospheres
13 p2347 A69-27715
- Gallium arsenide Fe-doped diodes efficiency as high speed switches from measured current-voltage characteristics at various temperatures
13 p2319 A69-27898
- Mean free path of interaction of nuclear active particles in Fe with energies greater than 530 gev
13 p2303 A69-28385
- Nuclear component energy flux absorption in Fe measured with ionization calorimeter
13 p2330 A69-28386
- Ni alloys phase precipitation and Fe substitution effects on heat resistant alloys
13 p2283 A69-28488
- Field equations for plane-parallel induction MHD machines with allowance for winding zone thickness and magnetic permeability of iron
14 p2405 A69-29914
- Temperature effects on magnetomechanical damping in Fe, Ni and mumetal, noting behavior difference due to domain structures
15 p2639 A69-30586
- Fe II forbidden lines profiles and equivalent widths prediction for solar photospheric spectrum, deducing photospheric Fe abundance
16 p2854 A69-31652
- Coronal Fe ionization lines X, XIII and XIV photographed by UV coronagraph
16 p2847 A69-31661
- Effective heat transfer coefficient lambda for microscopic Fe particles traversing rarefied air, oxygen and Ar target gases
16 p2769 A69-31870
- MH alpha 328116 /Cygnum/ spectrum noting three Fe IV lines
16 p2866 A69-32815
- Absolute gf values for Fe I and Fe II lines between 3190 and 3315 A measured by spectral absorption through shock heated gas containing Fe
18 p3175 A69-34304
- Solar Fe II lines theoretical equivalent widths calculations, estimating influence of photosphere model on iron abundance data
18 p3191 A69-34305
- Molten iron plane melt flow duration and mass in bimetallic castings production determined using nomogram
18 p3149 A69-35289
- High field susceptibility in Fe and Ni and high field Mossbauer study in Fe relating results to band structure and models of ferromagnetism
19 p3383 A69-36050
- Iron distribution inconsistency indicated in Group H and L chondrites through Ni and Co analysis of fractionated samples, plotting atomic ratios on Prior diagram
19 p3407 A69-36078
- Mossbauer spectra of Fe minerals in unequilibrated ordinary chondrites, noting ratios of olivine to pyroxene iron
19 p3408 A69-36082
- Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations
19 p3422 A69-36219
- Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes
19 p3346 A69-36440
- Mercury internal constitution and chemical composition, discussing models with iron cores and iron admixtures in mantle
20 p3597 A69-37331
- Solar corona Fe XII emission spectral lines relative intensity analyzed as function of temperature electron density
20 p3603 A69-37548
- C content and microstructure effect on electrochemical parameters of Fe and steels in dilute sulfuric acid, discussing Tafel constants and current density
20 p3563 A69-38002
- Revised solar iron abundance by photospheric Fe I lines analysis using Garz and Kock f values, noting influence on solar photospheric model
21 p3796 A69-38475
- Fe whiskers formation and cross section determination by Fe dichloride reduction
22 p3919 A69-40233
- King furnace absorption source used with spectrometer in relative oscillator strength measurement, with experiments on lines of Fe I
22 p4022 A69-40466
- Photoionization model of Seyfert galaxy extended to calculate temperatures, luminosities and sizes of zones emitting forbidden Fe X /6374 A/ and Fe XIV /5303 A/
22 p4024 A69-40581
- Ferredoxin from thermophilic and mesophilic Clostridia, noting difference in heat stability due to iron and sulfide environments
22 p3897 A69-41068
- Fe abundance in sun and carbonaceous chondrites, noting agreement between solar and meteorite abundances of Ni, Mg, Si and Li
24 p4385 A69-43223

- Deformation in aged Fe-Cr alloy studied for rate-controlling solid solution mechanism as function of stress
01 p0095 A69-10601
- Lattice parameters of austenitic Fe-Ni alloys as function of titanium content, using Debye-Scherrer camera
03 p0443 A69-13123
- Low carbon maraging steel, studying age hardening behavior of iron-manganese-nickel alloys with titanium additions
05 p0781 A69-16541
- Sintered W-Ni-Fe alloys strength and precipitation hardening characteristics for various compositions and cooling conditions
05 p0782 A69-16798
- Electron microscopic study of structural changes occurring during aging of martensite in Fe-Ni Ti alloy
05 p0783 A69-16813
- Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K
07 p1166 A69-19264
- Czechoslovakian heat resistant iron-carbon-aluminum alloy Pyroferal, properties and applications
07 p1168 A69-19345
- Dislocation damping measurements made on Fe-18Cr-Ni alloys, noting damping relation to nickel content and stacking fault
08 p1334 A69-20576
- Alloying elements effects on structure, mechanical properties, aging and composition of precipitation hardening intermetallic phases in Ni and Fe based alloys
09 p1525 A69-22143
- Supersaturation of dissolved B in splat quenched Fe-Ni-B alloys, noting interstitial and substitutional B in martensitic and austenitic phases
10 p1707 A69-22987
- Composition and sintering temperature cooling effects on fracture properties of W-Ni-Fe alloys, using electron microscope fractography
10 p1711 A69-23333
- Initial aging stage in Fe-Ni-Ti alloys using diffuse X ray scattering with electron microscopy of thin foils
10 p1712 A69-23720
- Fe-Fe interactions influence on increase in thermoelectric power with applied magnetic field at low temperatures for dilute alloys of Fe in Au
10 p1639 A69-23861
- Meteorite fragment from Arizona Meteor Crater, establishing probable history from shock loading experiments on iron alloys
12 p2158 A69-26344
- Intermetallic compound precipitation effects on mechanical properties of Fe-Mo alloy at high temperatures
12 p2116 A69-26925
- Structural features of Fe-Ni massive martensite observed by light, electron and hot stage microscopies showing parallel block packet
13 p2276 A69-27401
- Precipitation influence on martensite formation kinetics and structure of Fe-Ni Ti alloys
13 p2279 A69-27765

Metallographic study of microstructure recrystallization of 50 Ni-50 Fe alloy during annealing using special etchants and methods

13 p2281 A69-28155

Nital etchant and sodium bisulfite stain for morphology of quenched dilute alloy Fe-Ni martensite

13 p2282 A69-28166

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe analyzed as function of cooling rate using X ray analysis

15 p2636 A69-30105

Heat resistant Fe and Cu alloys creep index affected by temperature, testing time and specimen grain size

15 p2639 A69-30569

Dispersoids and temperature effect on coercive force of 19 Co base and 10 Fe plus 27 percent Co base

15 p2669 A69-30689

Surface layer role in strengthening of iron determined from examining temperature dependence of internal friction during thermomechanical treatments

17 p2991 A69-33939

TiNi compound alloying with Al and Fe, considering effect on hot hardness at various temperatures

18 p3157 A69-35249

Phase shape deformation and austenite stabilization in Fe-Ni and Fe-Ni-Ti alloys following secondary alpha phase of reversed martensite-austenite transformation

18 p3159 A69-35448

Isothermal and thermal martensite transformations on polished surfaces of Fe-Ni-Mo alloys

19 p3344 A69-35983

Autodiographic methods for diffusion and phase transformation in Fe-Cr alloys by application of photographic emulsion with tracer element on metal surface

20 p3561 A69-37416

Crystallographic relations between mother gamma phase and bulk martensitic structure of Fe-Ni alloys with less than 20 percent Ni, using radioisotopes

20 p3562 A69-37781

Smooth and notched tensile properties of Fe-Ni alloys in liquid Hg, discussing ductility and toughness

20 p3563 A69-38025

Plastic deformation combined effect with aging on mechanical properties of phase-hardened austenitic Fe-Ni-Ti alloys

21 p3746 A69-38956

Nonmetallic inclusions formation mechanism after reducing iron by Al, Zr and Ti, noting oxygen/ reducing agent ratio role

22 p3969 A69-40069

Alloy softening in bcc Fe-N and Fe-Ni, discussing causes of thermal stress component reduction in interstitial and substitutional alloys

22 p3969 A69-40164

Equilibrium vapor compositions and activities over Fe-Cr-Ni alloys at 1600 C determined by collecting effusate from thorium Knudsen cells

23 p4175 A69-41503

Ternary diffusion at high temperature in Fe-Co-Ni alloy system covering entire ternary phase diagram, including computed interdiffusion coefficients

23 p4176 A69-41505

Coherent matrix precipitates observation in Fe-Ni-Cr alloy by transmission electron microscopy, discussing yield strength and elongation dependence on aging conditions

23 p4176 A69-41508

IRON CHLORIDES

Relative oscillator strengths of 3500-5600 A Fe I lines in omission of arc burning in Ar with iron chloride admixture

20 p3581 A69-37823

IRON COMPOUNDS

NT CHROMITES
NT COHENITE
NT CORDIERITE
NT FAYALITE
NT FERRITES
NT ILMENITE
NT MAGNETITE
NT SCHREIBERSITE
NT TROILITE

Cr-S and Cr-Fe-S systems phase relations, using silica tube and collapsible tube experiments, correlating formation conditions of meteoritic sulfide assemblages

19 p3359 A69-36123

Charge transport in n and p type samples of beta phase semiconducting iron disilicide, noting effect of room temperature doping

19 p3390 A69-36556

IRON ISOTOPES

Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes

19 p3346 A69-36440

IRON METEORITES

NT SIKHOTE-ALIN METEORITE

Shock loading history effect on solid state response of iron meteorites to annealing at moderate temperatures permits deductions about thermal history

01 p0149 A69-10134

Meteorite structure and origin, discussing cosmic dust analysis and collection, Tungusk silicate-magnetite spherules, asteroid collisions and meteorite ages

01 p0159 A69-11367

Sikhote-Alin iron meteorite high temperature oxidation and ablation and simulation with Fe-Ni alloy, noting phase compositions and structure

01 p0025 A69-11373

Uranium content in fragments from iron meteorites determined by fission fragment track recording

01 p0026 A69-11377

Chinghe iron meteorite discovery site, noting no crater or impact traces

01 p0160 A69-11380

South African octahedrite containing inclusions of troilite and graphite veined with kamacite

03 p0507 A69-13097

Iron meteorites and possible utilization by primitive man, noting long resistance to decay

03 p0515 A69-14033

Mossbauer spectra of shocked and unshocked iron meteorite and fayalite

03 p0517 A69-14231

Lunar mascons size and depth calculated in terms of mare formed by low velocity iron meteorites impact

04 p0654 A69-14629

Electron microprobe analysis of potassium feldspar in Weekeroo Station meteorite

04 p0659 A69-14979

Widmanstatten angles relation to orientation of plane of section in iron meteorites

07 p1217 A69-19235

Trace element distribution in metal phase of chondrites and iron meteorites, using neutron activation analysis with radiochemical separation

08 p1404 A69-20921

Trace elements distribution in Smithonia iron meteorite by spark source mass spectrometry, noting terrestrial weathering effects

08 p1404 A69-20922

Chlorine as indicator of terrestrial contamination in iron meteorites, using neutron activation analysis and metallographic observation

08 p1405 A69-20923

Radiation ages of silicate inclusions in iron meteorites based on Sr evolution diagrams

08 p1405 A69-20927

Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions

09 p1596 A69-22047

Structure transitions in iron meteorites from Widmanstatten to granular pattern to study Barringer crater and Canon diablo meteorites formation

09 p1597 A69-22154

Tritium and argon 39 measurements of stone and iron meteorites, discussing decay and production rates and cosmic ray intensity

09 p1604 A69-22398

Meteorite fragment from Arizona Meteor Crater, establishing probable history from shock loading experiments on iron alloys

12 p2158 A69-26344

Freshly fallen meteorites from Portugal and Mexico, determining exposure age and classifying into iron meteorite and carbonaceous chondrite types

12 p2160 A69-26935

Tishomingo iron meteorite metallography, noting nickel content and martensitic microstructure evolution

13 p2353 A69-28159

Metallography of iron meteorites emphasizing Canyon Diablo anomaly

13 p2353 A69-28169

Iron and stone meteorites ablation using electrodeless plasmatron and filmed onto IR films

15 p2697 A69-31252

Silicon in iron meteorites and earth core determined by activation analysis on octahedrites, hexahedrites and ataxites

16 p2865 A69-32807

Structure of meteorite Gibeon section containing taenite grains and annealing twins indicating plastic deformation of taenite followed by recrystallization and grain growth

17 p3034 A69-33586

Boron, Li and Cl contents in iron and stone meteorites by fluorometric, thermal-neutron activation

and pyrohydrolytic separation methods, tabulating results

19 p3408 A69-36003

Cosmic-ray-produced stable and long-lived nuclides in iron meteorites, considering shielding effect on spaliation production

19 p3411 A69-36009

Ar 39 and Cl 36 production rates and ratios in stony and stony-iron meteorites metal phases, discussing terrestrial age calculation

19 p3411 A69-36101

Cosmic ray produced Be 10 in iron meteorites (terrestrial age determination, considering Cl 36 and rare gas analysis

19 p3412 A69-36101

K and Ar 40 determination in iron meteorites by neutron activation for K/Ar dating

19 p3412 A69-36101

Isotopic age determinations on iron and stony meteorites, discussing Rb-Sr and K-Ar results, internal isochrones, Kodaikanal data and planetary formation

19 p3413 A69-36101

Magnetic properties of stone, stony-iron and iron meteorites, discussing natural remanent magnetization origin in parent bodies and magnetic susceptibility

19 p3415 A69-36122

Iron meteorites genetic classification based on parent body cooling rate and Ga-Ge trace element content

19 p3416 A69-36122

Iron meteorites analysis for Ni, Co, P, C, S and Cu elements by milling technique, noting superiority degree based on Co-Ni correlation

19 p3417 A69-36130

Kamacite analysis for P and Ni in chondrites, pallasite and iron meteorites, considering cooling rate and rhabdite

19 p3417 A69-36130

Fe-Ni-P phase diagram studies applied to schreibersite and rhabdite formation in iron meteorites

19 p3417 A69-36133

Morphologies and mechanical properties for identification of phosphides/schreibersite/ and carbides/cohenite/ in iron meteorites, noting nucleation and growth

19 p3417 A69-36133

Iron meteorites microscopic and macroscopic features due to preterrestrial mechanical deformation, stressing local displacements encountered in normal octahedral kamacites

19 p3418 A69-36134

Spallogenic rare gas concentrations and isotopic ratios in taenite of iron meteorites measured mass spectrometrically and compared with kamacite values

19 p3419 A69-36135

Trapped rare gases in Fe phase and silicate inclusions of Campo del Cielo Meteorite, El Taco

19 p3419 A69-36140

Stony meteorite barium isotopes and iron meteorite and terrestrial silicate inclusions analyzed using double spike method for laboratory fractionation correction

19 p3425 A69-36422

Neutron activation method for Mn 53 in meteorites by X ray and gamma counters, noting extraction of Mn 54 free reference source

20 p3601 A69-37504

Meteorites Ni-Fe metal structures analysis as part of petrology study of mesosiderites

20 p3602 A69-37536

Chemical classification of iron meteorites with Ge concentrations between 80 and 200 ppm, reporting concentrations of Ge, Ni, Ga and Ir

20 p3602 A69-37537

Hoba meteorite surface radioactive isotope composition measured, finding terrestrial age from Ni-59 activity

22 p4021 A69-40411

Bogou iron meteorite Ni-Cu-Zn contents determined by radiochemical methods

23 p4209 A69-41321

IRON OXIDES

NT CHROMITES
NT ILMENITE
NT MAGNETITE

Emissivity and other radiative characteristics of stainless steel oxides heated to various temperatures in air

03 p0453 A69-14157

IROQUOIS HELICOPTER U UH-1 HELICOPTER

IRRADIANCE

NT ILLUMINANCE
NT SOLAR CONSTANT

Atmospheric optical data recorded by instrumented aircraft near Crater Lake, discussing surface spectral irradiance data

01 p0111 A69-10846

Nonlinear holograms distortions analyzed by five point method utilizing relation between irradiance and amplitude transmittance of photographic emulsion

12 p2090 A69-26255

Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc., of photoelectric filter radiometer and Leiss monochromator

16 p2861 A69-32261

IRRADIATION

NT AURORAL IRRADIATION
NT DEUTERON IRRADIATION
NT ELECTRON IRRADIATION
NT ION IRRADIATION
NT NEUTRON IRRADIATION
NT PROTON IRRADIATION
NT X RAY IRRADIATION

Cutaneous receptor response to microwave irradiation, measuring warmth sensory effects in human forehead with radiometer
[AGARDOGRAPH-111] 08 p1266 A69-20677

Electric vector transformation for three dimensional photoelastic medium irradiated by light in reverse direction, noting optical systems of birefringent plates and rotators

12 p2180 A69-26339

Luminescence effects on apparent size and shape of foveally fixated targets of various forms

19 p3259 A69-36458

IRREGULARITIES

Irregular pressure profiles and pressure-time histories when using octofluorocyclobutane and sulfur hexafluoride in explosive driven shock tube
[AIAA PAPER 68-730] 24 p4297 A69-43577

IRREVERSIBLE PROCESSES

Thermodynamic foundations of permanent deformation theory, noting parallel to viscoelastic material theory

02 p0350 A69-11714

Onsager reciprocity relations applied to thermodynamics of nonlinearity and noise in diodes

04 p0574 A69-14435

Variational methods for nonequilibrium thermodynamic processes noting fluctuation theory introduction

04 p0551 A69-15314

Thermodynamics of fluid materials and characterization of thermodynamics of irreversible processes, using constitutive equations

06 p0959 A69-18222

Hydrodynamic stability and entropy decrease in flow in three dimensional space, using irreversible thermodynamics principles

10 p1808 A69-22892

Book on thermodynamics of irreversible processes covering chemical reactions, relaxation phenomena, permeation, osmosis, electroosmosis, thermosmosis, electric conduction, diffusion, etc

11 p1999 A69-24533

Thermal efficiencies of liquid-metal MHD generator cycles, analyzing optimum parameters, working fluid and partial irreversibilities

13 p2205 A69-27484

Classical plasticity theory modified to include finite elastic and plastic strain components by considering thermoelasticity and plastic work irreversible processes

13 p2362 A69-28119

Linear irreversible thermodynamics theory as applied with conservation principles and Maxwell relations to charged particle motion in electromagnetic field, noting Onsager coefficients role

17 p3075 A69-34142

Irreversibility resulting from composition changes in operating fuel cell anode and cathode chambers and cell geometry influence

18 p3093 A69-34781

Entropy definition for nonequilibrium states, using mathematical theory of stability of motion applied to kinetic equations of irreversible processes

23 p4238 A69-41366

Heat and mass transfer in gas suspension, studying suspended particles effects on heat transfer by irreversible thermodynamics

[ASME PAPER 69-HT-34] 24 p4410 A69-43528

IRRIGATION

Plant and soil thermal behavior for various conditions of crop species, plant spacing, tillage, irrigation and aerial thermal scanner imagery

12 p2075 A69-26989

IRRITATION

U TOXICITY AND SAFETY HAZARD

IRROTATIONAL FLOW U POTENTIAL FLOW

ISENTROPIC PROCESSES

Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities

05 p0699 A69-16674

Isentropic compression tube with piston compressor for producing hypervelocity test flows, noting shock speeds

[AIAA PAPER 69-334] 13 p2249 A69-28270

Simple waves in compressible isentropic flows of inviscid nonheat-conducting gas free of shock waves

18 p3121 A69-34534

Flow discharge characteristics of nozzle during swirling gas flow ejection, considering isentropic and isothermal limiting cases

24 p4247 A69-43499

ISING MODEL

U FERROMAGNETISM
U MATHEMATICAL MODELS

ISIS-A

NT ALOUETTE 1 SATELLITE

ISIS A satellite fixed and sweep frequency ionograms indicating electron density variations, ionospheric resonances and Cerenkov radiation

15 p2604 A69-31416

Antenna systems design for ISIS-A scientific satellite, discussing antenna array of 13 radiators for telemetry, command, beacon and experimental purposes

17 p2918 A69-33030

ISIS SATELLITES

NT ALOUETTE 1 SATELLITE
NT ALOUETTE 2 SATELLITE
NT ISIS-A

Ionospheric satellites objectives and development resulting from topside sounder and ISIS programs

20 p3529 A69-37855

Ionospheric satellite series Alouette-ISIS, discussing successive engineering and management constraints leading to ISIS-C design

20 p3618 A69-37856

Sweep frequency ionospheric topside sounder design for Alouette and ISIS satellites, discussing influence of experiment requirements and spacecraft limitation and environments

20 p3507 A69-37859

ISLANDS

U GREAT BRITAIN
U JAPAN

ISOBARS (PRESSURE)

Temperatures and geopotentials of isobaric surfaces in Northern and Southern Hemispheres compared for summer and winter seasons

14 p2473 A69-29724

Turbulence coefficient in layers between main isobaric surfaces based on wind and temperature fields analysis

15 p2648 A69-30646

Error sources in forecasts for heights of isobaric surfaces obtained by numerical integration of prognostic equations of equivalent barotropic models

19 p3361 A69-35770

ISOBUTANE

U BUTANES

ISOCHORIC PROCESSES

Heat capacity at constant volume determined for nitromethane, trinitrotoluene and difluoromethane alkanes

[WSCI PAPER 68-39] 07 p1202 A69-18368

Specific isochoric heat capacity of pure fluids, considering thermal equation of state, vapor pressure and boundary conditions at critical point

11 p2001 A69-25201

ISOCROMATICS

High speed photography using multiply pulsed ruby laser, Pockels cell modulation and smear camera for isochromatic and photoelastic pattern recording

19 p3306 A69-35731

ISOCYANATES

Isothiocyanates and phenyl isocyanate reaction with hydrazinoethanol and hydrazinoethyl hydrogen sulfate

16 p2747 A69-31808

ISOENERGETIC PROCESSES

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons

03 p0488 A69-13888

Turbulent free shear layers in isoenergetic flow, correlating theory and experiment
[ASME PAPER 68-FE-9] 05 p0748 A69-16077

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons

11 p1939 A69-25689

ISOLATION

NT SOCIAL ISOLATION

Work capacity and adaptation characteristics of humans confined in small chamber and experiencing effects of isolation and sensory deprivation

08 p1262 A69-19838

EEG, heart beat, respiration rates, body temperature, motor activity, physical and mental efficiency of man during anechoic chamber confinement

10 p1646 A69-23510

Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation

14 p2449 A69-29561

Life in common by groups of four or five people isolated on high mountain under adverse conditions

21 p3661 A69-39267

Internal interactions of continua and concept of thermal isolation, discussing second law of thermodynamics

22 p4050 A69-40450

ISOLATORS

NT VIBRATION ISOLATORS

Circulator power splitting and isolating function in integrated microwave network

02 p0222 A69-12475

Substrates containing silicon regions separated by silicon dioxide or ceramic dielectrics, prepared by lamination in hot press, noting applications to integrated circuits

07 p1100 A69-18617

Dielectrics refill and decal air isolation for silicon integrated circuit components

07 p1100 A69-18618

ISOMERIZATION

Cool flames nonisothermal two-stage ignition of neopentane-oxygen mixtures, discussing chain propagation due to isomerization

11 p1940 A69-24477

Ionic and biradical mechanisms in thermal and photo cis-trans isomerizations elucidated by planar and twisted configurations of polyenes

13 p2216 A69-27618

ISOMERS

Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction

01 p0134 A69-10009

Heuristic Dendral program to mechanize inductive inference in organic chemistry to determine isomers in chemical compounds

07 p1075 A69-19484

Isoprenoids and isomeric alkanes identification in carbonaceous chondrites by gas-chromatographic mass-spectrometric analyses, including results from trillite nodules

19 p3414 A69-36113

Ion structure of keto and enol and McLafferty rearrangements determined by ion cyclotron resonance spectroscopy

19 p3265 A69-36288

DENDRAL program used to construct all possible acyclic structural isomers of C, H, N and O

23 p4114 A69-42214

ISOMORPHISM

Ti sub 3, Rh sub 5 and Hf sub 3, Rh sub 5 existence and isomorphism confirmed by crystallographic and X ray methods

19 p3343 A69-35920

ISOPHOTES

Zodiacal light isophotes and near-earth component from relationship between brightness at various geomagnetic latitudes and position of moon

03 p0512 A69-13693

Isophotal wavelengths of U, B, V and R bright star systems for replacing spectrophotometry with broad-band multicolor data

08 p1408 A69-21134

Isophot system characterizing photometric structure of elongated celestial objects constructed by equidensitometric method based on Sabatier photographic phenomenon

11 p1952 A69-24255

Polarimetric and photometric observations of comet Ikeya-Seki 1965f, plotting isophotes of head and polarized light distribution in tail

15 p2685 A69-30525

Photographic photometry of comet Ikeya-Seki during passage near sun, plotting isophotes of coma and tail and brightness distribution diagrams

15 p2685 A69-30527

ISOPLETHS

Orion nebula isophotal contours optical observation for three continuum colors /blue, yellow and IR/ and H alpha
22 p4031 A69-40942

ISOPLETHS

U NOMOGRAPHS

ISOPYCNIC PROCESSES

Diffusive flow with isopycnic lateral boundaries in porous medium and density distribution of diffusive motion, noting exact solution equivalence to previous solution
11 p1869 A69-24887

ISOSTASY

Lunar gravitational anomalies from internal density variation viewpoint, discussing isostasy in maria
04 p0654 A69-14631

Lunar mascons and maria isostasy, discussing time requirements
20 p3604 A69-37564

Book on gravimetry covering gravity measurement on land and in ocean, gravity anomalies, isostasy, geodetic applications, Eotvosian measurements and terrestrial tides
21 p3715 A69-39000

ISOSTERIC PROCESSES

U ISOPYCNIC PROCESSES

ISOTHERMAL FLOW

Fluctuation velocity, apparent kinematic viscosity and turbulent shear stress in isothermal homogeneous free jets
06 p0909 A69-17169

MHD generator plasma anisotropic instability caused by amplified magnetosonic waves propagating normal to current
11 p1922 A69-24227

Radial electric field effect on pressure drop in isothermal laminar flow of dielectric liquid through stainless steel tube, considering ion drag
12 p2136 A69-26401

Self similar solution to one dimensional isothermal ionized gas outflow from ionization front in half space filled with neutral gas exposed to quanta flux
21 p3771 A69-38997

Heat pipes for isothermal and adaptable energy transfer for space applications, discussing temperature control by fluid choice
21 p3852 A69-39475

ISOTHERMAL LAYERS

Nb-Zr-Cr alloys solidus surface and isothermal sections, using optical pyrometry, microstructural and X ray analyses
08 p1333 A69-20440

Solar atmosphere five minute oscillations observed by Frazier divided into two harmonic atmospheric model for studying oscillation region height and mean temperature
13 p2343 A69-27627

Shock waves from accelerated, decelerated and stationary axisymmetric bodies flying at supersonic velocities in stratified isothermal atmosphere
15 p2551 A69-31171

Earth based microwave data revealed isothermal layer in extrapolating Venus atmospheric profile below region probed by Mariner 5 and Venera 4
16 p2852 A69-31553

Shock wave propagation in isothermal atmosphere, discussing radiation and ionization effects on thermal jump
16 p2858 A69-32207

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model
[AIAA PAPER 69-624] 17 p3070 A69-33259

Thermal wind instability by numerical integration of equations of motion, noting convective cells tilt
17 p2998 A69-33734

Desinent cavitation on hemispherical nosed bodies in water at various temperatures and velocities, considering isothermal case for surface nuclei
[ASME PAPER 69-FE-1] 20 p3516 A69-37986

Lower boundary approximation for theory of thermal laminar steady state boundary layer on isothermal immersed plate
23 p4150 A69-41334

ISOTHERMAL PROCESSES

Radiation from isothermal sphere in vacuum having spherical scattering indicatrix solved by Bubnov-Galerkin method with allowance for scattering
01 p0174 A69-10106

Chemical composition effect on duraluminum supersaturated solid solution stability, presenting time vs temperature C curves of isothermal decomposition
01 p0094 A69-10396

Menabrea theorem for nonisothermal transformations of anisotropic elastic body with internal incompressibility constraint and initial stress
02 p0341 A69-12197

Heat conduction with change of phase in three dimensional melting and solidification problem under isotherm conditions and balanced energy at interface
02 p0354 A69-12548

Condensation-enhanced vaporization rates in nonisothermal systems, noting fume nucleation augmentation of rates into cooler environments
03 p0532 A69-13122

Plasticity of metals under isothermal conditions at elevated temperatures
04 p0671 A69-14454

Isothermal diode as study basis for internal complex controlling thermionic energy conversion
09 p1439 A69-21827

Audio frequencies internal friction measurement of austenitic stainless steels subjected to heat treatment and corrosion, discussing time dependence and carbide precipitates morphology
10 p1713 A69-23819

Isothermal theory of cool flames, discussing oscillations-fuel consumption relations, kinetics, etc
11 p1970 A69-24476

Sublimation in ammonium perchlorate propellants combustion, discussing low temperature isothermal processes, linear regression rates measurements and low ambient pressure
11 p1940 A69-24481

Ions and electrons in ionosphere diffusion tensor components and ambipolar diffusion coefficient expressions derived for nonisothermal plasma
12 p2071 A69-26700

Critical parameters of isothermal quasi-degenerate white dwarfs calculated by energy method, allowing for relativity theory error and neutron irradiation effect
13 p2351 A69-27871

Isothermal deformations in linear viscoelastic material under uniaxial stress, determining optimum strain rate history for maximum work lower bound
15 p2707 A69-30637

Radiative heat transfer in nonisothermal scattering media of plane, spherical and cylindrical geometries separated by particle cloud
16 p2878 A69-31925

Radiation effect on inorganic solids isothermal decomposition induction period, deriving equations for conditions representing various kinetics combinations during irradiation
[WSCI PAPER 69-21] 16 p2832 A69-32359

Acoustic gravity waves generated in isothermal atmosphere by ground energy source calculated using stationary phase method and kinematic theory
18 p3129 A69-34953

Isothermal and thermal martensite transformations on polished surfaces of Fe-Ni-Mo alloys
19 p3344 A69-35983

Total band absorbance of nonisothermal IR radiating gas, using wideband formulation of Curtis-Godson approximation and series expansion formulation
22 p3983 A69-40101

Flow discharge characteristics of nozzle during swirling gas flow ejection, considering isentropic and isothermal limiting cases
24 p4247 A69-43499

ISOTHERMS

Isothermal sections construction of zirconium corner of ternary phase diagram of Zr-Mo-V system from microstructure of cast and quenched alloy specimens
02 p0262 A69-11846

Isothermal sections construction of Zr-V-Ni system phase diagram from study of alloys at 1000, 700 and 500 C
02 p0263 A69-11848

Heat conduction in medium with phase transitions, solving one dimensional nonlinear problem by calculation of isotherms and reduction to Cauchy problem
19 p3453 A69-36838

Isotherms location in simple nonconstant area /diverging/ tube configuration investigated for heat transfer
20 p3632 A69-37219

Heated body cooling off study via temperature field isothermal lines visualization on TV screen
20 p3539 A69-37437

Free convection flows about inclined infinite cylinders with isothermal surfaces
24 p4416 A69-43687

ISOTOPE EFFECT

Temperature dependence of isotope thermotransport in liquid K and Rb using steel capillary cells
03 p0533 A69-13970

Saturated absorption by Ne inside 6328 A He-Ne laser, discussing selection of Ne isotopes in gain and loss tubes
07 p1149 A69-18892

Isotope shifts in 4416 A cadmium laser, showing change of double peaked to single peaked profile with doubled active tube length
10 p1705 A69-23819

Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes
19 p3346 A69-36444

ISOTOPE SEPARATION

Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques
24 p4315 A69-43199

NT ZIRCONIUM 95

Orientation of diamagnetic ground state Pb 207 atoms with nonzero orbital angular momentum by means of optical pumping and determination of nuclear moment
07 p1156 A69-19399

S-process nucleosynthesis and temperature averaged neutron capture cross sections studied in relation to solar system, considering elemental and specific isotopic abundances
08 p1357 A69-20899

Lead isotopes nucleosynthesis by three mechanisms and contribution of mechanisms to abundances, noting chronology in nucleosynthesis
08 p1357 A69-20899

Formation ratios of light isotopes in spallation reactions compared to observed stellar and solar abundances of lithium, beryllium and boron, discussing astrophysical implications
08 p1401 A69-20900

Relative intensities of lines in vibration and rotation bands of isotopic carbon dioxide in planet Venus, tabulating partition functions
15 p2656 A69-31154

Stony meteorite barium isotopes and iron meteorite and terrestrial silicate inclusions analyzed using double spike method for laboratory fractionation correction
19 p3425 A69-36422

ISOTOPIC LABELING

Tyrosine transaminase activity estimation by radioactive isotopic assay method, discussing application to rat liver and other organs
01 p0014 A69-10902

Tryptic digestion of C terminal tritiated peptides analyzed with Scenedesmus ferrodoxin, noting use for protein structural study
10 p1648 A69-24190

Calcium isotopes tracer migration in caged rats in metabolism study
13 p2212 A69-28618

Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion
19 p3313 A69-36490

Sympathetic nerve liberated noradrenaline increasing melatonin synthesis, using C 14 tracer for monitoring
22 p3871 A69-40051

Compartmental models for radioactive tracer experiments with known tracer material amount, using generalized Spearman simultaneous estimation procedure
24 p4339 A69-42765

ISOTROPIC MEDIA

Stress-strain state of isotropic elastic medium using equations with stress tensor, noting role of curvilinear hole
01 p0164 A69-10081

Microwave signal nonlinear interaction in isotropic positive column
01 p0127 A69-10282

Energy transport in atmosphere studied by considering sphere in isotropic fluid in infinite field without gravity, using first law of thermodynamics
01 p0667 A69-11032

Linear stationary thermoelasticity equations for Cosserat continua, discussing static and kinematic conditions, anisotropy and centrosymmetric isotropy equations
02 p0336 A69-11557

Glan-Thompson and Rochon prisms modified by replacing one of two calcite halves of cemented oriented birefringent crystals with glass
02 p0280 A69-11924

General solutions of three dimensional elasticity theory applied to isotropic disks and plates, emphasizing homogeneous solutions
03 p0526 A69-13738

Elastic equilibrium stress condition of anisotropic plates with circular isotropic inclusions
04 p0667 A69-14264

Axisymmetric stress field around spheroidal inclusions and cavities in transversely isotropic material [ASME PAPER 68-WA/APM-14]
04 p0669 A69-14400

Electromagnetic wave propagation in moving isotropic refractive media, giving Maxwell-Minkowski and EM wave equations
04 p0557 A69-14760

Electromagnetic wave propagation in spherically stratified isotropic media, presenting generalized refractive index profiles for electric type fields
04 p0563 A69-15492

Theory of inhomogeneous simple bodies applied for universal solutions for incompressible laminated bodies
05 p0834 A69-15732

Real and imaginary parts of homogeneous isotropic electron plasma complex refractive index, noting application to plane electromagnetic wave propagation
07 p1193 A69-19183

Cylindrical antenna input impedance in isotropic plasma, assuming weak three dimensional plasma diffusion
08 p1285 A69-20428

Families of eigenfunctions concept for stress and strain tensors of proper motions in continuous isotropic medium, considering vortices and gradients
08 p1417 A69-20752

Compatibility theorem extension to three dimensional rigid plastic bodies with stress and velocity discontinuities, noting isotropic bodies with convex yield surface
08 p1418 A69-20845

Differential equations for normal propagation of plane electromagnetic waves in isotropic stratified inhomogeneous gyration medium, discussing boundary conditions and reflection properties
08 p1353 A69-21000

Simply supported isotropic cylindrical panel stability under axial compression, obtaining asymptotic series expansion for upper critical stress
08 p1419 A69-21182

Transient heat flow in isotropic solids by electrical analog modeling in orthogonal curvilinear coordinate system
09 p1477 A69-22241

Reciprocity theorems of coupled and uncoupled thermoelasticity for macroisotropic and microisotropic simple homogeneous solids with microstructure
09 p1618 A69-22259

Longitudinal and transverse wave propagation in compressible isotropic turbulent plasma, noting mode coupling effect [AFCLR-69-0289]
10 p1729 A69-23424

Lame problem for elastic isotropic medium having free energy dependent on medium deformation and deformation gradients, estimating minimum surface curvature
11 p1970 A69-24632

Stress concentration in isotropic plates weakened by curvilinear holes subjected to loading at infinity, noting curvature at corner points of holes
11 p1972 A69-24655

Three dimensional bending problem for thick isotropic plate with curvilinear hole and normal and tangential stress applied to edge of hole
11 p1973 A69-24657

Optimum cooling of homogeneous isotropic cylindrical body with constraints on magnitude of thermoelastic stresses
11 p1976 A69-24772

Three dimensional problem of elasticity for transversely isotropic medium with cylindrical anisotropy, using partial differential equations for unknown functions
11 p1983 A69-25091

Nonlinear DC magnetic fields for nonhomogeneous isotropic current free regions in presence of ferromagnetic materials, discussing analytic solutions of boundary value problems
11 p1888 A69-25311

Helical and log conical helical antenna width reduction by loading of traveling wave antenna elements with isotropic material
11 p1852 A69-25315

Propagation of intensity modulated light rays in semiinfinite isotropic dispersive medium, discussing phase shift and modulation depth
12 p2029 A69-26026

Representation formula for response function of elastic materials having given isotropy group
12 p2188 A69-26926

Controllable motions of compressible homogeneous isotropic solids, anisotropic solids and fluids with memory under constant body force
12 p2189 A69-27118

Frequency equation for thickness effects on axisymmetric radial and rotatory vibrations of empty or fluid filled isotropic spherical shell
13 p2363 A69-28185

Microstresses and distortions in quasi-isotropic solid bodies under strain evaluated by correlation functions
14 p2531 A69-28806

Spectral distribution of fluctuations in stable plasma in absence of external fields, emphasizing electric field fluctuations, quasi-steady states, isotropic plasmas and thermodynamic equilibrium
14 p2490 A69-29103

Torsion of composite prismatic rod consisting of three different isotropic materials with two interfaces converging on cross section contour corner point
15 p2707 A69-30579

Stress concentration near circular nonreinforced hole at bending of transversely isotropic rectangular plate analyzed in terms of transverse shear theory
15 p2707 A69-30580

Cylindrical wave propagation in thermoelastic incompressible isotropic solids, considering cases of zero and nonzero coefficient of thermic dilation
15 p2707 A69-30626

Couple-stresses effect on stress concentration of plate containing infinite row of holes, solving linear elastic problem in isotropic Cosserat continua for plate
15 p2708 A69-30640

Nonlinear boundary value problems for isotropic plasma with known magnetic field, examining electromagnetic waves scattering at magnetic fluctuations
15 p2569 A69-30938

Bending theory for two layer plate made of isotropic material under sinusoidal load obtained by elasticity and classical theory based methods
15 p2714 A69-31198

Natural vibration of isotropic plates in temperature field with nonuniform distribution over plate
16 p2871 A69-31891

Somigliana dislocations effects on displacement field in linear isotropic elastic medium represented by integral with respect to line delineating surface
17 p3053 A69-33020

Initial thermostructural stresses in homogeneous quasi-isotropic two component medium, solving statistical boundary value problem thermoelastically
17 p3058 A69-33316

Infinite isotropic elastic plate vibration under vertical harmonic load, deriving vertical displacement at center of loaded area
17 p3058 A69-33408

Self channeling of light in nonlinear isotropic medium using exact solutions of nonlinear Maxwell equations for two dimensional case
17 p3007 A69-33975

Linear isotropic elastic continuum dislocations distribution, deriving transport equations by statistical methods, noting analogy between energy/momentum and MHD equations
18 p3212 A69-34352

Transverse shear deformation and rotatory inertia effects on large amplitude lateral free vibrations of transversely isotropic plates [ASME PAPER 69-APM-10]
18 p3213 A69-34386

Plane light wave propagation in homogeneous isotropic medium with fluctuating dielectric constant using perturbation theory and integrating energy conservation law
18 p3173 A69-35127

Isotropic plate critical strength measurements, evaluating role of material shear modulus
18 p3225 A69-35361

Refractive index profiles yielding wave functions expressed in terms of standard transcendental functions for electric fields in spherically stratified isotropic media
19 p3372 A69-35618

Natural frequencies of thin oblique angled isotropic plates, discussing closed form solution to differential equations
19 p3438 A69-36312

Plane elastic deformation in isotropic homogeneous medium using displacement vector, discussing finite difference equations and application to rectangular boundary
19 p3441 A69-36719

Homogeneous heat flux effect on limit load of isotropic plate with rectilinear through crack, noting conditions for crack propagation
19 p3441 A69-36744

Twisting of spherical shell of nonhomogeneous isotropic material with variable shear modulus and inner surface assumed to be stress free
20 p3619 A69-36911

Mathematical relations for ring laser beams polarization conditions, using slanted isotropic plate and phase circulator to separate polarization plane
20 p3553 A69-37606

Transverse vibrations of isotropic solid rectangular beam with secondary effects of rotary inertia and shear deformation retained
21 p3832 A69-38447

Plate bending theory modified for applying successive linear conjugates method to partially clamped isotropic plate and plate with circular hole
21 p3834 A69-38721

Stress-strain state in thin isotropic plate with circular hole under lateral bending and torsional moments
21 p3835 A69-38725

Model of isotropic polycrystal generalized to composite materials including mechanical mixtures, calculating macroscopic constants in heat conduction, diffusion and elasticity
21 p3752 A69-39193

Isotropic ideal bidimensional filter in interpretation of anomalous gravity fields, especially for separating local and regional effects
21 p3724 A69-39246

Antenna noise spectrum in collisionless isotropic plasma, considering plasma fluctuation theory and reciprocity theorem
21 p3683 A69-39284

Linear elastic isotropic materials for model tests, describing properties of material composed of Araldite B and air
21 p3844 A69-39319

ISOTROPIC TURBULENCE

Quantitative analysis of light intensity dependent changes in optical rotation angle of isotropic media caused by laser beam

22 p3959 A69-40017

Prolate spheroidal antennas operation in isotropic plasmas, studying effects of collision frequency, electron temperature and antenna length on admittance, radiation and current distribution

22 p3914 A69-40702

Kinetic beam instability development in homogeneous dust/gas cylinder rotating in hot invariable medium under arbitrary perturbations

22 p4032 A69-41017

Reflection and transmission coefficients for harmonic electromagnetic wave incident at parabolic layer of stratified isotropic plasma

22 p3901 A69-41020

Large elastic deformations of isotropic materials by deflection of composite parallelepiped composed of elastic incompressible materials, applying Rivlin solutions

22 p4048 A69-41277

Deformation tractions in undeformed and curved cuboid flexure and inverse flexure determined by stress-strain relations for homogeneous isotropic compressible materials

23 p4226 A69-41521

Radiative heat transfer in nonisothermal absorbing and emitting media without scattering and with anisotropic and isotropic scattering

23 p4239 A69-41632

Vector properties of isotropic strain hardenable materials in stress vector space applied to tubular brass subject to biaxial tension and complex loading

23 p4227 A69-41714

ISOTROPIC TURBULENCE

Diffusion of suspended particles in isotropic turbulence field of dispersed medium

02 p0234 A69-12579

Electrodynamics of turbulent conducting media based on nonrelativistic MHD

03 p0479 A69-13972

Rays associated Fokker-Planck relation for isotropic turbulence diffusion equation, discussing logarithmic refractive index, moments and path length

08 p1272 A69-20021

Magnetic field and magnetic energy evolution in infinitely conducting homogeneous isotropic turbulent medium, applying results to galactic magnetic field model

10 p1783 A69-23793

Sound field generation by isotropic turbulence through finite strength shock, estimating acoustic energy flux from supersonic jet containing shock waves

11 p1872 A69-25130

Time variability of horizontal wind as function of time provided by Kolmogoroff structure functions for components of isotropic turbulence

18 p3167 A69-34829

Homogeneous isotropic turbulence spectrum asymptotic behavior for various spectral energy transfer models

19 p3301 A69-36818

Approximate formula for energy spectrum of isotropic turbulence at large wave numbers, showing agreement with Gaussian exponential form

21 p3694 A69-38834

Spectral equation for decaying isotropic turbulence of incompressible inviscid flow at large Reynolds number, using spectral cascading

21 p3694 A69-38835

Final period of decay for viscoelastic fluid in homogeneous isotropic turbulence, deriving expressions for double correlation function and energy decay

22 p3928 A69-39891

Model for statistically isotropic homogeneous turbulence in incompressible fluid, representing turbulence as superposition of individual vortex sheets

22 p3930 A69-40525

Transverse spectra and structural functions of fluctuations for plane waves of different frequencies propagating in isotropic turbulent medium

23 p4117 A69-41728

Symmetry properties of Cameron-Martin-Wiener kernels in isotropic velocity field, applied to one dimensional model of incompressible turbulent flow

24 p4301 A69-43358

ISOTROPY

NT ISOTROPIC MEDIA

Green function applied to isotropic scattering of radiation in three dimensional homogeneous space

07 p1241 A69-18808

Transverse waves instability in relativistic plasma, noting condition of isotropy and existence of electromagnetic waves

07 p1193 A69-19032

Reduced modulus of elasticity dependence on form of plane stressed state, assuming initially anisotropic body with transversely isotropic elastic properties

11 p1986 A69-25182

ITALY

Fucino earth station operation with Early Bird and Intelsat 2-F3 satellites receiving equipment and transmission system

[UN PAPER 68-95455] 01 p0028 A69-10493

CENFAM radar receiving system for meteoric and upper atmospheric data on amplitude, range and direction of meteor echoes through interferometer pairs

13 p2354 A69-28649

Meteorological problems in Italy analyzed by digital computer program through numerical integration of atmospheric models to provide weather forecasts

13 p2295 A69-28651

Richardson number in vertical tropospheric region of maximum wind computed from data on jet streams observed in winter over radiosonde stations in Italy

13 p2295 A69-28656

Italian space research report to COSPAR covering international cooperation, extrasolar X rays, electron density measurements with San Marco 2 satellite, etc

15 p2725 A69-31465

Monte Cardiga telemetry station associated with sounding rocket range at Salto di Quirra, Sardinia, describing equipment, telemetry system capabilities and flexibility

20 p3512 A69-38280

ITERATION

NT ITERATIVE SOLUTION

Patch panel programmed DDA computer having MHz iteration rate and 35 bit usable word length, discussing system design and demonstration model

17 p2934 A69-34073

Alternating direction iteration method for nonlinear systems of equations applied to steady state heat conduction problem with nonlinear boundary conditions

18 p3163 A69-34329

Nonlinear estimation with noisy data, considering least squares fit, sequential /Kalman/ estimate and iterated sequential scheme

21 p3686 A69-39370

ITERATIVE SOLUTION

Convergence theorems for perturbed Newton methods for solution of nonlinear equation systems, suggesting algorithm holding Jacobian matrix elements constant during iterations

01 p0106 A69-10988

Iterative process for determining periodic solutions of nonlinear nonautonomous periodic differential equations without weak nonlinearity hypothesis applied to nonlinear synchronization

02 p0271 A69-11550

Modal substitution method for free vibration analysis of large discrete undamped dynamic systems

02 p0338 A69-11747

Optimal control problems for Markov chains solved by iterative method, using nonlinear finite difference equations to approximate degenerate elliptic functions

02 p0224 A69-11963

Iterative transfer of boundary values to fictitious contour in numerical solution of partial differential equations

[ONERA-TP-646] 03 p0454 A69-12874

Optimum overrelaxation factor in diagnostic and forecast calculations

03 p0458 A69-13033

Iterative method of determining orthogonalized bases for representation of sampled data signals

03 p0391 A69-13231

Iterative method to solve large sets of algebraic equations in approximate solution of multidimensional partial differential equations by implicit numerical techniques

03 p0456 A69-13554

P-n junction under arbitrary transient conditions, solving one dimensional, two carrier transport equations by numerical iterative method

03 p0487 A69-13639

Trajectory optimization, obtaining sequence of control functions by iterative application of maximum principle /min H/ to nonoptimal functions

04 p0548 A69-14827

Numerical solution of elliptic equations by iteration result in convergence prevention and solution of Laplace and Poisson equations with singular Laplace operator

04 p0625 A69-15133

Iterative solution of continuous-time-discrete-space /CTDS/ equations as approach to hybrid computational of certain partial differential equations

04 p0567 A69-15348

Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensitivity and energy limitations

[AIAA PAPER 67-620] 04 p0629 A69-15500

Iteration method for determination of critical buckling load for straight rods

05 p0832 A69-15600

Bairstow-Hitchcock iterative method analog computer simulation by steepest descent

05 p0723 A69-15930

Difference iteration method for solving three dimensional Dirichlet problem presented as system of planar Dirichlet problems

05 p0787 A69-16450

Identification of finite memory, time discrete linear systems by Kiefer-Wolfowitz stochastic approximation procedures, presenting two algorithms for sequential identification

06 p0900 A69-17350

Iterative solution of integral equation and uniform convergence conditions of function sequence approximating incremental stress distribution in elastic-plastic structures

06 p1024 A69-17510

Successive approximation for iterative construction of near optimum guidance

06 p0954 A69-17577

Radiative transfer iteration for gray medium between concentric spheres and for constant heat generating spherical region imbedded in gray medium

08 p1420 A69-20153

Structural iterative design convergence to minimum weight proved by dual linear programming, discussing global convergence and convergence rate

08 p1413 A69-20350

Iterative methods for composite layer slabs transport models, using invariant imbedding approach to transport theory

08 p1343 A69-20350

Iterative method for least square polynomial curve fitting with abscissas and ordinates subject to error

08 p1343 A69-20827

Algorithm with iterative technique for nonlinear minimax approximations

08 p1344 A69-20829

Iterative Chebyshev approximation for computerized network design by linearizing original nonlinear programming

08 p1299 A69-21170

Optimal linear quick response problem solving by fast convergence iterative procedure

09 p1473 A69-21791

Five parameter class of linear iterative methods for solution of linear equations systems in application to elliptic boundary value problems

10 p1718 A69-22870

Nonlinear Lagrange equations and iterative solutions for studying strain state of mechanical structures on basis of very small displacements

10 p1793 A69-22880

Iterative processes for solution of linear algebraic equations for n dimensional vectors in given space

10 p1718 A69-23208

Factorization procedure for iterative solution of systems of algebraic equations from discretization of elliptic boundary value problems

10 p1719 A69-23520

Iterative method for numerical solution of linear algebraic equations for stationary probability distributions in queueing and reliability theory

10 p1721 A69-23691

Least squares iterative program, deriving orbits for binaries HD 93403 and HD 135240

11 p1963 A69-25257

Iterated logarithm law proved for class of stationary series extended to systems of dependent random variables with complete couplings

11 p1910 A69-25699

Iterative algorithm to determine transition probability final distribution in Markov extremal systems

11 p1861 A69-25712

Time optimal controls for multivariable linear systems by computer programming of iterative calculations /Neustadt and fast convergence methods/

12 p2050 A69-26090

Inverse iteration method insensitive to small eigenvalue errors for finding eigenvectors

12 p2121 A69-26510

Iterative solutions of nonlinear integrodifferential dynamical equation for two point velocity correlation tensor in incompressible fluid turbulence studies
12 p2062 A69-26602

Higher order difference method for equilibrium and eigenvalue problems of two dimensional structures using iterative solution
13 p2365 A69-28239

Iterative solution of linear systems for computation of global stiffness matrix reciprocal
13 p2365 A69-28249

Iterative identification method for nonlinear control systems with single element, based on criterial functional
14 p2426 A69-29306

Iterative solution for difference equations approximating displacement vector determination problem in theory of elasticity, investigating algorithm convergence
14 p2536 A69-29479

Finite element and iteration method for large deflection of rectangular plate, considering stiffness matrix for bending
15 p2706 A69-30435

Cantilever beam profile optimization methods using iterative analog computation to achieve minimum deflection, showing application of Pontryagin maximum principle
15 p2709 A69-30671

Automatic hybrid apparatus for solving linear equations, using Gauss-Seidel iterative method and stressing control arrangement, communication circuits, etc
15 p2572 A69-31089

Boundary layer over impulsively started flat plate, describing flow transition from unsteady /Rayleigh/ to steady /Blasius/ state by iterative methods
16 p2769 A69-31812

Gradient iterative methods for finite element eigenvalue problem associated with stability and vibrations of elastic systems based on Rayleigh quotient
16 p2871 A69-31898

Starting weight increments in aircraft designs having various structural features and dimensions
16 p2735 A69-32144

Optimum overestimate to obtain bound permitting use as convergence criterion for iterative process in orbital glider reentry trajectory optimization
[ONERA-TP-628] 16 p2805 A69-32332

Soviet monograph on projective-iterative methods of solving operator equations in generalized metric and structurally normalized spaces
16 p2805 A69-32366

Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
17 p2933 A69-33745

Laser eigenmodes determined iteratively from eigenvalue equation including spatial inversion inhomogeneities, atomic density and local loss
17 p2984 A69-34046

Iteration process by difference scheme for numerical solution to Dirichlet problem of two dimensional Poisson equation
18 p3164 A69-34701

Convergence of methods of tangential parabolas and hyperbolas used in nonlinear equation solution with nondifferentiable operators
18 p3164 A69-34707

Linear boundary value problem solution using iterative method
18 p3165 A69-35050

Orbits computation by Picard successive approximations method, discussing iterative numerical perturbation techniques
19 p3398 A69-35615

Computer iteration accelerator based on modified Aitken process, noting application to vectors
20 p3498 A69-36950

Periodic orbits in nonlinear dynamical system constructed with iterative method based on modification of generalized Newton-Raphson technique
[AAS PAPER 68-085] 20 p3595 A69-37171

Literal solution to equations of motion applied to lunar theory using electronic computer with series convergence
21 p3796 A69-38474

Coupled gyroscopic systems two parameter stabilization problem analyzed for steady state characteristics by iterative method
21 p3723 A69-38829

Ludwig method generalized for iterative solution of nonlinear equations systems
21 p3755 A69-39002

Iterative processes for solution of linear algebraic equations for n dimensional vectors in given space
21 p3756 A69-39149

Molodenskii boundary value problem exact solution by successive approximations for determination of earth figure, noting quasi-geoid surface
21 p3716 A69-39248

Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique
21 p3852 A69-39433

Iterative method for reducing filters required for optimal Kalman filter design maintaining parameter estimation accuracy
21 p3687 A69-39463

Numerical calculations for boundary layer flows allowing similar solutions, using iterative numerical integration of integral equation
22 p3929 A69-39925

Iterative and vectoral methods for correcting computed direction cosine matrix errors
23 p4134 A69-42543

Iterative integration method of numerical quadrature over finite interval for analytic function, taking into account simple nonanalytic singularities in integrand
24 p4341 A69-43229

I
IZSAK ELLIPSOID
U ELLIPSOIDS
U GEODESY

J

J-79 ENGINE

Induced stressing method for complex castings by controlled cooling during heat treatment applied to front frame of J-79 turbojet engine
13 p2269 A69-28184

J-85 ENGINE

Inlet produced dynamic distortion and effects on stall margin of J-85 turbojet engine from supersonic wind tunnel tests
[AIAA PAPER 69-487] 16 p2840 A69-32676

JACKS [ELECTRICAL]

U ELECTRIC CONNECTORS

JACOBI INTEGRAL

Jacobi integral and Hill criterion for analyzing motion stability of natural satellites and large planets inside gravitational sphere
20 p3596 A69-37314

JACOBI MATRIX METHOD

Reduction of partitioned submatrices functions for expediting calculations of hypercirculant and hyperhyper Jacobi analytic functions
18 p3163 A69-34330

Eigenvalue conversion of second variation test for algebraic and differential constraints to Jacobi accessory minimum problem by introducing norm in coordinate perturbation space
19 p3400 A69-35672

JACOBI POLYNOMIALS

U HYPERGEOMETRIC FUNCTIONS

JAGUAR AIRCRAFT

Jaguar combat trainer/tactical support aircraft to meet France and UK military requirement, noting supersonic performance and honeycomb construction
04 p0549 A69-15062

Jaguar aircraft equipment conformity to maximum standardization with equipment for other programs
04 p0550 A69-15063

Automatic navigation and sighting system for French specified Jaguar combat aircraft development
16 p2809 A69-31760

Jaguar aircraft design and operational characteristics, noting supersonic performance at high altitudes and during maneuvers
20 p3463 A69-37928

JAMMING

Soviet book on electronic countermeasures and intelligence covering jamming methods for automatic systems
03 p0385 A69-12927

Radar or ECM/ECM system simulation by digital computer, using signal and jamming spectral inputs
03 p0400 A69-13200

Jamming susceptibility, noting corrections for multiple noise sources and sidelobe level for antenna pattern
14 p2414 A69-29501

Tactical Satellite Communications /Tacsat/ cost reduction, discussing jamming avoidance and mitigation

tion, communications security, capacity increase and spectrum conservation

20 p3497 A69-38315

JAPAN

Japanese space research organizations, sounding rockets, meteorology, satellite communications, geodesy, etc
[UN PAPER 68-95563] 01 p0151 A69-10501

Ship and aircraft traffic conditions in Japan and neighboring areas and requirements for navigation satellite system
[UN PAPER 68-95226] 01 p0113 A69-10520

Scientific satellite 1 solar cell panels power output dependence on temperature and spin calculated and compared with results for outdoor sunlight
15 p2552 A69-30072

Atmospheric observations in Japan during last 40 years, discussing relation to meteorology, statistical characteristics, whistlers, noise phenomena, periodic variations, solar effects and ray theory
15 p2595 A69-30418

Japan space research covering sounding rockets, balloons, satellites and facilities
15 p2725 A69-31466

Low level jet stream near meso-low on stationary front in Japanese rainy season analyzed from radar echoes, noting appearance of vertical current
16 p2809 A69-32601

JR 100 F lift jet engines for Japanese national aerospace laboratory produced as part of VTOL developing program

Piloting aspects of jet V/STOL aircraft for poor weather operations without complicated ground aids, discussing deceleration transition, forward speed and final approach angle
01 p0010 A69-10868

Reliability and maintenance economics for jet transport operations of 1980s, discussing Aircraft Integrated Data System /AIDS/ sensors design
[AIAA PAPER 68-207] 01 p0011 A69-11022

Aircraft and engine parameters for maximum theoretical range of turbojet for given cruising speed
03 p0366 A69-12950

Business jet aircraft use for air transport pilot training instead of simulating devices, noting pilot cabins
03 p0366 A69-13643

Design parameters optimization for V/STOL jet aircraft with lift engines mounted in wing pod, discussing wing loading and aspect ratio, power plant, etc
04 p0547 A69-14812

Anti-icing system for business jets, noting activation prior to encountering visible moisture
06 p0868 A69-17669

Commercial jet safety, analyzing aircraft accidents and accident rates
06 p0868 A69-17829

V/STOL commercial intercity jet aircraft design concept for high density short haul travel featuring low noise, high economy, reliability and tandem wing configuration
[AIAA PAPER 69-200] 07 p1056 A69-19571

Monograph on length requirements for takeoff and landing of jet transports covering airport classification, roll distance formulas and long range transport performance nomograms
08 p1301 A69-20717

Onboard gas turbine auxiliary power units for executive jet transport aircraft
[SAE PAPER 690332] 11 p1824 A69-24501

Thrust reversers for business jet aircraft, discussing federal aircraft regulation requirements for ground and in-flight qualification
[SAE PAPER 690311] 11 p1941 A69-24512

Jumbo jet instrument landing difficulties, suggesting specific improvements in aircraft and airport equipment
15 p2549 A69-30189

Dassault Mercure short haul jumbo jet, discussing production costs and market potential
15 p2550 A69-30317

Dassault Mercure high speed twin turbojet aircraft, discussing capacity, range, propulsion, profitability threshold, etc
15 p2550 A69-30318

German VFW 614 short haul commercial jet aircraft design, marketing, etc
16 p2734 A69-31805

Medium range Tu-154 three jet transport aircraft, detailing fuselage, airfoil, tail unit, landing gear, propulsion unit and circuitry
16 p2735 A69-32073

Jet aircraft runway friction due to mud and water noting relation to takeoff length
17 p2903 A69-34216

Wind shear effects on jet aircraft approach, discussing airspeed and glide path position maintenance requirements
[AIAA PAPER 69-796] 19 p3367 A69-35634

Jumbo jet audio entertainment and service systems, describing digital pulse multiplexing technique
19 p3285 A69-35806

Runway grade relation to jet aircraft takeoff length
19 p3296 A69-36874

Jumbo jet passenger loading devices including overwing bridges, transporters and terminal integration
20 p3511 A69-37916

Jet aircraft quasi-level flight above flat earth, deriving equation of path minimizing linear combination of fuel consumption and flight time
21 p3647 A69-39006

Statistics of jet aircraft accidents including worldwide data and safety trends
22 p4054 A69-41128

Jet transport operation and accidents statistics, analyzing world data, accident causes and safety gap
22 p4054 A69-41130

Safety implications of technological developments in aviation, discussing standards and statistical data for supersonic transports and jumbo jets
22 p3867 A69-41134

Third generation jet aircraft safety, discussing accident prevention and survival
22 p4054 A69-41142

Commercial jet aircraft thrust reversers and noise suppressors developed by Rolls-Royce, discussing compatibility, reliability and applications
[SAE PAPER 690410] 23 p4200 A69-41638

Refused takeoff as critical maneuver in ground operations during jet transport accident investigation, emphasizing pilot anticipation of conditions and preplanning actions
[SAE PAPER 690378] 23 p4062 A69-41654

Jet runway design, construction and operation, discussing surface texture, lightning, grooving, etc
[SAE PAPER 690377] 23 p4147 A69-41670

Jumbo jet role in air transportation, discussing future traffic growth, pilot problems and aircraft size limitations
23 p4063 A69-41819

Short haul transport aircraft development, discussing twin jet Mercure aircraft with low operation cost and Category III weather conditions landing
24 p4250 A69-42565

V/STOL commercial intercity jet aircraft design concept for high density short haul travel featuring low noise, high economy, reliability and tandem wing configuration
[AIAA PAPER 69-220] 24 p4251 A69-42648

Aero L-39 low wing cantilever monoplane jet trainer developed in Czechoslovakia
24 p4251 A69-42797

JET AIRCRAFT NOISE

Sonic bang intensities in stratified atmosphere obtained by geometrical acoustics and linear theory modifications to take account of nonlinear effects
01 p0008 A69-10056

Aircraft noise suppression, discussing community aspects of jet and fan noise and physical mechanisms of jet noise
01 p0009 A69-10349

Skin panel stresses for random acoustic loading, determining aircraft structure responses
03 p0530 A69-14092

Jet engine inlet noise control by modification of inlet guide vanes
05 p0811 A69-15622

Fan compressor noise reduction indicating effects of design, number of blades, vane/blade ratio, aerodynamic parameters and blade spacing
[ASME PAPER 69-GT-9] 09 p1571 A69-22505

Turbomachinery multiple pure tone noise associated with acoustic resonance of inlet cavities examined by narrow band filter tracking integer multiples of rotative speed
[ASME PAPER 69-GT-2] 09 p1572 A69-22509

Jet airliners noise characteristics, calculating spectral content and duration of perceived noise level and total noise level
09 p1435 A69-22637

Jet noise causes and suppression, discussing nozzle exit area geometry
15 p2671 A69-30372

Jet and compressor noise, discussing noise suppression techniques and engineering applications
[AIAA PAPER 68-550] 17 p3022 A69-34019

Jet noise effect on real estate value, discussing market survey, insulation and navigation easement costs and litigation damages
[AIAA PAPER 69-802] 19 p3288 A69-35594

Technology trends in airbreathing propulsion, discussing noise control for subsonic jet transports, turbine blade cooling, etc
[AIAA PAPER 69-774] 19 p3244 A69-35648

Cold subsonic coaxial jets observed for relationship between noise output and flow characteristics, showing effect of relative annular and central jet velocities
20 p3513 A69-37063

Acoustic field due to jet aircraft in motion, describing convection parameter modification in generalized sound pressure equation
20 p3462 A69-37757

Dornier Do 31 VTOL jet aircraft noise alleviation in far field, discussing shielding, interference, ground attenuation and reflection
22 p3862 A69-39932

Jet engine noise technology evaluation, noting effects on airport neighbor
[RAES PAPER 13] 22 p3999 A69-40492

Building block approach to turbofan engine design, discussing fuel consumption, noise and component research
[RAES PAPER 14] 22 p3999 A69-40493

Quadrupole self and cross correlations of directional jet noise patterns, including frequency spectra and corrections
22 p3931 A69-40891

JET AMPLIFIERS

Pressure gain estimates in analog jet amplifier based on total pressure measurements in main jet interaction region
02 p0195 A69-12076

Jet fluidic differential amplifier transfer function determination, describing interconnection dynamics
11 p1824 A69-24350

Gas jets collision flowing from parallel wall channels: applying solution to calculating geometrical characteristics of fluid jet amplifiers
12 p2016 A69-25877

Analog jet elements of pneumatics operating on direct interaction between streams, calculating statistical characteristics for analog jet amplifying element
14 p2393 A69-28744

Fluidic direct impact modulator design, studying effects of pressure levels and nozzle geometries
[ASME PAPER 69-FLCS-38] 20 p3465 A69-37978

Proportional fluid jet amplifier with flat saturation characteristics, describing gain, differential output pressures and noise levels
[ASME PAPER 69-FLCS-21] 20 p3466 A69-37981

JET AUGMENTED WING FLAPS

U WING FLAPS

JET BLAST EFFECTS

Real time real temperature exhaust gas reingestion and structural heating test facility for jet lift V/STOL configurations
[AIAA PAPER 69-310] 09 p1479 A69-22388

Jet influence and aerodynamic force changes on V/STOL aircraft in transitional and high speed flight investigated in wind tunnel tests for fighter aircraft
16 p2734 A69-31937

Ground jet suppression fences for VTOL aircraft: prepared pads, investigating erosion reduction and particle entrainment
[AIAA PAPER 68-639] 17 p2902 A69-34028

Blast angle effect on fanjet gas dynamics in crosswind, using equations for free lateral flow trajectories and reverse flow regions
21 p3850 A69-38863

JET BOUNDARIES

Jet line in rotational incompressible plane flows around shrouded propeller blade, using electrical analog
01 p0058 A69-10037

Incompressible laminar jet bounded by two parallel walls or by three walls, using linearized analysis related to Oseen approximation
14 p2429 A69-29023

Free jet boundary layer in mixing zone of hypersonic gas flow past body
20 p3513 A69-37094

JET CONDENSERS

Jet condenser at very low pressure in organic Rankine cycle power conversion system noting role in power efficiency
23 p4068 A69-42238

JET CONTROL

Fluid amplifiers, discussing digital and proportional jet-interaction devices and circuits
05 p0704 A69-16004

Direction changing of large solid propellant motors by changing jets angle or gas injection
07 p1230 A69-19291

Aerodynamic characteristics of elliptical airfoils with jet circulation control for VTOL rotors including dual jets and cyclic results
[AIAA PAPER 69-741] 18 p3084 A69-34406

Spacecraft control systems with computer command redundant jets for linear and angular pulses, relating configuration design to level-of-redundancy and task dimension
[AIAA PAPER 69-845] 21 p3822 A69-39375

JET DAMPING

U DAMPING

U SPIN REDUCTION

JET ENGINE FUELS

NT JP-4 JET FUEL

Jet fuel lubricity evaluation by ball-on-cylinder device
[ASLE PREPRINT 68AM 4A-2] 01 p0083 A69-10914

Permissible JP-5 fuel sulfur content effect on hot corrosion of protective coated Ni-base superalloys in marine environment, noting atmospheric sea salt role
01 p0141 A69-11059

Sulfur organic compound formation effect on composition and structure of solid phase formed during hydrocarbon jet fuels oxidation
01 p0142 A69-11097

Disulfide effects on jet fuel operating characteristics and demercaptanization influence on thermal stability, corrosive action and sedimentation
01 p0142 A69-11098

Corrosive characteristics of jet fuels near condensing water studied by weight loss method, using copper alloy plates
01 p0142 A69-11099

Combustion products temperature and composition in chamber or at nozzle exit calculated for fuels containing excess oxidizer ratios greater than unity
04 p0684 A69-14486

Aluminum corrosion by fungi isolated from jet fuel system with predominance of *Cladosporium resinae*, noting protective coatings
04 p0616 A69-14765

Aluminum corrosion by fungus culture isolated from jet fuel system
06 p0941 A69-17123

Turbine and jet engines kerosene fuels tests in small and medium size laboratory combustion chambers
13 p2240 A69-27932

Jet fuel quality improvement by adding isopropylolactadecylamine and other substances because of surface-active and sorptive qualities
16 p2828 A69-31562

Mono and bicyclic hydrocarbons effect on jet fuels combustion properties, considering burnup factor, deposit and smoke production levels
18 p3184 A69-35382

Supersonic transport aviation fuel thermal stability measurement data correlated with data deduced from heat transfer measurements
19 p3393 A69-36210

Open cell ester-base polyurethane foam effect on fuel-utilizing microorganisms growth in jet fuel-water systems
24 p4271 A69-42700

JET ENGINES

NT BRISTOL-SIDDELEY OLYMPUS 593 ENGINE
NT DUCTED FAN ENGINES
NT J-79 ENGINE
NT J-85 ENGINE
NT PULSEJET ENGINES
NT RAMJET ENGINES
NT SUPERSONIC COMBUSTION RAMJET ENGINES
NT T-53 ENGINE
NT TURBOFAN ENGINES
NT TURBOJET ENGINES
NT TURBOPROP ENGINES

In-flight and flight line checkout techniques for foreign object damage to jet engines
01 p0056 A69-11055

Coaxial jet mixing regimes in jet engines, determining requirements for compatibility by applying aerodynamic theory of ejectors
[ONERA-TP-599] 02 p0187 A69-11619

Pressure oscillation production in wind tunnel by hinged plates in test section walls to test jet engine inlets under controlled conditions
02 p0229 A69-12537

Electrochemical grinding application to metal cutting of refractory alloys in aircraft jet engine overhaul
[SAE PAPER 680662] 03 p0433 A69-13453

Combustion in high power jet engine combustion chamber in case of continuous and intermittent liquid fuel injection
08 p1421 A69-20762

Jet engine gas flow, temperature, velocity and pressure measurements by analog and digital systems
08 p1316 A69-20869

Jet mixing applications to aircraft engines, discussing one dimensional calculation of coaxial streams mixing inside conduit
09 p1429 A69-21305

Air powered fluid jet engine compressor bleed control stressing closing, reset and override operations
[ASME PAPER 69-GT-19] 09 p1571 A69-22498

Effective cost improvement of product and profit planning activity in jet engines production stressing J47 and J79 engines
[ASME PAPER 69-GT-61] 09 p1513 A69-22516

Jet aircraft engines condition monitoring system for detecting malfunctions without engine disassembly
[ASME PAPER 69-GT-66] 09 p1501 A69-22518

Airborne integrated in-flight data system to record and evaluate various engine parameters of operating jet engines
10 p1660 A69-23262

Howell engine hot section analyzer /HSA/ developed to improve maintenance, flight safety and costs of jet aircraft engines
10 p1671 A69-23263

Fluidic compressor bleed control unit for TF-30 jet engine to prevent stall at low rpm operation
10 p1753 A69-23559

Soviet book on electric ignition systems for piston and jet engines and design aspects of different types of ignition systems
12 p2146 A69-26756

Concorde jet engine silencer concept and characteristics
[AIAA PAPER 67-391] 12 p2148 A69-26759

Shorter combustors for high temperature jet engines of high speed aircraft, considering lifetime, shroud scoops, overheating, warpage, etc
14 p2509 A69-29433

Face seals for jet engine mainshaft bearing compartments, emphasizing oil film and gas film seals
[ASLE FICFS PREPRINT 28] 15 p2620 A69-30487

Jet engine intershaft bearing oil feed design, discussing use of nonrotating feed link and improvement of oil scavenging at high altitudes
15 p2671 A69-30702

Monograph on dynamic behavior of jet engines especially during perturbations based on linear theory
15 p2671 A69-30931

Thermocouples precision used for measuring metal temperatures of cooled jet engine turbine buckets
15 p2613 A69-31274

Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role
[AIAA PAPER 69-488] 16 p2843 A69-32706

Temperature and flow measurements in jet engine combustion chamber, discussing design and calibration of gasdynamic thermometer, double thermocouple and flow probe
17 p2945 A69-32947

Aerodynamic characteristics of plane inviscid fluid jets expanding over curvilinear surface, deriving force equations for surfaces in jet and rocket engines
19 p3296 A69-35815

Jet engine compressors and fans, combustors, turbines and composite materials in evaluating thrust-weight ratio, engine size, weight and life, etc
19 p3395 A69-36322

Jet engine risetime effect on spacecraft orientation control system performance, assuming monotonic or external thrust mode
19 p3370 A69-36619

JR 100 F lift jet engines for Japanese national aerospace laboratory produced as part of VTOL developing program
21 p3785 A69-38608

Jet engine noise technology evaluation, noting effects on airport neighbor
[RAES PAPER 13] 22 p3999 A69-40492

DC-10 aircraft CF6 engine thrust reverser and spoiler design features impacting operational characteristics, maintainability, noise reduction, structural concept, control and actuation system
[SAE PAPER 690411] 23 p4200 A69-41639

Jet engine combustion temperature measurements by thermocouples or gas analysis noting errors involved
23 p4165 A69-41650

JT9D engine fuel and vane control systems for Boeing 747, noting computing system positioning of throttle valve for fuel flow control
[SAE PAPER 690405] 23 p4201 A69-41658

Sonic diagnostic engine analyzer for detecting jet engine malfunctions prior to failure
24 p4312 A69-42758

JET EXHAUST

Jet engine exhaust composition and methods for reducing smoke emission through burner design changes, noting primary zone fuel and airflow pattern
[SAE PAPER 680348] 03 p0495 A69-13350

Aircraft test setup design and techniques to simultaneously measure engine thrust and engine thrust minus drag, noting nozzle configurations variations effect
[AIAA PAPER 68-395] 12 p2059 A69-26769

Circular jet flow exhausting at right angles from plane wall into uniform cross flow, considering application to V/STOL aircraft
17 p2896 A69-34036

JET FLAMES
U FLAMES

JET FLAPS

Thin jet-flapped airfoil flow analysis in ground proximity at small angle of incidence, assuming inviscid incompressible flow
09 p1431 A69-22275

Numerical solutions of thick cambered jet flap in ground effect for flat plate and diamond shaped airfoil
[AIAA PAPER 69-738] 18 p3083 A69-34404

Circulation controlled rotor aerodynamics with tangentially ejected air from surface slots of lifting body, noting performance at advance ratios and thrust coefficients
18 p3089 A69-35232

Jet flap as alternative to rigid diffuser for momentum propulsion, discussing thrust augmentation
[AIAA PAPER 69-777] 19 p3393 A69-35645

Monograph on interaction between primary and jet flapped secondary airfoils covering line-vortex use for lift augmentation, aerodynamic characteristics, etc
19 p3242 A69-36820

Thin jet flapped airfoil analysis with wake fully developed from leading edge and jet flow reflected from ground
22 p3861 A69-41184

JET FLOW

NT AIR JETS
NT PERIPHERAL JET FLOW
NT SUPERSONIC JET FLOW

Thermal radiation effects on two dimensional steady MHD jet of conducting ionized gas confined by magnetic field
02 p0287 A69-11831

Performance cost functions for reaction jet controlled system during on-off limit cycle for stable and unstable plant
02 p0278 A69-11965

Three dimensional wakes and jets, discussing center-line velocity, half width growth and velocity irregularities
02 p0190 A69-12549

Flame stabilization by jet flame holders for case of different composition of jets and incident flow
03 p0531 A69-12956

Laminar two dimensional free jet outflow of incompressible nonNewtonian pseudoplastic fluid from orifice into mass of same fluid
04 p0586 A69-14406

Coaxial flow jet chamber flow patterns dependence on inlet gas velocity, density and length/diameter ratio
[AIChE PAPER 25B] 04 p0587 A69-14509

Fast response thin skinned calorimeters for high heat flux profiles of arc jet flows
04 p0602 A69-15427

Stationary velocity profile near jet driven vortex tube outer wall calculated by laminar boundary layer flow theory, neglecting wall curvature effects
05 p0798 A69-15610

Airflow and power requirements of compressible hovercraft jet operating under equilibrium conditions
05 p0697 A69-15708

Incompressible jet flows, discussing two dimensional jet, axisymmetric laminar jet and turbulent free jet
05 p0746 A69-16008

Flow characteristics about curved lateral jet, discussing effect of pitot tube nozzle shape and turbulence
05 p0746 A69-16017

Plane supersonic flows separated by thin film shaped jet, deriving pressure as function of deviation
05 p0746 A69-16020

Heat transfer, temperature and velocity profiles in circular free jet can be described by heat conduction type equations
05 p0747 A69-16032

Flow field for single or multiple jets firing forward into oncoming supersonic free stream, noting effect of forward extending cylindrical body
[AIAA PAPER 69-69] 06 p0864 A69-18164

Stream function for plane free sonic gas jet flowing past profile
07 p1050 A69-18740

Navier-Stokes equations solved for viscous incompressible fluid flow due to laminar jet flow into channel in presence of magnetic field
07 p1120 A69-18997

Laminar conducting wall jet injected in transverse magnetic field, analyzing partial differential equations obtained
07 p1192 A69-19020

Analytical model of spoiler generated sound in jet pipe, presenting data on level, spectrum and directivity of sound
07 p1183 A69-19462

Jet flow and wakes in external stream and tailored pressure gradients, deriving similarity solutions for boundary layer equations
08 p1252 A69-20782

Incompressible jets bounded by infinite auxiliary thin jets, discussing straight wall jets and establishing existence and uniqueness of boundary value problem solution
09 p1480 A69-21734

Closed form solution for boundary shape of undeexpanded axisymmetric jet in still air
09 p1482 A69-21968

Thin jet-flapped airfoil flow analysis in ground proximity at small angle of incidence, assuming inviscid incompressible flow

09 p1431 A69-22275

Blasius-Chaplygin formula for generalizing Kutta-Joukowski theorem concerning jet profiles, calculating resultant of hydrodynamic forces

11 p1867 A69-24355

Kinetic theory for spherical expansion of hypersonic jet flow indicating translational freezing in hypersonic source expansion

11 p1870 A69-25006

Low Reynolds number stability of incompressible fluid half jet flow, investigating free laminar boundary layer instability

11 p1874 A69-25280

Spacecraft attitude control with minimum energy control logic for small constant disturbance torques, considering reaction jet torques and fuel consumption

11 p1966 A69-25446

Sodium liquid-metal jet MHD generators tested under constant and rising magnetic fields and off and on loads

13 p2208 A69-27511

Resonance tube excitation from energy depletion in central part of subsonic jet supplying tube

13 p2247 A69-27738

Reduction of noise from underexpanded axisymmetric jet flows using radial jet flow impingement [AIAA PAPER 68-81]

13 p2248 A69-28212

Monograph on return currents produced by confined jet of incompressible fluid with low initial ambient fluid velocity

13 p2250 A69-28335

Oscillation in resonance tubes excited by subsonic jet, analyzing pressure and frequency for small Mach numbers by using wave diagram

13 p2370 A69-28630

Laminar to turbulence transition in submerged and bounded jets, using schlieren visualization for compressible flow and birefringent visualization for incompressible flow

14 p2428 A69-28876

Attachment and separation of free jet from wall, discussing model equations for wall attachment fluid amplifier

14 p2428 A69-28877

Incompressible laminar jet bounded by two parallel walls or by three walls, using linearized analysis related to Oseen approximation

14 p2429 A69-29023

Unsteady jet viscous fluid flow under pulse variations based on Prandtl equations, showing turbulent motion analogy

14 p2432 A69-29608

One dimensional approximation for free jet nozzle flow in perpendicular magnetic field, calculating velocity distributions

14 p2501 A69-29910

Numerical analysis for spreading of free turbulent gas jets with arbitrary uneven initial distribution of momentum and heat and mass fluxes

15 p2590 A69-30157

Monograph on static pressure and turbulence in free jets and jet flames covering radial velocity oscillations with and without chemical reactions, confined jets turbulence, etc

15 p2719 A69-31190

Trails arising in wake of fan type jets in transverse gas flow during uniform fuel-air mixture combustion

16 p2879 A69-32140

Linearized motion equations for conducting gas in magnetic and electric field solved for coaxial channel and free jet, assuming small Reynolds number and parallel flow

17 p3010 A69-33016

Mach disk and Riemann wave location, size and strength in underexpanded jet flows, proposing model for conservation equation satisfaction [AIAA PAPER 69-665]

17 p2954 A69-33460

Circular jet flow exhausting at right angles from plane wall into uniform cross flow, considering application to V/STOL aircraft

17 p2896 A69-34036

Rarefied gas dynamics for continuous medium and discrete molecules assemblage, discussing flow over blunt model and free jet flow from sonic orifice

18 p3122 A69-34812

Rarefied gas dynamics of blunt and sharp-pointed slender bodies in supersonic stream and free jet sonic expansion into high vacuum

18 p3123 A69-34924

Aerodynamic characteristics of plane inviscid fluid jets expanding over curvilinear surface, deriving force equations for surfaces in jet and rocket engines

19 p3296 A69-35815

Force on circular plate near screen due to incident potential incompressible jet flow

19 p3297 A69-35816

Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle

19 p3377 A69-36180

Jet and Mach disk density measured by fluorescence electron beam technique, calculating Mach disk thickness from density profiles

19 p3239 A69-36396

Boundary layer formed in miniature nozzle studied for effect on jet spreading discharged into space at high Mach numbers

19 p3395 A69-36760

Rocket nozzle control by side forces produced by secondary gas stream injection observed for relationship with inclination angle to nozzle axis

20 p3457 A69-37065

Shock structure in two dimensional or axisymmetric jet flows under transverse impingement by low energy jets [ASME PAPER 69-FLCS-41]

20 p3515 A69-37975

Heat transfer to compressible laminar jet flowing along flat wall, obtaining distributions of temperature, wall shearing stress, heat transfer rates and jet thicknesses [ASME PAPER 69-FLCS-30]

20 p3516 A69-37979

LF switching in wall attachment type digital wall amplifiers, studying visual and quantitative values for switch pressure and flow as function of geometric variables [ASME PAPER 69-FLCS-31]

21 p3649 A69-38604

Velocity decay and heat transfer rates measurement in cylindrical wall jet formed by jet emerging through convergent nozzle

21 p3695 A69-38972

Pulsed performance of saturated steam reaction jet, comparing steam performance to nine gases for equal temperatures and thrust levels

21 p3785 A69-39021

Simultaneous passage of two unmixed gas flows through joint two circuit turbojet nozzle into ambient medium

21 p3785 A69-39094

Jet deflection in drifting subsonic gas flow

21 p3644 A69-39096

Concentration distribution of admixture in semibounded jet propagating along nonheat conducting plate, obtaining concentration profiles for various thermal and diffusion Prandtl numbers

21 p3854 A69-39844

Integral relations method applied to air jet flow along cylinder with boundary layer control by suction or blowing

21 p3698 A69-39845

Thermal boundary layer formed during laminar jet flow over flat porous plate, discussing temperature distribution and mass transfer at plate surface

21 p3854 A69-39846

Coaxial turbulent compressible gas jets propagation, discussing mass buildup data in coaxial jets

21 p3645 A69-39847

Aligned uniform magnetic field effect on hydromagnetic stability of two dimensional incompressible electrically conducting jet flow with large Reynolds number

22 p3931 A69-40687

Pitching characteristics of three dimensional peripheral jet ground effect machines with compartment partition along pitch axis, considering longitudinal static stability and dynamic pitching motion

22 p3866 A69-40818

Aerodynamics of twisted jet propagating in same fluid by asymptotic expansion, analyzing twist influence on heat transfer

24 p4244 A69-43057

JET IMPINGEMENT

Potential flow of stream interaction with two dimensional thin jet, discussing jet penetration depth

01 p0007 A69-11019

Heat transfer near stagnation point in axisymmetric turbulent jet impinging on circular disk

02 p0354 A69-12491

Supersonic gas jet impingement on inclined plane barrier, calculating parameters by approximation

03 p0413 A69-12958

Heat transfer characteristics of single lines of circular air jets impinging on concave cylindrical surfaces, discussing nozzle target spacing effect [ASME PAPER 68-WA/GT-1]

05 p0848 A69-16137

Impinging jet flames on furnace hearth, analyzing thermal boundary layer characteristics and convective heat transfer rates

06 p1035 A69-17933

Axisymmetric jet impingement against solid plane from tube at finite distance, using nonlinear partial differential equation in finite difference form [AICHE PAPER 31F]

08 p1302 A69-19847

Supersonic jet impingement on flat plate, showing shock wave profiles and slipstream surface at stations parallel to nozzle axis

08 p1252 A69-20841

Surface heat transfer coefficients under perforated plate of multiple square array round impinging air jets [ASME PAPER 69-GT-4]

09 p1624 A69-22508

Cavity formation on water and wet cement surfaces by impingement of axisymmetric air jet noting cavity shape, depth and diameter

11 p1869 A69-24888

Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes

12 p2190 A69-26781

Reduction of noise from underexpanded axisymmetric jet flows using radial jet flow impingement [AIAA PAPER 68-81]

13 p2248 A69-28212

Impingement pressure analysis associated with two phase cryogenic propellant venting to space environment

16 p2869 A69-32753

Internal heat transfer coefficients for impingement cooling of gas turbine airfoil leading edge [AIAA PAPER 68-564]

17 p3022 A69-34021

Water jets with greater than half sound speed created by shock wave impinging on cavity within liquid, discussing mechanism, maximum speed, shape, etc

19 p3301 A69-36815

Shock structure in two dimensional or axisymmetric jet flows under transverse impingement by low energy jets [ASME PAPER 69-FLCS-41]

20 p3515 A69-37975

Forced and periodic motion of air or water jets impinging in double input vortex chamber described in terms of oscillator deriving energy from hydrodynamic instability [ASME PAPER 69-FLCS-19]

20 p3465 A69-37981

Circular liquid jet oblique impingement on flat surface, noting dry zone occurrence at small angles due to lateral flow deflection

21 p3691 A69-38551

Supersonic fan-shaped jet formation by identical colliding underexpanded jets, calculating subsonic flow between interaction plane and curvilinear shock wave

21 p3643 A69-38643

Polymer films damage due to supersonic plasma jets, comparing fracture relief of oriented and unoriented polymers

21 p3752 A69-39081

Free and dividing streamlines shapes for two dimensional jet from parallel walls penetrating into counterstream, discussing finite cavities

22 p3859 A69-40143

Jet dynamic characteristics injected into supersonic air slipstream incident on flat body, calculating configuration, shock wave geometry and parameters distribution in flow field

24 p4250 A69-43710

JET LIFT

Temperature stresses analysis for jet lift VTOL aircraft structure during takeoff and landing, discussing fire hazard in lift pod

04 p0548 A69-14841

Engines for V/STOL application, discussing aerodynamics of thrust lift and lift jet engines

05 p0811 A69-15553

Aerodynamic effects of lift jet and lift fan inlets in transition flight, analyzing inlet momentum lift, inlet lip lift and drag [AIAA PAPER 68-637]

12 p2014 A69-26767

Reaction forces for jet lift VTOL attitude control during hover and transition, considering hot gas and pitch ducting applications [AIAA PAPER 69-545]

16 p2735 A69-32756

Ground simulations data of jet lift V/STOL compared with visual flight results, studying hover, lateral quick start and stop maneuver [AHS PAPER 362]

17 p2946 A69-33519

JET MIXING FLOW

- Plane MHD jets with variable conductivity, showing effective mixing length as function of distance
01 p0130 A69-10773
- Meksyn method application to problems of jet mixing and jet reattachment
02 p0233 A69-12530
- Confined jet mixing region at entrance of tubular reactor, discussing mass and momentum transfer, chemical conversion and effect of Reynolds number [AICHE PAPER 25A]
04 p0586 A69-14508
- Axial deviation of gas flow resulting from mixing turbulent gas jets
04 p0591 A69-15411
- Jet perpendicular penetration prediction from holes or tubes, discussing resultant gas stream mixing and temperature profiles [ASME PAPER 68-WA/GT-8]
05 p0750 A69-16143
- Mixing and combustion of gaseous and particle laden jets in air stream, analyzing turbulent, coaxial and jet mixing flows [AIAA PAPER 69-33]
06 p1038 A69-18146
- Fuel mixing mechanism in diffusion type supersonic combustion, noting influence of combustor configuration and fuel density [AIAA PAPER 69-32]
07 p1242 A69-19266
- Jet mixing applications to aircraft engines, discussing one dimensional calculation of coaxial streams mixing inside conduit
09 p1429 A69-21305
- Excess velocity and temperature decay laws in axisymmetric jet in transverse flow obtained via jet momentum and heat conservation equations
10 p1679 A69-23568
- Mixing zone of plane jet in rectangular nozzle mounted at end of controlled velocity wind tunnel
12 p2062 A69-26287
- Discontinuity coefficient on boundaries of mixing zone of plane jet, observing homogeneity of thermal and kinematic structures
13 p2247 A69-27978
- Air-hydrogen supersonic mixing and combustion, characterizing hot hydrogen jet discharging into supersonic concentric air stream at atmospheric pressure [AIAA PAPER 69-339]
13 p2378 A69-28275
- Fluctuating turbulent stress measurements in mixing layer of two dimensional jets including intensity, spatial correlation and wave-number fluctuating stress frequency spectra
14 p2431 A69-29577
- Three dimensional laminar jet mixing of incompressible viscous fluid from rectangular cross section nozzle into uniform stream
16 p2768 A69-31687
- Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures [AIAA PAPER 69-538]
16 p2843 A69-32705
- Vortex motion enhancement of jet penetration and spreading in supersonic fuel injection into large diameter combustors [AIAA PAPER 69-664]
17 p2953 A69-33437
- Jet injection into free circular cross section cross wind using curvilinear dynamic model, assuming negligible Archimedean forces effect
18 p3124 A69-35149
- Cold subsonic coaxial jets observed for relationship between noise output and flow characteristics, showing effect of relative annular and central jet velocities
20 p3513 A69-37063
- Laminar jet mixing of incompressible viscous fluid issuing from rectangular nozzle into uniform stream, considering various boundary conditions [ASME PAPER 69-FLCS-22]
20 p3516 A69-37976
- Flow separation and reattachment points and line of zero velocity jet mixing determined by injecting smoke [ASME PAPER 69-FE-29]
20 p3517 A69-37994
- Supersonic fan-shaped jet formation by identical colliding underexpanded jets, calculating subsonic flow between interaction plane and curvilinear shock wave
21 p3643 A69-38643
- Turbulent gas jet mixing in chamber with four inlet nozzles
21 p3785 A69-39102
- Free and dividing streamlines shapes for two dimensional jet from parallel walls penetrating into counterstream, discussing finite cavities
22 p3859 A69-40143

JET NOZZLES

- Interactions between outer and inner jets behind maximum cross section of jet engine nozzle [ONERA-TP-600]
02 p0187 A69-11620

Diathermal regenerative cooling of combustion chambers and engine nozzles with supercritical heat transfer mode
03 p0495 A69-12970

Noise intensity measurements in far field of circular nozzle for jet noise composition
17 p2957 A69-33602

Soviet monograph on turbines and jet nozzles for two phase flows covering gas-particle velocity and temperature differences, turbine design, etc
20 p3586 A69-38209

JET PILOTS

U AIRCRAFT PILOTS

JET PLUMES

U PLUMES

JET PROPULSION

Biowaste propelled resistojet control systems selection criteria based on NASA Manned Orbital Research Laboratory with six man crew [AIAA PAPER 68-121]
04 p0554 A69-15506

Isotopic propulsion engine development problems, emphasizing single channel thermal power engine with hydrogen working fluid
05 p0811 A69-15596

Water jet propulsion for air cushion vehicles, emphasizing inlet shape effect on performance and potential flow theory application to inlet design
08 p1254 A69-20115

Book on theory and design of jet, rocket, nuclear, ion and electric propulsion systems noting combustion, detonation, fluid injection and space mission applications
11 p1943 A69-25582

Optimum adaptation of propulsion gas generators to power jet driven rotors with blown flap control, considering jet engine, fanjet and engine driven compressor
17 p3020 A69-33344

Jet flap as alternative to rigid diffuser for momentum propulsion, discussing thrust augmentation [AIAA PAPER 69-777]
19 p3393 A69-35645

JET PUMPS

Jet pump head rise deterioration parameter for prediction of cavitation
05 p0745 A69-15791

Bleed air environmental system utilizing air to air jet pumps as flow multipliers for cabin pressurization air supply in commercial turboprop aircraft [SAE PAPER 690331]
11 p1941 A69-24494

Jet pump actuation of intermittently operating variable density closed circuit subsonic wind tunnels, measuring wind tunnel power factor
11 p1892 A69-25371

Noncavitating and cavitating performance of low area ratio water jet pumps, analyzing efficiency, area ratio, throat length, nozzle spacing and diffuser geometry
18 p3095 A69-35176

JET STREAMS [METEOROLOGY]

Objective layer of maximum wind /LRMW/ analysis technique for Northern Hemisphere jet stream, noting generation of initial guess fields
01 p0110 A69-10689

Jet stream cirrus radiative characteristics from airborne IR measurements, noting cirrus cloud emission and transmission and cirrus height and temperature estimates
01 p0110 A69-10694

Barotropic instability analyses by method of jet stream like fields and energy transport from zonal current to wave disturbances based on vorticity equation
02 p0276 A69-12758

Aircraft reports of clear air turbulence over North Atlantic, discussing jet stream proximity and large amplitude ridge associated with occlusion point
08 p1345 A69-19885

Jet flows instabilities with vertical and horizontal velocity drifts from numerical integration of atmospheric motion equations linearized with respect to small perturbations
12 p2125 A69-25950

Jet stream winds direction correlated with direction of LF pressure disturbances crossing microbarograph array
12 p2125 A69-26015

Richardson number in vertical tropospheric region of maximum wind computed from data on jet streams observed in winter over radiosonde stations in Italy
13 p2295 A69-28656

Equatorial jet stream excitation of longitudinal waves, analyzing plasma beam instability and spectrum of short wave inhomogeneities by quasi-hydrodynamic equations
14 p2437 A69-29073

Jet stream vertical wind shear chart construction for aircraft with gas turbine propulsion
14 p2473 A69-29730

Jet streams as indicators of atmospheric circulation, considering all altitude observance and dynamics-energetics aspects
14 p2477 A69-29831

Self maintenance of absolute angular momentum in atmosphere as explanation of subtropical jet stream origin
15 p2647 A69-30192

Low level jet stream near meso-low on stationary front in Japanese rainy season analyzed from radar echoes, noting appearance of vertical current
16 p2809 A69-32601

Jet stream blocking process simulation using geostrophic system of equations, considering effects of orography and contrast heating due to land-sea distribution
16 p2809 A69-32602

Asteroidal jet streams from Hirayama family Flora, difficult to reconcile with exploded planet view
17 p3030 A69-33070

Papers on experimental and theoretical research on atmospheric circulations, jetstream and cyclonic disturbances
17 p2999 A69-33757

Planetary jetstream and general circulation energy transformations, applying circulation model results to specific weather situations
17 p3000 A69-33758

Lateral mixing of air masses in jet stream by water fluid model experiments, discussing steady and non-steady state turbulent momentum exchange
17 p3000 A69-33759

Cyclonic vortices production by horizontal convergence in rotating water bowl as function of bottom surface inclination, modeling cyclogenesis in jet stream entropy field
17 p3000 A69-33760

Satellite photograph analysis to investigate interaction between subtropical and polar front jet streams
18 p3166 A69-34827

Cirrus clouds occurrence, position and wind velocities on jetstream axes based on statistical analysis of aerological data and satellite TV pictures
19 p3366 A69-36669

Synoptic and mesoscale cloud patterns near low level jet from Tiros 7 and 8 photographs, noting status formation and dissipation
20 p3570 A69-37404

JET THRUST

Performance cost functions for reaction jet controlled system during on-off limit cycle for stable and unstable plant
02 p0278 A69-11965

Engines for V/STOL application, discussing aerodynamics of thrust lift and lift jet engines
05 p0811 A69-15553

Spacecraft attitude control with minimum energy control logic for small constant disturbance torques, considering reaction jet torquers and fuel consumption
11 p1966 A69-25446

Thrust balance for scale model of powered nacelle fan jet engine from drag analysis in wind tunnel, deriving fan nozzle velocity coefficient
13 p2199 A69-27446

Minimum time single axis capture of satellite spinning about pitch axis by low thrust jets, considering gravity gradient phenomenon
17 p3048 A69-33237

Jet engine risetime effect on spacecraft orientation control system performance, assuming monotonic or extremal thrust mode
19 p3370 A69-36619

Pulsed performance of saturated steam reaction jet, comparing steam performance to nine gases for equal temperatures and thrust levels
21 p3785 A69-39021

Controllers design for reaction jet controlled aerospace vehicles, studying second order pitch-plane representation with actuator modeled as pure delay [AIAA PAPER 69-854]
21 p3822 A69-39382

Turbofan engine influence on civil transport aircraft design as function of thrust, discussing engine ratings, number of engines, APU and thrust engine
22 p3862 A69-39961

Nonlinear adaptive reaction jet attitude control for long life space vehicles, providing optimal performance over bias acceleration disturbances [AIAA PAPER 69-945]
22 p4036 A69-40328

JET VANES

- Fluidic system controlling inlet guide vanes to high pressure compressor of two spool jet engine, using digital elements to drive hydraulic servosystem
02 p0305 A69-12090
- Compressor inlet Mach number choice to control high performance variable stator compressors geometry
[ASME PAPER 69-GT-14] 09 p1571 A69-22502
- JT9D engine fuel and vane control systems for Boeing 747, noting computing system positioning of throttle valve for fuel flow control
[SAE PAPER 690405] 23 p4201 A69-41658

JETAVATORS

U GUIDE VANES

JETS

- V/STOL air intakes and jets simulation in wind tunnel tests, noting thrust simulation possibilities
11 p1866 A69-25431
- Shock tube with cylindrical explosive to implode glass wall and produce high velocity glass particle jet, studying jet velocity and behavior and test gas pressure effects
18 p3116 A69-34460

JETTISON SYSTEMS

- Small column insulated delay /SCID/ aircraft seat ejection systems, illustrating weight saving
06 p0877 A69-16957
- ELDO Europa 1 Fairings Jettisoning System and explosive devices, discussing heat shield structure and safety regulations
10 p1635 A69-23027
- Test facility for qualification of satellite fairings jettisoning system, describing accelerating tower and recording and control instrumentation
16 p2765 A69-31739

JETTISONING

- Full scale and transonic wind tunnel store separation characteristics, outlining uses of heavy and light scaling methods
17 p2896 A69-34035

JITTER

U VIBRATION

JODRELL BANK OBSERVATORY

- Jodrell Bank RF digital autocorrelation spectrometer based on time delay related to signal power spectrum through Fourier transform
17 p2970 A69-32856

JOINING

NT EXPLOSIVE WELDING

- Oxide ceramics finishing processes, discussing leaching, machining, surface finishing, strengthening by compressive surface layers and joining
09 p1510 A69-22350
- Silicated alumina attachment for high temperature radomes and leading surface heat shields, discussing stress concentration and load transfer
09 p1477 A69-22370
- Vacuum heat treating and joining process for various ferrous and nonferrous metals and alloys, discussing advantages, applications and economics
[ASM PAPER D8-22.3] 20 p3551 A69-38132

JOINTS (JUNCTIONS)

- NT BUTT JOINTS
- NT LAP JOINTS
- NT METAL JOINTS
- NT RIVETED JOINTS
- NT SEAMS (JOINTS)
- NT SOLDERED JOINTS
- NT SPOT WELDS
- NT WELDED JOINTS
- Structural analysis by direct moment distribution, Volume 1, covering statistically indeterminate structures formed of prismatic members
01 p0165 A69-10156
- Spar attachments of aircraft wings analyzed with respect to weight and applied loads, determining optimum bolt diameter ratio to lug width
04 p0673 A69-14496
- Shim joints design for composite material structural members reinforcement in joint region, considering weight factor
[AIAA PAPER 68-341] 11 p1987 A69-25369
- Bolt materials selection criteria in design of high strength lightweight joints, showing fatigue curves and temperature effects
13 p2268 A69-27758
- Composite airframe structural joint design and weight considerations for boron and glass fiber reinforced plastic materials
[ASM PAPER W9-23.1] 14 p2535 A69-29448
- Thermocompression joints strength measured using friction test, centrifuging and microtensile tests
15 p2573 A69-30081

Wire-wrap solderless joints production technology in electronic equipment

- 16 p2763 A69-32579
- Reliable structural joints and attachments design for components fabricated from nonmetallic refractory brittle materials, discussing departures from conventional practices
17 p3061 A69-33569
- Torque calculations about joints of rigidly chain-like arranged clusters of flying bodies
18 p3208 A69-34776
- Rigidity of rotors with pin joints, calculating moments of inertia at connected sections of turbine shaft disks utilizing similarity concept
19 p3324 A69-35832

Adhesives and adhesive resin bonding, describing internal stresses in joints, joints design for bonding, strength, bonding processes and testing

- 21 p3752 A69-38932
- Intersection plane stresses in internally pressurized cylindrical shells joined over elliptic face
22 p4040 A69-39978
- Plane-truss joints displacements determined by graph-analytic method, discussing representation of fictitious forces and moments
23 p4225 A69-41420
- Traction stresses distribution over contact surfaces using photoelastic frozen stress model
23 p4235 A69-42461
- Adhesive joints design with uniform shear stress for prestressing wood beams
24 p4323 A69-43425
- Composite-to-metal joints design and fabrication, using carbon yarn in epoxy matrix for missile interstage application
24 p4323 A69-43426
- Adhesive bonded joints for glass resin composite sandwich helicopter structures, describing aircraft applications
24 p4403 A69-43462

JORDAN FORM

- Riemann problem in regions, showing integral operators become bounded if closed rectifiable Jordan curve without cusps becomes curve of bounded rotation
06 p0947 A69-16893
- Rational transfer function matrix realization into irreducible Jordan canonical form state equation by nonsingular transformations
12 p2122 A69-26511

JOSEPHSON JUNCTIONS

- Electromagnetic waves parametric interactions during unsteady Josephson effect as function of wavelength ratio, magnetic field penetration and contact dimensions
02 p0293 A69-11464
- Josephson voltage-frequency relation independence of superconductor nature, noting e/h value and importance to voltage standards and quantum electrodynamics
02 p0299 A69-12599
- Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor
03 p0484 A69-13284
- Superconductor tunnel junction with noise, calculating frequency pulling, radiation linewidth and voltage power spectrum in AC Josephson effect
03 p0486 A69-13387
- Magnetic field dependences of Josephson critical current in high and low current Josephson junctions, discussing influence of induced self field
04 p0640 A69-14437
- Electromagnetic properties associated with presence of overlapping bands in pure superconductors, discussing temperature dependence
05 p0810 A69-16802
- Temperature dependence of Josephson critical current in superconductor model having anisotropic energy gap
05 p0810 A69-16803
- Experiments on Josephson tunneling junctions and superconducting contacts to demonstrate quantum electronic properties of superconductors
[IEEE PAPER D-7] 07 p1200 A69-19052
- Stationary Josephson effect used to determine fluctuations influence on superconducting tunneling
09 p1556 A69-21669
- Josephson effects in superconductivity and superfluidity including electron tunneling DC and AC effects, basic and double junctions
11 p1938 A69-25240
- Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor
14 p2508 A69-29656

Josephson current density distribution in thin film superconductors, determining relation between tunneling current density and magnetic field for films with/without current

- 15 p2667 A69-30196
- Regenerative Josephson effect detector with feedback-narrowed far IR response as tunable millimeter and submillimeter wave radiation detector
19 p3313 A69-36417
- Josephson frequency-voltage relation at microwave and far IR frequencies compared, using radiation induced steps
20 p3583 A69-37418
- Josephson currents interaction with LF surface plasmons in superposed thin dielectric and superconducting metal films, noting I-V characteristics
22 p3992 A69-40420

JOUKOWSKI TRANSFORMATION

- Pressure distribution in two dimensional incompressible potential flow on Joukowski airfoils with normal upper surface spoilers, emphasizing potential flow theory
[AIAA PAPER 69-737] 18 p3083 A69-34402

Joule HEATING

U OHMIC DISSIPATION
U RESISTANCE HEATING

JOURNAL BEARINGS

- Gas flow analysis for externally pressurized porous journal gas bearing, considering circumferential flow in bearing clearance and porous bushing
01 p0085 A69-10312
- Whirl instability of externally pressurized gas journal bearing with peripheral feeding holes, discussing analytical natural frequency of shaft bearing systems
02 p0254 A69-12426
- Hydrostatic journal gas bearings calculations for carrying capacity, gas consumption and optimal dimensions for maximum lifting capacity
03 p0432 A69-12960
- Rayleigh step journal bearings, considering pressure distribution, load capacity and attitude angle and optimal film thickness ratio for incompressible fluid lubrication
04 p0605 A69-14587
- Pressurized fluid journal bearing with fluid fed into space between shaft and shell from plenum chamber in bearing housing through circumferential slots
06 p0931 A69-17529
- Optimum geometrical design of multipad externally pressurized journal bearings
07 p1141 A69-19439
- Rotors linear vibrations due to unbalanced shaft rotating on lubricated bearings taking into account lubricant damping
07 p1235 A69-19441
- Incompressible fluid unsteady motion between journal and bearing solved in form of Reynolds number power series from stream functions
09 p1514 A69-22712
- Analytic solution for whirl in finite journal bearing with continuous lubricating film using Fedor approach
[ASME PAPER 69-VIBR-55] 10 p1700 A69-24147
- Herringbone grooved gas lubricated journal bearing static and dynamic characteristics analyzed approximately, noting pressure distribution and vibration amplitudes
[ASME PAPER 68-LUBS-7] 13 p2265 A69-27269
- Matched asymptotic expansions to obtain slider bearing load carrying capacity
[ASME PAPER 68-LUBS-18] 13 p2266 A69-27270
- Herringbone grooved gas lubricated journal bearing stability, testing effects of geometries and clearances on onset speed for half frequency whirl
[ASME PAPER 68-LUBS-25] 13 p2266 A69-27271
- Load carrying capacity and friction calculated for pivoted pad journal bearings for machine design use
[ASME PAPER 68-LUBS-27] 13 p2266 A69-27275
- Linearized theory for stability of self acting gas journal bearings with noncircular members and elements of flexibility and damping, noting three lobed rotor
[ASME PAPER 68-LUBS-45] 13 p2266 A69-27277
- Externally pressurized gas lubricated journal and thrust bearings designs, citing reference literature
[ASME PAPER 68-LUBS-8] 13 p2267 A69-27282
- Gas lubricated hybrid journal bearings with external pressure, noting load capacity and stability in steady state and dynamic analyses
[ASME PAPER 68-LUBS-21] 13 p2267 A69-27284

- Infinitely long journal bearing using ionized gas lubricant with magnetic field applied axially and electric field applied transversely to fluid film [ASME PAPER 68-LUBS-30] 13 p2267 A69-27287
- Spiral grooved turbulent screw seal/viscoseal/analysis, combining results of spiral grooved journal bearing study with turbulent fluid film theory [ASLE FICFS PREPRINT 32] 15 p2619 A69-30482
- Pressure distribution in self acting hydrodynamic journal bearings without end leakage, presenting closed form solution for nonhomogeneous Reynolds equation with turbulence considerations 18 p3139 A69-34270
- Load capacities of graphite lined journal bearings, discussing factors affecting wear rates [SAWE PAPER 68-LC-9] 18 p3148 A69-35002
- Pressure increment due to inertia of rotating fluid film at journal bearing periphery theoretically estimated and measured 20 p3548 A69-37085
- Total load factor static vertical component and lubricant flow rate square related to pocketed hydrostatic journal bearing revolutions 24 p4321 A69-43091
- JOURNALS [SHAFTS]**
U SHAFTS [MACHINE ELEMENTS]
JP-4 JET FUEL
 JP-4 fuel emulsions properties, handling characteristics and safety performance, noting satisfactory shelf life and thermal stability [ASME PAPER 68-GT-24] 06 p0982 A69-17190
- Fuel control systems using emulsified fuel, noting exposure effects and temperature and pressure characteristics [ASME PAPER 69-GT-40] 09 p1571 A69-22486
- JUDGMENTS**
 Noise level perception and subjective judgments for broadband noise with single, modulated and multiple tones, considering tone correction procedures 11 p1830 A69-24796
- JUNCTION DIODES**
 Capacitance variation in junction varactors with linear graded, abrupt and hyperabrupt junctions, storage switching diodes and storage varactors 01 p0038 A69-10168
- GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods 01 p0137 A69-10259
- Negative resistance behavior of InSb diodes at 77 K, extending double injection theory for insulators to extrinsic semiconductors 02 p0294 A69-11722
- Punch-through microwave negative resistance diode explained and contrasted with similar Read and Shockley structures 02 p0215 A69-11938
- Cavity excitation and support of limited space-charge accumulation mode oscillations in n-GaAs epitaxial diode 02 p0297 A69-11940
- GaAs Gunn diode oscillators operating at Q band frequencies 02 p0297 A69-11944
- Parametric frequency divider using reverse biased hyperabrupt junction diodes to provide nonlinear capacitance 02 p0217 A69-12152
- Beam-lead fabrication on dual Schottky barrier diodes for low noise integrated microwave mixers 02 p0222 A69-12474
- Magnetic field effect on amplitude, frequency and form of LF oscillations in Gunn diodes 02 p0222 A69-12684
- Anisotropic pressure influence on silicon diodes parameters 02 p0223 A69-12839
- Space charge limited square law diodes as HF mixers, noting low conversion loss of asymmetrical type 03 p0404 A69-13580
- Plane reflector with variable reflection coefficient for electromagnetic centimeter waves, consisting of plane grating of semiconductor diodes mounted in waveguide 03 p0406 A69-13938
- Small transverse dimensions effect and domain formation criterion for surface oriented Gunn diodes prepared on thin epitaxial GaAs layers 04 p0639 A69-14335
- Hybrid Gunn domain and LSA mode operation in oversized bulk and epitaxially grown GaAs, noting large signal impedance data 04 p0639 A69-14339
- Radiation effects on III-V compounds, considering damage in solar cells and luminescence, light emitting and Esaki diodes 04 p0641 A69-14504
- Diffusion capacitance of p-n junctions, short base semiconductor diodes and p-n-p transistor, discussing systematic error in quasi-steady state calculation 04 p0580 A69-15489
- Emitter base lateral diode carrier injection effect on current gain properties of small area double diffused planar transistors 05 p0728 A69-15808
- Spectral output time variation of GaAs diode laser operating in Fabry-Perot modes 05 p0772 A69-15961
- Recombination radiation of tellurium and zinc doped GaAs alloy type diodes, discussing luminescence spectra, current-voltage characteristics and temperature effects 05 p0729 A69-16210
- Deep trapping levels caused by ion implantation doping, discussing level effects on electrical characteristics of zinc implanted GaAs diodes 05 p0808 A69-16287
- Microwave absorption and series resistance of silicon mesa parametric amplifier diodes, discussing p-n junction and dielectric loss mechanism 05 p0732 A69-16347
- Statistical studies of current-voltage characteristics of zinc-doped silicon diodes 05 p0732 A69-16425
- P-n planar avalanche photodiode without guard ring noting electrical properties, uniform multiplication and fabrication 05 p0733 A69-16559
- Threshold failure levels of semiconductor diodes and transistors due to pulse voltages 06 p0977 A69-16883
- Gallium arsenide double injection diode using vacuum deposited film electrode on single crystal substrate, noting current controlled negative resistance 06 p0893 A69-17156
- Solid state diodes made by pulsed laser irradiation of polished silicon surfaces, discussing application to integrated circuit design 06 p0893 A69-17157
- Broadband hybrid junction of parallel transmission lines application to four diode star mixer/modulator 06 p0896 A69-17485
- Silicon double injection diode, discussing HF noise measurement, Nyquist noise equivalent circuit for double injection process and source of LF noise 06 p0898 A69-17762
- Potential barrier curvature influence in aluminum trioxide tunnel junctions, noting ionic space-charge effect on shape 07 p1196 A69-18243
- Oversized GaAs Gunn effect diodes operated in L and S bands at harmonics of fundamental transit time frequency with high power and efficiency 07 p1196 A69-18444
- Computer model of Gunn diode, discussing operations under pulse bias voltage and in resonator 07 p1097 A69-18449
- Conditions for existence of stationary high field domain in Gunn diode 07 p1097 A69-18450
- Mechanically and electronically tunable resonator for driving IMPATT and Gunn diodes 07 p1097 A69-18455
- Barrier capacitance of semiconductor diodes for exact temperature measurement, discussing application to temperature to frequency converters 07 p1100 A69-18556
- Relaxation oscillations in Si p-n junction diode reverse-biased into avalanche calculated by computer program 07 p1101 A69-18651
- Forward transient response characteristics of high resistivity, long base, low lifetime p-n silicon diodes doped with Au, noting voltage oscillations 07 p1101 A69-18652
- Observation of photocurrents generated in Schottky barrier diodes on barium titanate, suggesting practical utility of photon-to-electron conversion efficiencies 07 p1104 A69-18905
- Semiconductor diode noise experimental measurements indicating fluctuation-dissipation theorem/FDT/inapplicability to all quasi-equilibrium systems 07 p1113 A69-19596
- Silicon on sapphire semiconductor technology for diode arrays used as read-only memories, discussing capacitance, resistance and pattern encoding by laser 07 p1113 A69-19767
- Gunn effect memory loop in pulse diodes consisting of two Gunn diodes connected in series 08 p1279 A69-19912
- Optimal electroluminescent efficiencies for vapor grown gallium arsenide phosphide diodes, analyzing current spreading, absorption, impurity and composition effects [ECS PAPER 103] 08 p1284 A69-20366
- Properties of ion implanted GaAs diodes fabricated at room temperature, analyzing light emission, resistance and breakdown voltage [ECS PAPER 172] 08 p1284 A69-20369
- Noise properties of junction diodes and bipolar transistors as basis for low noise amplifiers design 08 p1286 A69-20839
- Destructive breakdown in Schottky barrier diodes by evaporating contact metal through mask onto silicon, showing local heating by thin wax layer 08 p1286 A69-20860
- Richardson constant for thermionic emission in Schottky barrier diodes, noting effect of surface shadows 08 p1286 A69-20865
- Response time of semiconductor diode from dependence of equivalent capacitance on direct displacement current 08 p1287 A69-20889
- Internal electric field effect of diode with inhomogeneously doped base on lifetime of strong reverse current generated during instantaneous switching 08 p1287 A69-20890
- Failure mechanism in high-voltage semiconductor diodes explained by effect of reverse voltage pulses, considering design reliability 08 p1294 A69-21116
- Radiative tunneling shifting peak spectra in abrupt asymmetrically doped GaAs junctions 09 p1544 A69-21336
- Anomalous mode avalanche diodes for pulse power generation noting output, efficiency, mode of operation, microwave oscillations and IMPATT diodes 09 p1466 A69-22455
- Gunn diode operating to VHF range with coaxial line to generate rectangular waves and to function as memory element 09 p1467 A69-22587
- GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods 09 p1559 A69-22652
- High performance silicon carbide backward diode, discussing device design and operational characteristics 09 p1470 A69-22787
- Gunn diode reliability improvement by using device structures preventing high field domains from reaching anode 09 p1470 A69-22788
- Gunn diode field distribution with distributed capacitance electrode analyzed with one dimensional computer simulation 09 p1470 A69-22789
- Voltage dependence of red and green electroluminescence in GaP diodes prepared by growing n-type liquid epitaxial layer on p-type solution grown substrate 10 p1663 A69-23664
- Quenched one dimensional bulk GaAs oscillators with linearly increasing and decreasing concave and convex doping gradients, showing profiles 10 p1663 A69-23667
- Forward and reverse current-voltage characteristics and reverse biased capacitance for nZnSe-pGe emitter base diodes of heterojunction transistors 11 p1851 A69-25114
- Emission and diffusion theories of metal-semiconductor contacts for describing current characteristics of abrupt isotype nGe-nGaAs heterojunction 11 p1938 A69-25115
- Solar cell equation series resistance and junction recombination parameters determination, considering I-V characteristics 11 p1826 A69-25395
- Frequency noises suppression in Gunn diode oscillators by frequency stabilization, using high Q external cavity 11 p1853 A69-25608
- Resonant load impedance effects on Gunn diode oscillators output fluctuations, noting maximum power conditions 11 p1853 A69-25609
- Fabrication procedure for microwave epitaxial GaAs diodes applicable for switching purposes 12 p2035 A69-25831

Probability distributions of characteristics of mass produced semiconductor rectifier diodes
12 p2035 A69-25832

Solar cells physical properties and functions, considering band structure of semiconductors, p-n junction diodes and photovoltaic effect, efficiency calculations and radiation damage
12 p2015 A69-25864

Microstripline circuit for stabilizing oscillating frequency of Gunn diodes prepared with GaAs slices
12 p2036 A69-25924

Laser emission noise and voltage noise cross correlation coefficient for CW GaAs laser diodes at 77 K, noting strong dependence on bias current
12 p2038 A69-26328

Negative resistance effects computed for HF operation of SCL diodes, based on quantitative analysis of small signal response
12 p2038 A69-26349

Laser diode output efficiency increased in presence of transverse magnetic field suppressing higher order TE and TM modes
12 p2039 A69-26353

Differential capacitance, diffusion voltage and exponent alpha of hyperabrupt junction varactor
12 p2039 A69-26375

Gallium arsenide thermometer calibration in 1 to 100 K range using interpolation formula derived from p-n junction diode equation
12 p2093 A69-26484

Bismuth doped lead tin telluride diode lasers with low threshold currents at cryogenic temperatures, discussing doping effect
12 p2109 A69-26641

Direct modulation characteristics of semiconductor junction laser, analyzing resonance phenomenon, bias current, admittance, modulation frequency limit and emission lifetime
12 p2110 A69-27069

Negative resistance formation in impurity compensated semiconductor diodes ascribed to injected carrier drift path increment with increasing current, deriving I-V characteristics
13 p2230 A69-27877

Photoelectric characteristics of thin film CdS-CdTe heterojunction diodes, considering I-V illuminance, spectral characteristics and conduction band continuity
13 p2230 A69-27882

Electroluminescence of p-GaAs diodes analyzed over temperature range of linear dependence of lasing on injection current
13 p2230 A69-27887

Gallium arsenide diode nonequilibrium carriers absorption of He-Ne laser radiation under emission conditions
13 p2272 A69-27893

Capture centers effect on current-voltage characteristic of p-i-n diodes during injection, noting negative resistance appearance
13 p2236 A69-28525

Current-voltage characteristics of p-n-p diodes, discussing collector voltage effect on current carrier concentration distribution in diode base
13 p2236 A69-28531

Forward current decrease in Si mesa diodes under fast neutron irradiation ascribed to increase in base resistance
13 p2236 A69-28549

Square wave generator for junction laser power supply
13 p2274 A69-28643

Small signal transient characteristics of semiconductor diodes analyzed by charge method, studying processes during p-n junction diode switching at low currents
14 p2419 A69-28918

SiC and GaP diodes used as low power light sources, studying electroluminescence in p-n region under pulsed excitation
14 p2419 A69-29325

Strain sensor using p-n heterojunction diode fabricated by vacuum evaporation onto flexible substrate
14 p2422 A69-29555

Solar conversion efficiencies of p-n and n-p diodes calculated for specified semiconductor heterojunctions using Anderson diffusion model
15 p2552 A69-30034

Current effects on quantum efficiency of gallium phosphide junction diodes emitting red light
15 p2575 A69-30174

Transit time effects in silicon space charge limited diodes, studying frequency characteristics of small signal equivalent circuit
15 p2575 A69-30181

Junction diode field factor, comparing results of dynamic impedance and distortion measurement methods with deduced values of static characteristic
15 p2575 A69-30301

Negative resistance section of current-voltage curve for long diodes of p-type indium antimonide, noting magnetic field effects on electrical breakdown
15 p2581 A69-31149

Gallium phosphide Schottky barrier diodes, discussing construction and metals used, barrier height relationships to impurity concentration and temperature, rectifying characteristics and internal quantum efficiency
16 p2757 A69-31613

Carrier lifetime in p-nu-n diodes, discussing error of forward pulsed diode method by Wilson and alternative model
16 p2757 A69-31615

Uniaxial stress effect in Schottky barrier diodes measured by beam balance noting higher sensitivity
16 p2758 A69-31619

Optimum metal contact stripe width for CW operation of GaAs junction lasers bonded on copper heat sink
16 p2796 A69-31698

Nanosecond pulse generator circuits based on four layer Si diodes designed for semiconductor laser excitation
18 p3153 A69-35257

Junction lasers current-voltage characteristics, discussing coherence-pinch effect as explanation of threshold behavior
19 p3337 A69-36531

Metal-semiconductor contact current-voltage characteristic derived from modified diode theory taking into account electron distribution function
19 p3391 A69-36608

Gunn effect applied to digital electronics, discussing diode characteristics, microwave amplifier design, pattern recognition, analog- numerical conversion, etc.
19 p3285 A69-36708

Recombination radiation of tellurium and zinc doped GaAs alloy type diodes, discussing luminescence spectra, current-voltage characteristics and temperature effects
20 p3506 A69-37783

Near constant phase variable attenuator for RF signal containing Doppler information, centering design around p-i-n diode as control element
21 p3681 A69-38410

Book on physics of microwave semiconductor diodes covering p-n junction theory and device characteristics and applications
21 p3682 A69-38990

Electroluminescence of p-GaAs diodes, analyzing temperature range of linear dependence of lasing on injection current
21 p3682 A69-39145

Digital computer determination of stimulated emission time delay, Q switching temperature and current region and impurity profile effect across junction in junction lasers
22 p3962 A69-40561

Lasing properties of Ni-doped GaAs diodes evaluated by plotting resonance, mode amplitudes and frequencies for various bias currents and external capacitance
22 p3912 A69-40606

Lasing properties of spontaneous emission hemispherical semiconductor diode with AlAs-GaAs junctions measured by calibrated silicon photocell
22 p3964 A69-40608

JUNCTION TRANSISTORS

Circuit for linear voltage amplitude to pulse width conversion using controlled unijunction monostable multivibrator
02 p0217 A69-12151

Gradual capture in p-n junctions and p-n-p transistors at AC voltage, noting diffusion capacitance and resistance
03 p0491 A69-14051

Plane of symmetry determination for generalized junction gate field effect transistors extended to include impurity profiles and bias voltage conditions
04 p0574 A69-14344

Diffusion capacitance of p-n junctions, short base semiconductor diodes and p-n-p transistor, discussing systematic error in quasi-steady state calculation
04 p0580 A69-15489

Insulated junction integrated circuit transistor operation with various terminal connections corresponding to diode switching of transistor
05 p0730 A69-16217

Double diffused planar Ge p-n-p and p-n-p transistors with high switching speed, noting fabrication and performance
05 p0809 A69-16557

Recovery and long term reliability of Si p-n-p transistors subject to gamma radiation, using military specifications for failure
06 p0976 A69-16878

Junction gate field effect transistor design covering geometries and impurity profiles
06 p0893 A69-17197

Computer model for n-p-n transistor in integrated circuit using substrate p-n junction isolation
07 p1114 A69-18246

Second breakdown in semiconductors, studying thermal feedback connected with temperature time dependence of junction electrical properties
08 p1294 A69-21115

Time delay in temperature controlled transistorized time delay circuit determined by transistor unsteady thermal processes
12 p2043 A69-26883

MOS and junction transistors damage due to radiation, noting decrease in collector current under fast neutron dose
13 p2227 A69-27514

One dimensional analysis of static collector emitter saturation voltage of epitaxial and triple diffused devices, considering transistor with lightly doped collector
14 p2421 A69-29545

Double diffused transistor with Gaussian impurity distribution analyzed by power series for carrier density distribution and frequency response
16 p2758 A69-31616

Beam lead sealed junction transistor and integrated circuits reliability, describing test conditions and failure mechanisms
18 p3145 A69-34497

Book on field effect and bipolar junction transistors and microcircuits, covering ideal and practical amplifiers, circuit characteristics, etc.
20 p3505 A69-37147

Generation-recombination noise due to trapped charge fluctuation at impurity centers in Si junction gate field effect transistors transition regions, using lumped equivalent circuit
22 p3911 A69-40009

Two dimensional analysis of junction transistor electrical behavior, analyzing DC and AC crowding effects, conduction and impedance of base and collector
22 p3911 A69-40011

JUNCTIONS

Wideband hybrid junctions synthesis from given parameters, suggesting matrix representation of ring circuits
01 p0043 A69-10593

JUPITER (PLANET)

Jupiter outer satellites orbits determination with computer program based on modified Cowell/Moulton methods for adjusting initial conditions
01 p0158 A69-11330

Brightness temperature maps for Jovian thermal radiation obtained through 8-14 micron window of atmosphere
02 p0309 A69-12715

Jupiter, Venus and Mars 8.6 mm radio emission, obtaining average disk brightness temperatures
02 p0327 A69-12716

Jupiter radio physics, discussing prebiological phase, low IR and microwave radio temperature and magnetic field
02 p0330 A69-12805

Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
03 p0368 A69-13076

Symmetric baroclinic instability role in Jupiter equatorial acceleration
03 p0508 A69-13347

Changes in bands of Jupiter /1962-1965/ from astronomical synoptic mapping program, tabulating overall and chromatic intensities and longitudinal velocities
03 p0512 A69-13696

Polarized radio emission from Jupiter, giving hypothesis of radiation belts deformation by solar wind
03 p0512 A69-13703

Surface temperatures for Galilean satellites of Jupiter calculated through corresponding lunations, assuming synchronous orbits with respect to Jupiter
03 p0513 A69-13776

Space flight launches, interplanetary transfer orbits, flyby orbits and capture orbits for solar probe with 0.3 AU perihelion and Jupiter satellite probe
04 p0657 A69-14826

Non-Io controlled fifth source of Jupiter decametric radiation from/near visible planetary disk
05 p0813 A69-15604

Europa control of decametric emission from Jupiter
05 p0813 A69-15605

Jupiter microwave radiation flux density at 81 MHz, noting spectrum of microwave emission
05 p0827 A69-16506

Jupiter unmanned flyby probes trajectory and mission analysis, considering planetary gravitational field role for trajectory shaping and flight times
06 p1007 A69-17598

Groups of drifting lanes of emission in fine structure of dynamic spectra of Jupiter decasecond decametric radiation bursts
06 p1008 A69-17958

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field
[AIAA PAPER 69-18]
06 p0997 A69-18129

Orbiter and rotator models of pulsating radio sources, considering relationship between lack of Faraday rotation and similar polarization in decametric radiation from Jupiter
08 p1397 A69-20688

Chemical abundances in planetary atmospheres based on spectroscopic determinations, considering terrestrial and Jovian planets
08 p1406 A69-20934

Venus and Jupiter observations by earth paraboloid antenna, discussing average brightness temperatures and upper limit for Venus water vapor abundance
09 p1600 A69-22206

Thermal models for Jupiter and Saturn corresponding to completely convective structure, using De Marcus state equations
09 p1607 A69-22428

Orbits of asteroids surrounding commensurabilities with Jupiter, discussing theory for origin of Kirkwood gaps
10 p1778 A69-23604

Venus and Jupiter low resolution UV spectra obtained with servocontrolled star tracking telescope in Aerobee rocket, noting Lyman alpha radiation characteristics
[JHU-TR-15]
10 p1788 A69-24121

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope
11 p1956 A69-24396

Jupiter red spot visibility, establishing partial dependence on solar activity
11 p1964 A69-25404

Io as unipolar inductor, analyzing interaction with Jupiter magnetosphere and decimetric synchrotron radiation
13 p2337 A69-27552

Jupiter decametric radio emission periodicity attributed to undiscovered satellite in unstable orbit, discussing application to satellite discovery
13 p2343 A69-27622

Linear polarization measurements at 6 cm, determining rotation period associated with Jupiter cm radiation
13 p2343 A69-27623

Photographic observations of fifth satellite and disk of Jupiter against stars background for mean motion and regression of nodes
13 p2345 A69-27653

Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission
13 p2354 A69-28504

Electron plasma oscillations and electron whistler of solar wind near Jupiter orbit
14 p2513 A69-29115

Zonal harmonics of Legendre polynomial series of Jupiter attractive force function effects on motion of fifth satellite
14 p2521 A69-29463

Instrumental observations of Jupiter opposition in 1967 and 1968
16 p2858 A69-32205

Mass of Jupiter system from motion of Doris, using variational equations for initial rectangular coordinates and velocities with respect to mass of Jupiter
16 p2863 A69-32403

Jupiter photochemistry above 1000 A, noting methane and ammonia photolysis zones, atmospheric pressures and hydrogen recombinations
17 p3032 A69-33165

Heliosphere boundary location significance for Jovian magnetosphere configuration, considering inverse correlation between sunspot number and Jovian decametric radio emission
17 p3033 A69-33379

IR radiometer to measure Jupiter atmospheric temperature by calculating certain constituents heat radiation levels through Planck formula assuming black body properties
17 p2974 A69-33425

Jupiter red spot prominence correlation with Zurich sunspot number
17 p3045 A69-34185

Jovian radio sources intermittency, recording difficulties, longitudinal drift and theories concerning origin
18 p3196 A69-34690

Polar flattening influence of Jupiter on artificial satellite motion around Callisto noting orbital perturbations
18 p3199 A69-34913

Jupiter decametric radio source analysis suggesting two component model of rotation at both constant and variable rotational periods
18 p3202 A69-35212

Jupiter observations /1966-1967/, discussing variations in size and position of polar caps and tropical belts
18 p3203 A69-35337

Jupiter swingby flight mode application to probe missions requiring solar polar regions overflight at close perihelion distances
19 p3401 A69-35915

Crab Nebula radio brightness at 2.16 and 8.2 mm measured and compared to Jupiter flux density
19 p3428 A69-36875

Jupiter tenth satellite reobserved, discussing calculations and computer techniques for determining orbit
[AAS PAPER 68-140]
20 p3595 A69-37194

H alpha auroral activity on Jupiter isolated by using Fabry-Perot etalons, showing photograph reproductions
20 p3598 A69-37414

Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used
20 p3602 A69-37529

Polarization ellipse orientation at source from Faraday fringes on Jupiter decametric radio bursts swept frequency records
20 p3594 A69-38169

Jupiter mass determined by applying Cowell numerical integration to equations of motion for ninth satellite
21 p3795 A69-38468

CircumJovian powered and free return trajectories, analyzing round trip missions and departure opportunity
[AAS PAPER 68-117]
21 p3805 A69-39207

Exploration capabilities provided by Jupiter gravity assisted trajectories compared to direct ballistic flight trajectories
[AAS PAPER 68-116]
21 p3805 A69-39224

Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932]
21 p3809 A69-39361

Jupiter mass determined from observations of four minor planets perturbations
22 p4013 A69-40121

Rocket UV spectra indicating Venus atmosphere weak absorption and low ozone abundance and possible Jupiter surface depressions
22 p4028 A69-40661

Jupiter spectrum observations in 2.8-14 micron range, describing absorption strength and brightness temperature, basing analysis on ammonia, methane and hydrogen absorption
22 p4028 A69-40662

Galilean satellites perturbing effect on motion of fifth Jupiter satellite
23 p4214 A69-41730

Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model
23 p4215 A69-41896

Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment
[AAS PAPER 69-290]
24 p4381 A69-42863

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope
24 p4390 A69-43786

JUPITER ATMOSPHERE

Jovian atmospheric rotational temperature from rotational lines in methane band
01 p0153 A69-10856

Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
02 p0324 A69-12303

Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path
[AIAA PAPER 68-1150]
03 p0520 A69-13565

Changes in bands of Jupiter /1962-1965/ from astronomical synoptic mapping program, tabulating overall and chromatic intensities and longitudinal velocities
03 p0512 A69-13696

Dark equatorial belt of Jupiter atmosphere in 1962 and 1963, noting photometric contrasts, molecular absorption and possible structure
04 p0658 A69-14961

Jupiter Red Spot visual observations in 1966 and 1967 noting changes in size, color and planetographic coordinates and variation of apparent intensity
04 p0659 A69-14963

Shock tube measurements of radiation from simulated Jupiter atmosphere related to thermodynamic conditions encountered by entry probe
[AIAA PAPER 69-184]
06 p0908 A69-18207

Jupiter Red Spot vorticity at perimeter indicated by interaction with dark spots circulating along south equatorial belt
07 p1213 A69-18606

Jovian limb H alpha line due to auroral emission obtained from high dispersion spectra with long light path through upper atmosphere
07 p1214 A69-18614

Methane absorption distribution in 6190 A band over Jupiter disk based on spectrograms, noting center to limb variations
11 p1960 A69-24730

Spectrum analysis of Jupiter atmospheric composition, obtaining abundances of minor constituents
12 p2155 A69-26205

Jupiter polarization wavelength dependence noted in observations of 5 seconds diameter regions near poles and equator related to Rayleigh-Chandrasekhar molecular scattering theory
13 p2348 A69-27805

Atmospheric motions on Jupiter, considering highly symmetric flow, baroclinic waves and red spot
15 p2694 A69-30856

Dark equatorial belt of Jupiter atmosphere in 1962 and 1963, noting photometric contrasts, molecular absorption and possible structure
18 p3197 A69-34724

Jupiter Red Spot visual observations in 1966 and 1967 noting changes in size, color and planetographic coordinates and variation of apparent intensity
18 p3197 A69-34726

Cloud layer multiple scattering in Jovian atmosphere, discussing influence on Lorentzian contour of planetary absorption lines
18 p3203 A69-35332

Jupiter observations /1966-1967/, discussing variations in size and position of polar caps and tropical belts
18 p3203 A69-35337

Methane abundance and rotational temperature of Jupiter, considering effects of line saturation
20 p3613 A69-38174

Venus, Mars and Jupiter lower atmospheric motions, considering atmospheres thermal and chemical composition
21 p3811 A69-39511

Jupiter magnetospheric radio emissions, discussing magnetic field and plasma-magnetic interactions
21 p3812 A69-39517

Methane rotational temperature in Jovian atmosphere deduced from equivalent widths of lines at 1.1 micron band
22 p4028 A69-40663

Jupiter Red Spot semiregular oscillations from photographic measurements, determining mean period and amplitude
24 p4383 A69-43002

JUPITER RED SPOT

Jupiter Great Red Spot in terms of homogeneous fluid rapid rotation, Rossby number, stagnant region, Taylor column and stratification

20 p3609 A69-38060

Jupiter Red Spot semiregular oscillations from photographic measurements, determining mean period and amplitude

24 p4383 A69-43002

K

K BAND

U EXTREMELY HIGH FREQUENCIES

K LINES

Equivalent widths of K line of single ionized calcium and central depths of unidentified broad absorption in O and B stars spectra

08 p1389 A69-20250

K alpha lines in solar soft X ray spectra noting instrumental effect

09 p1580 A69-22232

Chromospheric heating and polarization in late stars, considering association with Ca II K line emission cores

13 p2340 A69-27579

Ca 2 resonance line profiles in large disk flares and in surrounding plage, discussing H and K line behavior

17 p3023 A69-33054

Chromospheric inhomogeneities rapid changing properties observable in H and K lines above sunspot umbrae

18 p3204 A69-35389

Balmer and Ca II K/line profiles computed by program based on model atmospheres, comparing computed and observed data for F stars

19 p3426 A69-36578

Ti emission and absorption K spectra in Ti-Al intermetallics, suggesting hypothesis concerning long wave and fundamental subbands origin

21 p3749 A69-39787

Core profiles of H alpha, H beta, H and K from spectrograms of plages

22 p4010 A69-39993

Calcium K line strengths in A stars measured by narrow band spectrometer compensated for seeing and transparency variations

22 p4015 A69-40154

Hartree-Fock calculations for wavelengths of K alpha X ray transitions, tabulating configuration and term energies, dipole integrals and relative multiplet strengths

22 p3984 A69-40156

K-alpha band characteristics of N spectra stimulated in nitrides of transition metals by X rays

22 p3974 A69-41118

K-MESONS

K meson-light nucleus scattering lengths calculated using multiple scattering theory with Kim zero range

15 p2655 A69-30309

Particle physics and discovery of K mesons and hyperons emphasizing track recording, cloud and bubble chamber techniques

24 p4352 A69-43039

KA BAND

U EXTREMELY HIGH FREQUENCIES

KALMAN-SCHMIDT FILTERING

Kalman optimal filter for linear distributed parameter systems with Gaussian disturbances and measurement noise

01 p0034 A69-11143

Structure oriented parallel algorithms for matrix operations, noting applicability to real time calculations for discrete Kalman filter and control problems

02 p0224 A69-11743

Planetary atmosphere determination error analysis using Kalman filter, noting results of simulated Martian atmosphere entry

02 p0331 A69-12806

Optimal filter design for estimating state of linear dynamical system in presence of high measurement noise

04 p0582 A69-14877

Limited memory optimal filter theory, output and standard filter divergence due to errors

06 p0905 A69-17946

Orthogonal projection derived equation to optimally estimate state of nonstationary linear discrete systems with time delay, developing Kalman type filter

09 p1473 A69-22437

Kalman filter with delayed states as observables, discussing extra computer effort and modeling technique

09 p1473 A69-22438

Kalman equations of optimal recursive filter for linear discrete system extended to continuous system through limiting procedure

11 p1859 A69-25408

Modeling errors in linear discrete stochastic system effects on Kalman filter state estimates

11 p1860 A69-25448

Kalman sequential estimation adaptation to target maneuvers without sacrificing tracking accuracy in nonmaneuvering portions of trajectory

11 p1861 A69-25455

Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination

12 p2045 A69-26059

Deterministic linear observation systems and Kalman optimum linear filters application to performance improvement of inertial navigation systems

12 p2128 A69-26065

Modeling nonstationary random processes using linear time-invariant difference equation, with applications to Kalman filtering and gyro drift

14 p2479 A69-29486

Optimal filtering of linear distributed parameter systems corrupted by boundary and/or volume stochastic disturbances

15 p2565 A69-30183

Initial-convergence examination of Kalman filter for various autonomous navigation modes [AIAA PAPER 67-623]

16 p2809 A69-31875

Multisensor data processing technique for fail operational landing commands, using real time error analysis inherent in Kalman filter

17 p3003 A69-34106

Filtering and optimal control problems for discrete stochastic dynamical systems, describing various feedback controls and midcourse guidance optimization

18 p3109 A69-34660

Parameter sensitivity analysis of discrete suboptimal filters from optimal rmse estimate of actual system performance measure

18 p3110 A69-34675

Adaptive filter for estimating system noise inputs from actual residuals developed to control Kalman filter in satellite orbit estimation

18 p3110 A69-34676

Kalman filter based on calculus of variations, evaluating object trajectory during vertical atmospheric descent

19 p3307 A69-35794

Kalman recursive filtering method applied to inertial navigation systems resetting

19 p3286 A69-36645

Weighting coefficients calculations by recursive algorithm for designing optimal discrete adaptive Kalman filter

20 p3509 A69-37142

Discrete filters for optimal processing of downlinked satellite data, considering inverse filter development by Kalman filtering techniques

21 p3677 A69-39462

Iterative method for reducing filters required for optimal Kalman filter design maintaining parameter estimation accuracy

21 p3687 A69-39463

Kalman filter simulation for estimating aircraft position and velocity from airborne digital computer data in zero-zero landing system [AIAA PAPER 69-944]

22 p3978 A69-40327

Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination

23 p4146 A69-42446

Kalman-Bucy filtering technique for estimation of initial conditions and smoothing in linear dynamic systems, noting rectilinear motion of randomly accelerated spacecraft

23 p4132 A69-42546

Optimal deterministic estimation and feedback control for linear nonstationary process and measurement systems defined by Riccati equations, including Kalman-Bucy filter

24 p4291 A69-43276

KAMACITE

Kamacite analysis for P and Ni in chondrites, palasite and iron meteorites, considering cooling rate and rhadbit

19 p3417 A69-36131

Iron meteorites microscopic and macroscopic features due to preterrestrial mechanical deformation, stressing local displacements encountered in normal or acicular kamacites

19 p3418 A69-36134

Morphological, chemical and X ray analysis of urelite meteorite, identifying diamonds with kamacite and troilite admixtures from carbonaceous material

21 p3816 A69-396260

KAMAN MILITARY HELICOPTERS

U MILITARY HELICOPTERS

KAONS

Cosmic ray muons angular distribution measuring device for determining pion/kaon ratio

13 p2332 A69-28421

KAPOETA ACHONDRITE

Distribution and origin of primordial He, Ne and Ar in Fayetteville and Kapoeta meteorites extracted and analyzed by laser-microprobe mass spectrometer

19 p3419 A69-36142

KAPPA ROCKET VEHICLES

Ionospheric electron temperature probe analysis based on Japanese Kappa rocket data

05 p0761 A69-15701

KARHUNEN-LOEVE EXPANSION

Pattern recognition method dependent on preselection of good variables, discussing SELFIC and relationship to Karhunen-Loeve expansion and factor analysis

07 p1088 A69-18386

Pattern recognition as part of statistical communication theory, using Karhunen-Loeve expansion to minimize root-mean-square errors, showing application to handwritten numerals

09 p1461 A69-22292

KARMAN VORTEX STREET

Standing twin vortices in wake behind thin flat plate normal to flow visualized by Al dust, noting Karman vortex street

18 p3086 A69-35167

Karman vortex street formation indicated by smoke visualization method study of laminar wake behind single cylinder

21 p3644 A69-38687

KC-130 AIRCRAFT

U C-130 AIRCRAFT

KELVIN TEMPERATURE SCALE

U TEMPERATURE SCALES

KEPLER LAWS

Matrizants construction for Keplerian motions, discussing Hamiltonian character of variational equations for planar two body problem

03 p0513 A69-13779

Kepler third law application to radar determinations of astronomical unit of length in general relativity

04 p0657 A69-14698

Regularization of perturbed Keplerian motion in three dimensional space by means of Levi-Civita transformation generalized to three dimensions

05 p0827 A69-16602

Kepler hyperbolic sine equation calculated for Arend-Roland comet for case of constant residues by false position method

06 p0997 A69-16821

Table of computerized three place E-M solutions for Kepler equation, noting revision of Astrand table

10 p1777 A69-23395

Gauss method for Kepler equation ephemeris computation in nearly parabolic orbits, using expansions suitable for high speed computers

12 p2171 A69-27154

Optimum orbital transfer of material point subjected to reactive force with minimum mass loss, discussing Kepler motion kinematics

13 p2346 A69-27698

Discrepancy between Kepler first two laws and corresponding Newton propositions, noting necessary substitution of ovals for elliptical orbits

15 p2695 A69-31011

Relativistic generalization for polar Sommerfeld rosette of Fourier series expansions by Lagrange and Bessel for particle motion in Keplerian field

16 p2811 A69-31607

Simplified method for derivation of universal gravitation law from Kepler law of planetary orbits

16 p2813 A69-32481

Cowell equations modified for exact integration of pure Keplerian orbits, considering secular effects

18 p3165 A69-34842

Optimal transfers between Keplerian orbits for time free case, considering hyperbolas, ellipses external to and intersecting attracting planet

19 p3399 A69-35669

Minimum impulse transfer of vehicle between noncoplanar Kepler orbits, applying optimal control principles to formulation

23 p4214 A69-41878

KERNEL FUNCTIONS

- Kernel function applied to compressible fluid flow computation for linear procedure to determine subsonic flow patterns
01 p0058 A69-10225
- Eigenproblem for displacement integral equations with finite cosine transform kernels, extending Roark-Wing numerical method for eigenvalues to kernels
01 p0106 A69-10986
- Approximation for discretization error of discrete analog of Bergman harmonic kernel, discussing discretization error in Dirichlet and Neumann problems for Laplace equation
03 p0456 A69-13555
- Integral equation solution with Mellin inversion formulas for light scattering problems
06 p0949 A69-17887
- Viscoelastic problem solutions for hereditary media, using Laplace transforms or solutions of integral equations for inaccurately approximated kernels
08 p1412 A69-20329
- Stability and bending of flexible plates and shallow shells obeying hereditary relations solved by singular kernel functions
08 p1413 A69-20335
- Numerical and kernel expansion procedures for laser mode, discussing Gaussian quadrature numerical integration for conversion to matrix equation
08 p1328 A69-21091
- General theorems derived for Noether operator applied to integral equation with automorphic kernel
12 p2122 A69-26574
- Collision integral kernels of kinetic equation for single component gas density matrix derived by Bogolubov-Gubov method
14 p2458 A69-29169
- Semidefinite Peano kernels of stable forms
15 p2644 A69-30450
- Substitute kernel approximation for acoustic waves radiative transfer equations for nongray gas near equilibrium
15 p2717 A69-30791
- Diffraction of modal field by semiinfinite waveguide, integral representation for Wiener Hopf kernel factorization and applications to open resonators
17 p2930 A69-33888
- Orthogonal polynomials in three dimensional contact problems without friction, discussing construction of kernels over finite and semiinfinite intervals
22 p4041 A69-40113
- Symmetry properties of Cameron-Martin-Wiener kernels in isotropic velocity field, applied to one dimensional model of incompressible turbulent flow
24 p4301 A69-43358
- KEROSENE**
- Kerosene droplets combustion stability studied by motion pictures, discussing pressure, temperature and O concentrations effects in turbulent carbon dioxide flow
08 p1421 A69-20345
- Turbine and jet engines kerosene fuels tests in small and medium size laboratory combustion chambers
13 p2240 A69-27932
- KERR CELLS**
- Kerr effect apparatus for measurements of pure liquids and solutions involving comparison of two luminous fluxes with aid of photomultiplier
01 p0078 A69-10039
- Copper exploding wire Kerr-cell time-resolved absorption spectra analysis, considering copper atom transition
01 p0118 A69-10665
- High speed photodetector frequency characteristics using multimode gas laser and Kerr cell
10 p1707 A69-24211
- Kerr constant verification device to study electrooptic liquids properties
12 p2084 A69-26148
- KERR ELECTROOPTICAL EFFECT**
- Kerr effect apparatus for measurements of pure liquids and solutions involving comparison of two luminous fluxes with aid of photomultiplier
01 p0078 A69-10039
- Kerr effect and electrostriction during self focusing of high power laser beam in gases and liquids
04 p0611 A69-14792
- Kerr constant verification device to study electrooptic liquids properties
12 p2084 A69-26148

KERR MAGNETOOPTICAL EFFECT

- Quasi-static Kerr magneto-optic observation and procedure to predict results of dynamic flux reversal in thin Ni-Fe films
[IEEE PAPER 11.7] 01 p0138 A69-10716
- Quantum theory of electrical birefringence of noninteracting diamagnetic molecules /Kerr effect/ subjected to static electric field and polarized plane wave
02 p0279 A69-11538
- Kerr magneto-optic camera for 10 nsec exposures of dynamic magnetization configuration in magnetic thin film during high speed flux reversal
17 p2970 A69-32853
- Dynamic Kerr observations of high speed flux reversal and relaxation process in permalloy thin films by magnetooptical camera with Q switched ruby laser
19 p3383 A69-36446
- KESTREL AIRCRAFT**
U P-1127 AIRCRAFT
- KETONES**
NT ACETONE
- Ion structure of keto and enol and McLafferty rearrangements determined by ion cyclotron resonance spectroscopy
19 p3265 A69-36288

KEYING

- U FREQUENCY SHIFT KEYING
U PHASE SHIFT KEYING
- KIDNEY DISEASES**
U NEPHRITIS
- KIDNEYS**
- Lateral acceleration effects on human kidney functions, noting increase in diuresis and erythrocytes in urine
02 p0198 A69-11514
- Rapid global transportation effect on circadian rhythmic patterns in human body functions, discussing kidney excretion and pituitary adrenal cortical system
09 p1444 A69-22545
- Renal vascular circulation in carotid occlusion pressor reflex by vasoconstriction in absence of renal autoregulation
22 p3887 A69-41190
- Urine sampling conditions for kidney function circadian rhythm during global flight, considering food and water intake, sampling intervals and body position
24 p4266 A69-43374

KINEMATIC EQUATIONS

- Soviet book on kinematics of inertial navigation systems covering systems classification, equations derivation and computer algorithms for error analyses
02 p0278 A69-11793
- Dynamic equations for offset unsymmetric gyroscope with obliquely placed rotor, using dual transformation matrices
[ASME PAPER 68-WA/DE-5] 05 p0764 A69-16170
- Kinematics of vertical gyroscope mounted in additional servo frame, determining kinematic errors due to rotor axis deviation
09 p1498 A69-22108
- Drift rate of gyroscopic devices in space based on kinematic theorem, stressing free gyroscope subjected to harmonically varying moment
09 p1498 A69-22111
- Thermodynamics of strain rate sensitive elastoviscoplastic solids, considering kinematic description of plastic deformation and choice of state variables
11 p1994 A69-25601
- Airframe stability of VAK 191 examined by displacement method, using matrix calculations within Automatic System of Kinematic Analysis
20 p3462 A69-37515
- Kinematic dynamo waves, discussing excitation and maintenance of magnetic field by assumed motion of uniformly conducting fluid using small parameter and numerical methods
22 p3989 A69-40195

KINEMATICS

- NT BODY KINEMATICS
- Equations of motion for kinematics of complex mechanisms, noting methods and relations
01 p0115 A69-10165
- Sun motion with respect to extragalactic universe, discussing local supercluster kinematics
03 p0513 A69-13769
- Kinematic parameters for elastic slender body aid in description of motion of body
04 p0668 A69-14271
- Planar linkages kinematic synthesis and design, using Newton-Raphson iteration technique to solve nonlinear equations
04 p0604 A69-14517

Solar motion in distant objects kinematics, suggesting simultaneous solutions of local motion and galactic rotation parameters

- 04 p0654 A69-14627
- General kinematic yield mechanism and associated kinematically adequate multiplier formulated for structural elements characterized by plane deformation state
05 p0831 A69-15684
- Kinematics of electrochemical machining defined as quasi-steady process
[ASME PAPER 68-WA/PROD-22] 05 p0769 A69-16194
- Stellar samples with various luminosity and A star kinematic properties, discussing influence on application of hydrodynamics equations to evolution problems
07 p1224 A69-19712
- Relativistic kinematics analog model for deformable continua, introducing deformation gradient and tensors
08 p1416 A69-20693
- Four gimbal Cardan suspension gyroscope kinematics for nonperpendicular arrangement
09 p1502 A69-22705
- Kinematic equations of motion of body about fixed point, considering Steklov solution
11 p1918 A69-24791
- Single mirror scanning geometry and kinematics, analyzing spatial motion of objects plane mirror image
12 p2091 A69-26367
- Spiral galaxies rotation curve fluctuations attributed to kinematic properties of galactic matter and gas components
12 p2170 A69-27062
- Relativistic kinematics of continuum motion by invariant derivatives of deformation measures, discussing rigid body motion in Born sense
12 p2189 A69-27116
- Solar cycle kinematical model based on field amplification by solar differential rotation including fluctuations in eruption rate
13 p2337 A69-27548
- Power gyrostabilizer kinematic structure synthesis, applying matrix methods to design variables
14 p2446 A69-28924
- Nonlinear programming for calculating static and kinematic failure of one dimensional structures by extending results from linear programming
14 p2418 A69-29597
- Noctilucent clouds morphological and kinematic characteristics based on photographs
18 p3132 A69-35335
- MHD dynamo construction with emphasis on fluid motion effect on magnetic field, considering spatially periodic dynamo derivation from kinematic considerations
22 p3989 A69-40196
- Pressure loads and balancing force determination in kinematic pairs of link gear of landing mechanism
23 p4062 A69-41415
- Dynamic uniaxial tensile stress-strain data obtained at high rates by measuring kinematics of symmetrically expanding thin ring specimens
24 p4330 A69-42735
- KINESCOPES**
U PICTURE TUBES
- KINETIC ENERGY**
- Impulse and kinetic energy transfer in rarefied gases analyzed on basis of kinetic theory, considering surface curvature effect
01 p0173 A69-10093
- Radiation problem in general theory of relativity investigated by momentum energy tensor, formulating criterion for gravitational radiation
01 p0116 A69-10435
- Motion, field momentum and field kinetic energy equations of concentrated dislocations based on Zorski field theory of defects
02 p0336 A69-11556
- Thermalization of kinetic energy of plasma flow by shock phenomena produced by magnetic mirror field
02 p0289 A69-12176
- Plasma radiation, including atomic processes and radiation by variation of constituent kinetic energy
03 p0483 A69-14237
- Alkali metals thermoelectric power and energy dependence of Heine-Abarenkov pseudopotential, taking into account anisotropy effects
05 p0809 A69-16507
- Cosmic radiation propagation in interstellar space, discussing differential kinetic energy spectra of protons, He, C and O nuclei and Fe
06 p0988 A69-17269
- Lithium, Be, B and fluorine nuclei in cosmic radiation, discussing nature of spectra
06 p0988 A69-17271

Atmospheric circulation intensity measurement, using potential energy conversion to kinetic or kinetic energy dissipation by friction

07 p1175 A69-18947

Tropospheric energy cycle interannual variability and quasi-biennial oscillation from geostrophic computations of eddy kinetic energy, energy transfer and internal redistribution

07 p1129 A69-19628

Transmission line analogs and kinetic power theorems for space charge waves amplification in semiconductors, considering internal effect and wave excitation

10 p1748 A69-24052

Energy release in quasars through nonmassive gravitational collapse compared with local objects, noting cosmological luminosities

10 p1785 A69-24091

Mean and eddy motions in atmosphere described by mathematical expressions for total and mean kinetic energies

11 p1911 A69-24323

Slow charged products of charge exchange collisions by ions in molecular gases, comparing kinetic energies during various reactions

13 p2301 A69-27455

Variable fluid and field velocity HF induction generator, determining interaction between fluid dynamic forces and magnetic field and kinetic energy

13 p2207 A69-27502

Conditions governing application of reduced Nielsen equations to anholonomic systems dynamics, discussing kinetic energy function

13 p2288 A69-27924

Optimal control for minimization of heating and acceleration forces to reduce kinetic energy of reentry vehicle in space missions

13 p2352 A69-27960

MHD generator design using shock wave kinetic energy produced by explosion in shock tube with superconducting magnetic system

14 p2393 A69-28911

Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics

14 p2454 A69-29001

Convective instability by active stress, discussing composition dependent stress fields in continuous and mechanically isolated material and chemical to kinetic energy conversion

14 p2540 A69-29634

Atmospheric circulation integral characteristics, calculating kinetic energy in Northern Hemisphere

14 p2476 A69-29824

Kinetic energy conversion into heat in moving viscous media, formulating equations as volume integrals of spherical harmonics products

14 p2487 A69-29980

Kinetic energy balance equation of mean zonal flow in symmetrical polar cap derived from basic concepts of mechanics, discussing relative coordinate system rotation

15 p2595 A69-30219

Equations for gradually changing motion by differentiating momentum and energy equations with respect to abscissa noting wall resistance, viscosity, turbulence and Coriolis coefficients

15 p2593 A69-31489

Potential and kinetic energy of cylindrical thin shell with cutout approximated by two dimensional finite difference methods, obtaining eigenvalue problem

16 p2874 A69-32158

Zonal flow intensity, velocity and kinetic energy of standing and traveling waves compared for Northern and Southern Hemispheres

17 p2997 A69-33392

Stars kinetic energy and escape rates from isolated cluster with arbitrary stellar mass distributions, assuming spherical symmetry and velocity distribution isotropy

17 p3038 A69-33721

Kinetic inductance measurements in linear circular and rectangular cylindrical superconductors, giving inductance temperature dependence for wires and both thick and thin films

17 p3016 A69-33783

Gas-surface energy transfer experiment on OGO-F satellite, measuring upper atmosphere kinetic energy flux to determine accommodation and drag coefficients, density, etc

19 p3255 A69-36680

Meridional circulations in kinetic energy budget of Northern Hemisphere troposphere based on winter and summer climatic mean data, noting Hadley circulation

20 p3523 A69-37505

Kinetic energy of sunspot rotational motion transferred to electromagnetic energy in filamentary currents, noting time variations in solar atmosphere preconditioning for flare

20 p3589 A69-37550

Temperature potentials in cylinder of known radius, investigating optimal heating regime and thermal kinetic factor effect on maximum potential magnitude

21 p3837 A69-39089

Solar wind kinetic energy density using geomagnetic field horizontal component daily variation, treating earth as plasma probe

24 p4308 A69-42968

Horizontal wind speeds kinetic energy spectrum near surface, discussing diurnal variations

24 p4343 A69-43063

Absolute atmospheric kinetic energy, comparing equations deduced from Euler equations with equations deduced from equations of motion for inertial system

24 p4345 A69-43151

KINETIC EQUATIONS

NT HELMHOLTZ VORTICITY EQUATION

NT HYDRODYNAMIC EQUATIONS

NT KINEMATIC EQUATIONS

Krook kinetic relaxation equation generalized to include approximate kinetic equations with velocity independent collision frequency

02 p0234 A69-12582

Second dielectric virial coefficient of rare gases derived by cluster method

04 p0632 A69-14865

Kinetic model equation for electron plasma incorporating collision terms for model scattering

04 p0636 A69-15042

Model kinetic integral equation for describing flow in transition region at leading edge of tapered body in rarefied gas

05 p0697 A69-16040

Kinetic equation for plasma in external inhomogeneous nonstationary electromagnetic field, noting perturbation theory and Vlasov approximation

05 p0805 A69-16700

Chemical kinetic numerical integration techniques applied to equations for chemical relaxation

07 p1073 A69-18315

Kinetic description of inhomogeneous plasma in ring approximation, discussing Vlasov equation and velocity distribution function

07 p1193 A69-19034

Interaction between atom and plane monochromatic traveling wave taking into account pressure effect occurring in strong collision model

08 p1354 A69-19954

Exact solution to kinetic equation for resonant three wave coupling in weakly turbulent plasmas, assuming only single triplet of modes interaction

08 p1360 A69-19989

Modified truncation for BBGKY hierarchy for plasma, obtaining kinetic equation identical with Balescu-Lenard equation

08 p1360 A69-19990

Quantum paramagnetic amplifier saturating power dependence on input pulses length and frequency determined by kinetic equations solution

08 p1325 A69-20436

Kinetic equations for polyatomic gases obtained by extending 13 moment approximation to solve inelastic Boltzmann equation, resulting in 17 moment approximation

08 p1357 A69-20784

Plasma kinetic equation obtained by method similar to Chapman-Enskog method

08 p1369 A69-20816

Thermogravimetric plastics analysis data applied as constants to degradation kinetics equations used in charring-ablator digital computer programs

09 p1529 A69-22312

Performance analysis of combustion chambers with continuous air admission along flame tube, deriving governing equation from reaction kinetics

09 p1624 A69-22618

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account

10 p1722 A69-23972

Nonlinear integrodifferential kinetic equation for weak turbulence of resonant four wave processes, considering spectral energy density

11 p1921 A69-24294

Local potential method extended to study plasma oscillations inhomogeneous kinetic equations in presence of linear or nonlinear collision operators

11 p1925 A69-24316

Resonance radiation output effect on electron distribution according to energies and concentration in low temperature plasma, solving relevant kinetic equations

11 p1935 A69-25797

Solution for kinetic energy equation for organic semiconductors with narrow conduction band situated in strong electric field

12 p2144 A69-26674

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom/molecule collisions, deriving kinetic equations for energy level changes

13 p2302 A69-27797

Near electrode layer calculation in low temperature plasma, solving kinetic ion equation for quasi-neutral and Poisson equation for space charge regions

13 p2312 A69-28111

Correlation functions of fluctuations in electronic characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function

13 p2314 A69-28444

Collision integral kernels of kinetic equation for simple component gas density matrix derived by Bogoliubov-Gubov method

14 p2458 A69-29166

Kinetic energy balance equation of mean zonal flow in symmetrical polar cap derived from basic concepts of mechanics, discussing relative coordinate system rotation

15 p2595 A69-30219

N precipitation kinetics in deformed Nb, finding constant in rate equation dependent on temperature and correlated to precipitates nature

15 p2639 A69-30583

Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation

15 p2660 A69-30913

Linearized kinetic equation for perturbed electron distribution function, detailing plasma oscillations along magnetic field by Landau collision term

16 p2818 A69-31674

Radiation effect on inorganic solids isothermal decomposition induction period, deriving equations for conditions representing various kinetics combinations during irradiation

16 p2832 A69-32359

Klein theorem kinetic energy corrections taking into account breakdown of equipartition theorem

16 p2823 A69-32469

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams

17 p2956 A69-33492

Transformed kinetic equation used to study relaxation of quantum oscillator to thermodynamic equilibrium state

18 p3152 A69-35126

Stratified cloud transport and evolution, solving kinetic equations by numerical method

21 p3759 A69-39119

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account

21 p3760 A69-39658

Numerical analysis of plane Couette flow of rarefied binary gas mixture using relaxation type kinetic model equations, discussing slip velocity, friction coefficient, etc

22 p3931 A69-40778

Entropy definition for nonequilibrium states, using mathematical theory of stability of motion applied to kinetic equations of irreversible processes

23 p4238 A69-41366

Kinetic equations for fully ionized plasmas and approximate derivation method for generalized Fokker-Planck equation including nonadiabatic effect

23 p4195 A69-41515

Two stream plasma instability in equatorial electrojet extended to nonlinear domain by nonlinear treatment of ion kinetic equation

24 p4310 A69-43182

KINETIC FRICTION

NT SLIDING FRICTION

Three term formula for describing vertical wind velocity distribution in upper boundary layer of atmosphere, taking into account friction and orography effects

02 p0240 A69-11708

KINETIC HEATING

NT AERODYNAMIC HEATING

NT OHMIC DISSIPATION

NT SHOCK HEATING

Heavy ion track thermal spike model to account for LET and temperature effects in radiation biology and chemistry

03 p0371 A69-13479

Temperature rise of micron sized silver particles on carbon film due to electron beam heating, setting up heat balance equation

04 p0640 A69-14449

Concorde design problems due to kinetic heating, aerodynamic characteristics, structure, equipment, modified delta wing planform, etc

12 p2012 A69-26358

KINETIC THEORY

NT CHAPMAN-ENSKOG THEORY

NT EYRING THEORY

NT MIXING LENGTH FLOW THEORY

NT TRANSPORT THEORY

Impulse and kinetic energy transfer in rarefied gases analyzed on basis of kinetic theory, considering surface curvature effect

01 p0173 A69-10093

Inhomogeneous magnetically confined plasma stability, examining dissipative effects on spectra of drift oscillations with kinetic theory

01 p0126 A69-10187

Kinetic features of martensitic transformation of nickel steels dependent on plastic deformation degree at 525 C

02 p0267 A69-12190

Kinetic theory of fracture initiation, discussing changes in relative orientation distribution of network chains

02 p0345 A69-12401

Kinetic theory model of plasma sheath transition, analyzing sheath structure in unignited mode of thermionic converter

03 p0368 A69-13125

Kinetic theory of sound propagation in rarefied gas using generalized orthogonal polynomial expansion, evaluating adequacy of nonequilibrium distribution postulated by Mintzer

03 p0466 A69-13156

Electromagnetic properties of bounded isotropic plasma in kinetic approximation

03 p0477 A69-13712

Kinetic theory to determine wave increments propagating across magnetic field in system of relativistic electrons in cold plasma

04 p0635 A69-14555

Distribution functions for fast electrons near anode calculated by kinetic theory, assuming weakly ionized plasma with smaller Debye length than collision mean free path

04 p0635 A69-14764

Nonlinear and second order thermal diffusion of electrons in ionized gas

04 p0636 A69-14878

Nonequilibrium statistical physics for kinetic theory of gases and statistical mechanics, noting irreversibility and entropy

05 p0793 A69-15769

Kinetic model construction of maximum number of Boltzmann collision integral properties

05 p0797 A69-16679

Kinetics of homogeneous and heterogeneous growth of centers of new phase of semiconductor during ion bombardment as function of radiation dose

06 p0978 A69-16985

Kinetic boundary value problem of gas flow over plane wall with constant mass-velocity gradient

06 p0910 A69-17346

Kinetic theory of sharp leading edge parallel to supersonic flow using Boltzmann equation, determining flow field

06 p0861 A69-17637

Ratios of gas kinetic electron-atom collision integrals of Ramsauer for Ar

06 p0963 A69-17822

Chemical kinetic model for hydrocarbon fuels combustion and application to multidimensional finite difference mixing analyses in hypersonic engines and nozzles

[AIAA PAPER 69-86]

06 p1037 A69-18119

Finite kinetics calculations by computer programs to generate reactions among prescribed reactants

[WSCI PAPER 68-54]

07 p1072 A69-18314

Book on theory of kinetic equations covering classical mechanics, Liouville equation and distribution functions, kinetic equations relation to fluid dynamics, KBG equations, etc

07 p1180 A69-18411

Initial stage of motion in Rayleigh problem, calculating time variable velocity of tangential stress on and velocity of gas near plate

07 p1118 A69-18701

Kinetic theory development of equations for multicomponent gaseous mixtures symmetric diffusion coefficients

07 p1186 A69-19395

Electromagnetic wave reflection from moving plasma characterized by conductivity for slow waves, calculating reflection and absorption factors

07 p1196 A69-19748

Kinetic theory for plasma, considering electric field fluctuations time evolution simultaneously with one particle distribution time evolution and Landau damping in wave equation

08 p1360 A69-19991

Gas kinetics application to various flow problems by solving Boltzmann equation for monoatomic single component gas

08 p1351 A69-20708

Kinetic theory for weak shock generation by impulsive piston, using Fourier and Laplace transforms to solve BGK equation

08 p1304 A69-20783

Kinetic theory model of plasma sheath transition applied to sheath structure in unignited mode of thermionic converter

09 p1440 A69-21828

Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities

09 p1481 A69-21889

Kinetic theory of electromagnetic wave passage through magnetoactive plasma, discussing dispersion and specular and diffuse reflection

09 p1550 A69-22022

Kinetic theory of electromagnetic wave propagation in infinite laminated plasma with different dielectrics, determining attenuation

09 p1550 A69-22023

Galaxies and galactic clusters regarded as particles in kinetic theory of cosmology, discussing distribution function choice and red shift

09 p1605 A69-22410

Boltzmann H function for moderately dense gas of identical particles with discrete velocity distribution in cases of nonisotropic binary and ternary collisions

10 p1725 A69-23790

Plane wave solutions for acoustic propagation in polyatomic gas by using Sirovich-Thurber method for polyatomic kinetic models

11 p1920 A69-24287

Boltzmann equation with BGK model as governing equation for sharp leading edge problem in supersonic flow

11 p1817 A69-24288

Boltzmann equation for system of equations governing evolution of gas of identical particles with discrete velocity distribution, applying Chapman-Enskog method

11 p1921 A69-24325

Slip flow problem for general specular-diffuse boundary condition in kinetic theory of gases, noting molecular distribution function

11 p1869 A69-24893

Kinetic theory for examining transition regime of rarefied gas dynamics, discussing Boltzmann equations and models with related boundary value problems

11 p1870 A69-25005

Kinetic theory for spherical expansion of hypersonic jet flow indicating translational freezing in hypersonic source expansion

11 p1870 A69-25006

Kinetic theories applied to shock wave structure study of monatomic gas

11 p1870 A69-25007

Tonks-Dattner resonances in plasma column, using linearized Vlasov equation for coupling to plasma waves of time varying electric fields

11 p1929 A69-25266

Independent nature of variables in dimensional analysis, discussing temperature in kinetic and dimensional analyses

13 p2289 A69-28362

Knudsen arcs kinetic theory with cesium/inert gas mixtures in narrow gap between parallel plate electrodes, discussing fast particle beams and electron scattering

14 p2491 A69-29245

Kinetic theory of fluctuations in turbulent plasmas based on construction of many particle distribution functions

14 p2502 A69-29989

Kinetic theory of gases collision cross section definition compared to usual definition, discussing time reversed collisions

14 p2488 A69-29993

Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation

15 p2660 A69-30913

Metal particles evaporation kinetics in plasma arc, determining total and unsteady evaporation time by spectroscopy and absorption radiography

15 p2663 A69-30990

Optimization techniques for stellar kinetic theory problems, discussing kinematics distribution function, cosmic gas dynamics, interstellar matter, etc

15 p2695 A69-31004

Magnetic field lines curvature effect on plasma instabilities due to ion temperature gradient, noting frictional gravitation field simulation

16 p2816 A69-31636

Book on mathematical methods in kinetic theory covering boundary value problems associated with Boltzmann equation, model equations, rarefied gas dynamics, etc

16 p2811 A69-31721

Linearized Boltzmann equation in kinetic theory for weakly ionized plasma electrons under alternating electric and circularly polarized magnetic field, noting higher harmonics generation

16 p2820 A69-31752

Kinetic theory and gas-surface interactions for upper atmospheric density measurements by mass spectrometers, pressure gages and satellite drag, detailing adsorption effect

16 p2776 A69-32089

Metal oxide particle growth processes in rocket chambers and nozzles, using generalized kinetic-coagulation equation

[AIAA PAPER 69-541]

16 p2844 A69-32724

Supersonic leading edge problem using nonlinear Boltzmann equation with ellipsoidal model, calculating molecular distribution functions for flow field

[AIAA PAPER 69-652]

17 p2892 A69-33464

Kinetic theory of stationary laser emission under quasi-equilibrium conditions, analyzing emission modes

19 p3332 A69-35874

Laser multimode emission kinetic theory, discussing quasi-equilibrium disturbance effects and nature of inhomogeneity

19 p3333 A69-35875

Finite elements general theory applied to wave propagation, gas kinetics, nonlinear partial differential equations, continuum mechanics and fluid dynamics

20 p3567 A69-36948

Rice-Ramsperger-Kassel kinetic theory applied to sulfur hexafluoride injection into boundary layer of high speed reentry vehicle

20 p3514 A69-37226

Necessary and sufficient conditions of kinetic processes involving two systems of point masses

21 p3771 A69-39087

Quantum-mechanical theory of unimolecular kinetics and predissociation developed from generalized Fano theory of resonant scattering

22 p3986 A69-40724

Kinetic theory for macroscopic transport phenomena in N-component polyatomic gas mixtures with internal degrees of freedom under nonlocal thermodynamic equilibrium

23 p4238 A69-41435

Acoustic wave propagation in plasma, analyzing ionic and electron sound caused by oscillation and relaxation processes using Landau and Vlasov kinetic equations

23 p4196 A69-41726

KINETICS

NT ELECTROKINETICS

NT KINETIC ENERGY

NT NEWTON THEORY

NT REACTION KINETICS

NT VARIABLE MASS SYSTEMS

Kinetics of vaporization of metals with surface subjected to incident radiation flux noting pulse duration

02 p0350 A69-11577

Lithium aluminum hydride thermal decomposition using isothermal kinetics and differential thermal and thermogravimetric analyses, noting decomposition in four stages

02 p0304 A69-11898

Thermodynamic and kinetic interactions of high melting point metal oxides reduction by carbon

03 p0445 A69-13568

Q switched Ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes

04 p0610 A69-14381

Cylindrical thermionic diode with rhenium emitter for diode kinetic experiments, presenting test data from prototype diode with thimble water cooled
09 p1438 A69-21818

Longitudinal electric field penetration into semibounded plasma using kinetic approximation, assuming diffusive plasma particles reflection from plasma boundary
12 p2138 A69-26711

Composition dependence of carbon activity and carbon diffusivity in austenite
13 p2279 A69-27763

Q switched ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes
14 p2456 A69-28754

System kinetics synthesis for nonlinear multiple lumped parameter system having responses in boundary region of phase-time space
16 p2812 A69-32247

Device quantity failure kinetics or time dependence effect on time-to-failure distribution resulting from given device degradation coefficients distribution
17 p2936 A69-32895

Monograph on motion of solid body with cavities containing viscous liquid, covering kinetics involving completely or partly filled fluids
20 p3578 A69-38200

Emission kinetics of passive Q switched laser without constraints on relaxation time and switching characteristics of absorption centers and medium
21 p3740 A69-39550

KINFOFORM

Computer generated kinoform optical element operating on phase of incident waves and forming wave front reconstruction single image
10 p1697 A69-23867

KIRCHHOFF-HELMHOLTZ FLOW

U PIPE FLOW

KIRCHHOFF-HUYGENS PRINCIPLE

U DIFFRACTION

U WAVE PROPAGATION

KIRCHHOFF LAW OF NETWORKS

Kirchhoff equations for synthesis of passive dipole arrays, obtaining best approximation to radiation patterns
23 p4138 A69-41935

KIRCHHOFF LAW OF RADIATION

Longitudinal thermoelastic wave propagation in infinite plate, proving generalized Kirchhoff theorem
03 p0528 A69-13924

KIRKENDALL EFFECT

Two stage thermal treatment inhibiting influence on swelling and porosity linked to Kirkendall effect during sintering of Fe-Ni powder mixtures
05 p0782 A69-16616

KITE BALLOONS

U TETHERED BALLOONS

KLEIN-GORDON EQUATION

Space-time diffraction for asymptotic solution of Klein-Gordon equation, studying one dimensional dispersive medium
05 p0802 A69-15930

KLYSTRONS

Microwave selective filter using resonant cavity with single coupling component in feedback circuit of amplifier traveling wave tube or klystron
01 p0042 A69-10384

Permanent magnets used in conjunction with magnetrons, crossed-field amplifiers, klystrons, traveling wave tubes and microwave ferrite devices [IEEE PAPER 2.3]
01 p0045 A69-10713

Klystron bunching analysis, adding electron overtaking formulation to existing nonlinear space-charge wave theory
02 p0215 A69-11939

Stabilization system for klystron automatic frequency control, noting use in voice communication microwave generators and resonance spectroscopy
02 p0216 A69-12096

CW klystron amplifiers design limitations at Ku and Ka bands, discussing operation characteristics
03 p0405 A69-13724

High power transmitting tubes for INTELSAT satellite communication earth stations, including multicavity klystrons and wideband TWT
05 p0728 A69-15668

Frequency vs power absorption characteristics of deactivated klystrons, noting resonance frequencies and perturbation effect of electron beam loading
05 p0729 A69-15978

Design of coupled cavity extended interaction output resonators for klystron amplifiers
07 p1095 A69-18431

Double gap catchers for klystron amplifiers and oscillators
07 p1095 A69-18432

High power microwave interactions in pulsed electron beam plasma klystron
07 p1095 A69-18433

UHF high power klystron for DESY synchrotron, discussing design, short circuited load operation, phase variations and optimum RF outputs
07 p1096 A69-18434

FM noise in two and three chamber klystron oscillators, discussing tubes to reduce noise and relative merits of active or passive stabilization circuits
07 p1096 A69-18438

Van der Pol nonlinear oscillation theory adapted to microwave reflex klystrons, explaining locked and unlocked monotonic operational modes
09 p1466 A69-22444

DC to RF energy conversion in ungridded klystron gaps, calculating efficiency and optimum load conductance as function of gap dimensions
12 p2041 A69-26629

Current harmonics in triode klystron for frequency multipliers, noting modulation voltage
13 p2234 A69-28510

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, giving block diagrams of meter, detector and oscillator
14 p2451 A69-29800

Small signal analysis of processes in klystron resonators involving beam-field interaction
15 p2573 A69-30117

Space charge effects on trigger current and reflector voltages of reflex klystron
15 p2574 A69-30131

Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
17 p3006 A69-33674

Electrostatically focused klystron /EFSK/ small signal gain calculations based on lens cell space charge wave analysis
18 p3109 A69-35294

Axially symmetric magnetic fields for constant radius annular electron beams reflection, applying results to design of reflex klystron millimeter oscillator
19 p3267 A69-35930

Telemetry by reflex klystron accelerometer and seismometer with on air or coaxial cable signal transmission
19 p3272 A69-36255

Reflex klystron with closed electron flux in crossed electric and magnetic fields permitting inertialess frequency returning
21 p3682 A69-39128

Mush cathode fabrication and characteristics for high power klystrons, comparing efficiency to oxide cathodes
23 p4144 A69-42532

KNOBS

Minimum dimensions of circular nondetent knobs mounted on concentric shafts in case of nontolerable frequent inadvertent operation of adjacent coaxial knobs
17 p2916 A69-34005

Optimum knob crowding, measuring reach time, turning time, inadvertent touching and influence of knob spacing, diameter and configuration
17 p2916 A69-34006

Control knob optimum diameter for minimum operation time, noting frictional resistance
21 p3664 A69-38969

KNOWLEDGE

U PARADOXES

U PHILOSOPHY

KNUDSEN FLOW

Low voltage Knudsen arc in cesium argon mixture using tungsten electrodes, analyzing current voltage characteristics
06 p0963 A69-16920

Monte Carlo method to calculate distributions describing particle behavior in Knudsen cell, clarifying relationship between gaseous collisions and Knudsen number
06 p0908 A69-17111

Monte Carlo solution of linearized Boltzmann equation in rarefied gas dynamics, noting Knudsen layer and Couette flow applications
06 p0910 A69-17345

Collimated nozzle beam for probing low density gas flows, discussing transition from free molecular to isentropic flow and Knudsen numbers
07 p1136 A69-19467

Response times for entire Knudsen number range in straight round pressure pipes, using digital computer in final integration
10 p1677 A69-22900

One dimensional unsteady monotonic Maxwellian gas flow at small Knudsen numbers using Hilbert method, noting validity for shear flows
14 p2432 A69-29611

Coanda effect of separated jets reattachment to wall at high Knudsen number in pneumatic fluidic devices discussing Reynolds and Mach numbers effect [ASME PAPER 69-FLCS-37]
21 p3692 A69-38602

Rarefaction onset along streamline from rocket nozzle with small Knudsen number at exit plane
23 p4152 A69-41920

Monte Carlo method applied to heat transfer in rarefied gas flow between parallel plates involving temperature jump in Knudsen layer
24 p4246 A69-43490

KNUDSEN GAGES

Monte Carlo method to calculate distributions describing particle behavior in Knudsen cell, clarifying relationship between gaseous collisions and Knudsen number
06 p0908 A69-17111

Zirconium niobium alloys thermodynamic properties measured by Knudsen effusion method using zirconium
07 p1165 A69-18940

Equilibrium vapor compositions and activities over Fe-Cr-Ni alloys at 1600 C determined by collecting effusate from thoria Knudsen cells
23 p4175 A69-41503

KOLMOGOROFF THEORY

Statistical model of turbulent flow confirms Kolmogoroff hypothesis of equilibrium zone at large Reynolds numbers
03 p0413 A69-12949

Upper bounds for Bernstein-Kolmogoroff multidimensional inequalities, analyzing independent random vectors
11 p1910 A69-25698

Time variability of horizontal wind as function of time provided by Kolmogoroff structure functions for components of isotropic turbulence
18 p3167 A69-34829

KRONECKER PRODUCT

U ORTHOGONALITY

KROOK EQUATION

Krook kinetic relaxation equation generalized to include approximate kinetic equations with velocity independent collision frequency
02 p0234 A69-12582

Boltzmann equation with BGK model as governing equation for sharp leading edge problem in supersonic flow
11 p1817 A69-24288

Bhatnagar-Gross-Krook model for plane shock structure, considering moment and least squares methods and shock density gradient error analysis
12 p2063 A69-27112

Plane shock layer structure in pseudo-Maxwellian monatomic gas, integrating Krook equation for gas molecule velocity
14 p2432 A69-29613

KRYPTON

Total ionization cross section for symmetric collisions measured as function of energy by using neutral atomic beams of neon and krypton
08 p1356 A69-20740

Partially ionized Kr and Xe transport coefficients for various pressures and at high temperatures computed on basis of charged particle cross sections
09 p1548 A69-21935

Population densities, pumping rates, lifetimes, etc, of singly ionized krypton ion laser
12 p2109 A69-26638

Mode competition of 5861 and 6470 A lines in ionized Kr laser attributed to electronic level excitation processes
15 p2635 A69-31106

Radiation cooling behind strong shock in Kr as function of plasma luminosity near end of relaxation zone
18 p3171 A69-34450

Ar-Kr integral collision cross sections based on density measurements of Ar beam passed through liquid nitrogen cooled Kr filled scattering chamber
19 p3378 A69-36185

KRYPTON ISOTOPES

Spontaneous symmetric fission of superheavy elements near doubly magic nucleus as explanation for Xe and Kr isotopic composition anomalies in meteorites
20 p3601 A69-37503

KRYPTON 85

Radioactive Kr as gaseous penetrant for nondestructive test inspections, noting high sensitivity
19 p3322 A69-35575

KU BAND

U SUPERHIGH FREQUENCIES

KUTTA-JOUKOWSKI CONDITION

Blasius-Chaplygin formula for generalizing Kutta-Joukowski theorem concerning jet profiles, calculating resultant of hydrodynamic forces
11 p1867 A69-24355

Shape, position and velocity of vortex wakes shed in unsteady multienergy flows near trailing edge, applying Kutta condition
[ASME PAPER 69-APMW-19]
24 p4245 A69-43099

L

L BAND

U ULTRAHIGH FREQUENCIES

L-1011 AIRCRAFT

L-1011 Tri-Star aircraft systems and safety provisions, discussing automatic flight control system, propulsion, noise reduction, galley, coat storage and cabin window shades
[AIAA PAPER 69-828]
19 p3243 A69-35598

Design and economic concepts of Lockheed L-1011 wide body trijets, discussing airport and airways congestion alleviation, passenger appeal, etc
[RAES PAPER 15]
22 p3863 A69-40494

L-1011 fail operative automatic landing system design, operational characteristics and test programs
[SAE PAPER 690407]
23 p4185 A69-41657

LABELING [MARKING]

U MARKING

LABOR

Occupational attrition estimation methods for determining personnel separation through marriage, death, retirement and transfer applied to engineering and nursing
07 p1245 A69-19728

Efficient allocation of maintenance resources in USAF, analyzing B-52 costs and substitution of capital for labor
13 p2382 A69-28041

LABORATORIES

NT ENGINE TESTING LABORATORIES
NT ENVIRONMENTAL LABORATORIES
NT HUMAN FACTORS LABORATORIES
NT LUNAR MOBILE LABORATORIES
NT LUNAR RECEIVING LABORATORY
NT MANNED ORBITAL LABORATORIES
NT MANNED ORBITAL RESEARCH LABORATORIES
NT SPACE LABORATORIES

Independent testing laboratory management, outlining requirements specialized to fit continued growth conditions
15 p2720 A69-30402

Unutilized ideas in university laboratories, showing generation and implementation enhancement by marketing experience and product development background
15 p2720 A69-30596

Air cushion vehicle research and development laboratory testing, plans, support equipment, monitoring by TV, etc
15 p2589 A69-30865

Measurable and strategic characteristics of Army laboratories management, considering papers published, inventions and laboratory performance
15 p2721 A69-31070

Experiments integrated into single automated laboratory to detect extraterrestrial life through measuring metabolism and growth in planetary surface material
17 p2912 A69-32969

Technical communication patterns in R and D laboratories, discussing effects of work structure, social relations, etc
20 p3640 A69-38019

Laboratory experiments applicability to interplanetary plasma physics, describing simulations of solar

wind interactions, magnetosphere, collisionless shock waves, etc
22 p4028 A69-40689

LABORATORY EQUIPMENT

Equipment for minimum cost laboratory for thin and thick film hybrid circuits
04 p0559 A69-15198

High temperature vacuum tensile test device for continuously direct recording various stress-strain diagram rates by interchangeable dynamometer scale
07 p1117 A69-19319

Solid state ozone generator for preparing ozone in known concentrations to 1000 ppm in air for laboratory studies
10 p1693 A69-23346

Laboratory device for investigating thermionic energy converters and measuring current-voltage characteristics by static/dynamic methods
18 p3136 A69-34700

LABYRINTH

NT COCHLEA

NT VESTIBULES

Labyrinth polarization effect on stimulation and neuron activity in visual cortex of cats, using electroencephalograph
20 p3469 A69-37244

Vestibular neurons activity in decerebrized cats under ipsilateral and contralateral labyrinth polarization combined with acoustic and caloric stimulation
20 p3471 A69-37254

Cats vestibular neurons reactions to labyrinths mon- and binaural polarization and caloric stimulation
20 p3471 A69-37255

LACTATES

Pyridine nucleotide-linked D-lactate dehydrogenase stereospecificity in various species of invertebrates
01 p0018 A69-11198

Catalytic, physical and chemical properties of enzyme lactate dehydrogenase isolated from lobster tail muscle
22 p3897 A69-41069

LACTIC ACID

Glycolysis rate and lactic acid content in rats myocardium during adaptation to hypoxia, using pressure chamber
10 p1645 A69-23501

LAG [DELAY]

U TIME LAG

LAGRANGE COORDINATES

Resonant long period orbits around Lagrange equilibrium points, discussing formal expansions method for three body problem
07 p1225 A69-19719

Hamilton principle for inviscid compressible fluid in Euler coordinates, analyzing shortcomings found in variational principles and model in Lagrangian coordinates
11 p1875 A69-25483

Density perturbation mode in Lifshitz relativistic theory for expanding universe gravitational instability, adopting Lagrangian coordinate condition to eliminate physically meaningless solution
15 p2652 A69-30203

First approximation stability of triangular Lagrange solutions of restricted elliptical three body problem, formulating power series for orbital eccentricity
20 p3575 A69-37318

Renormalization of second order self energy part of photon and lowest order corrections to single photon vertex using Lagrange vector meson density
21 p3775 A69-39468

LAGRANGE EQUATIONS OF MOTION

U EULER-LAGRANGE EQUATION

LAGRANGE MULTIPLIERS

Dynamic programming and indeterminate Lagrange multipliers to formulate optimal control for discrete systems
05 p0737 A69-15886

Lagrange multipliers of variational problem of point motion and isochronal derivatives in field of attraction of axisymmetric planet
05 p0823 A69-16015

Coasting arc determination in rocket trajectory problems by Lagrange multipliers
09 p1595 A69-21969

Ordinary and inverse variational methods for stress-strain state of solid body, using Lagrange multipliers to reduce variational problem
10 p1793 A69-22885

Optimal control of one dimensional fluid flows with characteristic velocity passing through zero, showing

Lagrange multipliers continuous and bounded in optimal solution
11 p1934 A69-25728

Coplanar impulsive transfers and second variation test, using maximum principle and Lagrangian multiplier technique for propellant expenditure minimization
19 p3400 A69-35676

Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model
23 p4215 A69-41896

LALLEMAND CAMERAS

Photoelectronic image devices, discussing detectors, electronography, Lallemand camera, spectracon and electron image multipliers
12 p2082 A69-26136

Lallemand electronic camera application for spectroscopic observations of unsteady phenomena in galactic nuclei at 4000 A, noting radial velocities
12 p2163 A69-27017

LAMB WAVES

Self locking of three laser modes in He-Ne laser on basis of Lamb theory
05 p0773 A69-16290

FM Lamb wave system for flaws and defects detection in thin metal sheets
10 p1699 A69-23048

Monochromatic waves propagation in infinite micropolar elastic plate, treating Lamb and Love waves
11 p1995 A69-25605

Axisymmetric Lamb wave propagation in semi-infinite micropolar elastic solid, considering time varying load on half space boundary
24 p4406 A69-43730

LAMBERT LAW

U BOUGUER LAW

LAMBERT SURFACE

Lambert problem of fitting conic to two position vectors with specified time interval solved numerically by Newton-Raphson iteration
03 p0518 A69-14250

Horizontal Situation Display /HSD/ map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection
[AIAA PAPER 69-987]
22 p3908 A69-40367

LAME FUNCTIONS

Natural vibrations of cylindrical panels analyzed on basis of Lame parameters, shell equations and energy method
04 p0674 A69-14592

Geopotential represented in ellipsoidal harmonics, discussing Lame functions generation and rectangular-ellipsoidal coordinates relation and orbital elements perturbations
15 p2599 A69-31333

LAME WAVE EQUATIONS

Lame problem for elastic isotropic medium having free energy dependent on medium deformation and deformation gradients, estimating minimum surface curvature
11 p1970 A69-24632

LAMINAR BOUNDARY LAYER

Turbulent to laminar boundary layer reversal by applying negative pressure gradient
01 p0058 A69-10066

Unsteady laminar boundary layer near thermally insulated rotating disk, establishing solutions describing motion
01 p0059 A69-10361

Soviet monograph on laminar boundary layer in presence of suction covering incompressible flow through porous surface, drag reduction and optimal suction at high velocities
01 p0060 A69-10615

Very high temperature air flow laminar boundary layers on rotating bodies with unsteady chemical reactions, determining flow dynamic behavior
01 p0060 A69-10725

Time history of unsteady heat transfer in laminar boundary layer over semiinfinite flat plate due to step change in wall temperature or wall flow
01 p0177 A69-11401

Unsteady laminar boundary layer flow at curved surfaces, analyzing frequency and curvature parameter influence on basis of small disturbances method
[DVL-863]
02 p0231 A69-12053

Asymptotic laminar boundary layer in compressible gas in presence of normal and tangential velocity components at body surface
02 p0231 A69-12138

Transient laminar boundary layer development on flat plate following impulsive start of surrounding fluid

motion, obtaining temperature and velocity distribution relationship [ASME PAPER 68-HT-10] 02 p0232 A69-12208

Stability of laminar flow along flexible boundary using broken linear velocity profile 02 p0232 A69-12353

Compressible and incompressible laminar boundary layer with constant wall shear stress, using initial profiles 02 p0233 A69-12535

Boundary layers and heat transfers at shock tube walls, establishing approximate solution of boundary layer equation for laminar and turbulent cases [ONERA-TP-647] 03 p0412 A69-12875

Turbulent laminar boundary layer reversion to laminar state associated with departures from inner layer velocity distribution in presence of favorable pressure gradients 03 p0414 A69-13016

Unsteady compressible laminar boundary layer flow over insulated or isothermal flat plate moving with arbitrary time variant velocity in viscous fluid 04 p0588 A69-14715

Laminar compressible viscous boundary layer with arbitrary external pressure distribution, using implicit multiple difference method 04 p0591 A69-15294

Stationary velocity profile near jet driven vortex tube outer wall calculated by laminar boundary layer flow theory, neglecting wall curvature effects 05 p0798 A69-15610

Stability of laminar natural convection boundary layer flow, discussing thermal capacity coupling between fluid and wall and Prandtl number 05 p0744 A69-15719

Laminar boundary layer equations, discussing generalized similar solutions based on parametric approximation 05 p0746 A69-16019

Time dependent two dimensional incompressible laminar boundary layers analysis, discussing application to transient flow over semiinfinite flat plate [ASME PAPER 68-FE-10] 05 p0748 A69-16076

Two dimensional incompressible laminar boundary layer on curved wall for potential velocity inversely proportional to distance along origin [ASME PAPER 68-WA/FE-20] 05 p0749 A69-16096

Similar solutions for laminar boundary layer formed by convective and compressible flows 05 p0751 A69-16463

Heat and mass transfer by catalytic effect at wall, noting interaction of laminar boundary layer on flat plate 06 p1030 A69-17115

Universal equations for three dimensional laminar boundary layer of incompressible fluid on walls of axisymmetric channel with vortical external flow 06 p0909 A69-17328

Wall temperature and Mach number effect on heat flux distribution at spreading line of flow for supersonic gas on ellipsoid of revolution 06 p0858 A69-17331

Laminar boundary layer separation and reattachment near concave corner on cooled reentry body in supersonic flow 06 p0911 A69-17592

Inert gas discontinuous injection into nonequilibrium laminar boundary layer 06 p0860 A69-17635

Pressure distribution, heat transfer rates and shear stresses in laminar boundary layer of supersonic viscous flow incident on corner point of body 06 p0861 A69-17641

Incompressible laminar boundary layer with normal suction or blowing, discussing approximate method for evaluating laminar friction on wing contour 06 p0911 A69-17781

Incompressible laminar Falkner-Skan boundary layer suffering sudden acceleration by moving belt, noting boundary layer separation [AIAA PAPER 69-40] 06 p0912 A69-18049

Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow [AIAA PAPER 69-137] 06 p0913 A69-18078

Radiation profiles in ablating flat plate air-Teflon laminar boundary layer, discussing visible, UV and IR wavelengths [AIAA PAPER 69-99] 06 p1037 A69-18086

Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles, momentum and displacement thicknesses [AIAA PAPER 69-35] 06 p0913 A69-18094

Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests [AIAA PAPER 69-12] 06 p0863 A69-18112

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow 06 p0914 A69-18127

Hypersonic laminar boundary layers on compression corner model, studying flap lengths effects and mass transfer [AIAA PAPER 69-36] 06 p0866 A69-18214

Laminar boundary layer on axisymmetric blunt body in dissociated air taking into account nonequilibrium homogeneous chemical reactions 07 p1050 A69-18734

Chemical reactions in boundary layer on porous plate in oxygen stream, discussing similar solution of laminar boundary layer equations with flame front 07 p1119 A69-18735

Laminar boundary layer flow on sphere in hypersonic flow of equilibrium dissociating air 07 p1050 A69-18756

Solution velocity and turbulence effects on solvent cleaning of corrosion resistant steel tubing, discussing fluidity forces and cleaning formulation 08 p1318 A69-19807

Laminar boundary layer behavior in neighborhood of separation, discussing regressive influence beyond separation in Prandtl equations [ONERA-TP-677] 08 p1303 A69-19878

Vibrational relaxation effects on laminar boundary layer velocity profiles and temperature and on layer thicknesses and wall heat flow downstream of shock wave 08 p1303 A69-20269

Wall temperature influence on intensity of transverse flow of three dimensional laminar boundary layer resulting from transverse pressure gradient 08 p1251 A69-20274

Incompressible laminar thermal boundary layer unsteady development from state of rest in vicinity of wall of obstacle subjected to unsteady thermal field [ONERA-TP-680] 08 p1304 A69-20754

Transient free convection laminar boundary layer equations for heat transfer from vertical semiinfinite flat plate 08 p1305 A69-20842

Heat flux effect on laminar boundary layer separation in supersonic flow stressing free interaction zone 09 p1429 A69-21690

Numerical integration of equations of three dimensional laminar boundary layer in conical flow, using integral relation method 09 p1430 A69-21789

Two dimensional supersonic flow along adiabatic curved ramp noting separation, attached flow and laminar boundary layer interaction with external stream [AIAA PAPER 68-109] 09 p1430 A69-21949

Krause numerical solution applied to normal injection in three dimensional incompressible laminar boundary layer [DVL-902] 09 p1482 A69-21971

Laminar boundary layer separation and heat transfer on zero incidence cone at hypersonic speed, noting wall temperature and Reynolds number effects 09 p1433 A69-22609

Steady laminar boundary layer flow calculations extended to temperature boundary layer for given heat flow or temperature distribution at wall 10 p1808 A69-22915

Three dimensional laminar boundary layer of incompressible flow controlled by suction or injection, considering similarity flow solutions and role in satellite design 10 p1678 A69-22936

Similarity solutions of laminar boundary layer equations for three dimensional flows of incompressible power law fluids 10 p1678 A69-23235

Laminar boundary steady two dimensional constant velocity flow over curved surface equation derived from Navier-Stokes equation 11 p1867 A69-24375

Velocity profiles in unsteady laminar incompressible boundary layer over flat plate in shock tube by two parameter integral method 11 p1871 A69-25026

Low Reynolds number stability of incompressible fluid half jet flow, investigating free laminar boundary layer instability 11 p1874 A69-25280

Three dimensional laminar boundary layer near windward generator of cone subjected to uniform mass transfer by suction or injection 11 p1874 A69-25281

Numerical integration of equations for three dimensional laminar boundary layer on sharp elliptical cone in supersonic flow of ideal gas, discussing heat exchange 11 p1821 A69-25477

Universal laminar boundary layer equations, analyzing form of Prandtl equations not containing external flow velocity 11 p1876 A69-25490

Diffusion coefficients for laminar multicomponent dissociating boundary layer at surfaces of thermally decomposing protective coatings 12 p2190 A69-25890

Heat and mass transfer in laminar boundary layer on porous flat plate with variable suction or injection velocity and constant wall temperature 12 p2061 A69-25947

Laminar compressible subsonic boundary layer flow on symmetrical cylinder bounded by circular arcs noting zero/nonzero angle of attack 12 p2062 A69-26272

Tolerable surface roughness for transition stability in incompressible laminar boundary layer, including analysis of two and three dimensional roughness shape effects 12 p2063 A69-26774

Thermal radiation effects on laminar free convection boundary layer of vertical flat plate, studying absorbing and nonabsorbing gases [ASME PAPER 68-HT-43] 13 p2373 A69-27772

Velocity, enthalpy and mass flux radial distributions in laminar boundary layer from calorimetry of argon subsonic flow [ASME PAPER 68-HT-16] 13 p2374 A69-27776

Laminar MGD electrode boundary layer of thermal nonequilibrium plasma from collisionless Langmuir sheath and continuum theories 13 p2310 A69-28031

Chemically reacting flow field and solid surfaces, formulating nonequilibrium laminar boundary layer equations for two dimensional and axisymmetric flows 13 p2377 A69-28147

Laminar boundary layer studies by finite difference computer program for Mach numbers up to 15 13 p2248 A69-28173

Unique solution proven for laminar boundary layer equations of flow of revolution in unsteady state 13 p2248 A69-28195

Loitsianski method of parametric approximation extended to include flat plate with constant surface suction and flow past circular cylinder 13 p2249 A69-28247

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection, taking into account enthalpy and thermal diffusion effects 13 p2378 A69-28312

Relative variations of wall friction and thermal flux for laminar incompressible flow of constant volume mass 13 p2250 A69-28357

Three dimensional thermal laminar boundary layer around body moving with constant acceleration in incompressible fluid, considering wall temperature and Prandtl number 13 p2380 A69-2863

Temperature disturbance amplification in laminar natural convection boundary layer formed on vertical flat surface measured with hot-wire anemometers 14 p2430 A69-29575

Three dimensional laminar boundary layer on semiinfinite permeable flat plate in viscous incompressible fluid flow, calculating velocity profiles and skin friction components 14 p2433 A69-29898

Heat and mass transfer interaction at wall for laminar boundary layer on flat plate, considering catalytic effect of wall in atomic nitrogen recombination 15 p2716 A69-30415

Laminar boundary layer control by combined blowing and suction, analyzing surface roughness influence concerned with underwater vehicle skin friction reduction [AIAA PAPER 69-387] 15 p2591 A69-30477

Similarity solutions for laminar compressible boundary layer with reverse flow, considering various wall/stagnation temperature ratios 15 p2591 A69-30907

Laminar boundary layer equation solution representing velocity profile by fourth degree polynomial 15 p2593 A69-31263

Temperature profiles in laminar boundary layer with endothermal reaction investigated using nitrogen plasma jet in rarefied gas wind tunnel

16 p2821 A69-31833

Supersonic laminar boundary layer separation calculated by integral method using free parameters for velocity and enthalpy profiles, considering boundary layer-external flow interaction

16 p2731 A69-31834

Laminar boundary layer on rotating blades and yawed infinite wings, solving partial differential equations numerically by implicit finite difference scheme on computer

16 p2732 A69-31885

Turbulent boundary layer laminarization in conical nozzle flow, measuring velocity profiles and friction coefficient

[JPL-TR-32-1407] 16 p2732 A69-31894

Critical review of paper on suction effect on hyper-sonic laminar boundary layer separation

16 p2771 A69-31928

Compressible laminar boundary layer equations solutions for nonunit Prandtl number by direct numerical integration

16 p2772 A69-32173

Monograph on engineering calculations of momentum, heat and mass transfer through laminar boundaries having arbitrary pressure distribution and constant physical properties

16 p2879 A69-32203

Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests

17 p2890 A69-33251

Electron temperature and number density measured at atmospheric pressure in plasma thermal laminar boundary layer adjacent to cooled wall

[AIAA PAPER 69-692] 17 p3011 A69-33446

Eddy viscosity models adapting laminar boundary layer solution techniques to turbulent flows compared with measurements in hypersonic flows

[AIAA PAPER 69-688] 17 p2954 A69-33454

Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump

[AIAA PAPER 69-653] 17 p2954 A69-33458

Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions

[AIAA PAPER 69-710] 17 p2955 A69-33467

Laminar boundary layer control on two dimensional body by combined blowing and suction in presence of roughness, noting skin friction reduction

[AIAA PAPER 68-641] 17 p2957 A69-34015

Nonuniform heating rates during laminar boundary layer transition on slender cone at hypersonic speeds

18 p3085 A69-34435

Nonequilibrium laminar boundary layer of dissociating air on axisymmetric body determined using concentration profiles of oxygen and nitrogen components

19 p3239 A69-36395

Wall curvature effect on hydrodynamic stability of laminar incompressible boundary layer with respect to perturbing Tollmien-Schlichting waves

19 p3299 A69-36587

Three dimensional laminar boundary layer on conical body of revolution in low Reynolds number compressible fluid flow

19 p3241 A69-36762

Heuristic process for constructing similarity parameters approximation solution of laminar and turbulent boundary layers equations

19 p3301 A69-36799

Heat and mass transfer on vertical surface under combined free and forced convection, solving laminar boundary layer equations by stream function

19 p3453 A69-36844

Unsteady laminar incompressible time dependent boundary layer flows with cylindrical symmetry, transverse boundaries and no swirl

[ASME PAPER 69-FE-47] 20 p3517 A69-37997

Laminar boundary layer on funnel wall, considering internal vortical and radial flow

21 p3692 A69-38611

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection obtained with integral equations and Karman-Polhausen method

21 p3848 A69-38633

Gaseous injection effect on laminar boundary layer hypersonic flow around transpiration-cooled blunt bodies analyzed by integral method and Newtonian model

21 p3644 A69-39014

Laminar corner boundary layer flow with suction, discussing Navier-Stokes equations and steady state heat conduction problems

21 p3696 A69-39578

Laminar free convection from horizontal infinite strip with downward facing thermally insulated vertical walls at edges, noting boundary layer thickness and flow pattern

21 p3853 A69-39672

Effective thermal conductivity parallel to laminations and total conductance for combined parallel and normal heat flow in multilayer insulation

[AIAA PAPER 68-765] 21 p3853 A69-39763

Temperature-vorticity analogy for viscous two dimensional fluid flow extended to compressible flows, noting enthalpy and shear stress analogy

22 p3929 A69-39892

Numerical calculations for boundary layer flows allowing similar solutions, using iterative numerical integration of integral equation

22 p3929 A69-39925

Book on entropy gradient effect on laminar hypersonic boundary layers, covering external frictionless flow calculations based on momentum and energy integral theorems

22 p3930 A69-40618

Linear normal mode instability of three dimensional laminar and turbulent shear layers, analyzing relations between velocity profile, eddy viscosity and oscillations

22 p3932 A69-40893

Lower boundary approximation for theory of thermal laminar steady state boundary layer on isothermal immersed plate

23 p4150 A69-41334

Initial pressure rise and consequent laminar boundary layer separation during interaction with shock wave

23 p4151 A69-41691

Gas concentration measurement during injection into laminar boundary layer streaming along porous plate, using quadrupole resonance mass spectrometer

23 p4058 A69-41695

Laminar boundary layer in steady compressible gas flow past plane wing profile, studying surface temperature and suction effects

23 p4058 A69-41709

Pressure measurement modifications of quasi-steady flow model for interaction between reflected shock wave and laminar boundary layer in shock tube

23 p4152 A69-41903

Laminar boundary layers on slender paraboloids, analyzing skin friction formula and extension for transverse curvature ranges

23 p4152 A69-41904

Numerical method for calculating unsteady two dimensional boundary layers in laminar incompressible flow

23 p4152 A69-42108

Steady constant density two dimensional flow in laminar boundary layer over permeable curved surfaces, showing effects of suction or blowing

23 p4153 A69-42399

Boundary layer separation zones in laminar, transition and turbulent fluid flows past conical bodies with widening skirts

24 p4245 A69-43481

Laminar boundary layer separation in supersonic flow, constructing method for flow distribution functions, perturbed flow region dimensions and pressure perturbation amplitude

24 p4246 A69-43482

Heat transfer data for laminar, transition and turbulent natural convection boundary layers from water experiment on constant heat flux vertical plate

[ASME PAPER 69-HT-D] 24 p4410 A69-43525

Luminescent turbulent boundary layer prediction using mixing length model modified for viscous sublayer structural changes near wall compared with heat transfer data

[ASME PAPER 69-HT-13] 24 p4303 A69-43556

Van Driest-Bradshaw model for calculating sublayer function for self preserving luminescent boundary layers, discussing porous surface suction or acceleration effects

[ASME PAPER 69-HT-12] 24 p4304 A69-43557

Air flow laminarizing turbulent boundary layer, determining velocity, turbulence intensity, temperature profiles and local heat transfer coefficients

[ASME PAPER 69-HT-10] 24 p4413 A69-43558

Laminar, transition and turbulent boundary layer heat transfer measurements along wall in thermal entrance region of high temperature turbulent airflow through cooled tube

[ASME PAPER 69-HT-8] 24 p4414 A69-43560

Superimposed free vortex swirl effect on flow and heat transfer in three dimensional axisymmetric laminar boundary layer

24 p4304 A69-43584

Physical flows characteristics with self similar laminar boundary layers, performing inverse transformation of Falkner-Skan equation

24 p4304 A69-43586

Compressible laminar boundary layer behind shock or thin expansion wave past moving flat plate solved by transforming governing equations into Blasius equation

24 p4305 A69-43596

Quasi-steady laminar flat plate boundary layer in shock tube determined by reducing boundary layer equations to linear differential equations

24 p4305 A69-43632

High enthalpy shock tube and nozzle gas flows for incident shock Mach numbers analyzed for laminar boundary layers and boundary layer transitions

24 p4305 A69-43664

Laminar sublayer thickness in compressible turbulent boundary layers with and without heat transfer

24 p4306 A69-43724

LAMINAR BOUNDARY LAYER SEPARATION

U BOUNDARY LAYER SEPARATION

LAMINAR FLAMES

U FLAMES

LAMINAR FLOW

NT BLASIUS FLOW

NT HARTMANN FLOW

NT STRATIFIED FLOW

Tangential velocity profile growth in laminar axial flow through concentric annulus with rotating inner cylinder, using Navier-Stokes equations for prediction

01 p0058 A69-10143

Linear stability of steady and time dependent plane Poiseuille flow

01 p0175 A69-10333

Asymptotic forms of Navier-Stokes equations for laminar motions of incompressible viscous fluid, discussing validity and applications

[ONERA-TP-651] 01 p0059 A69-10383

Potential flow of stream interaction with two dimensional thin jet, discussing jet penetration depth

01 p0007 A69-11019

Linear stability of parallel flow in concentric annulus for infinitesimal axisymmetric disturbances

01 p0061 A69-11201

Two dimensional compressible inviscid laminar gas flows unsteady processes studied by extending method of characteristics

01 p0008 A69-11360

Laminar natural convection of electrically conducting fluid under magnetic field, noting temperature profiles

01 p0134 A69-11407

Frictional and heat transfer characteristics of laminar flow in porous tubes, using numerical solutions to flow and energy equations

01 p0177 A69-11408

Natural convection boundary layer stability on heated isothermal vertical plane wall, discussing Grashof number as laminar to turbulent flow transition criterion

02 p0188 A69-12038

Laminar flow of anisotropic Ericksen fluid near wall at large Reynolds numbers, discussing Newtonian behavior, viscosity coefficient and particle orientation

02 p0231 A69-12141

Plate temperature oscillation effects on forced convection laminar viscous incompressible MHD boundary layer flow from semiinfinite flat plate

02 p0288 A69-12143

Stability of laminar flow along flexible boundary using broken linear velocity profile

02 p0232 A69-12353

Algorithm for Orr-Sommerfeld equation applied to stability of laminar flow, noting profile resembling mean velocity profile of turbulent flow in flat tube

02 p0233 A69-12573

Supersonic flow past blunt body with convex corner calculated to establish sonic point on body

03 p0362 A69-13406

Eigenvalues for Orr-Sommerfeld equation by difference technique for Reynolds number range 5780-729000, determining Poiseuille flow stability in plane channel

03 p0416 A69-13654

Laminar flow of viscous fluid along wall with fixed leading edge and moving surface, discussing conditions of boundary layer formation and dynamic similarity

03 p0417 A69-13792

Steady laminar flow in two dimensional channel with different permeability porous walls and large injection at both walls

03 p0417 A69-13795

Instability and disturbance amplification in external laminar natural convection boundary layer over vertical flat surface with uniform heat flux

03 p0533 A69-13951

Laminar accelerating flow of thin film falling along vertical wall, emphasizing growth and decrease of boundary layer and film thickness

[ASME PAPER 68-APM/Z] 04 p0586 A69-14388

Laminar two dimensional free jet outflow of incompressible nonNewtonian pseudoplastic fluid from orifice into mass of same fluid

04 p0586 A69-14406

Relaminarization of turbulent flow, studying velocity profiles at various axial cross sections in porous wall tube with fluid injection

04 p0586 A69-14409

Thermal explosion in Poiseuille flow of reacting viscous fluid in infinite circular cylindrical channel or between two rotating infinite cylinders

04 p0686 A69-14986

Perfect magnetofluid model to study laminar flow stability along magnetic field, considering time dependences and rigid and free boundaries

04 p0637 A69-15045

Laminar heat transfer in circular pipes in low Peclet number flow case with laminar velocity profile, discussing Hagen-Poiseuille flows

04 p0687 A69-15397

Three dimensional boundary layers, extending Prandtl independence principle to laminar compressible flow over convex body

05 p0743 A69-15556

Laminar flow on swept low drag suction wings at high Reynolds numbers

05 p0696 A69-15557

Velocity profiles for laminar flow of homogeneous liquid in pipe inlet at small and moderate Reynolds numbers

05 p0743 A69-15578

Laminar flow of isotropic binary gas mixture in circular cylindrical tube with porous walls, determining concentration, field variation with wall suction Reynolds number

05 p0744 A69-15618

Laminar flow of nonNewtonian fluids described via rheological three parameter model

05 p0744 A69-15678

Laminar flow of stably stratified fluid with uniform upstream velocity and density gradient past thin flat plate, discussing upstream wake and boundary layer

05 p0745 A69-15724

Incompressible jet flows, discussing two dimensional jet, axisymmetric laminar jet and turbulent free jet

05 p0746 A69-16008

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects

[ASME PAPER 68-WA/HT-20] 05 p0847 A69-16123

Laminar flow stability parameter presenting coupling ratio between angular momentum change and loss rate by frictional drag

05 p0750 A69-16187

Injection or suction at disk surface, noting effects on heat and mass transfer in laminar flow about rotating disk

06 p1029 A69-17002

Laminar flow stability along flexible boundary, using broken linear velocity profile instead of boundary layer profile

06 p0909 A69-17207

Laminar source flow of viscous incompressible liquid between two parallel coaxial rotating porous disks

06 p0909 A69-17243

Turbulence hypothesis for velocity of laminar fluid flow at dividing line, considering basic pressure and adiabatic mixing zones

06 p0910 A69-17330

Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer

[AIAA PAPER 69-67] 06 p0862 A69-18044

Xenon flash lamps with electrolytic capacitors designed for photographic studies of laminar flows of viscous fluids

07 p1116 A69-18259

Similarity functions defined for laminar or turbulent separation in nonuniform supersonic flow

[ONERA-TP-659F] 07 p1050 A69-18417

Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds number .000006

07 p1050 A69-18703

Boundary layer approximation for steady laminar flow of viscous incompressible fluid past paraboloid of revolution, obtaining vorticity distribution

07 p1120 A69-18812

Navier-Stokes equations solved for viscous incompressible fluid flow due to laminar jet flow into channel in presence of magnetic field

07 p1120 A69-18997

Laminar conducting wall jet injected in transverse magnetic field, analyzing partial differential equations obtained

07 p1192 A69-19020

Laminar flow of viscous conducting fluid between parallel walls in traveling magnetic field, using Hartmann number expansion

07 p1192 A69-19023

Compressibility parameters role in pressure distribution derived for radial laminar compressible fluid flow between two disks

07 p1121 A69-19321

Laminar and turbulent stresses in plane asymmetric incompressible flows analyzed based on Boussinesq formula for turbulent shear stresses

07 p1121 A69-19330

Corrected stability limit for Poiseuille flow in pipes, annuli and channels, discussing flow between cylinders

07 p1121 A69-19475

Suction effect on temperature distribution and heat transfer in plane Couette flow and laminar flow in circular pipe

08 p1303 A69-20371

Transformation of laminar stationary incompressible boundary layer equations for body of revolution in incident flow, using difference method

08 p1252 A69-20703

Bounds on mass and momentum transport by turbulent flow between parallel plates derived for Couette and Poiseuille flows

08 p1305 A69-20840

Flow visualization tracer for quantitative measurements for laminar and turbulent flow, discussing mean velocity and shear stress

09 p1495 A69-21911

Permanent flow of solenoidal vector line rotation in steady nondegenerate rotational flow having complex lamellar unit normal to streamline

10 p1727 A69-22862

Laminar flow heat transfer of viscous incompressible fluid in entrance region of circular tube, using nonlinear equations

10 p1809 A69-23195

Hydromagnetic laminar natural convection flow and heat transfer of nonNewtonian fluid between parallel electrically conducting walls

10 p1728 A69-23237

Equilibrium dissociating gas laminar flow in circular tube calculated for heat transfer and hydraulic resistance, using boundary layer equations

10 p1679 A69-23426

MHD boundary layer nonlinear instability, treating laminar to turbulent flow transition as reversible process

10 p1734 A69-23452

MHD flows in MHD generator channel under magnetic field, analyzing steady laminar flow during entry and Hall effect on conductivity temperature dependence

10 p1734 A69-23455

Laminar elasticoviscous flow of liquid with short memory in two dimensional channel with porous walls

10 p1680 A69-23668

Differential equation for laminar flow of nonNewtonian fluid in annulus with porous walls of nonuniform permeability, considering inelastic and suction Reynolds numbers

10 p1680 A69-23690

Base drag effects on maximum lift drag ratio airfoils determined for moderate supersonic laminar and turbulent flows

10 p1633 A69-24060

Laminar flow stream containing periodic fluctuation of mass fraction of chemical species over flat plate with reactive surface

11 p1813 A69-24284

Dynamics of conducting fluid stream coupled to elastic medium by transverse electric or parallel magnetic field, considering stability of system

11 p1923 A69-24289

Convection heat transfer and flow in rotating bodies, discussing laminar, turbulent and mixed flow in cones and disks, spheres and cylinders

11 p1998 A69-24459

Second order effects on two dimensional laminar boundary layer flow of incompressible fluid

11 p1872 A69-25127

Criteria for reversion of turbulent to laminar flow / reverse transition/ as special cases of Reynolds number criterion, noting boundary layer properties role

11 p1873 A69-25133

Laminar Newtonian flow heat transfer to fluids with variable physical properties in vertical tubes with constant wall heat flux, considering viscosity and density

11 p2000 A69-25163

Self similar axisymmetric and plane laminar viscous gas channel flows noting exponential or hyperbolic law of decrease in static pressure along channel

11 p1875 A69-25488

Boundary layer calculation during laminar MHD channel flow under crossed magnetic and electric fields using successive approximation method

11 p1932 A69-25490

Finite difference method for heat transfer field developing laminar flow at inlet of circular uniform heated and isothermal tube, determining Nusselt number

12 p2062 A69-26242

Heat flux in two dimensional laminar separation zone in supersonic flow, measuring convection coefficient and wall pressure

12 p2011 A69-26289

Radial electric field effect on pressure drop in isothermal laminar flow of dielectric liquid through stainless steel tube, considering ion drag

12 p2136 A69-26400

Imaging for flowfield of nonuniform parallel streamlines with thin airfoil represented by vorticity distribution, noting change of lift and moment

12 p2012 A69-26775

Navier-Stokes equations of slow viscous fluid laminar flow near pipe inlet and exit with negligible mass forces, discussing velocity and pressure distribution

13 p2244 A69-27258

Piston-like laminar liquid metal flow in MHD generator to increase thermodynamic efficiency of cycle and to generate electricity by synchronous principle

13 p2206 A69-27491

Laminar-turbulent transition in MHD channel in transverse and longitudinal magnetic fields, discussing Reynolds equation for large Hartmann numbers

13 p2307 A69-27500

Supersonic wake flow visualization, obtaining direct photographs of various smoke streamlines

13 p2200 A69-28281

Kolmogorov-Prandtl turbulence energy hypothesis extended from turbulent region of one dimensional flow to laminar sublayer, obtaining numerical solutions for Couette flow

13 p2250 A69-28339

Temperature factor effect on transition from laminar to turbulent flow in boundary layer of plate

13 p2251 A69-28558

Incompressible laminar jet bounded by two parallel walls or by three walls, using linearized analysis related to Oseen approximation

14 p2429 A69-29023

Displacement of liquid by insoluble liquid from horizontal circular tube during laminar flow, analyzing flow characteristics

14 p2431 A69-29607

Radiating gray gas laminar jet in thermodynamic equilibrium ejected from plane nozzle into wake analyzed using boundary layer, divergence and transfer equations

14 p2432 A69-29612

Pressure drop fluctuations amplitude and frequency effect on channel resistance and magnetic field effect on fluctuations intensity in laminar conducting fluid flow

14 p2501 A69-29909

Convective heat and mass transfer coupling in laminar hydrodynamic duct flow, obtaining values for bulk and wall temperatures, transfer coefficients and rates, etc

15 p2716 A69-30004

Gas visco seals performance analyzed for continuum flow regime, noting coefficient agreement with laminar flow analysis

[ASLE FICFS PREPRINT 34] 15 p2621 A69-30494

Steady incompressible MHD laminar flow between parallel porous disks solved for large Reynolds and Hartmann numbers

15 p2662 A69-30968

Drag and friction coefficients for laminar pulsating incompressible fluid flow in circular tubes obtained from Navier-Stokes equation

15 p2592 A69-30988

Two dimensional laminar convection cells asymptotic behavior for high Rayleigh number, discussing Robinson and Pillow models for fluid between horizontal plates heated from below

16 p2767 A69-31588

Self excited vibrating laminar diffusion flames, discussing coupling, jet spacing radial heat transfer and boundary layer interaction

16 p2876 A69-31711

Asymptotic behavior of one dimensional laminar flow of incompressible viscous fluid in infinite cylindrical tube, giving equations for boundary conditions and flow rate

16 p2769 A69-31831

Laminar-turbulent transition in boundary layer on thermally decomposing surface, discussing gasification rate, Reynolds number effects, heat transfer and turbulence onset mechanism

16 p2878 A69-31951

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects [ASME PAPER 68-WA/HT-20]

17 p3068 A69-32902

Two term expansion for Nusselt number for laminar natural convection about isothermal horizontal cylinder in fluid with vanishingly small Prandtl number

17 p3068 A69-33014

Separated flow patterns in base flow at body recesses, emphasizing shock wave boundary layer interaction, laminar flow and flow in front of recess

17 p2949 A69-33124

Adiabatic compressible turbulent equilibrium boundary layer integral method analysis extended to study nonequilibrium laminar flows, deriving dissipation integrals, presenting numerical solutions [AIAA PAPER 69-689]

17 p2955 A69-33481

Transformation of two dimensional boundary value equations for laminar power law nonNewtonian fluid flow to yield similar solutions

17 p2957 A69-34016

Laminar separation in incompressible fluid flowing past bluff body at high Reynolds number, investigating shock wave interaction with laminar boundary layers

18 p3122 A69-34918

Boundary layer transition from laminar to turbulent flow on flat plate, considering supersonic and hypersonic flow, pressure gradients, surface curvature and roughness, etc

18 p3123 A69-34920

Asymptotic solution of supersonic linearized nonisotropic flow of viscous and heat conducting gas with internal heat sources past cylindrical shell, deriving surface pressure

18 p3089 A69-35460

Laminar flow of viscous compressible fluid with density dependent on temperature, calculating steady state Navier-Stokes equations using vector function

19 p3297 A69-35852

Hydrodynamic equations of laminar plane flow of incompressible viscous fluid in rectangular region, calculating velocity field by equivalent network and integration

19 p3297 A69-35853

Coupling conditions by distinct equations for two laminar flow regions, studying near wake and considering Euler, Navier-Stokes and Prandtl correlations [ONERA-TP-738]

19 p3299 A69-36649

Unsteady laminar MHD flow of electrically conducting viscous fluid between porous coaxial circular cylinders under radial magnetic field

20 p3581 A69-36912

Energy losses due to drag in unstable laminar fluid flow in tube

20 p3513 A69-36973

Rotta analysis for linear flow transformation into turbulent flow, discussing Reynolds numbers

20 p3513 A69-37086

Laminar flow of compressible viscous gas in channels of variable cross section

20 p3457 A69-37089

Electron density distribution in laminar air boundary layer on sharp wedges and cones predicted by reducing chemical kinetic model to ordinary differential equations [AIAA PAPER 68-733]

20 p3458 A69-37181

Stability theory formulation for evaluation of boundary layer transition from laminar to turbulent states [AIAA PAPER 68-669]

20 p3514 A69-37184

Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature [AIAA PAPER 68-672]

20 p3458 A69-37185

External natural convection flows, studying laminar instability, transition and turbulence in boundary layer flow

20 p3633 A69-37718

Heat transfer to compressible laminar jet flowing along flat wall, obtaining distributions of temperature, wall shearing stress, heat transfer rates and jet thicknesses [ASME PAPER 69-FLCS-30]

20 p3516 A69-37979

Slip ratios in annular two phase flow for case of laminar flow in film and no entrainment of liquid in vapor [ASME PAPER 69-FE-43]

20 p3517 A69-37995

Heat transfer in radial flow between two parallel plates, calculating Nusselt number for laminar and turbulent flows

20 p3633 A69-38176

Naimark theorem extended to class of nonself-adjoint eigenvalue problems in hydrodynamic stability, considering Orr-Sommerfeld equation and Taylor stability problem

21 p3754 A69-38426

Computational method for nonlinear two and three dimensional disturbances in plane parallel flows applied to transverse disturbances in plane Poiseuille flow

21 p3691 A69-38464

Propagation characteristics of steady adiabatic one dimensional laminar flames in premixed gases, considering activation energy and Lewis number

21 p3849 A69-38802

Ammonia addition effect on laminar flame speeds of propane-air mixtures

21 p3849 A69-38809

Heat transfer in curved channel as function of inlet configurations, obtaining Nusselt number equations for thermal and mixed convection and laminar flow

21 p3850 A69-38866

Membrane vibration problems for combined free and forced laminar convection through vertical ducts, obtaining expressions for velocity, temperature and Nusselt numbers

21 p3851 A69-38974

Laminar corner boundary layer flow with suction, discussing Navier-Stokes equations and steady state heat conduction problems

21 p3696 A69-39578

Laminar burning rate of premixed propane-air flames at one atmospheric pressure in DC electric fields, using cooled porous plug burned method

21 p3852 A69-39596

Channel flows energy stability, discussing Couette and plane Poiseuille flows, velocity profiles, vorticity maxima, etc

21 p3697 A69-39675

Thermal boundary layer formed during laminar jet flow over flat porous plate, discussing temperature distribution and mass transfer at plate surface

21 p3854 A69-39846

Free and dividing streamlines shapes for two dimensional jet from parallel walls penetrating into counterstream, discussing finite cavities

22 p3859 A69-40143

Laminar MHD flow in porous walled channel in transverse magnetic field, determining velocity distributions, induced fields and current over channel cross section

22 p3989 A69-40256

Laminar viscous flow and skin friction near trailing edge of flat plate analyzed by modified Oseen approximation, noting accuracy for high Reynolds numbers

22 p3930 A69-40683

Free viscous layers structure at large Reynolds numbers, using matched asymptotic expansions for two dimensional compressible flow

22 p3932 A69-40927

Boundary layer calculation in incompressible turbulent flow with closed streamlines, avoiding von Mises equation

22 p3932 A69-40931

Asymptotic description of laminar hypersonic boundary layer acceleration approaching sharp corner, assuming small interaction with outer inviscid flow [AIAA PAPER 68-67]

23 p4059 A69-41883

Limit-cycle oscillations of unstable plane Poiseuille flow analyzed by nonlinear Navier-Stokes equations

24 p4298 A69-42600

Laminar flow in porous circular pipe with constant suction or injection applied at wall

24 p4298 A69-42618

Mass injection by strong blowing across Couette-Poiseuille shear flow

24 p4301 A69-43354

Laminar flow swirling motion in circular duct, studying separation and reversal

24 p4301 A69-43355

Solution stability and secondary solutions growth beyond critical points investigation for Burgers equations for laminar-turbulent transition

24 p4302 A69-43360

Laminar flow in horizontal circular tubes with uniform heat flux, analyzing combined free and forced convection effects on secondary flow

24 p4409 A69-43519

Numerical program solving partial differential equations parabolic system for internal turbulent gas flow extended to flows undergoing circular tube laminarization by heating [ASME PAPER 69-HT-52]

24 p4409 A69-43520

Transverse curvature effect on laminar free convection heat transfer from vertical isothermal cylinders [ASME PAPER 69-HT-G]

24 p4410 A69-43522

Inverse transition from turbulent to laminar flow in radial diffusers, noting nonagreement of transition point prediction methods [ASME PAPER 69-HT-33]

24 p4247 A69-43530

Natural convection flow, discussing initial instability of laminar flow, disturbance amplification and transition to turbulent flow [ASME PAPER 69-HT-29]

24 p4411 A69-43531

Plane Poiseuille flow with nonlinear temperature distribution, studying vortex type secondary flow onset due to buoyant forces [ASME PAPER 69-HT-37]

24 p4411 A69-43533

Turbulent flow in circular porous tube laminarized by uniform mass injection through tube wall, measuring velocity and turbulence intensity by impact probe [ASME PAPER 69-HT-57]

24 p4303 A69-43537

Heat transfer and fluid friction of hydrogen and helium gas flows undergoing turbulent to laminar flow transition in heated pipe [ASME PAPER 69-HT-54]

24 p4303 A69-43539

Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method [ASME PAPER 69-HT-7]

24 p4304 A69-43561

Free flight telemetry base pressure measurements on slender cones and domed afterbodies in hypersonic laminar flow, using shock tunnel test facility [AIAA PAPER 68-698]

24 p4249 A69-43675

LAMINAR FLOW AIRFOILS

Design and fabrication of plane and trapezoidal fiberglass wings with laminar plastic profiles for aerodynamic tests, including wing rigging and slotted wing

19 p3324 A69-35831

LAMINAR FLOW CONTROL

U BOUNDARY LAYER CONTROL

LAMINAR HEAT TRANSFER

Transverse pressure gradient and streamwise derivatives effect on free convection laminar heat transfer on isothermal vertical plate at low Prandtl numbers

01 p0177 A69-11409

Transverse curvature effect on skin friction and heat transfer in laminar flows past slender circular cylinders

02 p0232 A69-12210

Heat transfer of steady laminar flow of incompressible, viscous and electrically conducting fluid between parallel porous plates

02 p0289 A69-12235

Cone tip blunting effect on cone local laminar heat transfer rate noting cone configuration, semivertex cone angle and Mach number

04 p0542 A69-14721

Laminar heat transfer in circular pipes in low Peclet number flow case with laminar velocity profile, discussing Hagen-Poiseuille flows

04 p0687 A69-15397

Hypersonic laminar and transitional heat transfer rate distribution on spherically blunted cones

05 p0696 A69-15707

Step function factor for laminar heat transfer from rotating disk with surface temperature changing stepwise in uniform forced stream

06 p1029 A69-17003

Laminar heat transfer in electrically conducting fluids flowing in parallel plate channels [JPL-TR-32-1335]

06 p1033 A69-17555

Pressure distribution, heat transfer rates and shear stresses in laminar boundary layer of supersonic viscous flow incident on corner point of body

06 p0861 A69-17641

Laminar heat transmission coefficients in combustion zone for particular oxygen and kerosene mixture

08 p1421 A69-20585

- Hot air open circuit wind tunnel for testing vaporized fuel films heat and mass transfer over flat plates
08 p1302 A69-20878
- Laminar flow heat transfer of viscous incompressible fluid in entrance region of circular tube, using nonlinear equations
10 p1809 A69-23195
- Temperature variation effects on heat transfer in laminar tube flow, taking into account constant wall temperature and heat flow density
12 p2189 A69-25762
- Heat transfer in laminar separated flows with flat plate segment connections, indicating correlation between local heat transfer rates for successive regions
16 p2879 A69-32169
- Nonequilibrium laminar heat transfer in viscous flow of chemically unstable gases past blunt body and plate
20 p3513 A69-37087
- Natural convection local heat transfer on constant heat flux inclined surfaces for water and air in laminar, transition and turbulent regimes
[ASME PAPER 69-HT-C] 24 p4410 A69-43526
- Boundary layer and heat transfer measurements for turbulent boundary layer laminarizing in conical nozzle flow with wall cooling
[ASME PAPER 69-HT-56] 24 p4303 A69-43538
- LAMINAR JETS**
U JET FLOW
- LAMINAR MIXING**
- Nonequilibrium dissociation effects on constant pressure laminar mixing for diatomic molecules and atoms, analyzing concentration and temperature of free shear layer
04 p0588 A69-14733
- Laminar mixing of two semiinfinite parallel streams, deriving equations and boundary conditions by applying perturbation technique
05 p0744 A69-15714
- Thin wall flow of circular jets in bounded transverse flow, showing hydrodynamic parameter of mixture effect on jets dimensionless path
10 p1679 A69-23567
- Three dimensional laminar jet mixing of incompressible viscous fluid from rectangular cross section nozzle into uniform stream
16 p2768 A69-31687
- Laminar jet mixing of incompressible viscous fluid issuing from rectangular nozzle into uniform stream, considering various boundary conditions
[ASME PAPER 69-FLCS-22] 20 p3516 A69-37976
- Soviet book on integral methods of calculations in theory of turbulent jets and wakes, covering turbulent boundary layers, laminar mixing, etc
20 p3518 A69-38211
- LAMINAR WAKES**
- Laminar two dimensional viscous wake behind finite flat plate, investigating upstream and downstream flow field of trailing edge region for high Reynolds numbers
[ASME PAPER 68-WA/APM-20] 04 p0541 A69-14387
- Laminar and turbulent hypersonic wakes trailing blunt bodies studied by finite difference method, taking into account pressure gradients and nonequilibrium chemical reactions effects
14 p2391 A69-29618
- Flow measurements about high Mach number low Reynolds number laminar wake behind spherically blunted cones, including surface and wake flow field data, radial wake profiles, etc
[AIAA PAPER 69-714] 17 p2894 A69-33500
- Laminar recompression behavior downstream of stagnation point behind hypersonic slender body, obtaining finite difference numerical solutions for near wake flow field
[AIAA PAPER 69-713] 18 p3085 A69-34417
- Similarity solutions describing buoyancy effect on laminar and turbulent wakes of heated body in incompressible fluid vertically ascending flow
19 p3296 A69-35761
- Axisymmetric laminar and turbulent wakes of body in flow with streamwise pressure gradient, discussing velocity defects and profiles
19 p3296 A69-35762
- Karman vortex street formation indicated by smoke visualization method study of laminar wake behind single cylinder
21 p3644 A69-38687
- Nonlinear finite-amplitude instability of two dimensional compressible laminar wake flows, using Fourier expansion and Landau equation
24 p4245 A69-43557
- Fluid mechanical structure of laminar hypersonic wake behind sharp circular cone, investigating flow

field at zero angle of attack and adiabatic wall temperature
24 p4247 A69-43576

LAMINATED MATERIALS U LAMINATES LAMINATES NT MULTILAYER INSULATION

- Balsa wood laminates as aircraft structural material noting thermal properties, fire and fatigue resistance, weight savings, etc
01 p0101 A69-10595
- Interlayer slip in layered wood beams with nail joints analyzed in terms of small deflection theory
01 p0169 A69-10638
- Stress distribution in composite cantilever beams of three layers with end loading solved by closed form elasticity method
01 p0172 A69-11266
- Thermal protection by ablation calculated, emphasizing blocking phenomenon and effectiveness of laminated and reinforced resins
02 p0351 A69-11890
- Fiberglass reinforced plastic laminates failure under biaxial compression due to layer separation with strain energy as endurance criterion
02 p0270 A69-12142
- Fracture process in composite films of stressed tetrafluoroethylene and fluorinated ethylene propylene
02 p0270 A69-12368
- Multilayered shells equivalence to single layer shells for stress analysis, vibrations and stability
02 p0346 A69-12509
- Sandwich panel construction, examining design with respect to panel size, thickness and weight limit
03 p0524 A69-13124
- Heat removal in multilayer superconducting devices, determining optimum number of layers
03 p0493 A69-14225
- Thickness twist and face shear vibrations of laminated layer, determining frequencies from stress equations of motion, constitutive equations and boundary conditions
[ASME PAPER 68-WA/APM-10] 04 p0668 A69-14392
- Time harmonic vibrations and wave propagation in laminated plate, using elasticity theory equations and continuum theory for layered medium
04 p0675 A69-14685
- Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load
04 p0679 A69-14907
- Attenuation calibration of optical resonator using transparent plate coated by thin metal layer
04 p0613 A69-15415
- Three dimensional photoelastic analysis based on optical theory of multilayer reflection technique
04 p0683 A69-15496
- Theory of inhomogeneous simple bodies applied for universal solutions for incompressible laminated bodies
05 p0834 A69-15732
- Bending equations for shallow elastic three layer asymmetric shell with different isotropic layers and transversely isotropic rigid filler at various temperatures
05 p0840 A69-16197
- Critical axisymmetric loads for instability in orthotropic multilayer conical shells obeying Hooke law under axial compression or external pressure
05 p0840 A69-16198
- Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders
05 p0769 A69-16486
- Stability of three layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear
05 p0843 A69-16683
- Delamination effects on strength degradation of filament wound composites
06 p0946 A69-17126
- Free vibration of thin laminated orthotropic cylindrical shells
06 p1020 A69-17145
- Stress-strain relations for laminar anisotropic medium from known mechanical properties of layers for application to fiber reinforced plastics
06 p1021 A69-17176
- Glow discharge technique for dielectric layer deposition between metal interconnection patterns in multilayer integrated circuits, noting adhesion and feedthrough problems
06 p0931 A69-17201

- Optimal computer calculation procedure for medium thickness anisotropic laminar plates with shear applied to rectangular and hinged plates
06 p1026 A69-18015
- Ferrite microstrips substrates role in integrated circuits, noting application of hybrid technology
07 p1090 A69-18399
- Substrates containing silicon regions separated by silicon dioxide or ceramic dielectrics, prepared by lamination in hot press, noting applications to integrated circuits
07 p1100 A69-18617
- Dielectrics reflow and decal air isolation for silicon integrated circuit components
07 p1100 A69-18618
- Stress-strain response up to ultimate failure and ultimate strength of laminated composite with nonlinear orthotropic lamina
07 p1170 A69-18710
- Antisymmetric cross ply and angle ply laminated plates deflection under transverse loading with coupling between bending and middle-plane extension
07 p1231 A69-18711
- Laminated composite fracture statistical theory with stress enhancements in elements next to primary fracture, comparing elastic and plastic matrices
07 p1170 A69-18712
- Unsymmetrically laminated simply supported plates approximate solutions, considering potential energy and reduced stiffness matrix
07 p1232 A69-18725
- Mathematical formulas for rigidity distribution of inhomogeneous multilayer shells, discussing invariance property
07 p1232 A69-19011
- Glass/resin laminates behavior at high temperature
07 p1136 A69-19515
- High temperature polyimide laminates for radomes and other supersonic aircraft components, discussing index flexural strength, dielectric constant and dissipation factor
07 p1171 A69-19545
- Translunar cracks in laminated graphite filament composites, noting effect of thermal stresses due to cooling
08 p1337 A69-20483
- Multidirectional boron-epoxy laminates shear strengths and elastic moduli, calculating in-plane tension and compression
08 p1337 A69-20484
- Laminates and filament wound structures using carbon fibers with silicon carbide whiskerized surfaces, noting compositing and laminating techniques
08 p1339 A69-20501
- Fire retardant thermally stable electrical grade thermoset resins tested for flexural and dielectric strength and weight loss
08 p1340 A69-20506
- Fiber composite design, discussing contribution of filament diameter, number, content and properties, ply parameters and void content to structural response
08 p1341 A69-20512
- Multilayer orthotropic cylindrical shells stability under distributed external load and off-center compression, analyzing subcritical deformation on critical load
09 p1613 A69-21685
- Complete solution for punching smooth interface double layer Tresca material in plane deformation, including Coulomb material
09 p1617 A69-22048
- Multilayer pressure vessel load carrying capacity calculated, using Huber-Mises yield condition to estimate axial force influence
09 p1618 A69-22257
- Failure modes in fiberglass reinforced epoxy laminates subjected to compression loadings, discussing cracks formation and delamination at glass-resin interface
09 p1529 A69-22305
- Fracture toughness of laminated adhesive bonded structures and monolithic aluminum, considering fracture stresses and ductile and brittle failure
09 p1526 A69-22318
- Fiber glass reinforced plastic backing phase of composite armor, noting test method for evaluation of performance
09 p1507 A69-22319
- Super insulation blankets comprised of dacron sailcloth, silk net or aluminized mylar, describing crinkling, cutting, sewing and hole drilling techniques
09 p1507 A69-22330

Polyimide materials, discussing lamination and applications in electronic circuitry such as interconnection cables and multilayer interconnection boards
09 p1511 A69-22354

Glass reinforced polyimide laminate fabrication, discussing metal foil laminates
09 p1530 A69-22363

Thermoplastic resins as matrices for glass reinforced plastics and aerospace structural and nonstructural adhesives
09 p1530 A69-22365

Polyimide glass fabric laminates with nonflammable characteristics for high O concentration spacecraft environments applications
09 p1531 A69-22366

Interfacial pressure distribution during slip damping in clamped rectangular beams subjected to vibration
10 p1800 A69-23350

Natural frequencies and associated composite loss factor for laminated plate with alternate elastic and viscoelastic layers, deriving partial differential equations [ASME PAPER 69-VIBR-68]
10 p1805 A69-24158

Reinforced metals properties and applications including fibers and lamination, notch sensitivity, brittle fracture, failure and heat resistance characteristics
11 p1904 A69-24898

Bending theory for truncated multilayer anisotropic conical shells, defining relations between displacements and external forces
11 p1984 A69-25141

Two dimensional elastic stress wave propagation in thick multilayered cylindrical shells for nonuniform external pressure distribution
11 p1991 A69-25511

Book on design procedures for modern fibrous composites emphasizing stiffness properties and calculations, covering laminates orthotropic lamina, etc
12 p2179 A69-26238

Fatigue life of Al alloy thin laminated sheets, considering cyclic frequency and temperature effects
12 p2180 A69-26359

Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load
12 p2182 A69-26660

Mathematical bending theory for three layer elastic plates containing light or rigid fillers
12 p2182 A69-26678

Simply supported laminated anisotropic rectangular plate with coupling occurring between bending and in-plane extension, discussing stiffness analysis by Fourier series method
12 p2184 A69-26808

Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces
12 p2185 A69-26821

Temperature effects on mechanical properties and fracture behavior of lamellar Ni-nickel titanide intermetallic eutectic alloy showing dependence on intermetallic constituent
13 p2277 A69-27406

Projectile impacts into laminated targets consisting of plastic layers backed by Al substrates using SHAPE code with hydrodynamic elastoplastic distortional model [AIAA PAPER 69-356]
13 p2366 A69-28289

Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris [AIAA PAPER 69-371]
13 p2367 A69-28303

Current-voltage characteristics of p-n-p-n diodes, discussing collector voltage effect on current carrier concentration distribution in diode base
13 p2236 A69-28531

Uniaxial compressive stability of rectangular boron-epoxy laminated plates clamped on loaded edges, determining buckling loads by Southwell plots
13 p2287 A69-28669

End loaded two layer laminated elastic strip stress concentration and self equilibrating traction distribution analyzed by eigenvalue equation
13 p2370 A69-28672

Free vibrations of laminated anisotropic rectangular plates with clamped edges analyzed by Rayleigh-Ritz energy method
13 p2371 A69-28673

Woven roving construction and fill/warp ratio effects on flexural strengths of four ply laminates
14 p2469 A69-29414

Pyrolyzed refractory laminates for high temperature applications, analyzing mechanical and thermal properties
15 p2618 A69-30313

Stress waves analysis in laminates design, assuming one dimensional linear elastic response to plane stress pulse on flat laminated plate surface
16 p2872 A69-31923

Laminated critical rate dampers consisting of ring shaped thin corrugated steel plates inserted between bearing and rotor, showing dependence on static load
17 p3066 A69-33945

Laminated anisotropic plate equations from thin plate theory including nonlinear terms, inertia and thermal stresses [ASME PAPER 69-APM-15]
18 p3213 A69-34390

Phenolic resin and silica cloth laminates transparency to IR radiation, noting experimental results
18 p3136 A69-34640

Creep calculation with temperature considerations for multilayer cylinder under nonisothermal load, comparing stress-strain state of viscoelastic and elastic cylinders
18 p3225 A69-35358

Polyimide resin system for glass reinforced laminates, noting processing characteristics and curing
19 p3353 A69-35505

Syntactic foam prepreg for low density laminate construction, presenting design and mechanical test data
19 p3353 A69-35512

Glass overlaid B filament laminates interleaved with C and silica fabrics, evaluating ablative properties in solid rocket motor tests
19 p3354 A69-35515

High modulus graphite epoxy composite material laminates fabricated and tested, correlating filament strength variation effect with composite tensile strength
19 p3354 A69-35518

Flexible-rigid hybrid polyimide-epoxy glass multilayer board to fill gap between all flexible and all rigid circuit boards
19 p3319 A69-35545

Strength analysis of three layer rectangular plates under complex load and support distributions
19 p3434 A69-35827

Glass fiber laminates based on epoxy organosilicon resins, discussing various hardeners effects on strength, etc
19 p3358 A69-35903

Vibration response approximation of three layer sandwich beam with nonlinear viscoelastic material core during flexural vibrations
20 p3619 A69-36910

Composite laminates in cylindrical bending, discussing classical laminated plate theory limitations by comparing boundary value problems to corresponding theory of elasticity solutions
20 p3626 A69-37760

Unbalanced cross-plyed elliptic laminated plates with bending membrane coupling, analyzing membrane boundary conditions with clamping assumed
20 p3626 A69-37762

Storage and loss moduli measurement for laminated glass fiber reinforced epoxy composite beams, discussing moduli prediction
20 p3627 A69-37763

Transverse shear deformation effect on bending of laminated rectangular plates, obtaining solutions for bending deflections, flexural vibration frequencies and buckling loads
20 p3627 A69-37770

Laminated composites ultimate strength prediction based on consecutive yield procedure with step-wise reduction of strength or load-carrying capacity used as design criterion
20 p3627 A69-37773

Axially symmetric distribution of residual strain in multilayered filament wound ring analyzed and compared with experimental results
20 p3628 A69-37774

Multilayer sandwich panels containing unequal facings with distinct orthotropic cores, calculating dynamic load and stability of triangular panels
21 p3832 A69-38418

Experimental facility for studying heat conductivity of multicontact metallic and nonmetallic materials /plates/ in vacuum at low temperatures under various loads
21 p3721 A69-38639

Collection of papers on composite engineering laminates covering mechanics, fiber reinforced plastics, sandwich construction, metal-clad products and flame sprayed coatings
21 p3752 A69-38930

Aluminum alloy laminates composed of two metallurgically bonded Al alloys of different composition
21 p3745 A69-38936

Approximate solution of unsteady thermal conductivity for plate with unlimited number of layers
21 p3851 A69-39083

Effective thermal conductivity parallel to laminations and total conductance for combined parallel and normal heat flow in multilayer insulation [AIAA PAPER 68-765]
21 p3853 A69-39763

Ultrasonic method for detecting strength defects in filament wound materials
21 p3733 A69-39798

Laminated random media stochastic displacement, using perturbation procedure to derive mean wave propagation deterministic equations
22 p4040 A69-39979

Hot gas flow through multilayer cylindrical shells, calculating temperature fields in walls
24 p4407 A69-42588

Coil under alternating current interacting with laminated conducting structure, giving recurrence formula for calculating deflector voltage
24 p4296 A69-42653

Vacuum cured glass-reinforced polyimide laminate tests for use at elevated temperatures on F-111 aircraft
24 p4335 A69-42933

Interlaminar shear stresses in cross-plyed three ply symmetric laminated composite plate, analyzing interlaminar stress distribution under simple tension
24 p4399 A69-43052

Dispersive pulse propagation in laminated composites compared with theoretical predictions for timing and amplitude of oscillations [ASME PAPER 69-APMW-22]
24 p4401 A69-43097

Geometric dispersion of transient stress waves in linearly elastic laminated composite based on sinusoidal modes [ASME PAPER 69-APMW-20]
24 p4401 A69-43098

Carbon fiber reinforced plastic components aerospace applications, discussing honeycomb sandwich satellite structure for investigating lamination methods, shapes, bonding and machining
24 p4336 A69-43209

Materials problems in microelectronic circuits, discussing multilayer interconnection arrays production by thick film or print-and-fire process
24 p4333 A69-43212

High performance void free carbon fiber laminates preparation using polyimide resins, describing flexural strengths, moduli and interlaminar shear strengths
24 p4325 A69-43445

High modulus graphite/asbestos reinforced laminates, noting improved transverse strength and thermal properties
24 p4337 A69-43447

LAMINATIONS
U LAMINATES

LAND
Multispectral orbital photography used to obtain urban land-use data [AAS PAPER 69-483]
24 p4307 A69-42837

LANDAU DAMPING
Landau damping in plasma, noting competing effects of nonlinearities and collisions on formation of plateau in spatially homogeneous distribution function
01 p0133 A69-11215

MHD waves, Landau damping and magnetosonic waves in homogeneous relativistic Vlasov plasma
04 p0636 A69-15043

Nonlinear interactions of positive and negative energy electrostatic modes of plasma immersed in magnetic field, discussing instability criterion and Landau damping [IAEA PAPER CN-24/E-13]
07 p1196 A69-19768

Landau damping of long wavelength ion acoustic waves in collision-free one dimensional plasma with gravity field
08 p1359 A69-19983

Ion Landau damping and finite Larmor radius effects on dispersion relation of Kelvin-Helmholtz instability due to shear in ion fluid velocity
08 p1367 A69-20799

Particle-wave interactions in weakly turbulent collisionless plasma, discussing ensemble average distribution function, diffusion, nonlinear Landau damping and nonlinear instabilities
08 p1368 A69-20803

Landau type interaction between electron beam and whistler/helicon/ wave electric field within semiconductor /InSb/
10 p1742 A69-24107

Landau dispersion relation solutions, noting higher order Landau poles and coupling of spatial Landau modes and least damped wave

11 p1929 A69-25265

High order plasma wave echoes formulation and relation to initial perturbations based on Landau solution of initial value problem for Vlasov equation

15 p2861 A69-30926

Stationary phase method of integration for growth and decay of resonant plasma oscillations excited by small pulsed dipole, noting Landau damping

16 p2817 A69-31641

Linearized kinetic equation for perturbed electron distribution function, detailing plasma oscillations along magnetic field by Landau collision term

16 p2818 A69-31674

Temporal damping rate for small amplitude linearly polarized TEM mode in plasma, using Landau equation

16 p2818 A69-31675

Noise emission and Landau damping of plasma resonances related by network theory including Nyquist formula, discussing noise temperature in free fall region

16 p2822 A69-32038

Solar corona heating ascribed to Landau damping of ionacoustic waves generated in motion of photospheric granules

17 p3030 A69-33060

Damping of plane sinusoidal wave in cold collisionless plasma, studying supercritical amplitude oscillatory process

18 p3180 A69-34703

Landau damping and echo in plasma, discussing theory, Van Kampen waves, finite amplitude wave attenuation, spin, cyclotron and plasma wave echoes

20 p3582 A69-38012

Relativistic solution by Landau procedure of initial value problem for one dimensional electron plasma wave coexisting with charged immobile background

21 p3778 A69-39579

Collisionless damping of large amplitude ion acoustic waves excited externally in thermally ionized Cs plasma

22 p3991 A69-41008

LANDING AIDS

NT APPROACH INDICATORS

NT ARRESTING GEAR

NT AUTOMATIC LANDING CONTROL

NT INSTRUMENT LANDING SYSTEMS

NT RUNWAY LIGHTS

Terminal area navigation and landing guidance systems for V/STOL intercity transport aircraft, considering radio guidance, aircraft control and system interaction

17 p2897 A69-33210

Fog removal by high power carbon dioxide lasers, evaluating possibility of clearing airport runways [AIAA PAPER 69-670]

17 p2945 A69-33449

Aircraft carrier landing system performance, variations in pilot experience, aircraft types and environment, emphasizing night carrier recovery

17 p2916 A69-34012

Landing guidance devices under difficult weather, discussing landing mechanics for land and carrier based aircraft

18 p3170 A69-34857

Lockheed C-130 Hercules modified as STOL aircraft studied in laboratory by computerized simulation and graphics techniques for pilot view during landing

18 p3092 A69-35466

Sensory physiology of pilot landing guided by runway lighting, stressing visibility influence

19 p3260 A69-35987

Wave-off Decision Device to define potential aircraft carrier-ramp-strike wave-off criteria for aircraft approach

20 p3573 A69-37161

Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral

[AIAA PAPER 69-864] 21 p3762 A69-39390

Kalman filter simulation for estimating aircraft position and velocity from airborne digital computer data in zero-zero landing system

[AIAA PAPER 69-944] 22 p3978 A69-40327

LANDING GEAR

Air cushion landing gear in civil air transport, discussing system concept, advantages and LA 4 aircraft experimental application

02 p0193 A69-12690

In-flight measurement of shear, bending moment and torque on lifting or control surfaces and loads on nose and main landing gear

04 p0677 A69-14842

Landing gear requirements for aircraft design, discussing tire pressure, wheel arrangement, brakes for loading and aircraft weight

08 p1255 A69-21161

Giant landing gear steel parts fabrication for Boeing 747 aircraft, discussing material and processing problems including Cr and Cd-Ti coatings application

09 p1434 A69-22064

Boron filaments reinforced epoxy aircraft landing gear structure prototype, discussing development, fabrication, and testing

09 p1508 A69-22340

V/STOL undercarriage design, considering influence of aircraft operation, engine installation, rough/soft ground capability, etc

09 p1435 A69-22781

Foam carpet and airport equipment to prevent fires and explosions from retracted gear landings

10 p1674 A69-23708

Optimum and suboptimum shock and vibration isolators, discussing three criteria and tradeoff between relative motion and accelerative force

[ASME PAPER 69-VIBR-45] 10 p1808 A69-24183

HF brake excited vibration damping in aircraft landing gear, obtaining closed form solution

[AIAA PAPER 68-312] 11 p1823 A69-25370

Landing shock attenuation system for Surveyor spacecraft, describing hydraulic cylinder and piston arrangement for damping, computerized shock absorber design and landing process simulation

[ASME PAPER 69-DE-54] 14 p2530 A69-28848

Tire test machine for tire parameter determination in aircraft landing gear shimmy stability studies

[AIAA PAPER 68-311] 17 p2902 A69-34029

Aircraft landing gear cylinder reinforcement rings design for minimum weight, using optimization iteration method for planar frames with elastic supports

[AIAA PAPER 68-328] 17 p3066 A69-34030

Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft

[AIAA PAPER 69-790] 19 p3243 A69-35639

C-5A transport landing gear assembly design, illustrating air turbine kneeling-drive module

20 p3466 A69-38179

Hydraulic power pack for automatically raising or lowering landing gear in small aircraft

20 p3467 A69-38183

High strength steel landing gear components corrosion protective finishes, discussing paint over bare steel, porous Cd plating and vacuum deposited Cd

21 p3743 A69-38730

Pressure loads and balancing force determination in kinematic pairs of link gear of landing mechanism

23 p4062 A69-41415

LANDING INSTRUMENTS

NT APPROACH INDICATORS

C-141 Category IIIB all weather landing system, discussing system concept, components, operations and performance

14 p2479 A69-29701

Jumbo jet instrument landing difficulties, suggesting specific improvements in aircraft and airport equipment

15 p2549 A69-30189

Multisensor data processing technique for fail operational landing commands, using real time error analysis inherent in Kalman filter

17 p3003 A69-34106

Self monitored subsystems in automatic flight control of Concorde, describing operation mode and landing display

17 p3003 A69-34196

Monograph on low visibility landing in civil aviation, considering visibility determination methods and equipment and IR sighting devices

20 p3574 A69-38064

LANDING MODULES

NT LUNAR LANDING MODULES

NT LUNAR MODULE

NT MARS EXCURSION MODULE

Apollo LM and CSM tracking systems boresight shift reducible by decreasing modulation indices or scaling factor alpha

10 p1672 A69-23277

Mars lander thermal control system design parameters including environment, power duty cycle and lander size and weight

[AIAA PAPER 69-610] 17 p3072 A69-33274

Planetary lander model thermal design, analysis and testing, emphasizing lightweight multilayer insulation, discussing thermal/vacuum testing

[AIAA PAPER 69-612] 17 p3049 A69-33296

Daily communication link geometry between spacecraft in elliptical orbit and landed capsule, establishing spacecraft visibility contours for landing site latitude

[AAS PAPER 68-110] 21 p3805 A69-39223

LANDING SIMULATION

All-weather landing flight director systems and fault warning display simulator studies of Boeing 707-720B aircraft in Category 3-C environment

01 p0010 A69-10455

Planetary landing vehicle design optimization, considering effects of trajectory, guidance and environmental parameters under uncertainty

[AIAA PAPER 69-128] 06 p1018 A69-18107

Rotary wing aircraft height-velocity testing, analyzing engine-out landing by combining flight tests with mathematical simulation model

[AHS PAPER 353] 17 p2900 A69-33524

Takeoff and landing analysis digital computer program (TOLA) developed by Air Force Flight Dynamics Laboratory for quantitative performance analysis

[AIAA PAPER 69-810] 19 p3289 A69-35630

Aircraft characteristics influence on longitudinal handling qualities during carrier approach from visual landings on moving base simulator

[AIAA PAPER 69-894] 21 p3648 A69-39418

Longitudinal flying qualities evaluation by pilots in carrier approach flight simulation, describing experiment apparatus, procedures and results

[AIAA PAPER 69-895] 21 p3648 A69-39419

Aircraft flying qualities research program, discussing Navy test pilot evaluations and longitudinal handling characteristics for simulated carrier landing task

[AIAA PAPER 69-897] 21 p3648 A69-39421

LANDING SITES

NT LUNAR LANDING SITES

Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site

02 p0324 A69-12390

Search theory application to planetary exploration overall strategy for improving landing site decisions

09 p1595 A69-21994

Mars landing site topography reconstructed via stereoscopic pictures returned by surface-based imaging systems

23 p4164 A69-41618

Bulk, selective particulate and hard rock samplers for landed extraterrestrial geological and biological instruments performing on-site analysis

23 p4146 A69-41620

LANDING SPEED

Stopping barriers for jet aircraft landing design and operation

11 p1862 A69-24354

LANDMARKS

Apollo landmark sighting by astronaut using Apollo onboard navigation system, simulating cloud cover effects with Monte Carlo technique

01 p0110 A69-10692

LANDSCAPE

U TERRAIN

U TOPOGRAPHY

LANGEVIN FORMULA

Langevin equation for interacting molecule system derived by Fourier transformation of Hamiltonian, noting physical correspondence to equation for shear viscosity in monatomic liquids

16 p2815 A69-32370

LANGMUIR PROBES

U ELECTROSTATIC PROBES

LANGUAGE PROGRAMMING

Space oriented programming languages and compilers for translating languages, discussing software generating tools under development for space missions

04 p0564 A69-15297

Research center for investigating man/computer interaction, discussing display systems, computers, languages and data entities

04 p0566 A69-15342

System/360 Continuous Modeling Program, detailing input language, user-defined functions and documentation
05 p0723 A69-16196

Computer programming language for three dimensional geometry at symbolic level, noting use for placement problems
05 p0724 A69-16382

Remote terminal computer for rotary-wing vehicles design, discussing programming language, engineer-computer interface and applications
07 p1052 A69-18868

Universal test equipment compiler /UTEC/ built for use with languages designed to control automatic test equipment
11 p1842 A69-25066

Soviet book on automated information retrieval systems covering computer languages, search in complex ordered codes, translation from Russian into computer language, etc
13 p2225 A69-27933

Coding of morphological evolution in time of auroral displays as generalization of existing IUGG code
13 p2256 A69-28655

Block structures and indirect addressing, discussing SNOBOL modifications and naming constraints
19 p3280 A69-36207

Onboard satellite computer design and programming language criteria, considering cost, reliability, weight, volume and energy requirements
20 p3499 A69-37379

Algorithm for programming language grammars conversion into pushdown store automata translators
21 p3679 A69-39607

Coding aspects of computers use in civil engineering, discussing language selection, program partitioning and storage use
22 p3903 A69-40139

NASA computer language CLASP coordinated with evolution of SPL /Space Programming Language/ for aeronautics and space programming
[AIAA PAPER 69-957] 22 p3905 A69-40339

Machine independent telemetry oriented language /MITOL/ to develop computer programs for real time and postflight telemetry data processing
22 p3905 A69-40340

Computer memory reduction through Fortran higher level language, discussing tradeoff between costs saved and additional logic hardware
[AIAA PAPER 69-963] 22 p3905 A69-40344

LANGUAGES
U ALGOL
U FORTRAN
U HANDWRITING
U MACHINE ORIENTED LANGUAGES

LANTHANIDE SERIES METALS
U RARE EARTH ELEMENTS

LANTHANUM
Lanthanum and hafnium effect on transition and recrystallization temperatures of tungsten and tungsten base alloys
05 p0782 A69-16797

La-Rh system study by powder X ray diffraction, metallographic and differential thermal analysis, constructing equilibrium diagram and determining crystal structure data
21 p3744 A69-38739

LANTHANUM COMPOUNDS
Thorium and La-compounds retained superconductivity to Pr and Tm concentrations due to crystal field splitting effect producing nonmagnetic singlet ground state
02 p0295 A69-11778

Lanthanum hexaboride single crystal field emitters for vacuum devices, describing construction and performance
09 p1468 A69-22601

Semiconducting properties of lanthanum-cobalt oxide measured, using Seebeck coefficient for analysis as function of resistivity
21 p3780 A69-38612

LANTHANUM FLUORIDES
Stimulated emission of water cooled CW Nd doped lanthanum fluoride at room temperature
08 p1323 A69-19945

Optical frequencies and polarizations of IR active phonons of tysonite lanthanide fluorides based on Kramers-Kronig reflectance spectra analysis
22 p3993 A69-40729

LANTHANUM ISOTOPES
Lanthanum isotopes beta decay, analyzing excitation of near spherical daughter nuclei of barium isotopes
01 p0122 A69-10100

LAP JOINTS

Adhesive bonded lap joint strength dependence on adherend mechanical properties under conditions of homogeneous adherend and cohesive failure
09 p1530 A69-22317

Polyethylene stainless steel lap joints and polyethylene samples yield strengths measurements at high temperature, suggesting yield mechanism based on dislocation loops
16 p2794 A69-32573

Outdoor aging effects on unstressed Al-Al lap shear joints bonded by various polymeric adhesives
19 p3320 A69-35562

Outdoor aging effects on unstressed adhesive-bonded Al to Al lap shear joints
24 p4319 A69-42932

LAPLACE EQUATION

Generalized alternating-direction implicit method involving extra parameter for solving Laplace equation used for 3d model problem
01 p0107 A69-11366

Finite difference methods to solve Cauchy problem for three dimensional Laplace equation
03 p0424 A69-13661

Digital computer solution of Laplace equation using dynamic relaxation method to introduce dynamic terms into basic equation
05 p0697 A69-15713

Solvability of third boundary value problem for Laplace operator in three dimensional domains bounded by irregular surfaces
07 p1173 A69-18497

Dynamic programming approach to numerical solution of elliptic boundary value problems, using Laplace equations
11 p1910 A69-25411

Network method for Dirichlet problem of Laplace equation in regions with rounded corners, noting polar and composite errors
12 p2123 A69-26730

Elliptic second order equation showing nonequivalent regularity conditions for Laplace and continuous coefficient equations
13 p2288 A69-27743

Green functions for Laplace, Poisson and transient heat diffusion equations solved by matrix multiplication
15 p2710 A69-30870

Series expansion for exponent of singularity of Laplace equation for flow near apex of plane delta wing
19 p3240 A69-36590

LAPLACE TRANSFORMATION

MHD boundary layer equations in Blasius problem reduced to differential equations and solved by Laplace transform
01 p0127 A69-10337

Eigenvalue problem for Laplace operator for two dimensional region with boundary composed of piecewise-analytical simple closed curves solved by finite difference method
02 p0271 A69-11650

Inverse Laplace transform determination method for periodic functions applied to rectangular pulse train and rectified sine wave
02 p0271 A69-11983

Variational theorems on eigenvalues of Laplace finite difference operator with first order boundary conditions
03 p0457 A69-14230

Digital filter transfer functions design by sampled data transformation, noting role of analog filters
04 p0584 A69-15461

Probability theory and Laplace functions used to determine pulse coincidence probability of two random independent pulse streams in given time
05 p0719 A69-16224

Delta functions use in extending domain of Laplacian operator in quantum mechanics
07 p1174 A69-19495

Wolf and generalized Parseval theorems applied to transformation of integral equation to S-plane in systems analysis
08 p1271 A69-19865

Viscoelastic problem solutions for hereditary media, using Laplace transforms or solutions of integral equations for inaccurately approximated kernels
08 p1412 A69-20329

Kinetic theory for weak shock generation by impulsive piston, using Fourier and Laplace transforms to solve BGK equation
08 p1304 A69-20783

Laplace transform applied to linear array analysis and synthesis, discussing transform singularity correspondence to array structure
09 p1532 A69-21600

Circuit function determination from Laplace transforms without calculating transient state matrix, using numerical method
09 p1472 A69-21785

Linear two dimensional partial differential equations solved by Laplace transforms on analog computer
12 p2123 A69-26717

Book on control theory covering automatic and remote position control, diagrams, transfer functions, operators, Laplace transform use with differential equations
13 p2238 A69-28345

Asymptotic behavior of function in Cauchy problem solution for heat conduction, basing method on Laplace transform inversion formula
13 p2380 A69-28685

Localization and convergence of Fourier series for fundamental systems of functions of Laplace operator, including eigenfunctions and trigonometric systems
15 p2644 A69-30287

Transient vibration linear analysis using Duhamel integral and Fourier and Laplace transformations, deriving receptances and application to aeroelastic systems
18 p3211 A69-34326

Classical solution existence to mixed boundary value problems for second order hyperbolic operators obtained by Laplace transforms
18 p3165 A69-35313

Finite difference analogs with increasing error terms applied to simple differential Laplace operator for accuracy determination
19 p3365 A69-36510

Linear nonstationary system with singular point analyzed for stability necessary and sufficient conditions using Riemann-Mellin conversion integrals and Laplace transforms
21 p3685 A69-38451

Boundary layer equations solved for MHD version of Falkner-Skan problem, using Laplace transform and steepest descent technique
21 p3693 A69-38750

Laplace transforms in heat conduction theory in three dimensional infinite homogeneous body
21 p3851 A69-39011

LARGE SCALE INTEGRATION
Large scale integration /LSI/ and medium scale integration /MSI/ circuits evolution and requirements, noting onboard computers and space applications
15 p2625 A69-30825

Large scale integrated circuits reliability with emphasis on multilayer metalization, designing test vehicles for failure mechanisms
17 p2935 A69-32887

Test structure model for studying semiconductor-insulator interface-related failure mechanisms in large scale integrated circuitry
17 p2936 A69-32894

Computer aided design of machines with custom LSI arrays, describing error detection procedures and MOS logic circuits
17 p2942 A69-34121

Threshold logic for LSI to realize broad range of functions noting signal control, gate characteristics, weighting, etc
17 p2943 A69-34122

Failure mechanisms and analyses of large scale integrated circuits based on bipolar and MOS transistors, describing measurement and probing techniques
19 p3282 A69-35787

Computer organization design employing distributed processor to provide general purpose computing while taking advantage of large scale integration
21 p3856 A69-39133

LSI oriented cellular array implementation of complex arithmetic functions for aerospace computers, describing techniques of automatic switching-in of spare modules for failures
[AIAA PAPER 69-964] 22 p3906 A69-40345

LARMOR PRECESSION
Integrodifferential equation for plasma oscillations solved for effect of ion Larmor radius size and intrinsic electric field on flute instability of axially symmetric plasma
06 p0966 A69-17520

Ion Landau damping and finite Larmor radius effects on dispersion relation of Kelvin-Helmholtz instability due to shear in ion fluid velocity
08 p1367 A69-20799

Finite Larmor radius, finite conductivity, rotation and Hall current effects on Jeans criterion for gravitational instability of plasma
10 p1729 A69-23408

Finite ion Larmor radius effect on gravitational instability of two superposed fluids in uniform rotation, analyzing interchange perturbations and vortex sheet
12 p2062 A69-26461

Finite Larmor radius effects on gravitational instability of rotating anisotropic plasma for transverse wave propagation mode
13 p2346 A69-27704

LASER COMMUNICATION U OPTICAL COMMUNICATION

LASER MODES

Saturation peak half widths on Ne energy level population inside single frequency Michelson-type He-Ne laser by tuned differential spectrometry, observing power broadening
01 p0089 A69-10182

Carbon dioxide laser stabilization using laser profile and three mirror system
01 p0089 A69-10183

Optically bistable operation of continuous wave GaAs p-n junction laser at 20 K
01 p0090 A69-10565

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role
01 p0090 A69-10787

Pulses generated by mode locked Nd glass laser, analyzing compression by gratings
01 p0091 A69-10817

Laser wavelength selection device for parallel wavelength separation or recombination of laser beams external to laser cavities
01 p0091 A69-10841

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser
02 p0255 A69-11611

Transverse mode selection effects on wave front of long pulsed ruby laser beam
02 p0257 A69-12409

Ruby laser modifications for pulse transmission mode operation and cavity dumping, noting peak power output
02 p0257 A69-12410

Stroboscopic holography for repetitive scenes, using mode locked laser as source
02 p0250 A69-12411

Frequency difference of traveling waves in accelerated rotating ring laser
02 p0257 A69-12417

Radiation damage in CdS irradiated by normal mode or Q-switched ruby laser, discussing stimulated Brillouin scattering
02 p0257 A69-12614

Laser transition and photon energy of lightly doped GaAs, showing many body electron-hole-lattice interactions
02 p0257 A69-12615

Nonlinear mode interactions in spatially inhomogeneous laser, analyzing suppression, phase locking and linear coupling among cavity modes
02 p0258 A69-12632

Laser pulse parameters generated in stationary locked mode regime with resonance modulation of losses
02 p0258 A69-12641

Transverse radiation field distribution in CW laser found by geometrical optics approximation, assuming active two level medium and mode close to threshold
02 p0258 A69-12642

Mode locking and ultrashort pulses in giant pulses in giant pulse ruby laser with heated nitrobenzene or alpha-chloronaphthalene in resonator
02 p0259 A69-12655

Dynamic mode locking of CW He-Ne laser by external regenerative feedback using RF beats between axial modes
02 p0260 A69-12657

Ring lasers emission modes, studying nonlinearity effects on radiation field spatial-temporal distribution
03 p0437 A69-13040

Parametric light generation in resonator with nonlinear medium, discussing continuous pumping with laser modes matched with pumping frequency
03 p0437 A69-13044

Ruby laser emission spectral line narrowing due to lasing modes reduction
03 p0439 A69-13059

Laser longitudinal oscillation modes beat frequencies measurement by grouping photoelectron velocities by HF field containing photomultiplier cathode
03 p0440 A69-13265

Single oscillation mode gas laser theory, calculating nonlinear susceptibility, gain profile, power tuning characteristics and oscillation frequency with Bloch equations
03 p0440 A69-13296

Selection of transverse oscillations of unstable Nd laser resonator modes with system of two mirrors and two variable focal length convex lenses
03 p0440 A69-13426

Tradeoffs among beam divergence, power output and mirror alignment tolerances of high power argon ion lasers operating in various low order transverse modes
03 p0440 A69-13549

Light pulse narrowing in laser in linear mode operation with inertialess bleachable filter
03 p0440 A69-13716

Technique to obtain desirable longitudinal oscillation mode for radiation of Ne-He laser
03 p0441 A69-13844

Bistable operating mode of GaAs semiconductor laser involving light emission shifts
03 p0441 A69-14175

Single picosecond mode locked optical pulse selection from train of pulses of Q switched Nd-glass laser using optics external to oscillator cavity
03 p0441 A69-14185

Simultaneous phase locking of longitudinal and transverse laser modes in He-Ne laser
03 p0441 A69-14188

Optical pumping distortion compensation in glass laser rod by changing coolant temperature, obtaining mode locked laser pulses
04 p0609 A69-14286

Single transverse electromagnetic mode power output for laser radar transmitter, using near hemispherical mirror resonator
04 p0609 A69-14287

Oscillation mode selection in gas lasers by thin film absorber in resonator, using standing wave electric fields periodicity
04 p0610 A69-14384

Traveling waves interaction effects on emission modes of gas laser with circular resonator
04 p0611 A69-14545

Laser interferometer gauges for machine tool accuracy, discussing operation, application, manufacture, cost and closed loop numerical control systems
04 p0606 A69-14880

Carbon dioxide laser noting output for added gases, efficiency, energy levels, excitation mechanism and tuning to single line and mode
04 p0612 A69-15173

High power single mode ruby laser, using multiple-mirror rods with plane-parallel end surfaces for generating longitudinal and transverse mode
05 p0770 A69-15700

Gas laser frequency stabilization, considering electromechanical control systems
05 p0773 A69-16230

Buildup modes of He-Ne laser in presence of other strongly oscillating modes, noting gain interaction effects
05 p0773 A69-16289

Self locking of three laser modes in He-Ne laser on basis of Lamb theory
05 p0773 A69-16290

High power stable modes of operation of argon laser, observing stable output spectra
05 p0773 A69-16292

Mode locked laser as stroboscopic light source potential by investigating expansion of laser produced plasma by schlieren photography
05 p0774 A69-16315

Fast digitalized scan laser using Nd-YAG as active medium and containing crossed array of lithium niobate electro-optic switches for mode selection
05 p0775 A69-16326

Mode suppression by mixed polarization in Michelson interferometer type of optical resonator
05 p0776 A69-16330

Ruby laser characteristics at 78 K, discussing emission threshold, optimum feedback, modes, etc
05 p0777 A69-16546

Radiation of laser active element with random inhomogeneities of refractive index, discussing beam divergence, operation modes and Q switched operation
05 p0777 A69-16550

Active element inverse population distribution effects on laser radiation angular divergence during lower and higher oscillation modes
06 p0932 A69-16913

Optical breakdown in air by mode synchronization operation of ultrashort pulses from neodymium laser
06 p0934 A69-17546

Light pulse duration and other parameters for ruby and Nd-glass lasers operating in synchronized mode regime determined by Armstrong method
06 p0934 A69-17549

CW laser mode steady excitation and narrow bandwidth obtainable by highly stable pumping and stable temperature of active element
06 p0934 A69-17681

Mode locked Nd glass laser to pump organic dye laser, obtaining continuously tunable picosecond pulses
06 p0935 A69-17759

Q switching and mode locking of neodymium selenium oxygen chlorine liquid laser, discussing power output and nature of pulses
06 p0935 A69-17776

Laser resonators, noting relation of light path between mirrors to half wavelength and line equivalence of lenses and resonators
06 p0937 A69-18005

Instrument profile of grating spectrograph determined by applying He-Ne laser mode separated in Fabry-Perot interferometer
07 p1131 A69-18405

Stabilized frequency single mode ionized argon laser, discussing intensity of electric field in cavity and mode selector
07 p1145 A69-18475

Emission frequency stabilizing effect in concentric sapphire-coated ruby laser, noting frequency independence from temperature fluctuations and thermal stresses
07 p1147 A69-18543

Self modulated radiation modes of Te-doped n-type InAs injection lasers
07 p1148 A69-18685

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching
07 p1132 A69-18801

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes
07 p1148 A69-18804

Single mode output power from 6328 A He-Ne laser through mode coupling induced by added absorption cell containing excited Ne
07 p1149 A69-18901

Organic dye lasers characteristics, describing broad continua produced for nanosecond absorption spectroscopy
07 p1150 A69-19047

Single mode single frequency carbon dioxide laser operating on single rotational-vibrational transition
07 p1151 A69-19058

He-Ne laser self locking of modes and spectrum weeding out at small absorption
07 p1151 A69-19059

Beam distortion in low order Gaussian-Laguerre modes propagating through saturable laser amplifier, noting uniform and Bessel small signal gain distributions
07 p1152 A69-19065

Dynamics of injection lasers, discussing picosecond pulse generation
07 p1153 A69-19071

Single mode carbon dioxide laser Lamb dip and vibration rotation lines absorption coefficients
07 p1153 A69-19075

Phase locking phenomenon of multitransverse longitudinal modes in He-Ne lasers, discussing mechanism of self locking phenomenon
07 p1153 A69-19076

Mode power spectra observations for ring and normal He-Ne lasers at 6328 A
07 p1155 A69-19087

Output and beat frequency of carbon dioxide laser with various resonator configurations realizing single mode operation
07 p1156 A69-19157

Induced emission cross section of neodymium glass laser in quasi-steady mode measured as function of rod section, mirror reflectivity and output
07 p1156 A69-19161

Optical heterodyning with single mode carbon dioxide laser and triglycine sulfate pyroelectric detector, noting detector sensitivity threshold
07 p1156 A69-19332

Helium-Ne laser beat frequencies between neighboring axial modes shifting linearly with inserted cavity loss
07 p1156 A69-19412

Lamb theory of mode self locking in gas lasers approximated to provide criteria for self locking
07 p1156 A69-19413

Single mode intensity measured for 0.6328 micron He-Ne laser as function of cavity Q, using Lamb semiclassical theory
07 p1157 A69-19414

Stable limiting cycles of laser resulting from mutual synchronization of phase shifted oscillation modes
07 p1158 A69-19752

Frequency doubling of laser light with variable Q switched resonator
07 p1158 A69-19753

Amplification curve change of active substance due to saturation by self field of He-Ar laser, discussing axial operation modes instability
08 p1323 A69-19942

Gas laser modes strong coupling and single moding induced by saturable absorbing medium within cavity resonator
08 p1324 A69-20166

Mutual influence of two laser modes, showing reduced transition rates due to perturbation of lower level
08 p1325 A69-20283

Mutual influence of two different laser modes corresponding to two transitions with same ground level, using He-Ne DC laser
08 p1325 A69-20284

Normal multimode laser action with and without phase locking, using exact steady state solution of Fokker-Planck equation
08 p1325 A69-20291

Quantum paramagnetic amplifier saturating power dependence on input pulses length and frequency determined by kinetic equations solution
08 p1325 A69-20436

Q switched single mode ruby laser pulse passage through traveling wave amplifier decreases beam divergence
08 p1326 A69-20542

Laser operation through semiclassical dispersion theory, presenting dipole moment and population density equations derived from quantum theory
08 p1326 A69-20571

Argon laser frequency spectrum instability caused by competing axial oscillations
08 p1327 A69-21023

Lasing characteristics of Nd-glass laser when cavity radiation varies with time, discussing rapid damping of relaxation oscillations of laser intensity
08 p1327 A69-21024

Carbon dioxide laser with two gas absorption cells in cavity for emission wavelength control and HF pulsed mode of operation
08 p1327 A69-21088

Gas laser frequency stabilization by coupled oppositely circularly polarized components of single cavity mode in axial magnetic field
08 p1327 A69-21090

Numerical and kernel expansion procedures for laser mode, discussing Gaussian quadrature numerical integration for conversion to matrix equation
08 p1328 A69-21091

Mode locking via nonlinear polarizations in multimode solid state lasers
09 p1514 A69-21344

Free carrier magnetoplasma effect used for far IR phase matched difference frequency generation in semiconductors, discussing carbon dioxide laser transitions
09 p1556 A69-21578

Mode locked He-Ne laser pulses compression by multiple reflections from interferometer after application of linear electro-optic frequency sweep
09 p1516 A69-21745

Solid state lasers, noting normal, continuous and single mode oscillations, Q switching, power output limitations, mode locking and liquid lasers
09 p1517 A69-22120

Gas lasers, discussing amplification, resonance, internal and external mirror lasers, outputs, and He-Ne, carbon dioxide and ion lasers
09 p1517 A69-22121

Mode locked laser operation, noting output and applications to optical communication, high speed photography, nonlinear optics and frequency standards
09 p1518 A69-22123

Periodic model variations in ruby and neodymium lasers with tilted mirrors, discussing factors in resonator misalignment
09 p1520 A69-22663

Laser resonator loss factor and axial mode frequencies calculation by interferometry
09 p1520 A69-22679

Intensity distribution in principal mode of TEM oscillations at various gain amplification levels, plotting intensity distribution generated by argon ion CW laser
09 p1520 A69-22685

Simultaneous action of RF perturbation between Zeeman sublevels of atomic transition sustaining gas laser oscillations, discussing single pi mode laser operation
10 p1704 A69-23808

Intensity interferometry by two photon excitation of fluorescence trace for three mode laser under phase locking, free running and FM-like conditions
10 p1705 A69-23811

Mode locked ruby laser for short duration pulse production, noting relation to reciprocal linewidth
10 p1705 A69-23813

Resonator field inhomogeneities effect on transient processes in quantum oscillator, considering two active crystals in cavity
10 p1705 A69-23948

Traveling wave passive Q switched laser with bleachable absorber filter, analyzing unsteady processes without expanding field along natural resonator modes
10 p1705 A69-23949

Mode interactions in argon lasers between two spectral lines noting effect on output
10 p1705 A69-24003

Single mode generation and Lamb dip in argon ion gas laser obtained by thin quartz plate inserted near plane mirror of resonator
10 p1706 A69-24080

High speed photodetector frequency characteristics using multimode gas laser and Kerr cell
10 p1707 A69-24211

Monograph on laser stroscopy in megahertz range covering spark photography comparison, concept of modes, resonators, applications, etc
11 p1893 A69-24368

Pulsed solid state Nd doped calcium tungstate fundamental longitudinal modes selection by insertion of Fabry-Perot interferometers, lenses and diaphragms into resonator
11 p1894 A69-24471

Ruby laser unsteady modes with ruby filter, discussing conditions for pulsed, monopulse and steady mode transitions, with formulas for steady emission
11 p1894 A69-24619

Giant pulse buildup time in Nd-glass laser with passive shutter determined by comparing Q factor and peak power ratios of different modes
11 p1894 A69-24621

Perturbation theory applied to emitting density matrix in nonlinear polarization of resonance media, considering gas laser in coaxial magnetic field
11 p1895 A69-24630

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser
11 p1895 A69-24718

Laser frequency drift effect on operation of three mirror interferometer, noting wave reflection by two compounded mirrors
11 p1895 A69-24720

Low order transverse modes in Ar ion lasers, analyzing beam divergence, output, mirror alignment and cavity configurations
11 p1896 A69-24841

Singly resonant optical parametric oscillator, noting single mode and multimode oscillation for various pump powers, pump wave depletion and mode competition
11 p1897 A69-25038

Coherence phenomena for gas laser transitions coupled by common level, noting coherent superposition
11 p1898 A69-25045

He-Ne laser output phase fluctuations between adjacent modes during unlocked and self locked condition, noting cavity optical length short term fluctuations influence
11 p1898 A69-25048

Ideal mode conversion and transmission by circular aperture of cylindrically symmetric cavity
11 p1899 A69-25056

Free emission spectrum analysis of ruby laser with external mirrors and elimination of axial mode discrimination
11 p1900 A69-25547

Ruby laser performance with perturbing effect of standing wave field on homogeneity of deexcitation of level populations eliminated by HF modulation
11 p1900 A69-25569

Organic cyanine dye solution laser pumped by Q switched ruby and another dye laser, discussing spectral distribution and modes
11 p1900 A69-25580

Frequency stabilization of He-Ne laser, using external Ne absorption tube in variable magnetic field as frequency standard
11 p1900 A69-25678

Two transverse modes locking with multiple longitudinal modes in He-Ne laser, noting separate locking and alternate quenching
12 p2104 A69-25923

Transverse mode dependence of spiking behavior for ruby laser pumped by pulsed argon ion laser
12 p2104 A69-25928

Resonant vibrational energy transfer between specific mode of carbon dioxide and N molecules at high temperatures, monitoring IR emission
12 p2131 A69-25984

Absorption characteristics of thin metallic films in standing light wave for mode selection and conversion in lasers
12 p2104 A69-26024

Frequency stability of He-Xe laser with nonresonant feedback, noting spectral line width dependence on number of interacting modes
12 p2105 A69-26049

Mode locked lasers for measuring fast radiative decay in fluorescent systems
12 p2105 A69-26310

Single mode laser oscillations buildup for 0.633 micron transition of He-Ne laser at levels above threshold using fast intracavity chopper
12 p2105 A69-26318

Off axial mode selection in circular cross section solid state lasers due to nonuniformity of excitation by focusing of pump power
12 p2106 A69-26320

Nonlinear crystal generated second harmonic power measured for multimode He-Ne 0.63 micron self locked laser
12 p2106 A69-26321

Mode interaction in lasers with homogeneous line broadening, analyzing rate equations for radiation fields of operating modes for asymptotic values of mode intensities
12 p2106 A69-26323

Laser gain medium dispersion expressions applied to multimode ring laser operation with mode spacing less than pressure broadened atomic linewidth
12 p2106 A69-26324

Transverse passive mode locking by dye technique for neodymium glass laser with confocal cavity
12 p2107 A69-26327

Laser diode output efficiency increased in presence of transverse magnetic field suppressing higher order TE and TM modes
12 p2039 A69-26353

Standing wave theory for steady state performance of Raman laser oscillator extended for time variation of exciting laser pulse
12 p2108 A69-26634

Gallium arsenide junction laser resonant modes from theoretical model, calculating frequency separation
12 p2108 A69-26637

Standing waves and single mode room temperature laser emission from electron beam pumped cadmium sulfide thin crystal, discussing emission at 77 K
12 p2109 A69-26639

Atmospheric effects on laser beam width, using Born approximation and Gaussian model to obtain TEM mode scattered power expressions
12 p2111 A69-27166

Analytic expressions for predicted widths of AM and FM mode locked pulses in homogeneous lasers
13 p2270 A69-27191

Breakdown in air produced by picosecond mode locked laser pulses showing evidence for self focusing
13 p2270 A69-27196

Spectral criterion for distinguishing mode locked and nonmode locked laser signals
13 p2270 A69-27197

Anomalous interaction of argon and krypton ion laser lines, considering connecting radiative transitions and cross modulation
13 p2270 A69-27204

Ultrasonic vibrations effect on emission of ruby laser with externally mounted mirrors
13 p2271 A69-27534

Ruby and neodymium glass traveling wave laser free generation spectra kinetics, noting mode transitions as function of pumping levels
13 p2271 A69-27655

LASER MODES

Single mode ruby laser for application to holography of ultrahigh speed three dimensional objects
13 p2262 A69-27980

Spectral width of emission of laser resonator in nonstationary mode in presence of active medium, noting time dependence
14 p2456 A69-28736

Oscillation mode selection in gas lasers by thin film absorber in resonator, using standing wave electric fields periodicity
14 p2456 A69-28757

Carbon dioxide laser inversion kinetics, combining pulse pumping with Q switching to observe rise, life and decay times
14 p2457 A69-28926

Pulsed lasers with pure carbon dioxide and mixture with N and He, discussing inversion mechanism, peak emission power and gas temperature effects in different modes
14 p2458 A69-29162

Ruby laser filled with single emission mode of oscillation using uniform pumping
14 p2458 A69-29164

Laser beam light pressure bending of incompressible liquid surface leading to beam self focusing in linear medium
14 p2461 A69-29674

Gas laser secondary modes emission and beat frequency spectrum widths, using results of Lamb lasers theory
15 p2633 A69-30121

Ruby laser lasing modes spectral time dependence attributed to population inversion inertia responsible for mode competition
15 p2633 A69-30725

Q switched ruby laser giant pulses during pumping by another Q switched laser exhibit simple shape and low duration
15 p2634 A69-30727

Characteristics of neodymium-glass laser with unstable resonator noting transverse modes and radiation angular distribution
15 p2634 A69-30730

Power coupling among modes in semiconductor lasers in presence of spontaneous or forced microwave modulation of population inversion
15 p2634 A69-30875

Spatial and energy characteristics of laser with nonuniform transmittance across resonator mirrors, analyzing transverse modes interaction
15 p2634 A69-30962

Mode competition of 5861 and 6470 A lines in ionized Kr laser attributed to electronic level excitation processes
15 p2635 A69-31106

Frequency selector for gas laser, considering monochromatic emission and multimode oscillation
16 p2795 A69-31608

OgaAs platelet laser modes time behavior, discussing control by electron-hole pair density
16 p2796 A69-31704

Passive mode locking of pulsed Nd-YAG laser using saturable absorber, noting two photon fluorescence contrast ratio
16 p2797 A69-32019

Cavity linear phase anisotropy and axial magnetic field effect on single mode Zeeman gas laser
16 p2798 A69-32606

Time behavior of output intensity and polarization of single cavity mode internal mirror Zeeman laser in axial magnetic field
16 p2798 A69-32607

Multiple mode phase locking of He-Ne laser with fixed cavity length and laser tube fixed position in cavity, generating high speed optical pulses
17 p2980 A69-32957

Optical heterodyne communication system with single mode and frequency carbon dioxide laser, noting coherent photon noise limit
17 p2919 A69-33086

Mode patterns and far field distribution for gas lasers operated in lowest order Gaussian transverse mode
17 p2981 A69-33090

FM detecting resolution using free running multimode uniphase Ar laser with Doppler broadened bandwidth
17 p2981 A69-33091

Single frequency lasers using thin metal film mode selection filters, discussing film properties and experiments with Ar ion and Nd-YAG lasers
17 p2982 A69-33399

GaAs diode laser pulse train emission during pumping near threshold
17 p2982 A69-33421

Wave interaction in gas ring laser, delineating single mode emission zones as function of pumping, emission frequency position and Q factor differences
17 p2982 A69-33632

Laser action and spontaneous emission at atomic oxygen transition, discussing pulsed emission mode in argon-oxygen laser
17 p2982 A69-33633

Laser pulse development dynamics taking into account phase relations between field and active medium polarization
17 p2983 A69-33695

Simultaneous integral equations numerical solution for open optical resonator mode analysis, using kernel function and Fresnel approximation
17 p2983 A69-33883

Laser eigenmodes determined iteratively from eigenvalue equation including spatial inversion inhomogeneities, atomic density and local loss
17 p2984 A69-34046

Statistical model for coherent functions obtained from laser equation, showing amplitude and frequency coupling of radiation fluctuations
18 p3152 A69-34820

Neodymium laser emission temporal structure in mode self locking regime with Q switching by saturable filter
18 p3152 A69-35016

Spectral inhomogeneity effect on spectrum of modes emitted by semiconductor *p-n* junction/laser
18 p3152 A69-35023

Semiconductor optical quantum amplifiers in pulse mode operation, describing arrangement for studying performance including pulse duration and current controls
18 p3153 A69-35258

Radiation dynamics of semiconductor GaAs injection laser with pulsed and continuous modes operation of diodes
18 p3154 A69-35495

Self mode locking of carbon dioxide laser with high order transverse mode oscillations in vibrational-rotational transitions of P branch
19 p3330 A69-35602

He-Ne laser light noises due to discharge current fluctuations and random mode beat
19 p3330 A69-35760

Kinetic theory of stationary laser emission under quasi-equilibrium conditions, analyzing emission modes
19 p3332 A69-35874

Laser multimode emission kinetic theory, discussing quasi-equilibrium disturbance effects and nature of inhomogeneity
19 p3333 A69-35875

Laser emission in system of four level centers, determining nonuniform emission line broadening due to disturbed quasi-equilibrium distribution of electron subsystem elementary excitations
19 p3333 A69-35877

Single and two mode laser emission dependence on pumping power distribution between four level active centers of different types
19 p3333 A69-35878

Relation between angular divergence, spectral characteristics and kinetic behavior of laser operating in various pulsed modes
19 p3333 A69-35879

Mode coupling effects in CW gas ring lasers, considering excitation density pulsations, traveling waves dispersion, polarization, etc
19 p3334 A69-36046

Mathematical model of CW ring laser mode coupling in limits of low excitation
19 p3334 A69-36047

Lamb theory of Doppler broadened gas laser extended to arbitrary intensities for single mode operation, calculating detuning curves and inversion densities
19 p3335 A69-36048

Internal modulation of HeNe laser in asynchronous regime, evaluating range and efficiency with regard to external modulation
19 p3335 A69-36341

Amplitude and output spectra of optical quantum amplifier based on GaAs injection laser, noting values in traveling wave and regeneration mode
19 p3336 A69-36348

Gas laser oscillation mode selection and self synchronization based on separation in two mirror cavity with nonlinear absorption
19 p3336 A69-36350

Continuous explosion laser study of stationary detonation waves to determine conditions leading to

partial population inversion and critical population density
19 p3336 A69-36360

Indium arsenide injection laser observed for self modulation at LF modes, discussing nonMarkovian character of photon density relaxation
19 p3338 A69-36537

Gallium arsenide junction lasers operating above threshold, showing resonant modes dependence of steady state gain function and frequency dependence of spatial gain distribution
19 p3338 A69-36691

Spectrum of axial modes of laser with inhomogeneous longitudinal pumping, dividing parameter space into steady emission regions
19 p3339 A69-36880

Stable mode generation in ruby laser with ability for modulation, using convex resonator and uniform illumination
20 p3553 A69-37607

Neodymium glass laser emission spatial characteristics, investigating higher laser modes excitation
20 p3554 A69-37725

Single mode He-Ne laser frequency stabilization by Zeeman effect
20 p3554 A69-37729

Simultaneous mode locking of Nd YAG laser and intracavity second harmonic generation in high temperature Li niobate or BaNa niobate
20 p3555 A69-37731

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role
20 p3555 A69-38004

Ultrasonic vibrations effect on emission of ruby laser with externally mounted mirrors
20 p3556 A69-38201

Transverse and longitudinal laser modes in holography, noting Michelson interferometer interference pattern role
21 p3734 A69-38398

Interaction between modes of radiation field and active medium in laser with nonresonant feedback, discussing amplitude stabilization of total radiation
21 p3735 A69-38581

Emission frequency stabilizing effect in concentric sapphire-coated ruby laser, noting frequency independence from temperature fluctuations and thermal stresses
21 p3735 A69-38695

Coherent radiation short pulses from mode locked laser permitting schlieren photography of plasma growth
21 p3736 A69-38795

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching
21 p3724 A69-38946

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes
21 p3736 A69-38949

Spectral characteristics of Q switched single frequency ruby laser with tunable emission frequency in giant pulse mode
21 p3737 A69-38991

Quantum theory for single mode laser radiation, considering photon distribution function and mean field damping decrement by phase quantum fluctuations
21 p3737 A69-38996

Frequency stabilization in He-Ne three mode laser by stabilizing LF oscillations via automatic adjustment of laser resonator length
21 p3738 A69-39078

Multimode He-Ne laser radiation polarization modulation as function of magnetic field, cavity anisotropy and frequency, using Macaluso-Corbino effect
21 p3739 A69-39447

Mode locking of organic dye laser by pumping laser with mode locked pulse train from Nd-glass laser, obtaining spectral bandwidth
21 p3740 A69-39545

Annular gas laser cavity designs with additional mirrors for longitudinal oscillation mode selection, noting positive results for He-Ne laser
21 p3740 A69-39553

Spectral, angular and temporal characteristics of traveling wave mode ruby laser emission, noting high transverse divergence effect on mode operation
21 p3741 A69-39554

Eigenmodes of asymmetric cylindrical confocal laser resonator with single output coupling aperture, obtaining diffraction loss factors and mirror field distributions
21 p3741 A69-39564

Pulse width increase in mode locked laser caused by phase deviations, noting optical elements with quadratic dispersion of refractive index
21 p3741 A69-39683

Mode locked laser output intensity, studying effect of random phase variations on pulses
21 p3741 A69-39684

Laser modulation theoretical analysis based on high speed laser oscillators, discussing high energy physics research applications
22 p3959 A69-39975

Spatial coherence of He-Ne laser beam studied in Young interference experiment, noting multimode light percentage attributed to weak transverse modes
22 p3960 A69-40018

Transverse mode selection in rotating mirror neodymium doped calcium tungstate laser by inserting slit and edge into resonator
22 p3961 A69-40316

Cavity Q dependence of intensity of single mode He-Ne laser above threshold for quantum and semiclassical theories
22 p3961 A69-40415

Single mode high power He-Ne laser with Michelson interferometer in cavity, describing performance determination method
22 p3962 A69-40473

Frequency locking of HCN laser transition at 890 GHz to harmonic of crystal controlled oscillator
22 p3963 A69-40567

Lasing properties of Ni-doped GaAs diodes evaluated by plotting resonance, mode amplitudes and frequencies for various bias currents and external capacitance
22 p3912 A69-40606

Spectrum characteristics of plasma generated by pulses of solid state laser radiation on metals and alloys in regular and quasi-stable regimes of emission
22 p3964 A69-40793

Axial mode frequencies, loss coefficients and optimal parameters of three and four mirror resonators of gas lasers, including designs with maximum selectivity
22 p3964 A69-40796

Frequency discrimination in optical harmonic generators, discussing spectral width of wideband laser for supershort pulses and spectral device, using frequency dependence of mode locking direction
22 p3965 A69-40964

Longitudinal modes locking and ultrashort light pulse generation in laser cavity resonator with nonlinear refractive index
23 p4171 A69-41389

Electron excitation and collisional energy transfer processes in laser level of pure carbon dioxide fill and carbon dioxide-water vapor mixture
23 p4171 A69-41390

Mode locked ruby laser with picosecond pulses using rooftop prism cavity with helical flashtube for pumping
23 p4172 A69-41395

Low energy ultrafast flashtube systems as optical pumps for lasers using fast decaying fluorescent materials/organic dyes/
23 p4174 A69-42187

Laser quantum theory compared to stationary atoms semiclassical theory, emphasizing role of cavity mode spatial structure
24 p4327 A69-42789

Laser cavity modes phase equality demonstrated by oscilloscope trace in two photon fluorescent method
24 p4327 A69-42981

Emission spectrum of nonself locked He-Ne ring laser, deriving phase relations for LF intermode oscillations
24 p4328 A69-43159

Beam divergence and multimode laser visible emission influence on power and angular structure of second optical harmonic generated in KDP crystals
24 p4328 A69-43161

Ruby laser second harmonic generation statistical characteristics with dielectric surface scatterer, showing variety of modes and high cross sectional stability
24 p4328 A69-43164

Transitions competition in He-Ne laser pulse operating in single mode with nonuniform gain saturation
24 p4328 A69-43165

Tilted etalons to obtain tunable single mode emission from gas lasers noting fabrication simplicity, vibration insensitivity and low insertion loss resulting in high efficiency
24 p4329 A69-43752

Isolation technique using exploding mirror shutter in multistage high gain laser system to overcome amplified target feedback during pulse lasing of reflective targets
24 p4330 A69-43762

LASER OUTPUTS

Emission and frequency shift angles of antiStokes radiation from trapped filaments of laser light in liquids
01 p0114 A69-10012

Continuous wave laser absolute power measurement by calorimeter consisting of wire wound in shape of cone
01 p0078 A69-10029

Maximum power efficiency of pulsed injection laser with Fabry-Perot cavity expressed in terms of two dimensionless geometric variables
01 p0089 A69-10119

Laser CRT with beam pumped aluminumized CdS crystals, discussing single spot low duty operation
01 p0039 A69-10175

Frequency mixing of IR signals with visible laser light in nonlinear crystals to detect IR signals
01 p0089 A69-10180

Optimum coupling for intracavity second harmonic generation in multilevel lasers
01 p0089 A69-10181

Electro-optic Q switch using lithium niobate as electro-optic material, comparing performance to conventional device using potassium di-deuterium phosphate
01 p0089 A69-10184

Laser cone calorimeters calibration to determine heat capacity
01 p0079 A69-10220

Target production device for deuterium plasma clouds in vacuum with Q switched neodymium laser
01 p0090 A69-10222

Light emission and transmission generated from laser interaction with lithium hydride in vacuum, noting laser energy variations effects
01 p0127 A69-10281

Laser Doppler velocity profile measurement at localized points in flow stream without disturbing flow
01 p0090 A69-10298

Recombination reactions during postdischarge in helium plasma produced by laser beam, deriving equation for density evolution
01 p0128 A69-10394

Photographic film blackening under high intensity laser radiation indicating two photon mechanism as responsible
01 p0080 A69-10429

Exploding wire heating technique using combination of focused laser beam electric field intensity and pulsed power electric current
01 p0090 A69-10666

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup
01 p0090 A69-10791

Active medium high gain during giant pulse generation shown to lead to radiation fluctuations
01 p0091 A69-10792

Continuous nonresonant visible radiation from Ar ion laser by utilization of wide bore, wall stabilized gas discharges, noting long time frequency stability
01 p0091 A69-10815

Drilling and welding with sealed-off continuous carbon dioxide gas laser with outcoming beam collimated by Ge lens
01 p0086 A69-10821

Continuous laser beam power output meter based on wire resistance thermometry method
01 p0081 A69-10822

Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence
01 p0139 A69-10831

Laser wavelength selection device for parallel wavelength separation or recombination of laser beams external to laser cavities
01 p0091 A69-10841

Pulsed nitrogen laser design involving gas discharge tube fed by low impedance parallel plate transmission line
01 p0091 A69-10842

Laser beam spectra for modulation by electrooptic Doppler shift, considering sawtooth and triangular functions for applied electric field
01 p0091 A69-10843

Carbon dioxide spectral line broadening and self broadening coefficients, using carbon dioxide laser radiant energy
01 p0091 A69-10844

Laser beam phase fluctuations for propagation through turbulent atmosphere, noting interferometer for simultaneous measurements for pairs of rays
01 p0091 A69-10845

One dimensional expansion of laser beam, using pairs of prisms with continuous wave output
01 p0091 A69-10852

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter
01 p0091 A69-10883

Amplification equations for calculating unsteady lasing in Q switched ruby laser, considering changes in populations and fields along cavity
01 p0092 A69-10888

Intense laser emission interaction with current carriers in semiconductors, analyzing dependence of thermoelectric field produced by light absorption on intensity, frequency and temperature
01 p0139 A69-10895

Intracavity laser diffraction gratings for single wavelength output
01 p0092 A69-10897

Liquid lasers compound range of organic type, circulating system of inorganic type and power peaks
01 p0092 A69-11194

Hydrodynamic model of laser produced solid particle plasma, giving distributions of pressure, density, temperature and velocity
01 p0132 A69-11210

Sparks from laser induced arc breakdown due to focusing of laser beam, noting evidence for initiation by self focusing
01 p0092 A69-11246

Time compression system with ultrasonic diffraction cell allows coherent light optical spectrum analyzer to function at audiofrequencies
01 p0035 A69-11283

Q switched laser excitation flash spectroscopic analysis of naphthalene, describing equipment arrangement and experimental results
02 p0254 A69-11544

Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes
02 p0255 A69-11608

Induced discharge laser wave propagation in medium with active and absorbing admixtures, determining stationary wave shape and velocity range
02 p0206 A69-11609

Carbon dioxide ionization by Q switched laser beam, using proportional counter
02 p0255 A69-11702

Preionization of gases by laser beam using theory based on molecular equilibrium concentration and collision excitation
02 p0283 A69-11703

Continuous wave GaAs injection lasers operation at high temperatures shown possible by using available threshold current densities with suitable heat sink materials
02 p0255 A69-11710

Laser applications in metal working including dissimilar metal welding, hole drilling, material removal and dynamic balancing
[ASTME PAPER MR68-406]
02 p0252 A69-11796

Soviet book on spectral, spatial and time characteristics of lasers covering luminescence and resonator theories, electromagnetic field structure and radiation dispersion
02 p0255 A69-11800

Bragg reflection of electrons by standing light waves of giant pulse laser
02 p0255 A69-11833

Injection laser emission from gallium arsenide base films grown epitaxially from gas phase in moist hydrogen atmosphere
02 p0255 A69-11879

Polarized low temperature laser excited Raman spectra of thulium gallium garnet
02 p0256 A69-11925

Plasma production by laser irradiation of solid, calculating numerically time variations of temperature distribution, laser intensity and evaporated layer depth
02 p0256 A69-11935

Polymethyl methacrylate irradiated by laser in vacuum to study mechanism responsible for gas formation
02 p0270 A69-11980

Energy characteristics of laser with passive Q switch, taking into account internal reflections
02 p0256 A69-11999

Ruby laser limiting gain, stimulated emission loss, noise loss and spectral distribution determined by radiation intensity, pumping power and mirror reflection
02 p0256 A69-12000

Mechanical thermal stresses effects during laser flash illumination of GaAs, discussing temperature dependence of radiative recombination

02 p0256 A69-12245

Ruby laser output energy degradation due to pump light absorption by color centers of ruby rod

02 p0256 A69-12358

Transverse mode selection effects on wave front of long pulsed ruby laser beam

02 p0257 A69-12409

Ruby laser modifications for pulse transmission mode operation and cavity dumping, noting peak power output

02 p0257 A69-12410

Critical values of laser formed solid angle determined in plasma diagnostics of scattering spectrum density distribution

02 p0251 A69-12416

Laser radiation hazards due to direct or reflected viewing determined by evaluating output characteristics and environmental factors effects

02 p0204 A69-12497

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals

02 p0257 A69-12560

Frequency and time dependent gains of dye solution lasers for pumping by lasers and flashlamps

02 p0257 A69-12616

Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra

02 p0258 A69-12617

Linear absorption coefficient of seminsulating Cr doped GaAs for IR carbon dioxide laser radiation, discussing lattice absorption mechanism

02 p0258 A69-12619

Dye solution laser wavelength shift and simultaneous oscillations at different wavelength ranges for pumping by another dye laser

02 p0258 A69-12620

Laser pulse parameters generated in stationary locked mode regime with resonance modulation of losses

02 p0258 A69-12641

Transverse radiation field distribution in CW laser found by geometrical optics approximation, assuming active two level medium and mode close to threshold

02 p0258 A69-12642

Chain and branched halogen-hydrogen reactions kinetic analysis for developing chemical laser with radiation energy weakly dependent on pumping energy

02 p0259 A69-12645

High power output CW laser oscillation measured at 4416 Å laser transition in Cd 2 using single isotope of Cd 114

02 p0259 A69-12653

Two photon fluorescence technique for display of picosecond laser pulses, discussing mode locking and ruby laser contrast ratios

02 p0259 A69-12654

Oscilloscope display of sample of subnanosecond light pulse, using optical analog of electronic sampling oscilloscope

02 p0259 A69-12656

Dynamic mode locking of CW He-Ne laser by external regenerative feedback using RF beats between axial modes

02 p0260 A69-12657

Laser oscillation frequency shift dependence on discharge current in 6328 Å He-Ne laser

02 p0260 A69-12658

Laser produced sparks in 200 kG magnetic field in air, butane and helium at atmospheric pressure

02 p0260 A69-12659

Tunable optical parametric oscillator using argon laser CW output as pump and lithium niobate as nonlinear crystal

02 p0260 A69-12701

Transverse magnetic field influence on power and polarization of helium-neon laser emission

02 p0260 A69-12844

Giant pulse generation by Q switched water cooled CW ruby laser in narrow spectral range, discussing laser design and operation principles

03 p0435 A69-12982

Electro-optical device using KDP crystal for laser beam deflection at temperatures near Curie point

03 p0435 A69-12984

Clamp type diode holders for obtaining CW coherent emission from gallium arsenide injection lasers

03 p0435 A69-12985

Radiation absorption variations in KC-19 CdSe glass during ruby laser radiation, noting microcrystals and nonlinear effects role in determining optical properties

03 p0436 A69-13036

Light wave propagation in gyrotropic crystals, examining laser frequency shift circularly polarized by modulating field

03 p0436 A69-13037

Ruby laser radiation nonlinear absorption coefficient measurement in CdS, ZnS and SiC semiconductor crystals, noting light limiting effects

03 p0436 A69-13038

Efficient conversion of Q switched neodymium-glass laser output into second harmonic obtained for low output levels at fundamental frequency

03 p0437 A69-13046

Q switched lasers powerful outputs obtainable at sum frequency, discussing frequency mixing in nonlinear dispersive media

03 p0438 A69-13047

Q switched neodymium-glass laser output conversion into second optical harmonic by passing beam through double Galilean telescope with adjustable focus

03 p0438 A69-13048

Pyroelectric crystals transparent at laser output wavelength used for recording transmitted radiation, noting response of triglycine sulfate crystal

03 p0438 A69-13050

Ruby laser light beam self focusing in sodium chloride and potassium bromide crystals

03 p0438 A69-13051

Two photon absorption and stimulated emission mechanism of CdS-CdSe mixed crystals investigated by ruby laser output

03 p0438 A69-13052

Q switched ruby laser nonlinear absorption in optically transparent organic liquids attributed to two quantum process with large cross section

03 p0439 A69-13055

Second optical harmonic generation in uniaxial negative potassium dihydrogen phosphate, noting influence of generating process on angular structure and output power

03 p0439 A69-13057

Ruby laser emission spectral line narrowing due to lasing modes reduction

03 p0439 A69-13059

Holographic laser type memory with bulk storage capacity and short readout time

03 p0428 A69-13116

Laser gyro in future inertial navigation systems for Category I landing without position updating

03 p0463 A69-13210

Time dependent photoelectron multiplier with low noise for recording long wave laser light pulses

03 p0440 A69-13264

Laser longitudinal oscillation modes beat frequencies measurement by grouping photoelectron velocities by HF field containing photomultiplier cathode

03 p0440 A69-13265

Holographic and microwave technology relationship, noting side-looking radar photos and X band radiation

03 p0430 A69-13354

Solid state laser Q switched by rotating prism emitting giant pulse before two mirrors in parallel

03 p0440 A69-13365

Raman effect in liquid glycerol obtained with 4880 Å ionized argon laser, determining valence vibrational frequencies

03 p0440 A69-13366

Tradeoffs among beam divergence, power output and mirror alignment tolerances of high power argon ion lasers operating in various low order transverse modes

03 p0440 A69-13549

Beam laser as frequency standard, considering wavelength and molecular transfer constraints imposed by technology limitations and frequency stability requirements

03 p0440 A69-13715

Light pulse narrowing in laser in linear mode operation with inertialess bleachable filter

03 p0440 A69-13716

Pulse compression by optical correlation techniques, discussing laser beam control by diffraction grating in ultrasonic delay line

03 p0397 A69-13732

Technique to obtain desirable longitudinal oscillation mode for radiation of Ne-He laser

03 p0441 A69-13844

Temperature dependence of He-Ne laser output at various wavelengths over low temperature range

03 p0441 A69-13845

Reduction of optical breakdown threshold in laser focus by superimposed microwave field

03 p0441 A69-13996

Ionizing action of radiation due to heating substance in laser beam focus, discussing highly ionized plasma production

03 p0479 A69-13996

Breakdown plasmoids produced by lasers

03 p0480 A69-14058

Arc and HF discharges in Ne-He lasers, comparing output power, spectral line intensities and reduced electric field vs reduced tube radius plots

03 p0441 A69-14132

Thermionic emission and dispersion of plasma created by monopulse of laser radiation focused on solid target, discussing plasma temperature determination methods

03 p0441 A69-14144

Cavity arrangement to obtain pulse durations of 0.5 to 10 microseconds with ruby laser

03 p0441 A69-14142

Single picosecond mode locked optical pulse selection from train of pulses of Q switched Nd-glass laser using optics external to oscillator cavity

03 p0441 A69-14183

Sinusoidal phase modulation role in spectral line broadening observed in trapped filaments of laser and Raman light

03 p0442 A69-14189

Laser ranging and illumination systems, discussing direction of pulsed monochromatic radiation to illuminate scene and utilization of reflected radiation for imaging

03 p0442 A69-14191

Threshold conditions for laser pumping with emission of perfect black body

03 p0442 A69-14220

Metal surface degradation by constant density laser radiation, computing screening effect

03 p0442 A69-14221

Single transverse electromagnetic mode power output for laser radar transmitter, using near hemispherical mirror resonator

04 p0609 A69-14287

Interferometric laser beam scanner using hollow cathode mercury ion laser output

04 p0609 A69-14288

High power output from submillimeter continuous wave gas laser

04 p0609 A69-14289

Mic total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models

04 p0609 A69-14290

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases

04 p0610 A69-14382

Interatomic collisions effect on multimode He-Ne lasers output power and spectral composition

04 p0610 A69-14383

Maximum inversion density and output power of Ne-He laser, given optimal discharge in hollow cathode

04 p0610 A69-14422

Power and time characteristics of He-Ne laser pumped by microwave pulses

04 p0610 A69-14423

Frequency mixing of organic dye solution laser radiation with ruby laser radiation, showing broader UV spectrum

04 p0610 A69-14424

Emission amplification coefficients of gas laser using pure carbon dioxide, carbon dioxide/air mixtures and carbon dioxide/air/helium mixtures

04 p0611 A69-14426

Resonant interaction of radiation from liquid nitrogen cooled ruby laser with ruby crystal in temperature range 4.2-100 K

04 p0611 A69-14439

Gas laser generation frequency control by emission absorption saturation effect, inserting neon filled emission absorbing cell into resonator

04 p0611 A69-14550

Surface smoothness of laser beam holes, discussing possible damage and technology recommendations

04 p0606 A69-14607

Pumping light filtration conditions effect on transition frequency of rubidium atoms

04 p0611 A69-14779

Kerr effect and electrostriction during self focusing of high power laser beam in gases and liquids

04 p0611 A69-14792

Helium-neon gas laser cavity beam for automatic high speed particle sizing

04 p0611 A69-15023

Homopolar generator as energy store for large laser pumping

04 p0612 A69-15151

Carbon dioxide laser noting output for added gases, efficiency, energy levels, excitation mechanism and tuning to single line and mode

04 p0612 A69-15173

Submillimeter water vapor laser power output for admixtures of H, N, carbon dioxide, methane, He and Ar, noting buffer effect of H

04 p0612 A69-15175

He/Ne ratio effect on performance of He-Ne laser in annular cavity

04 p0612 A69-15176

Output characteristics of slowly Q switched neodymium in calcium tungstate laser

04 p0612 A69-15206

Laser radiation influence on effectiveness of frequency doubling in KDP crystal

04 p0612 A69-15375

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics

04 p0560 A69-15376

Standard Leningrad-2 photoexposure meter applied to measurement of power of laser continuously operating in visual spectral range

04 p0602 A69-15405

Laser power increase noting influence of Mandelstam-Brillouin induced backscattering

04 p0612 A69-15414

Deuterium plasma heating by means of high power focused pulsed laser beam, noting initial energy of laser and pulse duration

05 p0769 A69-15583

Plasma production by ultrashort pulse Q switched laser beam, discussing avoidance of initiation of breakdown wave

05 p0770 A69-15584

Magnetic field confinement of plasma produced by focusing Q switched laser output on solid deuterium pellet

05 p0798 A69-15585

Laser light scattering by plasma using theory of ionospheric scattering of radar signals, determining scattered spectrum

05 p0798 A69-15586

Visual factors of laser displays providing human factors recommendation for several visual variables

05 p0760 A69-15591

Photon number and amplitude fluctuations of laser radiation in case of inhomogeneously broadened atomic line and for steady state condition

05 p0770 A69-15631

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

05 p0770 A69-15656

Time dependence of laser output in C and N atoms following dissociative excitation transfer explained in terms of measured populations of excited states

05 p0795 A69-15663

Relaxation rates of water vapor laser lines obtained with split discharge laser

05 p0771 A69-15810

Phase grating formation in giant pulse laser Q switching liquid by reflecting light beam from Lippman plate at Bragg angle

05 p0771 A69-15811

Thermionic electron emission from Mo and W targets irradiated by CW carbon dioxide laser beam

05 p0771 A69-15812

Gas laser pulse induced attenuated and nonattenuated plasma radiation recording, determining absorption coefficients

05 p0762 A69-15900

Spectroscopy of potassium vapor using laser induced fluorescence, noting laser line coincides with several molecular transitions

05 p0771 A69-15907

Spectral output time variation of GaAs diode laser operating in Fabry-Perot modes

05 p0772 A69-15961

Laser photolysis and spectroscopy for photographic recording of absorption spectra of transient intermediates in nanosecond reactions

05 p0772 A69-16025

Thin film thermocouple detector for molecular lasers operating in middle and far IR range

05 p0773 A69-16284

Visible laser frequency stabilization scheme and simultaneous determination of frequency in terms of time standard

05 p0773 A69-16291

Gallium arsenide electro-optic switch measuring signal time response to radiation step of homogeneously broadened carbon dioxide, He and nitrogen laser amplifier

05 p0773 A69-16293

Critical population inversion for xanthene dye solution laser, analyzing optical loss due to triplet state concentration [IEEE PAPER A-2]

05 p0773 A69-16307

Thermal self actions of CW laser beams in solids and liquids with wind or convection flow, discussing self focusing and defocusing [IEEE PAPER E-12]

05 p0774 A69-16311

Thermal self defocusing effect of laser beam in self focusing liquids, measuring refractive changes by high speed double exposure holography [IEEE PAPER J-7]

05 p0775 A69-16320

Brewster angle window degradation of high power ionized argon gas lasers [IEEE PAPER L-4]

05 p0775 A69-16322

Finite cross relaxation rate effect on spectral distribution in CW laser oscillator output with inhomogeneous broadening, noting population inversion distribution [IEEE PAPER T-2]

05 p0776 A69-16327

Mode suppression by mixed polarization in Michelson interferometer type of optical resonator

05 p0776 A69-16330

Stabilization method for composite cavity single frequency laser, noting insensitivity to oscillation power level variations

05 p0776 A69-16333

Pulsed water vapor laser with single Brewster window for operation between 20 and 120 microns, comparing performance with ordinary laser

05 p0776 A69-16334

Selective resonators for laser emission spectral structure control, proposing dispersion power increase by inserting telescopic system

05 p0777 A69-16371

Conversion of emission from pulse tube using neodymium laser with luminophor solution filled active element, discussing pumping nonlinear absorption kinetics

05 p0777 A69-16373

Semiconductor laser generation efficiency increased by using external resonator and by signal amplification

05 p0777 A69-16378

Laser scatter measurements in mesosphere and above for optical radar system parameters

05 p0758 A69-16414

Expansion anisotropy in angular distribution of laser produced plasmas in terms of drifting and expanding sphere model, discussing particle velocities, currents and time integrated counts

05 p0804 A69-16460

Pulsed ruby laser threshold and output energy for different relative orientations of rectangular prism and ruby crystal main crystallographic axis

05 p0777 A69-16526

Ruby laser characteristics at 78 K, discussing emission threshold, optimum feedback, modes, etc

05 p0777 A69-16546

Radiation of laser active element with random inhomogeneities of refractive index, discussing beam divergence, operation modes and Q switched operation

05 p0777 A69-16550

Laser beam scattering by acoustic waves of ionized crystal, reconsidering stimulated Brillouin emission theory for ultrasonic yield

05 p0777 A69-16610

Optical simulation of microwave antennas with variable profile reflectors, investigating radiation patterns by photometric scanning of photographs obtained with He-Ne laser

05 p0736 A69-16781

Electron concentration in pulsed plasma measured with Fabry-Perot interferometer and laser radiation source

06 p0963 A69-16911

Zeeman effect in He-Ne lasers during simultaneous emissions at various gas pressures and currents in magnetic fields

06 p0932 A69-16912

Active element inverse population distribution effects on laser radiation angular divergence during lower and higher oscillation modes

06 p0932 A69-16913

Laser based on xanthene series dyes and excited by neodymium laser second harmonic radiation, noting radiation spectra

06 p0932 A69-16914

Mass spectrometric studies of plasmas produced by laser beam interaction with solid materials

06 p0932 A69-16921

Continuous and pulsed lasing characteristics during discharge in pure oxygen noting ozone formation and removal at tube walls

06 p0932 A69-16923

GaAs laser excited by fast electrons exhibiting high efficiency and output power at room and liquid nitrogen temperatures

06 p0933 A69-16994

Carbon dioxide Q switched laser nonlinear amplification characteristics in vibrational-rotational bands

06 p0933 A69-17118

Solid state diodes made by pulsed laser irradiation of polished silicon surfaces, discussing application to integrated circuit design

06 p0893 A69-17157

Laser measurement techniques for plasma diagnostics, spectroscopy, angular rotation rate, distance, velocity and alignment of tools and assemblies [ASME PAPER 68-DE-21]

06 p0933 A69-17167

Lasing threshold and spectral characteristics of organic dye solutions, using excitation of second harmonic of monopulse ruby laser

06 p0933 A69-17255

Pulsed laser emission of atomic N in mixture of molecular N and He, noting effects of pressure and frequency and duration of excitation pulses

06 p0933 A69-17258

Gas laser operating on pure O-He-Ne-Ar mixture at liquid N temperatures, noting atomic O transitions, pulsed operation and energy level populations

06 p0933 A69-17259

He-Ne laser gain dependence on temperature noting influence of pumping conditions, discharge tube filling and geometry

06 p0934 A69-17260

CW room temperature laser using lanthanum sodium molybdate crystals with positive trivalent Nd ion impurity

06 p0934 A69-17262

Spectrum and amplitude fluctuations of laser light propagating through liquid helium, obtaining spatial correlation function of refractive index fluctuations

06 p0957 A69-17267

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

06 p0934 A69-17457

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs

06 p0934 A69-17466

Alternated magnetic field effects on lasing in ionized Ar

06 p0934 A69-17467

X rays detection from laser produced deuterium plasma through calibrated absorbers, presenting electron temperatures

06 p0964 A69-17479

Lippman-Brugg holograms production with high reconstruction efficiencies by suitable recording and processing techniques with commercially available photographic plates

06 p0926 A69-17481

Optical breakdown in air by mode synchronization operation of ultrashort pulses from neodymium laser

06 p0934 A69-17546

Light pulse duration and other parameters for ruby and Nd-glass lasers operating in synchronized mode regime determined by Armstrong method

06 p0934 A69-17549

Stimulated radiative recombination process for ramjet propulsion, investigating delay chamber required for vibration-to-translation conversion

06 p0984 A69-17630

Gas laser operation at high pressures, examining threshold pumping and power output dependence on pressure to optimize parameters

06 p0934 A69-17680

Ion laser emission cessation with increasing pressure, magnetic field and current strength due to lower transition level lifetime increase

06 p0934 A69-17682

He-Ne laser with small spark gap optimum parameters dependent on active medium and resonator field structure

06 p0935 A69-17683

Solid target output pulse magnitude and direction dependence on angle of incidence of intense laser beam

06 p0935 A69-17686

Mode locked Nd glass laser to pump organic dye laser, obtaining continuously tunable picosecond pulses

06 p0935 A69-17759

Inductively excited argon ion laser properties in high current regions

06 p0935 A69-17767

Semiconductors reflectivity enhancement by irradiating with Q switched ruby laser output

06 p0935 A69-17768

Ultrashort light pulse generation and measurement of half width, using saturable dye to mode lock Nd-glass laser

06 p0935 A69-17769

Mechanism for laser surface damage of glasses working through optical absorption, fluorescence, chemical reaction by quenching and breakdown

06 p0935 A69-17771

Q switching and mode locking of neodymium selenium oxygen chlorine liquid laser, discussing power output and nature of pulses

06 p0935 A69-17776

Temperature dependence of laser induced damage in plastic Q switch made of polyethylmethacrylate and vanadyl phthalocyanine for ruby laser

06 p0936 A69-17777

Laser emission of neodymium salt dissolved in polonium-chlorine, discussing fluorescence intensity

06 p0936 A69-17778

High power noble gas CW UV ion laser with W disk structure, showing continuous UV output limitation by optical degradation effects

06 p0936 A69-17900

IR radiation at 10.6 micron from two point sources mixed with collimated ruby laser radiation in proustite, obtaining visible image

06 p0928 A69-17904

Laser applications to situations requiring highly bunched high power density light beams

06 p0938 A69-18012

Ammonium perchlorate high temperature decomposition by using carbon dioxide laser pyrolysis/mass spectrometry

[AIAA PAPER 69-143]

06 p0885 A69-18111

Plasma ionization enhancement by laser line radiation matched to specific atomic transitions

[AIAA PAPER 69-47]

06 p0972 A69-18186

High efficiency ion lasers without additional axial magnetic field

06 p0938 A69-18221

Subpicosecond structure in output spikes of Nd-glass laser observed by employing two photon fluorescence displays inside laser cavity

06 p0938 A69-18231

Sixth order correlations of laser beam fluctuations near threshold from delayed coincidence measurements with three photodetectors, noting time constants

07 p1144 A69-18252

Laser excited vibrational fluorescence for determining vibrational energy transfer rates in HCl-carbon dioxide, HCL-HI and HI-carbon dioxide

07 p1144 A69-18289

Halide salts, semiconductors and nonoxide glasses as materials for high power laser windows

07 p1144 A69-18401

Quantum electronics trends, discussing output power, mode control, stability and lifetime of CW and Q switched lasers and parametric interactions in nonlinear optics

07 p1144 A69-18468

Streaming gas effect on carbon dioxide-nitrogen-helium laser power, discussing gas renewal phenomenon and evacuation rate

07 p1145 A69-18476

Rate equation analysis for internally optically pumped millimeter wave maser operating in laser crystal

07 p1146 A69-18480

Helium-neon laser for optical correction and guide beam techniques

07 p1146 A69-18484

Plasma diagnostics using scattering of laser electromagnetic radiation by plasma density function, discussing plasma species collision effect on line profiles

07 p1131 A69-18485

Giant pulse generation by switched laser rapid pumping of neodymium doped glass laser

07 p1146 A69-18486

Tandem amplifier system of glass and selenium-oxychloride liquid lasers, discussing input power/output pulse relation and population inversion density measurement

07 p1147 A69-18487

Synchronizing ruby and Nd-glass laser pulses by means of passive bleachable dye solution liquid Q switch

07 p1147 A69-18530

Time stabilization method for lasing in electro-optically Q switched ruby laser with saturable absorber in cavity

07 p1147 A69-18531

Helium-neon laser output power dependence on spark-gap cross section geometry, analyzing diffusion equation and population inversion

07 p1147 A69-18541

Memory effect in injection lasers output characteristics, noting anomalous increases in pulsed emission intensity with increasing current-pulse repetition rate

07 p1147 A69-18542

Output polarization rotation sensitivity to axial magnetic field varied by variable angle quartz flat inside He-Ne laser resonator

07 p1198 A69-18646

Circuit producing electrical and optical oscillations simultaneously constructed by combining semiconductor laser diode with photodiode

07 p1148 A69-18688

Photoconductivity induced by laser pulses in semiconductor with parabolic dispersion law, linear transition and nonequilibrium carrier concentration higher than equilibrium carrier concentration

07 p1148 A69-18690

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power

07 p1148 A69-18800

Fabry-Perot laser operation having third mirror inserted on optical axis, analyzing equations solution stability according to Liapunov

07 p1148 A69-18802

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies

07 p1148 A69-18803

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes

07 p1148 A69-18804

Picosecond laser pulses application to nonlinear optics, atomic and molecular systems transient response, optically generated plasmas, spectroscopy, high speed photography, etc

07 p1148 A69-18856

Gradual output degradation mechanism in GaAs injection lasers, attributing internal radiative quantum efficiency reduction to nonradiative recombination centers formation

07 p1148 A69-18857

Brewster angle lenses for low cost low loss laser beam transmission system

07 p1148 A69-18863

Q switched laser quasi-periodic short pulse emission pattern evolution from broadband noise source, using fluctuating dipole model

07 p1149 A69-18897

Saturated absorption by Ne isotope 6328 A He-Ne laser, discussing selection of Ne isotopes in gain and loss tubes

07 p1149 A69-18898

Laser beam absorption induced index changes associated with thermal blooming observed in iodine doped carbon tetrachloride, using Mach-Zehnder interferometer

07 p1149 A69-18899

Laser light scattering with orientation saturation of microsystems by electric field, noting application to optical anisotropy of macromolecules and colloidal particles

07 p1149 A69-18900

Single mode output power from 6328 A He-Ne laser through mode coupling induced by added absorption cell containing excited Ne

07 p1149 A69-18901

Radiation pressure effects on laser produced carbon plasma in vacuum, discussing target surface superheating, plume boundary, plume density precursor and electron and ion temperature merging

07 p1190 A69-18902

Pulse broadening in MHD copper vapor laser

07 p1149 A69-18904

Boundary value problem of temperature field and heat conduction in transparent media heated by laser

radiation producing thermoelastic stresses leading to breakdown

07 p1149 A69-18922

Pumping power effect on He-Ne laser amplification factor dependence on temperature and discharge currents

07 p1149 A69-18933

Nonpolarized single frequency gas laser radiation produced by interferential effects in complex resonator

07 p1149 A69-18936

Temperature profile and power density distribution in metastable level of ruby laser rod during pumping in air

07 p1150 A69-18937

Atmospheric extinction coefficient and backscattering function determined by laser radar using differential equation

07 p1126 A69-18966

Organic dye lasers characteristics, describing broad continuous production for nanosecond absorption spectroscopy

[IEEE PAPER A-3]

07 p1150 A69-19047

Pulses from Q switched carbon dioxide laser for studying Q switching techniques

[IEEE PAPER G-2]

07 p1150 A69-19054

Laser small signal step response measured, deducing medium bandwidth

[IEEE PAPER G-9]

07 p1151 A69-19056

Radiative lifetime for nitrous oxide 001-100 transition, laser level absolute population densities and saturation parameter measured in nitrous oxide-nitrogen-He laser

[IEEE PAPER G-10]

07 p1151 A69-19057

Single mode single frequency carbon dioxide laser operating on single rotational-vibrational transition

[IEEE PAPER G-11]

07 p1151 A69-19058

Nonsaturated gain of laser radiation in gas discharge in carbon dioxide with N and He

07 p1151 A69-19060

Spontaneous and stimulated Raman emission in liquids, obtaining picosecond pulse duration and laser light linewidth

[IEEE PAPER H-6]

07 p1152 A69-19063

Continuous wave and pulsed IR signals amplification on carbon dioxide laser amplifiers, discussing design, construction and performance of transmitter

[IEEE PAPER J-1]

07 p1152 A69-19064

Time resolved spectrum of high current pulsed argon laser discharge, noting primary laser output and afterglow

[IEEE PAPER L-12]

07 p1152 A69-19068

Output properties of Nd-selenium oxychloride liquid laser, detailing cell construction and output dependence on cell geometry and optical feedback

[IEEE PAPER M-8]

07 p1153 A69-19070

Dynamics of injection lasers, discussing picosecond pulse generation

[IEEE PAPER O-1]

07 p1153 A69-19071

Thermonuclear neutron emission from high temperature deuterium plasma produced by focusing high power laser radiation on lithium deuteride surface

[IEEE PAPER O-11]

07 p1153 A69-19072

Frequency reproducibility of He-Ne laser, using absorption dependence on frequency in strong field standing wave limit to provide stabilization

[IEEE PAPER P-4]

07 p1153 A69-19073

Stimulated Compton scattering for laser action, noting voltage tunability and gain at far IR wavelengths

[IEEE PAPER S-9]

07 p1154 A69-19081

Iodine IR laser, discussing CW emission obtained at various wavelengths and attributed to electronic transitions in atom

[IEEE PAPER T-5]

07 p1154 A69-19082

Collision broadened spectral line shape obtained in impact approximation using Anderson formulation compared to output of gas lasers

[IEEE PAPER T-6]

07 p1154 A69-19083

Laser induced gas breakdown by focusing nanosecond pulses in air and deuterium

[IEEE PAPER U-3]

07 p1155 A69-19085

Phase matched optical harmonic generation by anomalous dispersion in liquid media, using dye fuchsin red

[IEEE PAPER V-9]

07 p1155 A69-19086

Gain enhancement effect of CO on carbon dioxide CW laser performance by accelerating relaxation of bending mode

07 p1155 A69-19088

Scaled carbon dioxide lasers life and power outputs with Xe and H additives

07 p1155 A69-19091

Output and beat frequency of carbon dioxide laser with various resonator configurations realizing single mode operation

07 p1156 A69-19157

Induced emission cross section of neodymium glass laser in quasi-steady mode measured as function of rod section, mirror reflectivity and output

07 p1156 A69-19161

Velocity measurement by combination of Doppler principle and schlieren method involving reflection, refraction or diffraction of laser beam

07 p1135 A69-19259

Iodine fluorescence spectra excited by krypton ion laser, analyzing spectral series and vibrational rotational levels

07 p1156 A69-19304

IR beam profiles of carbon dioxide laser permanently recorded on foamed polystyrene

07 p1156 A69-19305

Giant pulse production of Nd-glass laser with aid of coherent pumping by second harmonic of Q switched laser, noting pulse duration

07 p1156 A69-19333

Single mode intensity measured for 0.6328 micron He-Ne laser as function of cavity Q, using Lamb semiclassical theory

07 p1157 A69-19414

Spectrum of light scattered by particles suspended in turbulent fluid

07 p1157 A69-19417

Pilot protection against laser hazards, discussing protective eyeglasses, fireproof clothing and materials

07 p1072 A69-19436

GaAs lasers radiation power hysteresis manifested in generating starts and stops at different injection current levels

07 p1157 A69-19593

Ruby laser beam incident on steel surface in air or water measured for energies, determining reflected energy dependence on incident energy for self insulation effect

07 p1157 A69-19594

Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector

07 p1157 A69-19641

Laser color TV projection-display system using moving mirrors and dual polarization scanner

07 p1137 A69-19740

Laser modulation at optical and near IR frequencies, discussing beam characteristics changes and information transmission

07 p1158 A69-19742

Magneto-optic, acousto-optic, electro-optic and free carrier modulation of IR laser beams

07 p1158 A69-19743

Holography combined with laser interferometry for nondestructive testing in materials, components and assemblies

07 p1137 A69-19777

Carbon dioxide laser excitation by fast proton beams, noting generation power increase

08 p1323 A69-19802

Carbon dioxide laser radiation frequency controlled by varying boron trichloride pressure in cell inserted in resonator

08 p1323 A69-19804

Flow diagnostics for high enthalpy nonequilibrium gas flows in shock tubes using long pulse ionized Ar gas laser

08 p1323 A69-19879

Li niobate crystal emission excited by Ar laser beam, deriving laser action formulas

08 p1323 A69-19941

Stimulated emission of laser employing crystal and glass lasers doped with neodymium ions, using high temperature spectroscopy

08 p1323 A69-19944

Stimulated emission of water cooled CW Nd doped lanthanum fluoride at room temperature

08 p1323 A69-19945

Nonlinear amplification of powerful light pulses in Nd glass

08 p1323 A69-19946

Transparent dielectrics destruction by laser radiation noting stress development in medium

08 p1324 A69-19947

Micromachining with laser beam, choosing mirrors and lenses of optical system to provide uniform energy distribution for microwelding or hole boring

08 p1324 A69-19980

Laser beams self focussing interpreted as photon contraction due to equivalent gravitational attraction

with gravitational constant proportional to nonlinear refractive index

08 p1324 A69-20085

Back diffraction field behind hologram illuminated with laser beam, noting hologram image observation through beam cross section

08 p1312 A69-20086

Small signal pulsed gas laser amplification limits, discussing time dependency, temperature effects, relaxation rates and energy transfer

08 p1324 A69-20098

Flowing CO-N-He laser with power enhancement and high efficiency, noting role of gases

08 p1324 A69-20163

Picosecond light pulse measurement by two photon excitation of photographic film

08 p1313 A69-20165

Gas laser modes strong coupling and single moding induced by saturable absorbing medium within cavity resonator

08 p1324 A69-20166

Laser welding in nonconventional applications and tiny components

08 p1319 A69-20203

Quantum theory of laser, discussing stationary photon distribution and correlation function for intensity fluctuations

08 p1324 A69-20221

Collision cross sections between monatomic gas impurities and metastable atoms in He-Ne laser from output curve and impurity partial pressure

08 p1325 A69-20278

Normal multimode laser action with and without phase locking, using exact steady state solution of Fokker-Planck equation

08 p1325 A69-20291

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion

08 p1325 A69-20325

Natural intensity fluctuations spectrum of He-Ne laser, determining modulation coefficient dependence on output

08 p1325 A69-20431

Light intensity dispersion logarithm calculated along axis of laser beam propagating in atmosphere

08 p1351 A69-20437

Plasma diagnostics by use of lasers, discussing Thomson scattering and problems arising from light scattering applications

08 p1326 A69-20471

Laser beam diffraction method for measurement of apparent filament diameters, emphasizing high modulus carbon filaments

08 p1316 A69-20499

Inhomogeneous laser beams self focusing effects in organic liquids recorded on bases of induced stimulated scattering

08 p1326 A69-20538

Gas laser emission natural frequency fluctuations spectral density measured by auxiliary heterodyne laser

08 p1326 A69-20540

Q switched single mode ruby laser pulse passage through traveling wave amplifier decreases beam divergence

08 p1326 A69-20542

GaAs laser employing external resonator with thin film active substance, noting output power and emission thresholds during electron beam excitation

08 p1326 A69-20543

Emission spectrum of laser employing electron-vibrational transitions in samarium doped calcium difluoride crystal, noting spectrum shift with increasing crystal temperature

08 p1326 A69-20544

Picosecond light pulse generation by solid state laser interpreted by fluctuating intensity spikes arising from random emission interference in out-of-phase modes

08 p1326 A69-20548

Laser operation through semiclassical dispersion theory, presenting dipole moment and population density equations derived from quantum theory

08 p1326 A69-20571

Kine films of gas flows within highly luminous transient arc taken by laser schlieren technique

08 p1316 A69-20615

Biological effects of laser radiation on mammalian retina, noting thermal injury [AGARDOGRAPH-111]

08 p1266 A69-20676

Nonlinear optical effects in He-Ne and ruby lasers noting laser gain, frequency splitting, frequency differences in coupled lasers and frequency band narrowing

08 p1327 A69-20768

Design of ruby laser for stability, lifetime, maintenance and safety requirements of commercial users, discussing power, pulse duration and beam divergence

08 p1327 A69-20881

Book on laser communication system design covering modulation and detection methods

08 p1277 A69-20884

Luminous discharge at nonabsorbing surface when exposed to single pulse ruby laser beam, suggesting photoionization in surface layer

08 p1327 A69-21021

Formation and characteristics of flash produced in air by single pulse of Q switched ruby laser, using holographic interferograms

08 p1317 A69-21022

Laser rubies emission characteristics operating at different temperatures in common resonator, studying kinetics for pumping powers

08 p1327 A69-21076

Atmospheric effects on laser beam attenuation, noting application to optical visibility measurement by ruby laser

08 p1327 A69-21089

Laser beam propagation in scattering media, noting attenuation coefficients for coherent and incoherent radiation

08 p1328 A69-21092

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate

08 p1328 A69-21185

Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis

08 p1328 A69-21188

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis

08 p1328 A69-21190

Laser produced blast wave expansion measured by microwave technique, obtaining surface temperature and electron density

09 p1514 A69-21324

Dispersion corrected three wavelength laser heterodyne system for plasma electron density and neutral density measurements

09 p1544 A69-21331

Second harmonic generation conversion efficiencies at 5300 A with KDP and lithium niobate crystals, using Nd-glass laser of high radiance and narrow bandwidth

09 p1514 A69-21333

Pulse velocity in self locked He-Ne laser, noting air turbulence effects prevention

09 p1514 A69-21347

Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications

09 p1492 A69-21394

Motion measurement using Doppler shift of scattered laser light, noting high resolution

09 p1492 A69-21398

Spatial size and velocity distributions for liquid or solid aerosols suspended in air flow using Q spoiled ruby laser and holography

09 p1492 A69-21418

Electro-optical shutter for Nd-glass laser with high peak power pulses, discussing switching time, contrast ratio and synchronization

09 p1493 A69-21422

Far IR laser pulse shape and duration

09 p1515 A69-21424

Laser triggered spark gap and Pockels cells producing consistently repeatable controlled duration pulses

09 p1515 A69-21427

Highly turbulent boundary layers on walls in channels using laser light sources

09 p1515 A69-21434

Coherent light fluxes detection, noting correlation characteristics of output signals of photomultiplier illuminated by multimode He-Ne laser

09 p1515 A69-21438

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator

09 p1515 A69-21474

Relaxation times of carbon dioxide laser levels induced by radiation

09 p1515 A69-21488

Optimal conditions for gas discharge in tubes with hollow cathodes in He-Ne mixture for obtaining lasing at Ne line wavelength

09 p1516 A69-21507

Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer
[SAE PAPER 690266] 09 p1494 A69-21555

Stimulated Mandelstam-Brillouin scattering in compressed N and H as function of pressure, using ruby laser pulses 09 p1516 A69-21562

Carbon dioxide-nitrogen-helium laser with RF excitation of discharge plasma, noting high power per unit length 09 p1516 A69-21678

Light polarization from stimulated Brillouin effect in compressed gaseous nitrogen, presenting depolarization variations as function of gas density and laser power 09 p1516 A69-21691

Picosecond structure of low power laser signals using calcite beam splitter and potassium diphosphate second harmonic generator 09 p1516 A69-21742

Optical parametric noise in water by ruby laser beam for phase matched four photon process 09 p1539 A69-21751

Gain, output power and radiation directivity of He-Ne traveling wave laser with nonresonant feedback 09 p1517 A69-21796

Fabry-Perot fringes maxima in frequency response of laser interferometer, describing passive technique using eight wave plate 09 p1517 A69-21915

Laser induced breakdown spark ignition of detonable and nondetonable chemically reactive gas mixtures, noting blast waves [AIAA PAPER 68-146] 09 p1622 A69-21951

Laser beam optical scintillation under atmospheric turbulence conditions, showing log amplitude variance saturation and decrease 09 p1517 A69-22079

Laser beam scintillation at night over long atmospheric horizontal paths, showing log amplitude covariance observation in agreement with theoretical prediction 09 p1517 A69-22080

Lasers, reviewing output properties, control and modulation characteristics, and applications to communications, plasma generation, measurement, high temperature metallurgy, etc 09 p1517 A69-22118

Laser oscillations, discussing oscillation frequency, oscillation time, noise and spectrum width, pumping and lasing materials, line broadening and giant pulse generation 09 p1517 A69-22119

Solid state lasers, noting normal, continuous and single mode oscillations, Q switching, power output limitations, mode locking and liquid lasers 09 p1517 A69-22120

Gas lasers, discussing amplification, resonance, internal and external mirror lasers, outputs, and He-Ne, carbon dioxide and ion lasers 09 p1517 A69-22121

Semiconductor lasers, discussing materials, oscillation wavelengths, excitation methods, operating principles, fabrication, GaAs p-n junction laser and applications 09 p1518 A69-22122

Mode locked laser operation, noting output and applications to optical communication, high speed photography, nonlinear optics and frequency standards 09 p1518 A69-22123

Fabry-Perot resonator and beam waveguide systems for laser beams, noting mode coupling and separation in laser optical systems 09 p1518 A69-22125

Phototubes, photodiodes, photoconductors, quantum detectors, nonlinear optical detectors and heterodyne receiving systems for photodetection of laser outputs 09 p1518 A69-22126

Passive electromagnetic circuit elements for laser light control such as circulators, isolators and phase shifters, discussing coherent light and polarization 09 p1518 A69-22127

Laser beam modulation and deflection methods involving control of amplitude, phase, frequency and direction, noting use of semiconductor p-n junctions 09 p1518 A69-22128

Atmospheric propagation properties of laser light, discussing particle absorption, gaseous absorption and refractive index disturbance effects 09 p1518 A69-22129

Optical communications applications with emphasis on large capacity transmission 09 p1456 A69-22131

Pulsed laser radar and applications to upper atmosphere observation equipment and distance measuring devices 09 p1456 A69-22132

Laser control of French rocket head guidance system, discussing gyroscopic master, stellar or solar detectors, etc 09 p1518 A69-22162

Laser radiation produced by continuous glow discharge within Al hollow cathode, determining laser power in terms of He-Ne mixture pressures 09 p1519 A69-22245

Pulsed ruby laser of small output for hole drilling, studying correlation of vaporization, hole diameter and depth with laser output 09 p1504 A69-22247

Laser induced line narrowing in coupled Doppler broadened transitions, noting mode crossing and spontaneous emission 09 p1519 A69-22282

Metallic systems microbonding and joining reliability, noting electron and laser beam welding and deposited film connections 09 p1510 A69-22348

Optical motor system to efficiently convert laser energy into mechanical rotational energy, giving equations for controlling motor speed 09 p1442 A69-22457

Distance measurements of several hundred feet to resolution of three millionth of inch by applying He-Ne laser interferometer 09 p1519 A69-22475

Laser evaporation vapors from refractory materials to produce surface temperature for carrying out reactions in gaseous phase and thin film preparation 09 p1519 A69-22476

Laser spark image in air photographed in scattered laser radiation light, showing singularities and absence of beadlike structure 09 p1519 A69-22531

Coherent radiation brightness increased from liquid N Raman laser, using off-axial pumping 09 p1520 A69-22533

Rubidium vapor laser pumping induced frequency shifts eliminated by detuning resonator without decreasing output power 09 p1520 A69-22636

Temperature effect on pulsed laser action on electron transitions in diatomic molecules for rotational relaxation, discussing excitation mechanisms 09 p1520 A69-22654

Ruby laser emission absorption in transparent dielectrics, noting crack formation and propagation producing opacity 09 p1520 A69-22655

Pulsed plasma production when focusing Q switched laser on solid target surface, noting high temperature effects and optical diagnostics methods 09 p1520 A69-22656

Frequency effects in laser with nonlinearly absorbing gas cell inserted in resonator, noting self stabilization of generation frequency 09 p1520 A69-22661

Laser resonator loss factor and axial mode frequencies calculation by interferometry 09 p1520 A69-22679

Two mirror resonators, discussing curvatures formation and stability conditions to derive natural frequencies 09 p1520 A69-22680

Gas laser output increase by nonconstricted discharge in aluminum tube cathode with mirror resonator 09 p1520 A69-22681

Liquid laser gain measurement via luminescence intensity, noting optical pumping thermal effect 09 p1520 A69-22683

Stimulated Mandelstam-Brillouin scattering at second harmonic of ruby laser and neodymium glass laser 09 p1520 A69-22684

First Stokes component of stimulated Mandelstam-Brillouin scattering and line defects caused by self focusing of single pulse laser beam 09 p1521 A69-22686

Lasers industrial manufacturing applications, discussing processing operations and measurement and inspection techniques 09 p1521 A69-22783

Carbon dioxide laser beam deflection and thermal defocusing due to wind in absorbing medium 10 p1701 A69-22949

Carbon dioxide laser combining gas flow with fluid mixing to achieve high gain 10 p1701 A69-22954

Laser applications to production line metal working, discussing economics, welding, drilling, automation, thermal and atmospheric effects, etc 10 p1698 A69-22983

Trivalent rare earth ions Stark structure based on spectroscopic observations of stimulated transitions in lasers 10 p1701 A69-23129

Amplitude fluctuations and line width of traveling wave and standing wave He-Ne laser, considering saturation effects 10 p1701 A69-23135

Far IR radiation from water vapor laser, noting monochromaticity and strong linear polarization 10 p1702 A69-23161

Optical frequency standards, discussing lasers VHF stability, RF and optical ranges, long and short term effects, etc 10 p1702 A69-23299

Ceramic substrate cutting with carbon dioxide laser by scribing perforation pattern, 10 p1699 A69-23302

Gaussian laser beam reflection and refraction at curved interface between media of different refractive indices, considering tilted ellipsoidal interfaces 10 p1725 A69-23309

Thermal diffusion and free thermal convection in fluids by diffraction interferometer, using laser for light source 10 p1702 A69-23431

Excitation of ultrathin Cd/SeS/ platelets with mode locked He-Ne laser for excitons formation, discussing time delay 10 p1703 A69-23512

Laser pulse picosecond substructure measurements, using pulse compression and second harmonic generation techniques 10 p1703 A69-23514

Matrix method for acoustical holograms and optical reconstruction of virtual and conjugate images using laser light of 6328 A wavelength 10 p1696 A69-23549

Peaked electron emission from nickel surface with large work function under laser radiation, discussing emission pulses, electron currents and surface temperature time variations 10 p1703 A69-23572

Stimulated emission of trivalent Nd ions in glass base, explaining connection between efficiency and emission polarization by interaction of laser modes with ions 10 p1703 A69-23618

Q switching combined with pulsed pumping of carbon dioxide laser for observing optimal Q switching instant, noting pulse energy increase 10 p1703 A69-23619

Stress effect on laser damage crack orientation in transparent organic dielectrics, estimating gas pressure in cracks 10 p1703 A69-23621

Nonlinear susceptibility tensor components and refractive index variations of liquids and glasses in high intensity ruby laser field, using interference methods 10 p1703 A69-23622

Dynamics of external loss modulation and Q switching methods of generating ultrashort pulses in mode locking laser 10 p1703 A69-23623

Gas laser with nonlinear absorbing cell in resonator, discussing effective gain dependence on squared field amplitude, hysteresis phenomena and output power 10 p1704 A69-23625

Low voltage He-Ne laser, noting outputs for various pressures and grid anode separations 10 p1704 A69-23652

Nd glass laser for emission of high radiance diffraction limited pulses, noting long path air breakdown and second harmonic generation 10 p1704 A69-23654

IR detection at sum or difference frequency by employing optically nonlinear crystal and laser in visible and photomultiplier 10 p1704 A69-23656

Laser emission lines produced by pulsed electrical discharge through ammonia 10 p1704 A69-23666

Quantum phase noise in He-Ne laser, considering amplitude fluctuation, spontaneous emission and oscillator linewidth 10 p1704 A69-23669

Coherent detection spectroscopy with laser oscillator, emphasizing high resolution and applications in astronomical spectroscopy and IR 10 p1696 A69-23684

Resonator interferometry of pulsed submillimeter wave lasers, analyzing mode structure, pulse shapes and molecular mechanism of laser emission
10 p1705 A69-23810

Isotope shifts in 4416 A cadmium laser, showing change of double peaked to single peaked profile with doubled active tube length
10 p1705 A69-23812

Mode locked ruby laser for short duration pulse production, noting relation to reciprocal linewidth
10 p1705 A69-23813

Neodymium doped YAG laser efficiency dependence on pump power level and spectral filtering of pump light
10 p1705 A69-23814

Mode interactions in argon lasers between two spectral lines noting effect on output
10 p1705 A69-24003

Sulfur dioxide-helium laser pulsed and CW submillimeter outputs
10 p1706 A69-24005

Far IR lasing lines in hydrogen sulfide, sulfur dioxide and OCS, discussing output
10 p1706 A69-24008

Self focusing of CW argon laser beam due to absorptive heating in crown glass, emphasizing time dependence of beam diameter as function of distance
10 p1706 A69-24009

Q switching techniques for solid state lasers at room temperature for high peak power, discussing mechanical systems, electro-optic and magneto-optic shutters
10 p1706 A69-24018

Electron concentration and temperature dependence on gas temperature as factor determining He-Ne laser output at 6328 A
10 p1706 A69-24078

Damping of solid state laser relaxation oscillations in power output due to diffusion of excitation
10 p1706 A69-24079

Laser radiation induced stress waves in transparent media using dynamic photoelastic technique
10 p1707 A69-24213

Laser radiation backscatter along oblique paths in atmosphere, calculating transmission over horizontal and oblique paths
10 p1659 A69-24220

Laser radiation spectrum scattered by low temperature plasma electrons at atmospheric pressure
11 p1922 A69-24233

Nonlinear confining and deconfining forces of laser light interaction with inhomogeneous plasma, analyzing macroscopic motion based on ponderomotive force description
11 p1923 A69-24297

Conventional and dual beam laser Doppler methods for velocity measurement of solids, liquids and gases
11 p1893 A69-24333

Pulsed tunable lasers, emphasizing dye lasers for visible and near visible light in specialized spectroscopy
11 p1893 A69-24343

Dye lasers CW operation feasibility, showing sufficient quenching of rhodamine 6G triplet state by oxygen dissolved in methanol
11 p1893 A69-24344

Pulsed molecular nitrogen laser positive UV and IR systems interaction under varying gas pressure, applied voltage and tube diameters
11 p1893 A69-24346

Laser light scattering in radiation driven breakdown waves in He, using high resolution streak photography to obtain diagnostic data
11 p1915 A69-24420

Laser beam for determining instrumental profile of high resolution double pass solar spectrograph, noting influence of slits width
11 p1893 A69-24431

Population inversion distribution and wave processes in optical amplifier, showing beam transformation of constant section and dependence on crystal characteristics
11 p1893 A69-24447

He-Ne laser light coherence distortion by atmospheric turbulence
11 p1894 A69-24452

Q switched carbon dioxide laser power increased by placing bleachable /boron tetrachloride/ filter in resonator
11 p1894 A69-24454

Collection of papers on electron beam and laser beam technology covering cold electron emitters, space charge flow, gas lasers, microelectronics, thin polycrystalline films
11 p1846 A69-24596

Laser application to welding, drilling and other processes involving material removal for microelectronic circuits and components fabrication
11 p1846 A69-24600

Output power losses in lasers with inhomogeneous active rods, deriving formulas for losses in ruby and Nd-glass laser rods
11 p1926 A69-24603

Statistical characteristics of photocurrent pulse amplitudes during cathode exposure to gas laser outputs
11 p1834 A69-24611

Specific level role in emission of optical radiation by ruby laser stimulated calcium fluoride crystals doped with divalent Dy ions
11 p1894 A69-24618

Power output and radiation spectra of trivalent Nd doped liquid lasers based on phosphoryl chloride with tin and titanium chlorides
11 p1894 A69-24620

Giant pulse buildup time in Nd-glass laser with passive shutter determined by comparing Q factor and peak power ratios of different modes
11 p1894 A69-24621

Molecular carbon dioxide laser radiation emission in tube containing low pressure atmospheric air, using C cathode and Al cold cathode
11 p1895 A69-24625

Holograms on photochrome films by split beam He-Ne laser using special mirror system
11 p1881 A69-24631

Gas lasers coherence properties and availability for holography, discussing continuous power output of He-Ne, Ar and Kr ion lasers
11 p1895 A69-24680

Coherent pulse laser holography for front and back lighted holograms of moving objects
11 p1895 A69-24686

Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence
11 p1936 A69-24698

Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes
11 p1895 A69-24715

Induced discharge laser wave propagation in medium with active and absorbing admixtures, determining stationary shape and velocity range
11 p1895 A69-24716

Laser beam welding effectiveness for TWT with coaxial input and output lines
11 p1896 A69-24741

Gas laser materials, fabrication and performance, analyzing gas cleanup, cathode degradation, bore erosion and optical surface contamination effects
11 p1896 A69-24743

Equal inclination interference fringes effects on laser beam reflection from plane parallel glass plates, evaluating angular distance between adjacent fringes
11 p1896 A69-24840

Low order transverse modes in Ar ion lasers, analyzing beam divergence, output, mirror alignment and cavity configurations
11 p1896 A69-24841

Turbulence induced depolarization of linearly polarized He-Ne laser beam at 6328 A traversing atmosphere near ground level
11 p1896 A69-24842

Probability of ocular damage for illumination by pulsed laser beam transmitted through atmosphere, developing safety nomograph for eye hazard analysis
11 p1830 A69-24843

Rabbit corneal damage thresholds for Gaussian beams of carbon dioxide laser IR radiation at various exposure times
11 p1830 A69-24844

Laser radar eye hazard for fixed and variable transmitter intensities, considering eye damage magnitude and successful detection magnitude of transmitter intensity
11 p1830 A69-24845

Polarization effects of scattered coherent light on laser imagery, determining surface roughness and angle of incidence effects photographically on basis of Fung theory
11 p1896 A69-24849

Lasers applied to simulation of effects of X ray or gamma ray bursts on semiconductor devices
11 p1896 A69-24877

Calorimeter for IR carbon-dioxide laser output power measurement, noting range calibration and accuracy
11 p1885 A69-24903

Holographic reconstruction of spatial distribution of laser light field within and outside resonator, noting suitability for pulsed laser analysis
11 p1885 A69-24919

High power short duration diffraction limited laser pulse generation with optically swept laser glass slab forming amplifier chain
11 p1897 A69-25036

Singly resonant optical parametric oscillator, noting single mode and multimode oscillation for various pump powers, pump wave depletion and mode competition
11 p1897 A69-25038

Electro-optic broadband laser light modulator designs and modulation characteristics, computing curve set for evaluation of various materials
11 p1897 A69-25039

Atmospheric scattering behavior under reduced visibility conditions for laser wavelengths of 0.69 and 1.06 micron
11 p1837 A69-25040

Distance vs time and velocity vs time measurements for high speed model missiles by means of laser interferometry and optical Doppler shift method
11 p1886 A69-25042

Glass lasers with trivalent rare earth ions noting properties, characteristics and recent developments
11 p1898 A69-25043

Coherence phenomena for gas laser transitions coupled by common level, noting coherent superposition
11 p1898 A69-25045

Gas laser transitions and power broadening, analyzing saturation and gain profiles of He-Ne laser by light probe
11 p1898 A69-25046

He-Ne laser output phase fluctuations between adjacent modes during unlocked and self locked condition, noting cavity optical length short term fluctuations influence
11 p1898 A69-25048

Stimulated emission cross section measurement of Nd ions in calcium tungstate using Edwards method
11 p1938 A69-25049

High power CW carbon dioxide laser saturation and discharge conditions analyzed by rate equation
11 p1898 A69-25050

Far IR CW gas laser design for maximum output, discussing pulsed operation, wavelength measurement and radiation detection
11 p1898 A69-25051

Electro-optically Q switched Nd doped calcium tungstate laser for producing two controlled pulses, noting application to other solid state lasers
11 p1899 A69-25052

Carbon dioxide laser for production of high peak power pulse, discussing mw peak power design and oscillation problem in high gain amplifiers
11 p1899 A69-25053

Photoelectric, calorimetric and photon-momentum methods for measuring laser output energy and power emphasizing liquid, wire and pyroelectric calorimeters
11 p1899 A69-25196

Temperature and electron concentration in plasma spark obtained in air by focusing Q switched laser radiation
11 p1928 A69-25235

Microwave analysis of plasmas produced by laser beam on aluminum spheres, noting expansion velocity and electron density
11 p1930 A69-25287

Ruby laser light scattered at 90 degrees by dense plasma focus, analyzing signal detection
11 p1899 A69-25324

Fractures in refractory metals surface layers due to Q switched laser pulses
11 p1899 A69-25402

Laser pulse deflection by acoustooptical system consisting of ultrasonic cell and oscillator
11 p1840 A69-25423

Calcite crystals stability anisotropy to ruby laser radiation, studying threshold power as function of beam polarization
11 p1900 A69-25553

Fluctuations in angle of arrival of laser and thermal radiation beams over near ground path
11 p1840 A69-25570

Optical satellite tracking system using multicoincidence method of photon signal counting by Q switched laser
11 p1841 A69-25579

Laser radiation transmission in atmosphere examined for information transmission applications
11 p1841 A69-25638

Laser radiation in vacuum effects on metals and alloys 11 p1906 A69-25684

Intensity fluctuations of single frequency gas laser at 3.39 microns, discussing fluctuation minimization methods 11 p1900 A69-25750

Transformation of Q switched neodymium laser radiation into Stokes component during stimulated combination scattering in liquid nitrogen 11 p1900 A69-25751

Gas ionization by UV radiation emitted by pellet, target or portion of gas in laser beam focus, using polished metallic mirrors 11 p1901 A69-25754

Nonuniform standing wave fields spatial distribution in active rod of ruby laser effects on laser radiation dynamic parameters, discussing radiation spectrum width 11 p1901 A69-25756

Airborne Q switched ruby laser for studying upper atmosphere meteoric formations optical characteristics and kinetics against background of underlying surface 12 p2125 A69-25955

Atmospheric boundary layer transparency to gas laser emissions in IR spectrum, determining attenuation factor dependence on humidity and visibility range 12 p2028 A69-25957

Pulsed laser emission from carbon dioxide collisionally pumped by vibrationally excited DF produced by reacting fluorine oxide with deuterium 12 p2104 A69-25986

Second harmonic conversion of giant pulse Nd laser emission related to beam divergence and space-time distribution of radiation, noting energy relationship 12 p2104 A69-26022

Power output of He-Ne laser as function of transverse magnetic field strength 12 p2104 A69-26023

Spectrum analysis of aluminum plasma excited by giant pulse ruby laser radiation, discussing temperature and density 12 p2134 A69-26027

Reabsorption effect of emitted quantum on lifetime of excited levels in gas laser, determining capture factor 12 p2104 A69-26028

Emission spectrum of ruby laser as function of relative orientation of resonator and active crystal axes, noting spectrum width 12 p2104 A69-26029

Microwave modulation of GaAs injection laser radiation, using Zaleskii recording method and liquid nitrogen to cool laser diode 12 p2105 A69-26031

Shadow and schlieren photography, interferometry and quantitative data treatment obtainable by high speed multiframe photographic arrangement, using laser beam 12 p2086 A69-26165

Deformation measurement by laser pulse holographic method, discussing laser source choice criteria 12 p2087 A69-26175

Schlieren high speed photography systems for ballistic projectile studies, discussing use of gas lasers as nanosecond light sources 12 p2088 A69-26182

Regulated pulse lasers under free oscillation for photographing distant objects by illumination with shortened light pulses 12 p2089 A69-26190

Laser beam damage in glass blocks, noting high speed photographic study and absorption of light by inclusions 12 p2117 A69-26193

Alignment/test rig for head-up displays using laser light pencils 12 p2091 A69-26304

Mode locked lasers for measuring fast radiative decay in fluorescent systems 12 p2105 A69-26310

Spontaneous emission of carbon dioxide lasers, studying emission in Second Positive System of nitrogen as function of discharge current and laser output power 12 p2105 A69-26316

Disaligning and velocity changing collisions influence on laser light induced saturation peaks or holes in velocity distribution of Ne atoms 12 p2105 A69-26317

Ruby crystal optical homogeneity and relation to main laser emission characteristics, discussing optical and structural surface properties [IEEE PAPER U-7] 12 p2106 A69-26322

Laser emission noise and voltage noise cross correlation coefficient for CW GaAs laser diodes at 77 K, noting strong dependence on bias current 12 p2038 A69-26328

Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N and O 12 p2107 A69-26330

Laser diode output efficiency increased in presence of transverse magnetic field suppressing higher order TE and TM modes 12 p2039 A69-26353

Pulsed HCN sealed laser long term operation, discussing behavior of 311 and 377 micron emissions 12 p2107 A69-26391

Laser output power amplitude fluctuations effect on beat frequency stability for traveling waves in annular laser with broadened Doppler emission line 12 p2107 A69-26541

Laser Doppler flowmeter for heterodyne detection of laser light scattered from moving fluid applied to fluid velocity and velocity distribution measurements 12 p2093 A69-26546

Q switched ruby laser with rotating prism, considering single pulse operation by increasing switching rate 12 p2107 A69-26588

Optical alignment for lasers with electro-optical Q switching and mutually misaligned ruby rod, KDP crystal and polarizing prism 12 p2107 A69-26589

Giant pulses from laser with electro-optical quartz shutter, noting advantageous optical and mechanical properties of quartz 12 p2108 A69-26591

Heat removal from laser ruby rod by Cu prism connected to cooling system, discussing limiting factors in heat transfer area size 12 p2108 A69-26592

Contrast interference patterns obtained in Michelson interferometer at various path differences, using He-Ne laser as light source 12 p2108 A69-26593

Phase pulsations between normal frequencies and combination tones in CW gas laser output, analyzing observations by scanning interferometer 12 p2108 A69-26635

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter 12 p2109 A69-26647

Holographic plasma diagnostics covering phase, amplitude variations images, laser spark, theta pinch studies, etc 12 p2094 A69-26707

Pulsed or continuous radiation generated in laser having active element of neodymium glass fragments 12 p2109 A69-26715

Incandescent cathode temperature effect on He-Ne laser output, ascertaining mixture parameters, cathode voltage and power dependence on discharge current 12 p2109 A69-26716

Gas lasers, including stimulated emission in monochromatic field of traveling and standing plane waves, spontaneous emission with stimulated transitions, etc 12 p2109 A69-26906

Standard phenomenological laser rate equations for population inversion and light intensity generalized by considering intensity dependent losses and Einstein coefficients 12 p2110 A69-27014

Direct modulation characteristics of semiconductor junction laser, analyzing resonance phenomenon, bias current, admittance, modulation frequency limit and emission lifetime 12 p2110 A69-27069

Soviet monograph on plasma diagnostics by lasers, describing interferometry, optical field visualization, schlieren and shadow photography 12 p2139 A69-27075

Atmospheric effects on laser beam width, using Born approximation and Gaussian model to obtain TEM mode scattered power expressions 12 p2111 A69-27166

YAG-Nd laser continuous operation using incoherent injection luminescent pumping by gallium arsenide phosphide light emitting diodes at liquid nitrogen temperature 13 p2270 A69-27192

Spectral criterion for distinguishing mode locked and nonmode locked laser signals 13 p2270 A69-27197

Intense ultrashort pulse widths determination by two photon fluorescence patterns, using model of partial laser mode locking 13 p2270 A69-27198

Shift of certain Hg spectral line by high power pulse from Nd laser through perturbation of atomic energy levels 13 p2270 A69-27202

Temperature effects on polarization degree, threshold current and delay of radiation from GaAs laser diodes with diffused Zn 13 p2227 A69-27328

Signal strength of two beam interferometers with laser illumination, considering modulation depth of interference pattern 13 p2259 A69-27450

Photographic layers darkening process, using widely spaced or single giant pulses of ruby laser 13 p2260 A69-27612

Laser light scattered from arc discharge, observing enhanced plasma oscillations 13 p2307 A69-27629

Potassium vapor radiative perturbation by ruby laser radiation in glass cell with end windows, studying emission line structure 13 p2271 A69-27656

Neodymium laser emission of organic molecules in UV region noting molecular absorptivity and fluorescence 13 p2271 A69-27657

Carrier dragging in CdS single crystals under Q switched ruby laser light due to photon stream 13 p2271 A69-27661

Gallium arsenide diode nonequilibrium carriers absorption of He-Ne laser radiation under emission conditions 13 p2272 A69-27893

Cadmium telluride laser characteristics including emission wavelength and electron beam threshold current density 13 p2272 A69-27896

Single frequency ruby laser emission spectrum coincidence with interacting laser radiation at instant of Q switching 13 p2272 A69-27911

FM laser pulse formation time characteristics noting modulated resonator losses 13 p2272 A69-28114

He-Ne laser transition line shape and gain curve through width, considering spectral frequency characteristics, output power and gas temperature and concentration 13 p2272 A69-28115

Quasi CW solid state doped lasers excited by pyrotechnic pump sources with potassium perchlorate oxidant and zirconium fuel, noting power to weight ratio 13 p2272 A69-28116

Multichannel optical interference fluid manometer, using laser light source for fringe pattern photographic record 13 p2263 A69-28190

Collective scattering of light from ruby laser by cold dense deuterium plasma produced by electrical discharge, deducing density and electron temperature 13 p2273 A69-28366

Ruby and neodymium glass lasers applicability to metal working, investigating factors affecting integral pulse power stability 13 p2273 A69-28431

Gas laser modulation steady state characteristics with KDP crystal in cavity, noting output power dependence on applied electric field 13 p2273 A69-28432

Laser radiation absorption in xenon plasma, noting dependence on intensity due to atoms ionization 13 p2314 A69-28442

Optical maser induced electrical breakdown interaction with superhigh pressure ionized gases, using optical interferometry and holography 13 p2273 A69-28464

Power output of ruby laser stimulated by strong pinch discharge plasma flux at 4000-7000 A in He 13 p2273 A69-28530

Spotted scattered background contrast relation to scattering system geometry during laser scattering by suspended Lycopodium spores 13 p2273 A69-28550

Square wave generator for junction laser power supply 13 p2274 A69-28643

Spectral width of emission of laser resonator in nonstationary mode in presence of active medium, noting time dependence 14 p2456 A69-28736

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases

14 p2456 A69-28755

Interatomic collisions effect on multimode He-Ne lasers output power and spectral composition

14 p2456 A69-28756

Submillimeter wave generated in ZnTe by difference frequency mixing of Q switched ruby laser, discussing beat power

14 p2457 A69-28927

Frequency shifts of Lamb dip minimum in helium-neon laser, considering effects of discharge tube parameters and gas pressure

14 p2457 A69-28929

Optically swept glass slab laser design, discussing pulse length and peak power

14 p2457 A69-28930

Polarization dependent gain saturation and nonlinearity induced anisotropy in He-Ne laser amplifier

14 p2457 A69-28931

Ruby laser beam effects on CdS crystals optical properties, measuring absorption spectrum and light dispersion in crystal

14 p2457 A69-28999

Laser emission field effect on discharge current in pure carbon dioxide and mixtures with molecular N and He

14 p2458 A69-29161

Pulsed lasers with pure carbon dioxide and mixture with N and He, discussing inversion mechanism, peak emission power and gas temperature effects in different modes

14 p2458 A69-29162

Composite ruby laser optical inhomogeneity effect on spectral, temporal and angular emission characteristics

14 p2458 A69-29163

He-Ne laser traveling wave output power, obtaining end mirror reflection coefficient optimal value

14 p2458 A69-29165

Passive Q switch laser single pulse formation time and spectral width using balance equations

14 p2458 A69-29166

CdS crystals emission spectrum during two photon excitation by ruby laser, noting dependence on pump power

14 p2458 A69-29167

Optical rectification effect in lithium metaniobate crystals under neodymium laser radiation, comparing results with data for potassium dihydrophosphate crystals

14 p2458 A69-29168

Fluorite crystal laser activated by divalent samarium, discussing characteristics in pulsed operation mode

14 p2458 A69-29328

Single crystals garnets Raman spectra using laser radiation, separating phonon spectra of host lattices from electronic Raman effect

14 p2507 A69-29334

Gallium arsenide injection laser for communication systems with pulse frequency modulation, noting power output dependence on crystal quality

14 p2459 A69-29349

Laser beam discrete deflection method using Wollaston prism and electro-optical switch for changing polarization plane

14 p2459 A69-29391

Ruby laser reflected and transmitted light intensity following radiation focusing on cuvette containing cyclohexane, noting dependence on incident pulse power

14 p2459 A69-29392

He-Ne lasers operation at 6328 Å, discussing optimum design parameters for power, life and stability

14 p2459 A69-29429

Linear polarization achieved in He-Ne laser by applying external transverse magnetic field to plasma discharge

14 p2459 A69-29569

Nonlinear interactions of linearly polarized carbon dioxide laser signals in sulfur hexafluoride measured as function of angle between polarization planes

14 p2460 A69-29602

Enhanced plasma heating in absorption zone of laser-induced gas breakdown at spherical blast wave shock front

14 p2460 A69-29604

Electron density, temperature and dimensions of helium breakdown induced by Q switched ruby laser beam as function of space and time

14 p2492 A69-29636

Log amplitude fluctuations of laser beam in turbulent atmosphere, obtaining asymptotic expressions for near field of transmitter aperture

14 p2460 A69-29638

Self resonant energy transfer mechanisms in active media for lasers investigated by two methods

14 p2460 A69-29644

Stimulated emission of cerium trifluoride-positive trivalent Nd ion laser noting absorption, luminescence, excitation, emission spectra and metastable state lifetime

14 p2460 A69-29645

Laser radiation conversion during induced combination scattering, discussing stabilization of emission mode of first Stokes component

14 p2460 A69-29648

Three level He-Ne laser, showing nonlinear interference effects on gain line shape and use in magnetic field and frequency stabilization

14 p2460 A69-29671

Laser with molecular H and Cl mixture at HCl vibrational transitions

14 p2461 A69-29672

Pulsed HF discharge analysis in hydrogen based on laser light scattering at plasma electrons, noting presence of satellites

14 p2451 A69-29781

Bibliography on laser applications in plasma physics covering plasma diagnostics and production

14 p2498 A69-29842

Undulation in output waveforms of pulsed water vapor laser observed with In-doped Ge detector

14 p2461 A69-29887

Plasma temperature measurement by resonant laser radiation absorption, assuming Saha-Boltzmann relation

14 p2501 A69-29954

Laser-nonlinear crystal dynamical interactions, studying saturation and coherence properties of second harmonic wave generated inside laser cavity

15 p2632 A69-30026

Efficient extinction in optically coupled GaAs injection lasers achieved by selecting quenching radiation frequency close to operating frequency

15 p2633 A69-30059

Gas lasers output power calculation based on operating transition with mixed contour due to natural and Doppler broadenings

15 p2633 A69-30079

Pulsed ruby lasers for welding fine wires for electrical interconnections, considering laser energy and pulse duration effects

15 p2617 A69-30097

Continuous butt welding with CW carbon dioxide laser, noting heat affected area, remelt zone and weld efficiency

15 p2617 A69-30099

Automatic frequency control of laser and regenerative amplifier, considering frequency stability

15 p2633 A69-30238

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals

15 p2633 A69-30257

Calorimeter for CW laser output power absolute measurement, discussing operation principles, structural features, circuit and accuracy

15 p2608 A69-30320

Solid state and gas lasers operational parameters tabulation including pulse durations, powers, energy flux densities, electric and magnetic field strengths, etc

15 p2633 A69-30708

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator

15 p2633 A69-30719

Lasing kinetics, emission spectrum and directivity of ruby laser with spatially homogeneous population inversion

15 p2634 A69-30729

Characteristics of neodymium-glass laser with unstable resonator noting transverse modes and radiation angular distribution

15 p2634 A69-30730

Two photon absorption excitation of luminescence in ruby crystals by neodymium laser radiation, determining luminous intensity dependence on pumping intensity

15 p2634 A69-30731

Electron scattering due to Kapitza-Dirac effect in laser standing wave field

15 p2634 A69-30736

Microwave hologram construction and image reconstruction by laser beam, analyzing results by matrix expression

15 p2610 A69-30802

Lenses spherical aberration role in studying laser induced breakdown of gases, considering intense ionization collinear regions multiplicity along optic axis

15 p2634 A69-30878

Lasers and holography applications in astronomy including high resolution spectrographic diffraction gratings manufacture and astronomical objects photographic pictures evaluation

15 p2610 A69-30880

Molecular beam behavior in constant electric and magnetic fields, applying laser frequency dependence on magnetic field orientation to resonator

15 p2655 A69-30943

Statistical characteristics of Q switched He-Ne laser emission gain fluctuations during transient process from subthreshold to superthreshold value

15 p2634 A69-30960

Unsaturation frequency discriminator influence in semiconductor laser feedback loop on laser emission spectrum

15 p2635 A69-30967

Scintillation magnitude related to range and turbulence strength in near earth optical propagation, using pulsed and helium-neon laser

15 p2570 A69-31030

Gas laser cutting of thin carbon films on thick pyrex glass and ceramic substrates

15 p2635 A69-31037

Pumping energy absorbed by active element of neodymium glass during laser emission related to activator concentration

15 p2635 A69-31104

Optimal parameters of cuvette for use with helium-neon laser as excitation source to record combination light scattering spectra of powdery materials

15 p2635 A69-31105

Mode competition of 5861 and 6470 Å lines in ionized Kr laser attributed to electronic level excitation processes

15 p2635 A69-31106

Quantum mechanics method for obtaining photocount distribution from optical maser photoelectron counting statistics

15 p2635 A69-31238

Atomic coherence and inhomogeneous broadening effects on laser amplifier ultrashort electromagnetic high peak power pulses

15 p2635 A69-31239

Laser Doppler heterodyning for monitoring motion noting solid surfaces vibration, liquid and solid surfaces linear velocity and turbulence in liquids and gases

15 p2614 A69-31276

Fluid flow velocity measurements by Doppler shift of laser light scattered from moving fluid, determining beat frequencies

15 p2616 A69-31291

Laser flowmeter for pulse flow of highly corrosive rocket fuels and oxidizers with measured rise times less than 10 msec

15 p2616 A69-31292

Scintillation of ground based spherical wave laser source viewed from space analyzed from Geos 2 satellite laser tracking, noting stellar scintillation correspondence

15 p2570 A69-31309

Photography of laser echoes on satellites, tabulating results

15 p2570 A69-31311

Space direction by compensation method of cosmic triangulation network, using laser and optical observations of artificial satellites

15 p2699 A69-31377

Ellipsometric dimensions calculations with aid of laser radiation, stressing formulas for compensator and polarizer assemblies

15 p2636 A69-31474

Mechanical testing of high temperature materials subjected to thermal cycling by high power pulsed laser beam

15 p2636 A69-31512

Frequency selector for gas laser, considering monochromatic emission and multimode oscillation

16 p2795 A69-31608

Laser measurements of earth-moon distance applied to determinations of earth axis motion and lunar shape, relief, dimensions and motion

16 p2788 A69-31624

Laser radiation absorption by inhomogeneous overdense plasma, discussing effects of plasma expansion on energy coupling efficiency

16 p2818 A69-31679

Ruby laser output energy degradation due to pump light absorption by color centers, discussing roles of defects and impurities in center formation

16 p2795 A69-31697

Q switched laser produced blast waves in low pressure Ar, discussing gas density and time dependence roles

16 p2796 A69-31705

Holographical interferometry with laser spark radiation containing fundamental and second harmonic wavelengths, confirming heavy particle densities decrease in plasma with time

16 p2789 A69-31771

Lasing influence on electron energy distribution in gas discharge measured with Langmuir probe, showing electron-electron interaction insufficient to maintain equilibrium

16 p2796 A69-31772

Low temperature method for measuring breakdown threshold parameters of liquid and gaseous He by laser beam, observing stimulated Mandelstam-Brillouin scattering

16 p2796 A69-31799

Laser cavity optimization for producing minimum short light pulse width in fast Q switching of optical maser

16 p2796 A69-31802

Gas laser application to magnetospectroscopy of graphite, Bi, As and pyrolytic graphite single crystals

16 p2796 A69-31822

Injection semiconductor lasers emission characteristics, discussing gallium arsenide diodes, nonlinear losses in pulsed mode, laser interactions, etc

16 p2796 A69-31949

Monomode giant pulse generation from neodymium glass laser by coherent pumping

16 p2797 A69-32018

Plasma magnetic field and electron density measured by Faraday rotation using resonant gas laser radiation

16 p2822 A69-32041

Laser amplifier nonlinear losses effect on light beam propagation, studying arbitrary waveform development into asymptotic steady state pulse (SSP)

16 p2797 A69-32043

Laser radiation influence on effectiveness of frequency doubling in KDP crystal

16 p2797 A69-32122

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics

16 p2752 A69-32123

Increase or decrease in light absorption by plasma particles found dependent on laser intensity level

16 p2797 A69-32382

Atmospheric gas constituents number densities determined as function of altitude by correlating laser beam scattering and absorption data

16 p2781 A69-32387

Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix

16 p2798 A69-32480

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

16 p2798 A69-32513

Wave front resistivity in laser produced plasma interacting with magnetic field enhanced by two stream instability

16 p2823 A69-32564

Electron density measurement method in plasma or vacuum based on refraction index in optical frequency range using laser interferometer mismatch as criterion

16 p2798 A69-32583

Tunable far IR radiation generated from difference frequency between two Q switched ruby lasers using lithium niobate and quartz as mixing crystals

16 p2798 A69-32603

Time behavior of output intensity and polarization of single cavity mode internal mirror Zeeman laser in axial magnetic field

16 p2798 A69-32607

Dielectric breakdown thresholds and cavitation in organic liquids observed during Q switched and pulsed ruby radiation

17 p2979 A69-32826

Laser effect in neodymium glass, estimating efficiency of light energy output vs electric energy input

17 p2984 A69-32828

HCN laser line width measurement with high resolution spectrum analyzer indicating spectral widths caused by mechanical instability

17 p2979 A69-32850

Self Q switching of pumped neodymium-doped YAG and ruby lasers obtained by static misalignment of mirror and pumped laser filament

17 p2979 A69-32916

Line width and intensity correlation of laser radiation noting damping constant

17 p2980 A69-33012

Laser induced gas breakdown covering breakdown mechanism and plasma expansion and decay, with bibliography

17 p2980 A69-33026

Angular structure of second optical harmonic for cylindrical lens focusing of ND laser beam into negative KDP crystal

17 p2981 A69-33110

Laser emission spatial structure transformation determined from ratio between focused spot radius and distance between lens and output mirror

17 p2981 A69-33111

Broadband intracavity SHF modulation of He-Ne laser emission in 10 cm band, showing agreement with calculations

17 p2981 A69-33112

Spontaneous gas laser emission from level coupled by spontaneous transition with emitting level, obtaining atoms interaction with laser field velocity distribution and spectral line width

17 p2981 A69-33116

Continental and maritime hygroscopic particles associated with increasing relative humidity, determining effect on backscattered power from laser beam using Mie scattering equations

17 p2981 A69-33160

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion

17 p2981 A69-33315

Long path difference vacuum Michelson interferometer application to far IR and IR laser wavelength measurements compared with 6328 Å He-Ne wavelength

17 p3006 A69-33405

Laser harmonic frequency measurement application to absolute frequency determination of 84 micron heavy water laser

17 p2982 A69-33406

Fog removal by high power carbon dioxide lasers, evaluating possibility of clearing airport runways [AIAA PAPER 69-670]

17 p2945 A69-33449

Laser technology and effects on materials fracture

17 p2989 A69-33557

Rb 87 vapor laser output power dependence on magnetic field strength and resonator detuning, discussing laser and atomic transition frequency tuning

17 p2983 A69-33694

Phase fluctuation measurements of laser beam propagating through turbulent atmosphere

17 p2927 A69-33855

Laser beam propagation through turbulent medium, investigating statistical distribution of phase shift fluctuations

17 p2976 A69-33857

Physical mechanisms for nonlinearities in electromagnetic wave propagation, analyzing plane wave instability, self focused beams propagation and laser oscillations

17 p2928 A69-33867

Laser emission divergence reduced by compensating optical inhomogeneity of active elements with prismatic reflector in resonator

17 p2983 A69-33970

Gas laser power dip in presence of elastic collisions, using equilibrium equations for particles velocity distribution function

17 p2983 A69-33972

Molecular gas absorption coefficient dependence on laser emission energy density, considering disturbed equilibrium distribution of molecules

17 p2983 A69-33973

Polarized emission from Nd activated glass, establishing S and P polarization component energy dependence on pumping energy

17 p2984 A69-33974

Laser action in quantum system, analyzing absorption constant relation to spontaneous/stimulated emission constants, energy level population inversion, pumping, etc

17 p2984 A69-34150

Optical parametric oscillator output/signal/frequency locked to absorbing atomic transition, discussing effective linewidth

18 p3133 A69-34263

Carbon dioxide flowing gas laser pumped by thermally excited nitrogen, discussing power gain and absence of chemical and charged particle effects

18 p3151 A69-34264

Damage thresholds to ocular tissues from laser radiation, presenting comparative theoretical curves and recommended safe working levels

18 p3097 A69-34312

Submillimeter water vapor laser power output for admixtures of H₂, N₂, carbon dioxide, methane, He and Ar, noting buffer effect of H

18 p3152 A69-34717

He/Ne ratio effect on performance of He-Ne laser in annular cavity

18 p3152 A69-34718

Wavelength dependence of total and depolarized backscattered laser light cross section for rough metallic surfaces

18 p3172 A69-35011

Neodymium laser emission temporal structure in mode self locking regime with Q switching by saturable filter

18 p3152 A69-35016

Ruby laser stimulated emission spatial, temporal, energetic and spectral characteristics during disruption in spherical cavity containing strongly scattering medium

18 p3152 A69-35026

Electron current flow from metal target in gas due to laser radiation, showing increased dependence on gas pressure

18 p3152 A69-35124

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate

18 p3152 A69-35154

Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis

18 p3152 A69-35157

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis

18 p3152 A69-35159

Optical distance measurement using laser and atmospheric dispersion method through average refractive index determination over path

18 p3152 A69-35198

Intensity changes in visible sidelight emission from carbon dioxide laser switched on and off, calculating vibrational temperatures

18 p3153 A69-35243

Luminophors for carbon dioxide laser radiation visualization noting controlled sensitivity, quick response and resolution

18 p3153 A69-35259

Ionization effects in hydrodynamic model of radiation driven breakdown wave propagation, obtaining wave velocity and absorbed laser flux density relationship

18 p3174 A69-35286

Stimulated reflection experiment for correlation between coherent photon beams from independent lasers

18 p3153 A69-35292

Gas and solid state lasers optical resonance and radiation generation, frequency properties, frequency shift, spectra and Zeeman effect

18 p3154 A69-35408

Radiation dynamics of semiconductor GaAs injection laser with pulsed and continuous modes operation of diodes

18 p3154 A69-35495

Time variation of laser flare plasma temperature related to pulse parameters, using soft X radiation from plasma

18 p3154 A69-35496

High power pulsed laser welding system for structural alloys and parts, discussing pulse length, repetition rate, shielding and applicability

19 p3320 A69-35556

Focused Gaussian laser beam expansion due to thermal changes in refractive index of air, noting focused spot area increase with pulse energy

19 p3330 A69-35601

Nonlinear analog of conical refraction in biaxial crystals, considering birefringence in piezoelectric uniaxial crystals and laser beam propagation

19 p3330 A69-35604

High speed photography for hypervelocity aeroballistic ranges, using giant pulse ruby laser for front lighting

19 p3306 A69-35732

Electron concentration in hypersonic nonequilibrium shock layer flow by two wavelength laser interferometry, noting wavelength dependence of refractivity

19 p3306 A69-35742

Shock wave propagation through collisionless magnetized plasma, using gun driven, laser and cesium plasma flow methods

19 p3379 A69-35759

He-Ne laser light noises due to discharge current fluctuations and random mode beat

19 p3330 A69-35760

Ruby laser resonator losses resulting from changes in mirror transmittance or inclination, or introduction of bleachable absorbers

19 p3331 A69-35863

Solid state CW laser frequency control during operation, discussing emission properties and laser applications

19 p3331 A69-35864

Solid state laser emission frequency control and retuning using dispersive resonators, analyzing interference methods for wavelength measurement

19 p3331 A69-35865

ZnS-CdS crystals luminescence during varied forbidden bandwidth, discussing two photon and ruby laser excitation and temperature dependence

19 p3331 A69-35866

Stimulated emission characteristics of CdS-CdSe mixed crystals subjected to two photon excitation, studying pulse energy at 77 K as function of pumping power

19 p3332 A69-35867

Nonlinear Maxwell equations applied to non-monochromatic emission for nonlinear crystal situated in resonator, examining generation of second optical harmonic

19 p3332 A69-35869

Laser emission theory for indirect band-band transitions, considering light absorption by free carriers in semiconductors with polar and unpolar scattering

19 p3332 A69-35873

Kinetic theory of stationary laser emission under quasi-equilibrium conditions, analyzing emission modes

19 p3332 A69-35874

Laser multimode emission kinetic theory, discussing quasi-equilibrium disturbance effects and nature of inhomogeneity

19 p3333 A69-35875

Laser emission during disturbed quasi-equilibrium, considering emission spatial inhomogeneity due to arbitrary radiative transitions

19 p3333 A69-35876

Laser emission in system of four level centers, determining nonuniform emission line broadening due to disturbed quasi-equilibrium distribution of electron subsystem elementary excitations

19 p3333 A69-35877

Laser radiation modulation at EHF by linear electro-optical effect of KDP and ADP crystals

19 p3334 A69-35884

Multilayer lead oxide and cryolite dielectric coatings stability to ruby laser radiation, noting breakdown coherent radiation power densities

19 p3334 A69-35886

Coherent radiation generation using gas lasers, analyzing interaction between EM radiation and matter

19 p3335 A69-36067

Coherent radiation detection using laser optical sine waves, considering detection by heterodyning, laser preamplifier and parametric amplification

19 p3335 A69-36070

Multiphoton luminescence and photocurrent excitation by ruby and neodymium laser beams of KCl-Eu single crystals, noting brightness dependence on laser beam power

19 p3335 A69-36165

Cylindrical concave surface quality control by contactless comparison with reference surface, using interferometer with Twyman system and continuous laser

19 p3311 A69-36196

Memory matrices sensitivity to laser beams with various emission power densities, considering matrices of thin metal layers on transparent base

19 p3335 A69-36198

Internal modulation of HeNe laser in asynchronous regime, evaluating range and efficiency with regard to external modulation

19 p3335 A69-36341

Rb 87 vapor laser pumping, output, spectral line width and emission frequency approximated in three level system

19 p3335 A69-36342

Rb 87 vapor laser output power and spectral line width dependence on optical pumping intensity and atom density in resonator

19 p3336 A69-36343

Light induced shift of Rb 87 vapor laser emission frequency during modulated optical pumping, discussing elimination by filter temperature and tuning

19 p3336 A69-36344

Pulse ruby lasers with mercury lamps for pumping noting improved efficiency, power and temperature regime due to reduced IR radiation

19 p3336 A69-36347

Amplitude and output spectra of optical quantum amplifier based on GaAs injection laser, noting values in traveling wave and regeneration mode

19 p3336 A69-36348

Water vapor laser submillimeter emission spectra, considering rotational and vibrational lasing transitions due to electron impact and molecular interactions

19 p3336 A69-36349

Pulsed water vapor laser high power operation and strongest component wavelength measurement

19 p3337 A69-36416

Laser action from atomic bromine produced by flash photolysis of gaseous iodine monobromide, discussing pulsed output, optical gain, chemical reversibility and atomic excitation

19 p3337 A69-36444

Injection lasers threshold characteristics, studying temperature and doping level effects on current density and radiation energy

19 p3337 A69-36527

Magnetic field effects on emission line shift, threshold current and power output of GaAs injection laser, discussing spontaneous radiation in magnetic field

19 p3387 A69-36529

GaSb p-n injection laser output at 4.2 K in strong transverse magnetic field, deducing effective mass and g-factor from stimulated emission peak shift

19 p3387 A69-36530

Coherent emission from injection electron-hole plasma in indium antimonide without magnetic field, noting roles of crystal thickness and pinch effects

19 p3387 A69-36532

Temperature effects on threshold current density, emission wavelength and polarization of PbSe diode lasers

19 p3337 A69-36533

GaAs lasers emission dynamics, considering threshold amplification, spontaneous noise, nonlinear operation, etc

19 p3337 A69-36534

Radiation dynamics of GaAs injection semiconductor laser, plotting spike period dependence on resonator length

19 p3337 A69-36535

GaAs-P injection laser time delay measured from start of current flow in p-n junction diode, studying effects of memory, temperature and reverse bias

19 p3387 A69-36536

Power, efficiency and temperature dependence of emission spectra and threshold current density in electron beam pumped GaAs laser, noting doping concentration

19 p3338 A69-36538

He-Ne laser discharges noise and oscillations classified, investigating interaction between intrinsic oscillations

19 p3338 A69-36605

HCN laser line gain measurements during continuous excitation as function of current and pressure for acetonitrile and water mixtures

19 p3339 A69-36695

Carbon dioxide lasers near IR spontaneous emission spectra

19 p3339 A69-36697

Flat wire grid calorimeter used as radiation sensor in measuring pulsed ruby laser

19 p3339 A69-36755

He-Ne laser communication feasibility experiments, discussing modulation, detection, operating parameters, etc

19 p3279 A69-36756

Spectrum measurement of He-Ne laser by Fabry-Perot interferometer, determining mirrors flatness

20 p3536 A69-36945

Wavelength-surface temperature relationship of ruby laser, discussing thermal control of emission wavelength

20 p3552 A69-36967

Gas mixtures CW gain characteristics at 337 mu as function of pressure, current, mixture and flow rate, considering HCN laser systems

20 p3552 A69-36995

Laser Doppler velocimeter (LDV) for fluid velocity measurements, noting advantages

20 p3552 A69-37004

Frequency controlled unmodulated laser for long path interferometry, noting servolop correction of frequency relative to Lamb dip

20 p3553 A69-37303

Vibrational displacement phase measurement by Michelson interferometer with laser source

20 p3538 A69-37320

He-Ne laser temperature condition optimization based on calculation and experiment

20 p3553 A69-37356

He-Ne laser output intensity saturations in presence of axial magnetic field, noting moving and fixed minima

20 p3553 A69-37433

Threshold power, gain, output power and radiation energy during optical pumping of Q switched molecular laser by black body radiation

20 p3554 A69-37722

Resonant parametric oscillator stable and random phases, considering smooth frequency tuning and two quantum luminescence laser construction

20 p3554 A69-37723

Neodymium glass laser emission spatial characteristics, investigating higher laser modes excitation

20 p3554 A69-37725

Differential equations for field amplitude and level populations applicable to solid state lasers output power pulsations

20 p3554 A69-37726

Nonmonochromatic laser emission frequency characteristics, studying second harmonic generation in nonlinear KDP crystal

20 p3554 A69-37727

He-Ne laser emission tuning with thin absorbing metallic film situated near reflecting mirror

20 p3555 A69-37730

Holographic image range contouring produced by multifrequency emission from resonant output reflector in pulsed ruby laser cavity

20 p3540 A69-37733

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

20 p3555 A69-37940

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs

20 p3555 A69-37949

Alternated magnetic field effects on lasing in ionized Ar

20 p3555 A69-37950

Electro-optical tuning effect on frequency of parametric laser with KDP crystal, noting Curie point

20 p3555 A69-38003

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup

20 p3555 A69-38009

Active medium high gain during giant pulse generation shown to lead to radiation fluctuations

20 p3555 A69-38010

Output power spectra of Pb-Sn-Te diode laser above threshold of oscillation, demonstrating inverse dependence of line width on laser power

21 p3734 A69-38326

Ruby laser goniometric and telemetric echoes by photographing Geos satellites

21 p3671 A69-38335

Temperature dependence of stimulated light power from GaAs junction lasers operated at constant bias current above threshold

21 p3734 A69-38437

Solid state traveling medium laser pulsed emission characteristics and nonlinear intensity distribution

21 p3735 A69-38438

Interaction between modes of radiation field and active medium in laser with nonresonant feedback, discussing amplitude stabilization of total radiation

21 p3735 A69-38581

Gas molecule collision influence on photon echo intensity produced by two linearly polarized laser pulses incident on sulfur hexafluoride

21 p3774 A69-38589

Vacuum restoration by laser evaporation of active media /getters/ and vapor condensation on cold substrate applicable to nonmetallic active media /titanium-magnesium oxide/

21 p3735 A69-38590

Continuously operating multipurpose wind tunnel for laser light scattering experiments in supersonic two phase flow

21 p3689 A69-38596

Helium-neon laser output power dependence on spark-gap cross section geometry, analyzing diffusion equation and population inversion

21 p3735 A69-38693

LASER OUTPUTS

Memory effect in injection lasers output characteristics, noting anomalous increases in pulsed emission intensity with increasing current-pulse repetition rate
21 p3735 A69-38694

Q switched laser pulse propagation in nonlinear laser amplifier using bitemporal relativity theory, deriving five dimensional wave equation revealing superlight signal existence
21 p3770 A69-38839

Giant Q switched laser pulse interaction with C target in background gas showing complex luminous shock structure near target as function of time
21 p3736 A69-38942

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power
21 p3736 A69-38945

Fabry-Perot laser operation having third mirror inserted on optical axis, analyzing equations solution stability according to Liapunov
21 p3736 A69-38947

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies
21 p3736 A69-38948

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes
21 p3736 A69-38949

Laser radiation increased absorption in opaque solid body attributed to vaporization, analyzing factors determining thermodynamic equilibrium between condensed and gaseous phases
21 p3736 A69-38962

Deposited beta active thallium isotope materials angular distribution after vaporization by Q switched laser beam determined by target fragment recoil
21 p3737 A69-38992

Quantum theory for single mode laser radiation, considering photon distribution function and mean field damping decrement by phase quantum fluctuations
21 p3737 A69-38996

Current carrier concentration and magnetic field as factors influencing laser frequency resonance mixing in semiconductors with narrow forbidden bands
21 p3737 A69-38998

Electron beam pumped semiconductor laser light beam amplitude and phase distribution, studying effects of inhomogeneous excitation by model
21 p3737 A69-39041

Photographic and photometric study of absorption and reflection of ruby laser light incident on biological objects
21 p3665 A69-39060

He-Ne laser emission attenuation coefficient relation to water content of artificial fogs for 0.63, 1.15 and 3.39 microns
21 p3738 A69-39118

Argon ion laser single frequency output spectrum characteristics
21 p3738 A69-39140

Laser induced multiphoton ionization and cascade breakdown in high pressure gases, considering roles of refractive index, laser nonideal output and beam self focusing
21 p3738 A69-39445

Construction and components of laboratory water vapor laser emitting coherent radiation in far IR
21 p3738 A69-39446

Holographic interferometry by single two wavelength laser pulse exposure, discussing variable sensitivity techniques
21 p3725 A69-39448

Distance measuring method limitations for modulated CW laser determined by laser transmitter receiver in conjunction with retroreflector target fixed position
21 p3739 A69-39457

Laser profilometer to measure sea wave profiles from airborne platform, describing transmitter, receiver and signal processor
21 p3739 A69-39461

Laser design for smooth emission frequency retuning, discussing equations for laser field oscillations, two photon resonance, tensor analysis, quantum emission, etc
21 p3739 A69-39539

Emission from polymethine dye solution during optical pumping with pulses from Q switched Nd glass laser, discussing emission spectral, temporal and energy characteristics
21 p3739 A69-39542

Time characteristics and second harmonic of radiation of Nd laser containing lens systems, producing second harmonic in KDP crystal
21 p3740 A69-39544

Pumping and excitation spectra of solid solutions of cryptocyanine in glycerine irradiated by ruby laser, discussing population inversion and scattering and vibrational transitions
21 p3740 A69-39546

Amplification saturation in spatially inhomogeneous laser field, relating power to active medium and resonator parameters
21 p3740 A69-39549

Emission kinetics of passive Q switched laser without constraints on relaxation time and switching characteristics of absorption centers and medium
21 p3740 A69-39550

Gas dynamic processes during vaporization of solid material under Nd laser emission, using high speed photography
21 p3740 A69-39551

Shadow photography study of electrical discharge set off by laser spark
21 p3740 A69-39552

Spectral, angular and temporal characteristics of traveling wave mode ruby laser emission, noting high transverse divergence effect on mode operation
21 p3741 A69-39554

Negative ion concentrations in plasma by flash photodissociation, using Q switched laser for irradiation
21 p3778 A69-39574

Focal plane observation of granulation phenomena on scattering surface illuminated by coherent light from gas laser
21 p3741 A69-39575

Laser applications in combustion research, discussing interferometric, schlieren and deflection mapping, holography, velocity measurement, scattering, laser spectroscopy, ignition by laser beams, etc
21 p3741 A69-39589

Analogy between Cerenkov and quasi-Cerenkov radiation in nonlinear crystal by intense laser light used to determine conditions for quasi-Cerenkov radiation
21 p3741 A69-39669

Pulse width increase in mode locked laser caused by phase deviations, noting optical elements with quadratic dispersion of refractive index
21 p3741 A69-39683

Mode locked laser output intensity, studying effect of random phase variations on pulses
21 p3741 A69-39684

Absorption spectra from excited metastable states in tunable dye laser pumped atomic Ca, using fast flashlamp continuum
21 p3775 A69-39740

Peak power ranges of Q switched CO-air-He molecular laser, noting recovery time and CO vibrational temperature
21 p3742 A69-39742

Power density and time history of pulsed molecular nitrogen laser, discussing dependence on fill pressure and electric circuit parameters
21 p3742 A69-39779

Normal frequencies, force constants and moment of inertia of carbon dioxide isotope molecules from spectroscopic data, calculating atmospheric transmission of carbon dioxide laser radiation
21 p3742 A69-39780

Asymmetry method for precision alignment of rectilinear systems, using laser light diffraction behind misaligned target
21 p3742 A69-39781

Structural changes in Mo single crystal under action of laser radiation of various power densities
21 p3750 A69-39842

Laser application to distance measurement in air for determining atmospheric influence, using two wavelengths
22 p3959 A69-39901

Output power of CW lasers employing HCN and water vapor active medium
22 p3959 A69-39958

Laser modulation theoretical analysis based on high speed laser oscillators, discussing high energy physics research applications
22 p3959 A69-39975

GaAs injection laser properties calculation with doping levels for exponential band tails formation, deriving threshold currents, lasing frequencies, I-V characteristics, etc
22 p3959 A69-40012

Quantitative analysis of light intensity dependent changes in optical rotation angle of isotropic media caused by laser beam
22 p3959 A69-40017

Spatial coherence of He-Ne laser beam studied in Young interference experiment, noting multimode light percentage attributed to weak transverse modes
22 p3960 A69-40018

Laser range measurement from earth to lunar retroreflector to study earth tipping and gravitational constant secular decrease
22 p3960 A69-40190

He-Ne laser system for micromachining thin film photolithographic masks, describing computer controlled coordinate table and product quality
22 p3954 A69-40236

Gas laser-Doppler radar system for moving materials velocity and length measurements in industrial processes
22 p3955 A69-40237

Laser interferometric length measurement by fringe counting, considering mechanical and optical systems limitations and design tolerances
22 p3960 A69-40238

Photoelectric methods for pulsed and CW lasers output power and energy measurements
22 p3961 A69-40239

Laser safety factors in open air applications, discussing pulse length, energy spatial distribution, atmospheric attenuation, human eye sensitivity, etc
22 p3892 A69-40241

Calorimeters for laser energy measurement, discussing radiation damage avoidance and modifications for various modes
22 p3961 A69-40243

Device measuring light pressure and pulse energy of laser emission by converting kinetic energy into potential energy of twisted elastic suspension thread
22 p3961 A69-40246

Cavity Q dependence of intensity of single mode He-Ne laser above threshold for quantum and semiclassical theories
22 p3961 A69-40415

Laser beam self focusing in plasma in terms of ponderomotive acceleration due to light intensity gradient
22 p3961 A69-40417

Carbon dioxide laser development, discussing gain, static amplifier and high pressure operations
22 p3962 A69-40474

Absorption and fluorescent spectra, relaxation times and quantum efficiencies measured for glasses doped with trivalent erbium, reviewing spectroscopic parameters involved with laser effect
22 p3962 A69-40476

Density, ion temperature, electron temperature and ion drifts in Ba or Ba doped plasmas determined by resonance fluorescence and optical pumping
22 p3962 A69-40532

Ruby laser resonator mirror mechanical vibrations effects on emission temporal behavior, spectral output and far field pattern, describing conditions for spiking
22 p3962 A69-40562

Spiking behavior detection in Q switched light output from GaAs pulsed junction laser, noting width at high pumping levels
22 p3963 A69-40563

Carbon dioxide and carbon dioxide mixture mirror Q switched laser peak power generation, using pulsed excitation
22 p3963 A69-40564

Electron beam pumped dislocation free GaAs lasers filamentary and nonuniform emission characteristics from X ray topographs before and after bombardment
22 p3963 A69-40565

Q switched pulsed discharge carbon dioxide laser, determining peak power dependence on delay between pulse excitation and Q switching
22 p3963 A69-40566

Laser shadowgraph technique for visual observation of projectiles surface flying at hypersonic velocity along ballistic trajectory
22 p3963 A69-40601

Lasing properties of spontaneous emission hemispherical semiconductor diode with AlAs-GaAs junctions measured by calibrated silicon photocell
22 p3964 A69-40608

Laser produced Sb and Te vaporization near critical point, using time of flight mass spectrometer
22 p3993 A69-40719

Photographic study of epoxy resin breakdown kinetics under pulsed laser beams, showing crack area as function of time
22 p3973 A69-40743

Laser radiation power and electron concentration in He-Ne plasma measured by microwave diagnostics
22 p3964 A69-40794

Population and excitation rates of working levels of carbon dioxide laser calculated on basis of emission

power, amplification coefficient and spontaneous emission intensity

22 p3964 A69-40795

Neodymium activated glass laser efficiency as function of absorption of pumping and emission energy by glass

22 p3964 A69-40797

Mach-Zehnder laser interferometer for measurements of electron density in transient Hg vapor plasma, noting agreement with microwave measurements

22 p3965 A69-40924

Argon laser lower operating level decay probabilities, using spectrum analysis to study role of radiative decay

22 p3965 A69-40965

Holographic technique of coherent light field transformation with desirable phase distribution from laser light beams of arbitrary wavefront characteristics

22 p3950 A69-41115

Electron-positron pair formation in electromagnetic field created by coherent laser light focused into vacuum with ideal lens

22 p3965 A69-41116

Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules

22 p3965 A69-41117

Quantum mechanical multimode correlation functions derivation and applications to laser theory

22 p3965 A69-41152

Reaction zone following overdriven detonation wave propagating into mixtures of fluorine oxide and hydrogen molecules showing HF laser emission

22 p4052 A69-41188

Mirror mount for shock tube laser cavity with alignment capability, noting seal against internal pressures

22 p3951 A69-41233

Pumping model for analyzing stimulated and enhanced potassium multiphoton emission primed by ruby laser-stimulated Raman electronic radiation

23 p4171 A69-41391

Gaseous absorption cell variable attenuator for carbon dioxide laser radiation at specific wavelength, using forced convection to eliminate thermal defocusing effects

23 p4172 A69-41396

Far IR gas laser with linearly polarized radiation output obtained by using echelette reflection grating in place of end mirror

23 p4172 A69-41400

Slow combustion laser spark at intensity below optical breakdown obtained by focusing radiation pulse of Nd glass laser in discharge gap

23 p4172 A69-41492

Hydrogen fluoride chemical laser emission spectrum, studying rotational-vibrational transition of molecules triggered optically or electrically

23 p4172 A69-41493

Nitrogen-carbon dioxide-helium lasers CW operation at various pressures and N flow rates

23 p4173 A69-41496

Closed cycle gas cooling techniques for self contained CW kilowatt carbon dioxide laser, relating output power to flow velocity and input power

23 p4173 A69-41497

Intensity of optical pulses from CW GaAs injection lasers observed with fast sampling techniques

23 p4173 A69-41500

High output laser amplifier consisting of glass and selenium oxychloride/Nd liquid lasers

23 p4173 A69-41565

Output power dependence of repetitively Q switched carbon dioxide laser on repetition time measured with thermopile, noting decrease in mirror system

23 p4173 A69-41566

Photochromic film behavior under high power argon ion laser excitation studied for display and computer memory applications, using excitation model

23 p4173 A69-41629

Pure water vapor and water vapor-air mixture continuum absorption of carbon dioxide laser radiation measured to determine atmospheric attenuation

23 p4173 A69-41631

Sweep tuning gas laser and output power vs frequency characteristics, demonstrating tuning ability within entire Doppler bandwidth

23 p4174 A69-41635

Temporal reference acoustical holography with Sokolov ultrasound camera system using double pulsed ruby or scanning CW laser

23 p4166 A69-42182

Retroreflector and Scotchlite object images obtained in long range holography with Q switched ruby laser, noting atmospheric seeing conditions

23 p4167 A69-42184

Absorption coefficient measurement for hydrocarbon gases for He-Ne laser beam at 3.39 microns, tabulating coefficients, noting variations from spectroscopic data

23 p4174 A69-42192

Ground to satellite laser ranging experiments for daylight satellite range measurements

23 p4174 A69-42193

Neodymium laser radiation effect on electrical and histomorphological properties of liver in rats and hamsters

23 p4111 A69-42344

Laser hazard probability assessment in various applications, discussing power characteristics, attenuation by absorption and scattering and radiant energy spatial distribution

24 p4327 A69-42576

Albino guinea pigs respiration rates and ear skin histology after exposures to coherent ruby laser light

24 p4270 A69-42578

Photosynthesis enhancement in seaweed after alternate exposure to gas laser and tungsten lamp white light passed through IR narrow band filter

24 p4270 A69-42580

N or He additions effects on carbon dioxide laser design and power output

24 p4327 A69-42640

High temperature plasma generation by high power laser beam irradiation on small solidified gas particle, detailing experimental equipment and procedures

24 p4354 A69-42645

Blast wave energy determination of laser-induced gas breakdown in hydrogen, nitrogen, helium, argon and xenon in pressure chamber

24 p4299 A69-42651

Ruby laser crystal energy emission related to crystal rate of motion

24 p4327 A69-42652

Laser granularity effects on brightness discrimination [AAS PAPER 69-464]

24 p4272 A69-42843

Log amplitude mean value for Gaussian or laser-like optical beam propagating horizontally in turbulent atmosphere

24 p4282 A69-42970

Fraunhofer hologram of glass fiber by Be X rays reconstructed using He-Ne laser light

24 p4314 A69-42973

Amplified radiation of laser used for coherent optical pumping in two level low pressure gas laser

24 p4327 A69-43067

Ultrashort laser light pulses self focusing and determination of focal points coordinates

24 p4328 A69-43068

Emission spectrum of nonself locked He-Ne ring laser, deriving phase relations for LF intermode oscillations

24 p4328 A69-43159

Polarization characteristics of He-Ne ring laser emission with circularly anisotropic resonator, analyzing ellipticity as function of half wave cavity plate

24 p4328 A69-43160

Beam divergence and multimode laser visible emission influence on power and angular structure of second optical harmonic generated in KDP crystals

24 p4328 A69-43161

High power ruby laser pulse generation by diffraction modulator, employing modulated ultrasonic traveling waves at minimum resonator transmission losses

24 p4328 A69-43163

Transitions competition in He-Ne laser pulse operating in single mode with nonuniform gain saturation

24 p4328 A69-43165

Teflon dielectric properties evaluated during fast laser beam heating, noting presence of C by microwave measurement

24 p4336 A69-43266

Oscillographic recording of GaAs laser ultrashort radiation pulses, using isolated injection regions and semiconductor photodiode as photoelectric converter

24 p4329 A69-43740

Diffraction coupling of power from carbon dioxide laser, computing angular distribution of output light

24 p4329 A69-43753

Thermal turbulence effects on phase fluctuations of laser beams, studying temporal decay of mean square refractive index fluctuation with fringe pattern displacements

24 p4329 A69-43754

Dielectric and semiconductor films vacuum deposition by CW carbon dioxide laser, discussing optical properties

24 p4329 A69-43755

Scanning Fabry-Perot interferometer interaction with laser source, calculating laser intensity and oscillation frequency changes for weak mode coupling

24 p4329 A69-43756

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser reflectivity, taking into account optical losses

24 p4330 A69-43766

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser resonator length, taking into account optical losses

24 p4330 A69-43767

GaAs junction laser total stimulated light power dependence on resonator length taking into account optical losses

24 p4330 A69-43768

NT SOLID STATE LASERS

Laser gyro applications including guidance, navigation and control problems

02 p0248 A69-11741

Laser applications in metal working including dissimilar metal welding, hole drilling, material removal and dynamic balancing

[ASTME PAPER MR68-406]

02 p0252 A69-11796

Laser application to machine tool accuracy and alignment

[ASTME PAPER MR68-407]

02 p0252 A69-11797

Glass pleats and cold cathodes in laser discharging tube, discussing angular displacements

03 p0435 A69-12981

Pumping beam width influence on optical range resonator excited coupled oscillations, deriving approximate equations

03 p0437 A69-13043

Parametric light generation employing KDP nonlinear crystals with mechanically tuned frequency

03 p0437 A69-13045

Cathode sputtering and thermal evaporation in vacuum used for preparing thin dielectric coatings on mirrors of optical resonators containing nonlinear crystals

03 p0438 A69-13049

Laser display technology, discussing experimental systems, light sources, modulation and scanning

03 p0431 A69-13850

Neodymium glass properties degradation during laser operation due to short wave pumping radiation and stimulated emission

03 p0442 A69-14219

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror

04 p0612 A69-15372

Papers on gas, glass and injection lasers, nonlinear optics and frequency stabilization of gas lasers

05 p0772 A69-16225

Laser displays for information transfer to provide improved computer driven read-out techniques, noting real image and holographic displays

06 p0928 A69-17924

Collection of papers on lasers noting solid state, gas and semiconductor types, basic principles and applications

06 p0936 A69-18002

Lasers, reviewing phenomenology, physical and theoretical fundamentals, quantized energy levels, population of energy levels and laser components

06 p0936 A69-18003

Atomic physics of lasers and active materials, noting multiplet spectra of atoms, molecular spectroscopy, energy level population distribution and amplification

06 p0937 A69-18004

Laser resonators, noting relation of light path between mirrors to half wavelength and line equivalence of lenses and resonators
06 p0937 A69-18005

Laser amplifiers and oscillators, discussing conversion of active atom excitation energy into light energy
06 p0937 A69-18006

External and internal modulation methods in lasers noting phase, amplitude and frequency modulation, birefringence, electrooptics and Stark and Zeeman effects
06 p0937 A69-18010

Fluctuation phenomena in electromagnetic field in optical spectral region and coherence characteristics of optical fields, analyzing quantum noise
06 p0937 A69-18011

Microwave and optical generation and amplification - Conference, Hamburg, September 1968
07 p1090 A69-18420

Difference frequency generation by multiple quantum transition from laser medium considered as resonant optical frequency mixing device
07 p1144 A69-18470

Traveling wave microwave and optical resonators synthesis, determining design conditions for resonant frequencies
07 p1145 A69-18477

Desired laser characteristics for space communications compared to existing lasers
07 p1146 A69-18483

Automatic laser tracker system for close-up photographic coverage of rocket test [SMPT PREPRINT 101-91]
07 p1116 A69-18949

Optical resonator as Q meter, discussing error capability and construction
08 p1312 A69-20106

Ion laser construction, detailing water cooled quartz tubes, electrodes, adjustable mirrors, etc
09 p1515 A69-21487

Lasers, reviewing output properties, control and modulation characteristics, and applications to communications, plasma generation, measurement, high temperature metallurgy, etc
09 p1517 A69-22118

Nonlinear optics, discussing materials, polarization, harmonic generation, light mixing, parametric amplification and oscillation, stimulated scattering, absorption, reflection, refractivity and self focusing
09 p1518 A69-22124

Fabry-Perot resonator and beam waveguide systems for laser beams, noting mode coupling and separation in laser optical systems
09 p1518 A69-22125

Light wave reconstruction including polarization, using single reference beam with depolarizing diffuser as source
10 p1690 A69-22951

Laser theory and operations including types and applications
10 p1702 A69-23384

Laser applications to high temperature, gas dynamical and plasma phenomena
10 p1741 A69-23809

Resonator field inhomogeneities effect on transient processes in quantum oscillator, considering two active crystals in cavity
10 p1705 A69-23948

Lasers and opto-electronics - Conference, University of Southampton, England, March 1969
11 p1897 A69-25034

Active scanning Fabry-Perot interferometer interaction with mode matched laser resonator, analyzing phase and intensity of reflected wave of active three mirror resonator
11 p1886 A69-25047

Dielectric loss tangents measurements combining coherent optical resonator with microwave techniques, noting application at mm wavelengths
12 p2080 A69-26057

Lasers application to measurement techniques including alignment, direction, distance, elongation, interferometric, holographic, etc
12 p2094 A69-26903

Soviet collection of papers on nonlinear optics, discussing lasers, electromagnetic interactions, Q switching, dynamics, etc
12 p2109 A69-26905

Laser active media polarization in strong electromagnetic fields, solving boundary value problems
12 p2110 A69-26907

Inhomogeneous permittivity and boundary effects influence on electric fields of laser with open cavity containing inhomogeneous active medium
12 p2110 A69-26908

Two photon and resonance parametric lasers nonlinear polarization theory, deriving equations for electromagnetic field oscillations
12 p2110 A69-26910

Zeeman laser with one end mirror exhibiting x-y-type loss anisotropy, considering resonance condition for round trip pass and self consistent field equations
13 p2271 A69-27398

Laser based on carbon dioxide molecules formed chemically in electrical discharge studied for designing special carbon electrode laser
13 p2274 A69-28585

Acoustic hologram recorded by laser flying spot scanner
13 p2265 A69-28662

Quasi-distribution function differential equation for laser field with nonMarkoffian character derived from density matrix master equation
14 p2486 A69-29633

Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation
14 p2461 A69-29779

Helium plasma electron temperature and concentration measured in arc in magnetic field by laser light scattering at electrons
14 p2496 A69-29780

Negative dispersion of light in neodymium activated calcium tungstate single crystal using neodymium glass laser source, analyzing interference bands in spectral diagrams
15 p2632 A69-30051

Energy exchange between active centers in silicate and phosphate glass, comparing luminescent and lasing properties
15 p2632 A69-30053

Wave reflection in laser resonators with ferrite end faces, determining oscillation spectra and wave amplitudes
15 p2579 A69-30954

NASA laser systems for satellite tracking, determining ranging accuracy by comparing laser and computed reference orbital data
15 p2571 A69-31312

Lasers for satellite range measurements, discussing power output, mount, accuracy and data
15 p2571 A69-31337

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror
16 p2797 A69-32119

Quantum electronics, Volume 2, Maser amplifiers and oscillators
17 p2982 A69-33687

Simultaneous integral equations numerical solution for open optical resonator mode analysis, using kernel function and Fresnel approximation
17 p2983 A69-33883

Polarization, frequency and energy characteristics of lasers with resonators containing polarization transforming elements
17 p2983 A69-33967

Laser technology applications stressing engineering, control, communications, medicine, space sciences, holography, computers, etc
17 p2984 A69-34163

Book on laser operation and applications, discussing radiation characteristics, monochromatic properties, coherence, directionality, polarization, power, excited state kinetics, optical transitions, etc
18 p3151 A69-34357

Wave equation of electromagnetic field of optical resonator with arbitrary mirrors, utilizing Schroedinger equation and equivalent mechanical system
19 p3333 A69-35880

Apollo 11 moon reflector-laser beam experiment, discussing range changes produced by axial rotation and orbital motion and use for earth-moon dynamics
19 p3339 A69-36766

Nonlinear optics, properties, light waves interaction, forced scattering and application in laser technology
20 p3555 A69-38014

Vortex flow air cooling system for lasers using vortex effect of gas separation, resulting in minimum weight and dimensions and high cooling efficiency
21 p3734 A69-38399

Ring laser bias in angular rotation measurement using optical phase shifters
21 p3735 A69-38651

Laser research from theoretical stage to present, discussing applications
21 p3736 A69-38781

Lasers as tools for integrated circuits fabrication, noting roles of various laser operating parameters
21 p3742 A69-39705

Lasers and mechanical engineering - Conference, London, November 1968
22 p3960 A69-40234

Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
23 p4120 A69-41758

Portable He-Ne laser design featuring positional adjustment for use in aligning optical systems
24 p4327 A69-42924

RF and microwave signal variable delay and processing using laser-acoustic interactions, photodetector and electrical-to-acoustical transducer
24 p4283 A69-43027

Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength
24 p4384 A69-43197

Laser beam circuitry miniaturization facilitating laser circuit assembly isolation from thermal, mechanical and ambient changes
24 p4328 A69-43327

LASV U F-111 AIRCRAFT

LATCHES

Microminiature latching relay design and manufacturing cost
13 p2232 A69-28049

LATENCY U REACTION TIME

LATERAL CONTROL

Missile control during propulsion period, emphasizing vane deflection required for lateral wind compensation
01 p0163 A69-11297

Semipassive attitude control system providing one degree pointing accuracies in all axes
07 p1226 A69-18326

Thrust, bank angle and angle of attack of aircraft minimum fuel lateral turns at constant altitude and specified velocities
13 p2203 A69-28245

Lifting rotor dynamics and undesirable characteristics reduction, discussing feedback control systems for pitch and roll [AHS PAPER 340A]
17 p2899 A69-33509

VSTOL aircraft aerodynamic roll motion control requirements at low speeds
20 p3574 A69-37514

LATERAL OSCILLATION

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect [AIAA PAPER 69-58]
06 p1019 A69-18204

Stability analysis of missile lateral supersonic flutter based on Lagrange equations, considering conservative thrust, control deviation and aerodynamic forces
17 p3045 A69-32946

Vibrating circular plate standing wave lateral displacements visualization by photographically recorded moire patterns
20 p3537 A69-37067

LATERAL STABILITY

Equations of motion of point restricted tethered parafoil for investigating longitudinal and lateral dynamic stability
01 p0009 A69-10415

Supersonic interference on lateral stability of planar configurations analyzed using wind tunnel data [AIAA PAPER 68-21]
02 p0189 A69-12377

Root locus method applied to longitudinal and lateral stability of aircraft with flexible fuselage and wing
04 p0677 A69-14835

Lateral stability of glider towed by cable in steady rectilinear horizontal flight, deriving motion equations as ordinary differential equations
09 p1433 A69-21498

Attitude control system effect on roll resonance in rocket boosted projectile
09 p1610 A69-22001

Satellite three axis attitude control analysis showing rolling and longitudinal stabilization possibility by flywheel, with validity tested by analog simulation
17 p3048 A69-33240

Stress-strain state in thin isotropic plate with circular hole under lateral bending and torsional moments
21 p3835 A69-38725

LATERALITY U LATERAL STABILITY

LATERALIZATION U LATERAL CONTROL

LATITUDE NT GEOMAGNETIC LATITUDE

Time and latitude variations of blanketing sporadic E of different intensities

01 p0070 A69-11159

Latitude dependence of earth spectral radiation intensities, discussing satellite observations in equatorial and subtropical regions

03 p0422 A69-13507

Sunrise modal interference patterns for VLF propagation, analyzing variations with latitude

03 p0396 A69-13628

Mean tropospheric wind vectors periods compared to annual variations of earth rotation and pole latitude

08 p1309 A69-20854

Solar activity influence on cosmic ray intensity 11 year variation, taking into account heliostitudinal movement of sunspot regions in solar cycle as evidence of density gradient

10 p1754 A69-22802

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations

11 p1956 A69-24401

Seasonal and latitudinal models of atmospheric wind and temperature structure between 30 and 120 km altitude

15 p2600 A69-31367

Latitude variations of day and night ionospheric critical frequencies, inhomogeneity and ionization, discussing generation of r type sporadic E layer in auroral zone

17 p2964 A69-33963

Latitudinal variations in conditions for F 1 layer occurrence probability and stability during solar activity minimum period

20 p3527 A69-37669

Satellite observations of auroral particle precipitations indicating latitude dependence of auroral electrons averaged pitch angle and energy spectral distributions

22 p3938 A69-40502

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations

24 p4391 A69-43791

LATITUDE MEASUREMENT

Royal Belgian Observatory studies on time, meridian, seismological and gravimetric services, latitude variation due to polar motion, terrestrial tides and geodetic satellites

08 p1306 A69-19992

Latitude measurements for features on Saturn, discussing means and standard deviations

08 p1394 A69-20618

Nonpolar latitude variations due to observation errors, discussing instrumental, computational and meteorological influence, particularly refraction resulting from climatic conditions

11 p1952 A69-24257

Nutation period of 18.6 years using data from International Latitude Service

17 p3027 A69-32868

Earth polar coordinates determined from latitude observations, discussing weighting functions for determining polar motion

17 p2959 A69-32869

Nighttime latitude variations in Danjon astrolabe observations at Poltava, noting decrease from early evening to midnight

17 p2959 A69-32870

Differences in latitude readings obtained with two zenith telescopes, showing Pearson distribution of type VII and influence of observation conditions

17 p2959 A69-32879

LATTICE IMPERFECTIONS

U CRYSTAL DEFECTS

LATTICE PARAMETERS

Lattice deformation relationship to dislocation density in vanadium carbide powders

02 p0265 A69-12001

Temperature dependence of A and C periods of Y crystal lattice at 77 to 300 K, discussing preparation of Y films and anomalous thermal expansion

02 p0298 A69-12047

Lattice parameters of austenitic Fe-Ni-Ti alloys as function of titanium content, using Debye-Scherrer camera

03 p0443 A69-13123

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices

03 p0491 A69-14053

Young modulus of sintered nonporous titanium, zirconium and chromium nitrides, computing charac-

teristic temperature and root mean square atomic displacements in lattices

06 p0938 A69-16830

Lattice strains in matrix phase of aluminum-boron and copper-tungsten composites measured by X ray diffraction

06 p0939 A69-16944

Oxygen diffusion parameters in beta-titanium measured by successive layer removal, noting lattice constant dependence on temperature

07 p1163 A69-18783

Lattice location of dopant elements implanted into Ge determined by carbon ion backscattering, noting substitutional concentrations above thermal equilibrium solubilities

07 p1199 A69-18903

Relative heats of formation and reduced melting temperatures of lanthanide compounds correlated to lanthanide contraction

07 p1168 A69-19597

InAs-InP solid solutions diffusion rate and lattice constant for various compositions

12 p2144 A69-26587

Characteristic temperature, Young modulus and rms atomic displacement in metal borides of various porosities, using dynamic method based on ultrasonic oscillations measurement

12 p2115 A69-26615

Mu phase lattice constants and cell volume in Nb-Zn system

15 p2636 A69-30086

Nb and Ti carbides investigated for lattice parameters, microhardness and resistivity in homogeneity domain

15 p2638 A69-30282

GaAs zinc gallium selenide solid solutions properties, analyzing lattice constant, microhardness, forbidden zone and concentration relationships

15 p2670 A69-31050

Phase equilibria in ternary systems Nb-Fe-B and Nb-Co-B, determining structural types and lattice constants by using X ray and microstructural analysis

15 p2641 A69-31246

Titanium alloy martensites crystallography by electron microscope, discussing lattice parameters and spontaneous transformation

18 p3154 A69-34245

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices

18 p3182 A69-35046

Critical transition temperature of vanadium oxide semiconductors as function of doping element content and lattice constant, using X ray diffraction

23 p4198 A69-41564

Spin-phonon systems thermal noise, based on combined lattice and spin lattice Hamiltonian densities, applied to acoustic noise field measurements

24 p4350 A69-43061

LATTICE VIBRATIONS

Carbon dioxide laser for observing nonlinear effects related to electron interaction with lattice vibration within semiconductors

03 p0437 A69-13041

InSb semiconductors electron scattering analysis at ionized impurities and optical and acoustical lattice vibrations with various polarizations

03 p0492 A69-14170

Displacement correlations and frequency spectra for mass disordered lattices, deriving cluster expansion for phonon Green function

03 p0493 A69-14241

Hydrodynamic and lattice vibrations equations for coupled waves in ion semiconductors in external electric and magnetic fields, observing sound amplification

06 p0978 A69-16897

Finite amplitude longitudinal wave propagation in lattices analyzed by study of compressive wave in chain of mass points with nearest neighbor interaction

06 p1022 A69-17367

Consistency of high temperature equation of state of solids, considering Gruneisen parameter and lattice dynamics

08 p1419 A69-19814

Time average holography for analysis of vibrations, overcoming fringe peak decrease with large amplitude and loss of phase information

09 p1495 A69-21749

Anharmonic lattice vibrations, specific heats and coefficient of linear expansion of solids at high temperatures, noting interatomic spacing

10 p1809 A69-23653

Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra

10 p1747 A69-23963

Raman effect in potassium dichromate single crystal, discussing symmetrical and antisymmetrical internal vibrations of free ions

12 p2105 A69-26285

Solid state physics applications to fracture problems and structure of solids, considering crystallography, lattice vibrations, defects, electron bands, alloys and surface physics

13 p2316 A69-27221

Bound excitons spectra in Cu doped gallium arsenide crystals, analyzing line oscillation structure and uniaxial compression effect

16 p2824 A69-31571

Lattice vibration theory of solid state diffusion for Cu including anharmonic effects formulated using equilibrium statistical mechanics, considering interacting phonon events

17 p3015 A69-32822

Raman spectrum of solid alpha-nitrogen at low temperatures, calculating scattering intensities and Raman active librational lattice vibrations

23 p4194 A69-42204

IR lattice spectra of rare earth Al, Ga and Fe garnets, discussing oxygen anion, translational rare earth cation and crystal lattice external motions

24 p4360 A69-42974

LATTICES

Foldable tubular connection application to expandable lattice structure, analyzing cross sectional distortions

06 p1024 A69-17608

LATTICES [MATHEMATICS]

NT BOOLEAN ALGEBRA

NT BOOLEAN FUNCTIONS

Serial BCD binary coder design, using Karnaugh diagrams to minimize synchronous and asynchronous counter stages

09 p1467 A69-22579

LAUNCH COMPLEXES

U LAUNCHING BASES

LAUNCH DATES

Europe 1 carrier rocket prelaunch wind load calculations as base for launch or delay decision

01 p0160 A69-10032

Launch opportunity and window constraints, considering injection energy and precision, reference body occultation, communications range, etc

20 p3617 A69-37287

LAUNCH VEHICLE CONFIGURATIONS

Turquoise satellite booster, using stages of SSBS and MSBS ballistic missiles

02 p0334 A69-12232

Cryogenic core concept for flexible and economical delivery system [AIAA PAPER 68-812]

21 p3827 A69-39753

LAUNCH VEHICLES

NT ATLAS CENTAUR LAUNCH VEHICLE
NT ATLAS SLV-3 LAUNCH VEHICLE
NT CENTAUR LAUNCH VEHICLE
NT DIAMANT LAUNCH VEHICLE
NT ELDO LAUNCH VEHICLE
NT EUROPA LAUNCH VEHICLES
NT EUROPA 1 LAUNCH VEHICLE
NT EUROPA 2 LAUNCH VEHICLE
NT EUROPA 3 LAUNCH VEHICLE
NT RECOVERABLE LAUNCH VEHICLES
NT SATURN LAUNCH VEHICLES
NT SATURN 5 LAUNCH VEHICLES
NT SCOUT LAUNCH VEHICLE
NT TITAN LAUNCH VEHICLES
NT TITAN 3 LAUNCH VEHICLE

Data analysis methods for integrated data processing system for onboard in-flight checkout for launch vehicle evaluation [AIAA PAPER 67-911]

01 p0037 A69-11024

Soviet rocketry origin, technology, launch vehicles, boosters and orbital assembly concept

01 p0162 A69-11066

Systematic approach to standard launch vehicle based on governmental expenditure minimization while attaining mission goals

01 p0162 A69-11096

Low profile bulkheads for launch vehicles and spacecraft compartments to obtain structural weight reduction [AIAA PAPER 68-355]

02 p0334 A69-12370

Liquid propellant space launch vehicles longitudinal modes natural frequency, discussing coupled engine-propellant supply system stability [AIAA PAPER 68-289]

02 p0335 A69-12393

LAUNCH WINDOWS

Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations

02 p0326 A69-12680

Angular motion during first stage cut-off of Europa 1 launch vehicle from flight tests compared with theoretical predictions

03 p0519 A69-12856

HM 4 rocket motor for second stage of Diogene booster, using LOX and hydrogen propellants

04 p0647 A69-15064

Spacecraft launching facilities and payload capabilities in next decade, discussing orbits, spacecraft size and volume, attitude stabilization and positional accuracy

06 p1012 A69-16857

Dynamics of carrier rockets and space vehicles having complex three dimensional thin walled constructions with cavities containing liquids

[UN PAPER 68-95622] 06 p1013 A69-17051

Optimum attitude program for multistage satellite launch vehicle with impact restrictions

07 p1229 A69-18492

Space boosters, performance of launch vehicles and requirements for future U.S. space launch capability from USAF vantage point

08 p1410 A69-20882

Future launch vehicle programs for automated space missions, discussing higher launch velocities and economics

[AIAA PAPER 68-447] 09 p1610 A69-21983

Computer design for booster/satellite control, discussing systems reliability, low power and tradeoffs

11 p1843 A69-25320

Materials rating method in pressure vessel applications, considering impact on design of minimum cost space launch vehicle

12 p2175 A69-26844

Soviet space program, discussing launch sites, series of launch vehicles and mission identification

13 p2381 A69-27303

Boosters and space vehicles including earth satellites, lunar probes and interplanetary spacecraft

13 p2356 A69-27914

Market analysis program to evaluate relationship between launch vehicle jettison weight and total cost based on all projected missions

[SAWE PAPER 776] 18 p3208 A69-34872

Rocket launch system cost role in space operations, discussing low cost expendable drop tank and Triamese reusable launch vehicle/spacecraft concepts

18 p3210 A69-35087

Parameter optimization of launch vehicle attitude control system of fixed structure for various computation techniques

18 p3210 A69-35092

Earth orbital space program mission effectiveness increased through utilization of standby launch vehicles, spacecraft and space station systems

19 p3430 A69-36010

Reliability study of launch support equipment, presenting failure data for mechanical and electromechanical components

19 p3295 A69-36023

Attitude control system for launch vehicles, providing commanded thrust vector angle proportional to desired angular displacement of acceleration vector

21 p3819 A69-39032

Launch vehicle cost reduction by minimizing software, fabricating in commercial shops and avoiding sophistication, parts and acts of man

21 p3857 A69-39688

Cost reduction steps in reusable launch vehicle design, discussing aircraft design and development experience application

21 p3826 A69-39689

Launch systems evolution, cost reduction breakthrough approach and application to future space transportation

21 p3857 A69-39692

Vehicle designs and cost analyses for launch vehicle selection to minimize costs of 40,000-150,000 pound payload placement into orbit

21 p3827 A69-39694

Support software costs reduction for launch vehicle systems by implementing computer techniques to provide requisite data

[AIAA PAPER 69-978] 22 p4052 A69-40358

Adaptive cost equations in computer programs supporting launch vehicle long range planning, based on launch vehicle anticipated usage

[AAS PAPER 69-164] 24 p4392 A69-42815

Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration

[AAS PAPER 69-359] 24 p4418 A69-42828

Cost analysis in low cost launch vehicle studies emphasizing sustaining engineering and plant economics

24 p4393 A69-43120

Attitude control system with rate of change limiter to minimize launch vehicle drift during first stage ascent through atmosphere

24 p4394 A69-43277

Launch vehicle control system synthesis based on mode control theory state variable formulations

24 p4394 A69-43278

LAUNCH WINDOWS

Mission capability differences between direct and orbital Mars missions as to launch period selection, targeting capability and error analysis

02 p0331 A69-12821

Release windows for auxiliary body ejection from satellite in eccentric orbit, discussing visibility, celestial body interference, etc

03 p0505 A69-13003

Solar radiation protection of radiometers and spectrometers on reentry vehicle by launching times and solar view field selection

04 p0666 A69-15511

Multiple impulse orbital departure window for manned interplanetary spacecraft, discussing launch delay, space assembly, refueling and checkout, etc

[AIAA PAPER 69-126] 06 p1010 A69-18065

Mission windows for single and multiple planet swingbys past Jupiter to outer planets

[AAS PAPER 68-115] 19 p3402 A69-35936

Launch opportunity and window constraints, considering injection energy and precision, reference body occultation, communications range, etc

20 p3617 A69-37287

Optimum midcourse impulses effects on heliocentric launch window, comparing two and three impulse delta 5 performance for two and three dimensional solar system models

[AAS PAPER 68-095] 21 p3804 A69-39201

Triple planet ballistic flybys, discussing mission opportunities and launch windows

[AAS PAPER 68-114] 21 p3805 A69-39206

Mission analysis for 1972 Venus launch opportunity, discussing launch period selection and trajectory constraints for Atlas/Centaur vehicle

[AAS PAPER 68-135] 21 p3805 A69-39208

Synchronous communications satellite launch constraints for fixed time or node, noting application to IDCSP/A mission and sun angle, occultation and transfer orbit

[AIAA PAPER 68-445] 22 p4036 A69-40543

LAUNCHERS

NT AIRCRAFT LAUNCHING DEVICES

NT CATAPULTS

NT GUN LAUNCHERS

NT HYPERVELOCITY LAUNCHERS

NT MOBILE MISSILE LAUNCHERS

NT ROCKET LAUNCHERS

High enthalpy, Mach and Reynolds number flight studies on ballistic ranges, describing launchers, flight simulation, measuring and recording techniques

06 p0860 A69-17632

Cape Kennedy Space Center mobile launchers and auxiliary equipment for Saturn vehicles, discussing functions, design and systems

24 p4297 A69-43036

LAUNCHING

NT AIR LAUNCHING

NT LUNAR LAUNCH

NT ORBITAL LAUNCHING

NT ROCKET LAUNCHING

NT SPACECRAFT LAUNCHING

International liability for damage caused by launching of objects into outer space

[UN PAPER 68-95337] 01 p0180 A69-10525

LAUNCHING BASES

NT CAPE KENNEDY LAUNCH COMPLEX

French space center in Guiana, discussing geographic location advantages for payload, rocket launching, space rendezvous, etc

02 p0228 A69-11920

General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements

[AIAA PAPER 69-308] 09 p1479 A69-22385

Centro Ricerche Aerospaziali objectives, equipment and activities in aerospace research, including space

flight simulation facilities and scientific satellite launching range

15 p2724 A69-31456

Stratospheric balloons launching and nacelles for measurement of cosmic rays, atmosphere high altitude characteristics, discussing French launching center

16 p2734 A69-31759

General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements

[AIAA PAPER 69-308] 22 p3927 A69-40552

LAUNCHING DEVICES

U LAUNCHERS

LAUNCHING SITES

Temporary launching sites for rocket probes, discussing CNES activity, Dragon and Titus programs and mobile launching units

02 p0228 A69-11921

Spacecraft launching facilities and payload capabilities in next decade, discussing orbits, spacecraft size and volume, attitude stabilization and positional accuracy

06 p1012 A69-16857

Belier rocket launching facilities in Guiana, describing pads, tracking system, telecommunications network, etc

09 p1477 A69-22161

Soviet space program, discussing launch sites, series of launch vehicles and mission identification

13 p2381 A69-27303

Microbiology quality assurance program for planetary mission, considering spacecraft sterilization during fabrication, test and launch site activities

15 p2559 A69-31124

Failure data role in management of launch operations reliability program

19 p3294 A69-36022

LAVA

Volcanic gas from lava lake, noting carbon and sulfur gases depletion during cooling and solidification

02 p0236 A69-11466

Magnetic analysis by successive double heat treatment of miocene lava cooled during geomagnetic polarity reversal for determining field intensity

16 p2788 A69-32646

LAW

Aircraft noise alleviation through flight procedures improvement, home building modification and noise standards legislation

14 p2392 A69-29154

LAW [JURISPRUDENCE]

NT INTERNATIONAL LAW

NT LEGAL LIABILITY

NT PENALTIES

NT SPACE LAW

Industrial loyalty and trade secrets, discussing preservation of forms of intellectual property posed by mobile employee and management policies

01 p0180 A69-10991

Legal problems in hovercraft classification, discussing problems in adapting existing transport legislation to hovercraft operation

04 p0689 A69-14942

Federal government contracting, discussing legality of NASA service contracts

05 p0850 A69-15987

Air safety, emphasizing misunderstandings or unresolved problems in accident prevention connected with law/safety interface

06 p1040 A69-16837

Book on law of airspace covering property rights, legal aspects of airspace utilization, airspace transactions, courts role, damage suits, etc

07 p1244 A69-18709

Federal, state and municipal jurisdictional aspects for heliport establishment, detailing regulations

13 p2381 A69-27433

FAA jurisdictional procedures for law infringement, discussing civil codes, delegation of enforcement authority and routine violations including low flying, weather, etc

16 p2882 A69-32335

Telemetric control of urban transportation systems and law enforcement, considering automobiles as prime vehicle

19 p3272 A69-36256

Air cushion vehicle legal status and cargo and passenger liability

19 p3455 A69-36330

Custody, jurisdictional conflict and prosecution problems of in-flight crimes, discussing federal jurisdiction and Tokyo Convention ratification

22 p4053 A69-40708

LAWS

- U CLOSURE LAW
- U CONSERVATION LAWS
- U HOOKES LAW
- U KEPLER LAWS
- U KIRCHHOFF LAW OF RADIATION
- U NEWTON PRESSURE LAW
- U RADIATION LAWS
- U SCALING LAWS
- U SIMILITUDE LAW

LC CIRCUITS

Broadband LC filters having prescribed amplitude response and constant group delay, emphasizing IF filters for radio relays

05 p0732 A69-16343

Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters

09 p1471 A69-21327

Narrow band LC 70 MHz IF filter design method

12 p2036 A69-25915

Autooscillatory process in n-circuit tunnel diode LC oscillators acted upon by external sinusoidal voltages

16 p2764 A69-32256

Networks of ideal inductors, capacitors and periodically operated switches with no energy loss, deriving frequency-power formulas from response functions

18 p3111 A69-34682

LCRE REACTOR

- U LITHIUM COOLED REACTOR EXPERIMENT

LEAD [METAL]

Lead isotope composition and concentrations of U, Th, Ra, total Pb and Pb 210 in recent volcanic rocks, noting disequilibrium due to chemical fractionations

04 p0593 A69-15011

Orientation of diamagnetic ground state Pb 207 atoms with nonzero orbital angular momentum by means of optical pumping and determination of nuclear moment

07 p1156 A69-19399

Lead isotopes nucleosynthesis by three mechanisms and contribution of mechanisms to abundances; noting chronology in nucleosynthesis

08 p1357 A69-20897

Tensile tests on time dependent Pb and cellulose nitrate, including stress-strain curve prediction from creep test data

19 p3445 A69-36829

LEAD ACETATES

Equatorial mounted solar energy concentrator efficiency compared to unconcentrated sunlight and artificial UV-visible light source in reducing Pb tetraacetate solution in acetic acid

16 p2736 A69-31814

LEAD ALLOYS

Superconducting flux-flow resistivity minimum in Pb-Tl alloy, discussing thermal dissipation associated with temperature gradients across moving fluxoid

07 p1198 A69-18642

Creep long term deformation characteristics of plate and tube lead alloy model material predicted from short term room temperature creep deformation

21 p3844 A69-39320

LEAD COMPOUNDS

Plateau effect in burning of platonized propellants due to lead compound additives

03 p0494 A69-12881

Soviet book on methods of investigating semiconductors as applied to lead chalcogenides PbTe, PbSe and PbS covering physical and physicochemical properties

12 p2145 A69-26851

LEAD ISOTOPES

Pb isotopic analysis using double spike mass spectrometric method to achieve reproducibility and accuracy, discussing principles and performance

24 p4280 A69-42733

LEAD OXIDES

Multilayer lead oxide and cryolite dielectric coatings stability to ruby laser radiation, noting breakdown coherent radiation power densities

19 p3334 A69-35886

LEAD SELENIDES

Temperature effects on threshold current density, emission wavelength and polarization of PbSe diode lasers

19 p3337 A69-36533

LEAD SULFIDES

Lead sulfide single crystals and polycrystalline films growth studied by electron microscopy during vacuum deposition on NaCl and other substrates

10 p1743 A69-23002

Nonequilibrium conductivity and radiation of CdS, GaAs and PbS single crystals in waveguide cell under electron beam

13 p2318 A69-27886

LEAD TELLURIDES

Chemical compatibility estimation of lead and tin tellurides thermoelectric materials with metallic alloys

04 p0551 A69-15315

PbTe single crystal films growth on KCl studied by electron microscope, observing vapor crystal mechanism without coalescence of contacting crystals

10 p1745 A69-23323

Sb addition effect on electrical conductivity and Hall effect in PbTe single crystals over temperature range

11 p1939 A69-23706

Substructural patterns of epitaxial PbTe films obtained by condensation of vaporized PbTe on NaCl crystal surfaces, discussing formation kinetics and morphology

12 p2144 A69-26675

Thin PbTe semiconductor films electrical properties measured in air and vacuum, showing dependence on thickness and conditions of preparation

21 p3782 A69-39242

Thermoelectric generators using hot junction pressure contacted lead telluride technique, presenting model for long term performance characteristics

23 p4188 A69-42262

LEAD TITANATES

Phase diagram, dielectric and magnetic properties of Bi manganate/Pb titanate solid solutions of perovskite structure, showing dependence on composition and temperature

22 p3996 A69-41163

LEADERSHIP

Group leadership attempting behavior dependence on situational and perceptual variables

23 p4110 A69-42015

LEADING EDGE SLATS

Leading edge flap angle and planform effects on low speed vortex patterns of flat plate double delta wings, measuring aerodynamic forces

17 p2890 A69-33246

LEADING EDGE SWEEP

Critical flutter behavior of variable geometry aircraft with wing of 70 degree leading edge sweep, noting wing-tail interference

11 p1991 A69-25517

LEADING EDGES

NT SHARP LEADING EDGES

Unsteady incompressible boundary layer flow over leading edge boundary layer calculated by three dimensional time dependent equations

02 p0233 A69-12543

Laminar flow of viscous fluid along wall with fixed leading edge and moving surface, discussing conditions of boundary layer formation and dynamic similarity

03 p0417 A69-13792

Test of similarity theory of leading edge vortices above slender wings in subsonic conical flow

04 p0543 A69-14820

Model kinetic integral equation for describing flow in transition region at leading edge of tapered body in rarefied gas

05 p0697 A69-16040

Delta wing head wave at zero angle of attack in steady supersonic flow during transition from subsonic to supersonic leading edges

[DVL-871] 06 p0858 A69-17242

Discontinuity effect on Ekman layer development at leading edge of flat plate

07 p1120 A69-19044

Shockload on axial intake fan leading edge of radial flow compressor, calculating flow field

08 p1251 A69-20604

Transonic flow around airfoils with constant curvature in uniform asymptotic stream, studying leading edges in exact form

09 p1429 A69-21606

Leading edge conditions of obstacle exuding fuel into oxidizer stream, using Oseen equations in parabolic coordinate system

11 p1997 A69-24307

Delta wing in three dimensional supersonic flow analyzed by method of characteristics, discussing leading edge problems

11 p1820 A69-25425

Analytical model for free convection heat transfer from vertical plates with nonhorizontal leading edges, discussing flow field

13 p2379 A69-28342

Conical flow past cruciform wing-body and tail-body systems, considering various positions of leading edges with respect to Mach cone

15 p2548 A69-31002

Optimum surface for thick delta wing in hypersonic flow obtained by variational method, assuming closed leading and trailing edges

16 p2731 A69-31559

Supersonic leading edge problem using nonlinear Boltzmann equation with ellipsoidal model, calculating molecular distribution functions for flow field

[AIAA PAPER 69-652] 17 p2892 A69-33464

Leading edge vortices and shock detachment flow over delta wings, discussing drag reduction due to lift

17 p2896 A69-34025

Boundary layer equation for steady incompressible flow past flat plate with parabolic leading edge, obtaining series solution in inverse powers of Reynolds number

18 p3124 A69-35270

Supersonic flow past antisymmetrical thin delta wing by flow separation from subsonic leading edges, noting wing surface pressures

19 p3241 A69-36779

Thin jet flapped airfoil analysis with wake fully developed from leading edge and jet flow reflected from ground

22 p3861 A69-41184

Newton formula and Ritz method to determine wing shape with blunt leading edge, considering minimum drag achievement at hypersonic velocities

24 p4247 A69-43497

LEAKAGE

Leak flow rates of nitrogen and helium at various pressure gradients measured by gas chromatography and mass spectroscopy

01 p0079 A69-10297

Liquid hydrogen circulation pump design emphasizing liquid leaks

01 p0087 A69-11148

Mass spectrometer helium leak testing of cryogenic storage vessels, noting procedures and insulation and evacuation of jacket space

02 p0252 A69-11811

Mass spectrometer leak testing by calibrated enclosure method for quantification of gaseous leaks in large complex systems

04 p0598 A69-14974

Leak testing of welded pressure and vacuum vessels, considering nature of flow of gases through small restrictions

07 p1140 A69-18799

Circularly polarized waveguide mode simulation for multislotted leaky waveguide harmonic content measurement

07 p1105 A69-19046

Bubble leak testing of components to understand effects of gas and liquid viscosity, surface tension, pressure differential and temperature

09 p1503 A69-21391

Y-circulators specified, measured and calculated values correlated as function of leakage matrix elements and terminating dipoles reflection

09 p1473 A69-22114

Leaky helix and solid metal waveguides propagation losses measured by shuttle pulse method in SHF

13 p2233 A69-28063

Graphical method for plotting contours of Rice distribution function as rocket-borne radar reflection data, determining leakage factor

14 p2416 A69-29536

Leak detection for aerospace hardware, discussing equipment, operations, checkout, etc

15 p2618 A69-30315

Back pressure control system for heat leak evaluation tests of cryogenic containers, discussing component selection and error analysis

15 p2702 A69-30397

Misalignment and eccentricity effect on face seal, discussing leakage dependence on phase angle

[ASLE FICFS PREPRINT 15A] 15 p2620 A69-30483

Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness

[ASLE FICFS PREPRINT 15B] 15 p2620 A69-30484

Noncontacting minimum leakage dynamic seal requiring liquid-vapor interface with leakage tolerance

[ASLE FICFS PREPRINT 40] 15 p2620 A69-30485

Lubrication and leakage control mechanics of face seals, considering liquid to vapor boundary within interface

[ASLE FICFS PREPRINT 22]

- 15 p2620 A69-30486
Sealing mechanism theory with face seal applications, taking into account load carrying capacity and no leakage pressure gradient
[ASLE FICFS PREPRINT 18]
- 15 p2620 A69-30489
Elastohydrodynamic lubrication of square section high pressure face seals mounted on rigid housings, considering design charts for load and leakage
[ASLE FICFS PREPRINT 16]
- 15 p2621 A69-30493
Leakage in mechanical face seals with hydrodynamic films, noting misaligned seal theories for pumping with cavities and two fluids
[ASLE FICFS PREPRINT 19]
- 15 p2621 A69-30497
Leakage prediction through mechanical seal by theoretical equation developed from basic fluid mechanics
[ASLE FICFS PREPRINT 17]
- 15 p2621 A69-30499
Load support and leakage from microasperity lubricated face seals, developing hydrodynamic lubricant films
[ASLE FICFS PREPRINT 21]
- 15 p2622 A69-30500
Semiconductor devices leak testing methods including liquids, helium mass spectrometer, Radflo and hermetic seal tests
- 16 p2758 A69-31712
Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
- 16 p2791 A69-32326
Leak tests for sealed electronic circuits using helium mass spectrometer
- 18 p3138 A69-35271
Density field surrounding leaking circular hatch of spacecraft treated as free molecular flow from annulus, superposing far field of effusive orifice flow
- 21 p3695 A69-39035
Seals leak testing for complex manned spacecraft structures
[AIAA PAPER 69-1030]
- 22 p3924 A69-40399
Leak detection techniques efficiency determined for airtight atmospheric air sampling devices used at low pressure and concentration
- 24 p4296 A69-42656
- LEARNING**
NT ASYMPTOTIC METHODS
NT CONDITIONING [LEARNING]
NT ITERATIVE SOLUTION
NT PROBLEM SOLVING
NT THEOREM PROVING
NT TRANSFER OF TRAINING
- Cost prediction equations used in perturbed environment of learning curves subjected to design change in industry
- 01 p0180 A69-10652
Muscle motor performance under continuous practice conditions, analyzing individual differences, intraindividual variability and remoteness
- 17 p2911 A69-34003
Circadian periodicity of human reaction times tested during normal diurnal cycles and 24 hour wakefulness, noting acoustic and visual stimuli effects on learning
- 24 p4267 A69-43387
- LEARNING MACHINES**
Mathematically stylized simple systems representing systems with functional law varying as function of acquired experience
- 01 p0050 A69-10377
Artificial intelligence application to design of off-line and on-line learning control systems for controlling spacecraft attitudes
- 04 p0581 A69-14568
Limited speech recognition system /LISPER/ simplifies recognition by computer designed as research vehicle and pattern recognition system
- 04 p0565 A69-15338
Learning model of brain stem reticular formation based on nonlinear probabilistic hybrid computer concepts
- 05 p0711 A69-15802
Markov extremum drift dual compensation in optimal systems with learning experiments
- 05 p0741 A69-16671
On-line optimization of stochastic control systems based on learning controller model, discussing computer simulation results
- 06 p0900 A69-17354
Learning control system design, using a priori information in subgoal selection, control situation grid extensions and controller initialization
- 06 p0900 A69-17355

Self organizing and learning control systems, adaptive systems theory and defining self organizing control systems

07 p1114 A69-18382

Cybernetic structural model for learning and mentalization comprehending symbol systems, languages, homeostatic mechanisms, etc

07 p1070 A69-18385

Learning matrices applied to mathematical relationship establishment during adaptation stage between input and output of adaptive systems

07 p1088 A69-18387

Adaptive threshold detection, using stochastic approximation techniques to derive receiver structures capable of learning optimum threshold setting during actual operation

11 p1839 A69-25297

Mathematically stylized simple systems representing systems with functional law varying as function of acquired experience

12 p2054 A69-26670

Self adaptive system for recognition of dynamic shapes, discussing self structuring by learning, incomplete pattern recognition, logic element network, etc

12 p2054 A69-27080

Learning control systems research and applications noting trainable controllers, reinforcement control, Bayesian estimation and stochastic approximation

18 p3112 A69-35093

Brain and machine model of pattern recognition, pattern synthesis, memory, learning and speech, using concept of similarity, context and signal analysis

24 p4273 A69-42909

LEARNING THEORY

NT REINFORCEMENT [PSYCHOLOGY]
NT TRANSFER OF TRAINING

Spatiotemporal patterns learning among sensory and motor organs with linearly ordered components by nonlinear networks in terms of embedding fields theory

22 p3887 A69-41196

Learning model of motor behavior in brain cortex of higher animals and man, discussing M automaton, information reception, correlation, memory, emotions, desires and actions

23 p4109 A69-41977

LEAST SQUARES METHOD

Approximate solution convergence for linear operator equation in Hilbert space by least squares method

01 p0105 A69-10728

Plant identification procedures by stepwise approximation and least squares methods

03 p0409 A69-13072

Damping factor automatic determination by use of second derivatives of residuals for damped least squares method of optical design

04 p0630 A69-14295

Deterministic pattern classification algorithms, discussing abstraction problem, stochastic algorithms, minimum error scheme and modified least squares scheme

06 p0892 A69-17395

Iterative method for least square polynomial curve fitting with abscissas and ordinates subject to error

08 p1343 A69-20827

Least squares local smoothing by polynomials of noisy data in n dimensions

08 p1344 A69-20830

Smoothing data stability by least squares method, noting applicability to computer processing at random sequences

09 p1532 A69-21754

Algorithm for calculating Bayes estimates for unsteady Gaussian signals separation in presence of unsteady Gaussian noise by least squares method

11 p1833 A69-24443

Least squares iterative program, deriving orbits for O binaries HD 93403 and HD 135240

11 p1963 A69-25257

Photogrammetric networks equalization by method of least squares, using external orientation elements of aerial photographs

12 p2079 A69-26032

Book on stress rupture parameters including least squares approach to Larson-Miller, Dorn, Manson-Haferd, Graham-Waltes, Murry, Brozzo and Chitty-Duval

13 p2360 A69-27372

Solar eclipses phases and elements calculation by Fortran language computer, using least squares method

13 p2336 A69-27447

Stress in elastic cylinder under thermal expansion with one end clamped expressed by series expansion of biharmonic function using least squares method

14 p2534 A69-29284

Polynomial and nonlinear equations of state for solids and liquids analyzed using uncommon statistical and least squares methods

14 p2486 A69-29470

Satellite triangulation by least squares method based on conditions relating to observing stations coordinates, concerning synchronous observations in directions and distances

15 p2594 A69-30030

Nonlinear least squares optimization program applied to atmospheric temperature sounding, solving for temperatures at various altitudes from simulated carbon dioxide intensity measurements

17 p2960 A69-33156

Least squares method of smoothing curves or surfaces involving orthogonal base functions, discussing matrices conditioning and structure eigenmodes

18 p3218 A69-34643

Geodetic satellite measurements employing curve fitting approach using least squares analysis to resolve atmospheric refraction and shimmer problem

18 p3104 A69-35202

Polynomial approximations in perturbational navigation and guidance schemes including Chebyshev and least square approximations

19 p3368 A69-35664

Least squares method application to boundary value problem approximate solution for plane, axisymmetric, creeping and incompressible irrotational flows

19 p3299 A69-36475

Optimal timing of measurements to minimize dispersion of navigational observation parameters by least squares method with application to Keplerian orbit elements

19 p3370 A69-36614

Synthetic aperture terrain imaging radar system optimal design, considering noise-free and random noise conditions using least squares method and signal to noise ratios

20 p3489 A69-37639

Least square or least mean square approximation methods in abstract pattern recognition, noting unknown probability density function

20 p3504 A69-38285

Relation between smoothed and filtered linear least squares estimates of signal process in white noise from deriving resolvent identity of covariance function

21 p3754 A69-38432

Unitary matrix representing generalized inverses, proving weak method of steepest descent for least squares solution of equations

21 p3755 A69-38926

Earth-pole wobble /1951-1966/ by spectral analysis using least square fit method

21 p3716 A69-39244

Nonlinear estimation with noisy data, considering least squares fit, sequential /Kalman/ estimate and iterated sequential scheme

21 p3686 A69-39370

General linear state estimation from algebraic viewpoint without probability theory concepts, establishing least squares parameter estimation

23 p4182 A69-41880

Satellite attitude estimation from onboard telescope celestial sightings using iterative least squares method, considering measurement error noise and axes wobble

24 p4348 A69-43244

Iterative weighted least squares method for reconstructing time history of coupled rotation and flexural oscillations of Radio Astronomy Explorer satellite

24 p4394 A69-43291

LEAVES

Cotton leaves reflectivity and transmittance measurements, discussing substrate salinity effects on internal structure of hydroponically grown plants

15 p2558 A69-30456

Temperatures of radiantly heated sun and shade leaves of white oak measured in low speed wind tunnel, considering differences in convective heat dissipation

18 p3095 A69-34540

LEE WAVES

Finite difference method for calculating lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature

10 p1722 A69-23967

Statistical analysis of lee wave clouds from satellite TV pictures, determining lengths and air flow direction

11 p1912 A69-24828

Motion of slender axisymmetric bodies in rotating fluid, relating Long hypotheses to flow reversal and dipole distribution effects on lee waves

13 p2248 A69-28170

Turbulence origin and structure in stably stratified media for finite disturbance instability in sloping flows experimentally observed with visualization techniques

17 p2999 A69-33735

Lee waves and orographic wind phenomena in Rocky Mountains near Boulder, noting stratospheric standing gravity waves and turbulence sampled by HI-CAT U-2
17 p2999 A69-33738

Finite difference method for calculating Lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature
21 p3759 A69-39653

LEG [ANATOMY]

Leg volume changes in response to lower body negative pressure due to blood redistribution
17 p2908 A69-33171

White mice gastrocnemius muscle wet mass, dry mass and noncollagen-nitrogen (NCN)/content, noting (NCN)/content dependence on body mass
23 p4080 A69-41406

LEGAL LIABILITY

Legal problems in space navigation and solution through international law including air and outer space limits, regulating authority and damage liability [UN PAPER 68-95475]
01 p0179 A69-10511

International liability for damage caused by launching of objects into outer space [UN PAPER 68-95337]
01 p0180 A69-10525

Manufacturer and assembler liability for injuries caused by design defects resulting from engineering errors in aircraft products
01 p0180 A69-11392

Litigation for aircraft accidents, discussing legal and fiscal aspects and deterrent effect contributing to aviation safety
01 p0181 A69-11393

Aviation insurance function in providing risk capital in expanding aviation enterprises at fair and equitable rates, discussing air safety
06 p1041 A69-16845

International problems of air traffic control, discussing legal and political basis for organization and ATC liability
06 p1042 A69-16846

Air carrier legal responsibility for commercial air safety as compared to liability in other transportation modes
06 p1042 A69-16847

Federal government legal liability for commercial air safety in aircraft accident suits
06 p1042 A69-16848

Aircraft parts manufacturer liability in air accidents, discussing litigation and warranties
06 p1042 A69-16849

Tort system of U.S. law effect on air safety promotion, discussing liability influence on government, manufacturers and airlines
06 p1042 A69-16850

Aviation industry passenger liability, discussing negligence litigation, compensation standards and roles of government, manufacturers and courts
06 p1042 A69-16851

Legal consequences of discrepancies between freight rates for airline tickets and bills of lading and actual invoices, discussing liability areas and regulated tariff
07 p1244 A69-19232

Legal problems in space navigation and solution via international law including air and outer space limits, regulating authority and damage liability
07 p1244 A69-19233

Air carrier liability for nuclear weapons damage, discussing international agreements
11 p2003 A69-24260

Sonic boom damage legal claims, discussing causal relationship validity and claims processing
14 p2541 A69-29155

Legal, social and physical effects of supersonic flight, discussing damage claims validity and recovery resulting from breaking of sound barrier
17 p3075 A69-32841

Jet noise effect on real estate value, discussing market survey, insulation and navigation easement costs and litigation damages [AIAA PAPER 69-802]
19 p3288 A69-35594

Air piracy legal aspects as determined by Swiss law and Treaty of Tokyo
19 p3454 A69-35979

Legal liability in civil aviation, proposing international treaty
19 p3454 A69-35980

Air cushion vehicle legal status and cargo and passenger liability
19 p3455 A69-36330

Article 8 // of Carriage by Air Act, 1932 compared to Warsaw Convention Article 8 //, noting definition of legal liability of carrier
19 p3455 A69-36331

ESRO and legal liability in damage suits concerning satellite protection and environmental control
20 p3635 A69-37108

Outer Space Treaty of 1967, discussing Article 4 and arms control
20 p3636 A69-37109

Space law legal liability definitions for damage caused by space objects, discussing juridical principle and procedure
20 p3636 A69-37110

International lawyers proposal for compulsory registration of space activities in connection with astronauts rescue and damages liability
20 p3637 A69-37118

Legal principles observed for international telecommunication systems establishment by means of artificial satellites regarding states interests and rights
20 p3638 A69-37124

International legal liability for personal injury or property damage caused by space activities
20 p3638 A69-37127

Liability for personal and property damage due to space activities [AAS PAPER 69-042]
24 p4418 A69-42826

LEGENDRE CODE
U COMPUTER PROGRAMMING
U NEUTRON SCATTERING

LEGENDRE FUNCTIONS

Summation of Legendre series by transformation into integrals and use of recurrence relations
01 p0171 A69-11072

Legendre polynomial description of radiation pattern of group of radiators, discussing design of linear radiators
02 p0209 A69-12341

Optimum addition of abscissas in quadrature formulas by expansion of abscissas equation in Legendre polynomials
03 p0455 A69-13372

Unsteady atmospheric motions on planetary scale using Legendre polynomials
08 p1311 A69-21158

Brightness coefficients for isotropic scattering of homogeneous plane layer in turbid medium, using Legendre polynomials
11 p1960 A69-24733

Nonrelativistic theory of rotating configurations in terms of gravitational potential, center mass density and variable angular velocity
12 p2159 A69-26662

Finite thickness plate heat equation using Legendre polynomials
14 p2537 A69-28970

Boltzmann equation for Lorentzian plasma in elliptic magnetic field solved by expanding distribution function in Legendre polynomials
17 p3009 A69-32827

LEIDENFROST PHENOMENON

Creeping flow model of Leidenfrost boiling with moving surface, discussing vaporization time for equivalent drop film boiling on stationary surface [AIChE PAPER 20]
15 p2718 A69-31116

LEM [LUNAR MODULE]
U LUNAR MODULE

LENGTH

Characteristic length constant in open cosmological model of large scale properties of real space-time, noting relation to other constants
09 p1608 A69-22528

Gas laser-Doppler radar system for moving materials velocity and length measurements in industrial processes
22 p3955 A69-40237

Laser interferometric length measurement by fringe counting, considering mechanical and optical systems limitations and design tolerances
22 p3960 A69-40238

LENNARD-JONES GAS

Viscosity and thermal conductivity of helium on basis of Lennard-Jones (6 to 9) potential [ASME PAPER 67-WA/HT-1]
02 p0351 A69-12205

Prigogine-Nicolis-Misguich transport theory tested with inert gas liquids and compared with Rice-Allnatt theory, based on modified Lennard-Jones potential model
04 p0589 A69-14863

LENS ANTENNAS

Geodesic lens radar antennas, discussing air filled devices operated in TEM mode, inclusive Luneberg lenses, double layer pillboxes and parabolic lenses
03 p0402 A69-13184

Radio wave field distortions by dielectric prisms in lens waveguides, discussing beam transformation, noting both geometrical optics effects and diffraction role
11 p1833 A69-24436

LENS DESIGN

Hologram chromatic aberration compensation by two lens system
01 p0080 A69-10430

Tinted ophthalmic media effect on detection and recognition of red signal lights in daylight, noting allowable coloration for aviation use
01 p0022 A69-11341

Plastic virtual infinity lens system for large aperture cathode ray tube direct view simulator displays
05 p0760 A69-15592

Collimator lens design for transforming axisymmetric primary field into prescribed secondary field
06 p0895 A69-17454

Double focus lens holography for diffusely reflecting surface deformation recording, discussing gas lasers, Polaroid photographic materials, etc
11 p1880 A69-24467

Ray tracing application to evaluating aberrations produced by Fresnel holograms for optimizing design of aplanatic lens holography system
11 p1885 A69-24848

Focusing power of hyperbolic gas lens for light beam waveguides, noting temperature distribution measurements and pole separation
12 p2107 A69-26392

Electromagnetic field in idealized medium of uniformly curved gas lens for light beam waveguide, describing lens radius effects on incident beam spot
13 p2270 A69-27181

Nonmagnetic ionization gage consisting of quadrupole lens systems excited at HF, discussing electron focusing during operation
13 p2263 A69-28084

Simulated gravitational lens made of Plexiglass for demonstrating stellar gravitational lens phenomena, presenting partial cross section
15 p2653 A69-31163

Atmospheric ion concentration increment by electrostatic lens to facilitate electrical properties measurements of charged particles in submicroscopic range
17 p2971 A69-32928

Optical computerized design procedure for Ritchey-Chretien corrector, combining ray deviation error function and third order aberration design techniques
17 p2972 A69-33087

Mosaic mirror and lens camera system for multiple image high resolution photography
17 p2972 A69-33089

Collimator lens design for transforming axisymmetric primary field into prescribed secondary field
20 p3508 A69-37939

Gas lens system for periodic light beam waveguide, describing gas enclosed in circular cylinder and heated by specific temperature distribution
24 p4350 A69-43332

LENSES

NT CONTACT LENSES
NT WIDE ANGLE LENSES

Gas lens distortion of Gaussian light beam in sequence of lenses with same aberration, using shuttle pulse technique
01 p0120 A69-10849

Brewster angle lenses for low cost low loss laser beam transmission system
07 p1148 A69-18863

Equivalent network representation of feedthrough lens array taking into account mutual coupling between elements to predict performance characteristics
08 p1280 A69-20014

Flare or stray light measured in long focus photographic objectives by photometric sphere and spherical segments without collimator
12 p2093 A69-26590

Lenses spherical aberration role in studying laser induced breakdown of gases, considering intense ionization collinear regions multiplicity along optic axis
15 p2634 A69-30878

Objective lens of AVR-2 refractor at Poltava Observatory measured for spherical aberration, astigmatism, field curvature, coma and distortion
17 p2970 A69-32883

Angular structure of second optical harmonic for cylindrical lens focusing of ND laser beam into negative KDP crystal
17 p2981 A69-33110

Laser emission spatial structure transformation determined from ratio between focused spot radius and distance between lens and output mirror
17 p2981 A69-33111

Electrostatically focused klystron /EFSK/ small signal gain calculations based on lens cell space charge wave analysis

18 p3109 A69-35294

Fresnel zone plate as converging and diverging lens in holographic image reconstruction, noting sine wave zone plate

22 p3947 A69-40864

Viscoelastic properties of lenses extracted from cats and dogs analyzed as function of displacement using computer simulation

22 p3883 A69-40875

Camera lenses and techniques for aerial color photography, discussing atmospheric influences, filters, films and exposure times

22 p3950 A69-40999

LENTICULAR BODIES

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on states

09 p1617 A69-22078

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on states

23 p4228 A69-41970

LEONID METEORIDS

Meteor spectrum from 1966 Leonid shower considered to be closer to comet nucleus spectra than previous spectra

04 p0655 A69-14664

Radar and photographic studies of meteors from Leonid and Perseid showers, presenting velocities, luminescence and ionization

10 p1783 A69-23895

Micrometeoroid showers proximity to epsilon Leonid showers in earth orbit, analyzing Helfenzreider comet role from satellite data

14 p2522 A69-29588

17 November 1966 Leonids return, tabulating data from previous returns starting with October 899

14 p2525 A69-29715

Leonid meteoroids mass distribution law exponent evaluation based on unstable meteoric radio echo durations integral distribution

18 p3203 A69-35334

LEPTONS

NT ANTINEUTRINOS

Leptonic quarks with various charges in cosmic rays, determining upper limit of flux in underground measurements

02 p0306 A69-11547

Lepton nonconservation implications for experiments involving solar neutrinos, showing effect on capture rate at earth for pep neutrinos

23 p4194 A69-41596

LES

U LINCOLN EXPERIMENTAL SATELLITES

LESA [LUNAR EXPLORATION SYSTEM]

U LUNAR EXPLORATION SYSTEM FOR APOLLO

LESIONS

NT PULMONARY LESIONS

Visceral lesions observed in mice and rats exposed to ultrashort waves indicating no pathological modification of physiology of reproduction [AGARDOGRAPH-111]

08 p1266 A69-20679

Rabbit corneal damage thresholds for Gaussian beams of carbon dioxide laser IR radiation at various exposure times

11 p1830 A69-24844

Ventromedial hypothalamic /VMH/ lesions, body weight and food consumption changes in male and female rats, observing differential effects

17 p2910 A69-33756

Olfactory bulb removal effects on uptake decline of telencephalic norepinephrine, noting use for mapping adrenergic pathways

22 p3871 A69-40055

LETHALITY

Microorganisms death by exposure to high intensity visible and UV light, discussing effect of endogenous photosensitized oxidation on caratoid-containing Rhodotorula glutinis

20 p3475 A69-37613

LETTERS [SYMBOLS]

U SYMBOLS

LEUCINE

High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in *Pseudomonas saccharophila* cells

03 p0369 A69-13433

Anoxia effects on leucine-super 3 H incorporation by submandibular gland cells of neonatal rats, discussing cytoplasmic proteins synthesis impairment-

22 p3887 A69-41195

LEUKOCYTES

NT EOSINOPHILS

NT LYMPHOCYTES

Glycolysis control by respiration in human leukocytes with and without Pasteur effect conditions

15 p2555 A69-30413

Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O content, noting neutrophil energy exchange disorder role

17 p2907 A69-32942

Pre and postflight leukocyte chromosome aberration analyses of Gemini astronauts

17 p2908 A69-33173

Radioprotective effects of 5-azacytidine on bone marrow and blood leukocytes of X ray irradiated AKR mice

23 p4080 A69-41429

Radiation effects on population kinetics of granulocyte system forming bone marrow, discussing radiosensitivity and radiation-induced granulocytopenia

23 p4090 A69-41965

LEVEL [HORIZONTAL]

Bamberg zenith telescope investigation, noting level constant dependence on level tube bubble length

17 p2970 A69-32882

LEVEL [QUANTITY]

NT ATOMIC ENERGY LEVELS

NT ELECTRON STATES

NT ENERGY LEVELS

NT GROUND STATE

NT INTERMOLECULAR FORCES

NT MOLECULAR ENERGY LEVELS

Automatic level measuring system, consisting of decade control oscillator, digital level generator and selective level meter for 200Hz-2MHz range

09 p1501 A69-22577

LEVELING

Analytic platform or strapdown systems application, discussing closed and open loop leveling techniques

08 p1347 A69-19862

LEVERS

Lever support systems for telescopes noting tilt compensation, acceleration balance and problems of friction, pivot viscosity, thermal effects and weight

12 p2057 A69-26410

LEVITATION

Manned relativistic space flight limitations dependence on biomagnetic levitation of human body in inhomogeneous magnetic field to compensate inertial forces during acceleration

22 p3889 A69-39906

LEWIS BASE

Lewis acidity of alanes, discussing interactions of trimethylalane with amines, ethers and phosphines

07 p1074 A69-18630

LEWIS NUMBERS

Adiabatic model deflagration limits for steady linear monopropellant burning at Lewis number of unity and one step gas phase reaction

24 p4415 A69-43670

LIABILITIES

U LEGAL LIABILITY

LIAPUNOV FUNCTIONS

LCL /Liapunov, Cetaev and LaSalle/ functions for autonomous systems of second order extended to more general differential equation systems

01 p0103 A69-10007

Multivariable PFM control system stability analysis using Liapunov function as Hermitian quadratic form

01 p0050 A69-10207

Stochastic Lurie type systems stability using Liapunov method

01 p0050 A69-10240

Stability properties of discrete-continuous feedback control systems with signal dependent sampling

02 p0226 A69-12733

Conditions for solution existence for n differential equations and Liapunov functions

05 p0787 A69-16451

Stability of differential systems with random parameters, developing Liapunov function approach and application to Ito equation

05 p0788 A69-16484

Pulsed control systems stability with frequency pulse modulation analyzed by Liapunov direct method

05 p0740 A69-16670

Soviet achievements in space research, comparing satellites with U.S. counterparts

06 p1005 A69-175616

Transient stability of AC generator analyzed by Liapunov direct method, considering effects of flux decay, speed governor and voltage regulator

07 p1058 A69-18644

Fabry-Perot laser operation having third mirror inserted on optical axis, analyzing equations solution stability according to Liapunov

07 p1148 A69-18802

Liapunov functions construction for linear and nonlinear differential equations, including nth degree systems with multiple nonlinearities

07 p1181 A69-19001

Periodic solutions of autonomous system oscillations with many degrees of freedom based on Poincare method applied to Liapunov systems

07 p1183 A69-19680

Almost periodic systems stability criteria derived from differential inequalities and Liapunov function, considering existence and uniqueness

09 p1532 A69-21612

Solutions boundedness in autonomous nonlinear systems with single nonlinearity, using Lure type Liapunov functions to prove theorems

09 p1533 A69-22449

Liapunov direct method in stability problems for semilinear and quasi-linear systems of hyperbolic partial differential equations with independent variables

09 p1534 A69-22799

Liapunov functions generation for deterministic ordinary differential equations, discussing integral methods, quadratic forms, partial differential equations, canonical forms, etc

11 p1908 A69-24317

Liapunov functions applied to stability analysis of nonlinear multivariable direct and indirect control systems with time lags

12 p2048 A69-26079

Stability conditions for control systems consisting of linear multivariable stationary neutral plant and multivariable pulse frequency modulator, using Liapunov direct method

12 p2049 A69-26080

Liapunov matrix equation solution, discussing restriction removal

12 p2121 A69-26377

Liapunov function construction with numerical algorithm, considering systems described by $dx/dt = f(x,y)$ and $dy/dt = g(x,y)$

12 p2122 A69-26520

Energy metric algorithm for Liapunov functions generation, discussing stability conditions in Wall and Moc work

12 p2122 A69-26521

Asymptotic stability inferred by examining higher order derivatives of Liapunov function, noting application to learning and adaptive control

12 p2122 A69-26522

Boundary value problems of thermoelasticity, discussing existence and uniqueness theorems, ellipticity, thermoelastopotentials, Liapunov-Tauber theorem, Fredholm theorems, etc

12 p2182 A69-26726

Multivariable PFM control system stability analysis using Liapunov function as Hermitian quadratic form

14 p2424 A69-28741

Periodic solution to equations describing nonlinear autonomous time lag system close to Liapunov systems

14 p2482 A69-28799

Control systems synthesis for nonlinear plants with known Liapunov functions and constraints, considering stability

14 p2424 A69-28819

Sufficient conditions for asymptotic stability of motion in finite and whole of nonlinear systems by Liapunov second method

15 p2652 A69-30660

Cetaev /A, lambda/ estimates of approximate integrations of system of ordinary differential equations, analyzing stability with aid of Liapunov functions

15 p2644 A69-30664

Asymptotic Liapunov stability of perturbed solutions to weakly coupled multifrequency systems

15 p2654 A69-31258

Stability and asymptotic stability theorems related to Liapunov second method, considering linear differential equations zero solution

15 p2654 A69-31259

Nonlinear nonconservative systems asymptotic stability analysis, emphasizing Zubov construction procedure for Liapunov functions

16 p2873 A69-32059

Stability determination for nonlinear automatic control systems, describing mathematical methods based on Liapunov functions
16 p2804 A69-32242

Absolute stability, stability in whole and engineering stability in reference to Liapunov stability applicability
16 p2874 A69-32244

Liapunov functions applications in motion stability theory problems, considering dynamic systems, periodic orbits, optimum damping and control
16 p2804 A69-32248

Stability conditions for time lag differential equation systems over finite interval employing Liapunov functions, noting similarity with systems having continuously acting disturbances
17 p2995 A69-33616

Exponential boundedness of system motion for Lure type forced systems, using quadratic Liapunov functions
18 p3164 A69-34674

Instability criterion for motion differing from criteria of Liapunov and Chetaev
18 p3174 A69-35317

Conservation laws and Liapunov stability of free rotation of rigid body about principal axes derived from kinetic energy and angular momentum
19 p3397 A69-35612

Quadratic Liapunov function existence for exponentially stable linear system with varying coefficients described by vector differential equations
19 p3359 A69-35617

Liapunov first stability theorem generalized for differential equations in Banach space
19 p3360 A69-35860

Liapunov method applied to stability evaluation of multiparameter self adaptive nonsearch gradient servosystems
19 p3286 A69-35891

Liapunov stability theory for motion of spacecraft with flexible and moving parts in force free space [AAS PAPER 68-125]
20 p3617 A69-37180

Fabry-Perot laser operation having third mirror inserted on optical axis, analyzing equations solution stability according to Liapunov
21 p3736 A69-38947

Asymptotic stability of differential equations solutions in linear normalized spaces via Liapunov theorems extension
21 p3755 A69-39105

Stability of two differential equations in critical case, obtaining Liapunov stability and instability
21 p3755 A69-39107

Frequency domain and Liapunov instability criteria for attitude control system design of large booster, noting nonlinear feedback [AIAA PAPER 69-853]
21 p3687 A69-39381

Extension of Liapunov systems to time lag systems with small periodic parameter
22 p3980 A69-40107

Liapunov stochastic stability direct method analog used for estimating reliability of redundant systems with constant recovery time
23 p4144 A69-41953

Dynamic characteristics of nonlinear discrete systems by motion division method, using discontinuous Liapunov function for stability criteria
23 p4144 A69-41956

Distributed parameter systems stability as internal and input-output property, describing Liapunov functionals construction
24 p4293 A69-43303

Liapunov functionals for time delay systems by path integrals in state space, using convolution equations involving distributions with compact support
24 p4295 A69-43317

LIBRARIES

Three leveled computer program library compiled for numerical analysis
01 p0036 A69-10709

LIBRATION

Optical ranging technique for studying lunar physical libration by measuring distance between earth observatory and two fixed points on lunar surface
01 p0158 A69-11311

Photographic investigation of gegenschein and cloud satellites at L sub 5 earth-moon libration point, noting gegenschein intensity peak
07 p1212 A69-18602

Ideal resonance problem with single critical term for case of libration solved by modified Poincare method, considering 24-hr satellite
12 p2152 A69-25800

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem
12 p2155 A69-25883

Libroelastic wave propagation and dispersion characteristics /solid carbon dioxide/ evaluated by using Raman scattering measurements
13 p2286 A69-28668

Lunar libration constants determination based on Schlueter heliometer observations using Bessel-Wichmann method, allowing for limb irregularities
17 p3028 A69-32875

Lunar libration point L4 photographs taken during 6 October 1968 eclipse showing no discrete objects or clouds
20 p3613 A69-38249

LIBRATIONAL MOTION

Raman spectra and temperature dependent nuclear quadrupole resonance frequencies of p-dichlorobenzene and p-dichlorobenzene-D, calculating librational amplitudes
01 p0122 A69-10286

Three body problem, discussing impossibility of libration points of gravitating ellipsoid
01 p0155 A69-10957

Stability characteristics of small and moderately sized short period Trojan librations in sun-Jupiter restricted three body problem
01 p0158 A69-11329

Attitude control system for gravity gradient stabilized satellite in synchronous and near synchronous equatorial orbits, discussing libration damping methods
03 p0504 A69-12857

Lunar libration clouds, discussing visual observation at small phase angles for estimation of dominant cloud particle size
05 p0827 A69-16527

Magnetic sample-and-hold damping using geomagnetic field for libration damping of gravity gradient stabilized satellite in near synchronous equatorial orbit
07 p1227 A69-18337

Long life gravity gradient stabilization system using Vee configured control moment gyros to semipassively damp vehicle librations
07 p1228 A69-18345

Rotational dynamics equations in linearized matrix form applied to satellite librations in circular orbit and gyroscope motion
11 p1970 A69-24608

Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping
15 p2680 A69-30188

Mimas-Tethys commensurability of motions and inclinations, calculating libration amplitude variation by numerical integration
16 p2861 A69-32241

Stability of motions about triangular libration points in elliptic restricted three body problem [AAS PAPER 68-090]
20 p3595 A69-37175

Rotational motion bounds of satellites exhibiting parametric resonance under small librations in orbital plane
20 p3617 A69-37191

Closed form solution to stability of coupled libration motion of slender axisymmetric satellite in circular orbit limited to small amplitude vibrations
22 p4008 A69-39936

Periodic solutions for gravity-gradient stabilized satellite librating in orbital plane, using elliptic sine function and harmonic balance method
23 p4224 A69-41876

Stability analysis of periodic solutions associated with planar librations of gravity oriented satellite using linear perturbation analysis
24 p4388 A69-43649

LICHENS

Cladonia rangiferina resistance to stresses, considering suitable indices for stress response
18 p3095 A69-34539

Norwegian lichen species chemical investigation for aromatic compounds, hydroxy fatty acids, amino acids, soluble and bound sugars
23 p4080 A69-41428

LIDAR

U OPTICAL RADAR

LIE GROUPS

NT SPINOR GROUPS

Lie groups for equations of motion in quantum mechanics or field theory determined by operator analysis
02 p0282 A69-12840

Lie algebra of second order linear differential equations
02 p0273 A69-12841

Stored energy function of hyperelastic material by Lie group extension of Truesdell theorem on symmetry groups
04 p0680 A69-14945

Group classification of solutions to Hopf equation according to type of viscosity coefficient
07 p1118 A69-18700

Canonical transformations depending on small parameter, utilizing Lie series
19 p3397 A69-35608

Grobner method of Lie series applied to numerical integration of spacecraft trajectories and n-body problems
23 p4223 A69-42476

LIENARD POTENTIAL

Necessary and sufficient conditions for solution boundedness for Lienard equation with forcing function
02 p0272 A69-12132

LIFE [DURABILITY]

NT FATIGUE LIFE

NT HALF LIFE

NT PLASMA LIFETIME

NT SATELLITE LIFETIME

NT SERVICE LIFE

NT STORAGE STABILITY

Direct reading device for minority carriers lifetimes measurement in semiconductor single crystals
01 p0078 A69-10073

P-n-p junctions photoconductivity decay observation, determining signal bulk minority carrier lifetime in thin n regions
01 p0136 A69-10242

Radiative lifetimes for four N II excited states emitting UV during transition to lower level
02 p0280 A69-11928

Minority carriers lifetime measurement in degenerate GaAs, showing dependence on current density and operating temperature
03 p0483 A69-12917

Planar transistor reliability test results noting failure rate, stability and effect of temperature
03 p0402 A69-13006

EUV emission line radiative lifetime measurement by foil-excitation technique, noting correction for cascading, He II and transition probabilities for N II and O III
03 p0471 A69-13165

Mean life measurement of excited ions electronic levels using beam foil light source, emphasizing beam particle monitoring and theoretical equations
04 p0595 A69-14278

Cumulative damage theories application to fatigue data for high strength materials, discussing stress levels
04 p0668 A69-14379

Laws of wear and average life, noting application to electric connector reliability
04 p0579 A69-15320

High temperature effects on gallium arsenide crystals current carriers lifetime, discussing recombination characteristics and impurity photoconductivity
05 p0809 A69-16551

Growth induced dislocation effect on lifetime of minority charge carriers in silicon single crystals
06 p0980 A69-17551

He-Ne laser capillary end contamination with consideration of life lengthening, discussing thermal properties of argon ion laser with pyrolytic graphite
07 p1145 A69-18474

Film thickness effect on wear life of resin bonded solid lubricant film compared for various load test conditions [ASLE PREPRINT 68AM 7C-4]
07 p1139 A69-18624

C III 2p super 2 presuper 1 D level mean life measurement using beam-foil technique, noting corresponding Einstein A coefficient
07 p1184 A69-18643

Sealed carbon dioxide lasers life and power outputs with Xe and H additives
07 p1155 A69-19091

Internal electric field effect of diode with inhomogeneously doped base on lifetime of strong reverse current generated during instantaneous switching
08 p1287 A69-20890

SERT 2 thruster hollow cathode durability tested in bell jar [AIAA PAPER 69-304]
09 p1562 A69-21224

Lifetime of highly soluble isolated dense spherical solute particle in solvent, taking into account molecular diffusion, kinetic limitations, etc
10 p1651 A69-22939

Excited levels in Li I produced by Li 7 ion passage through carbon foil, measuring excitation mean lives by beam foil technique
13 p2301 A69-27454

Lifetime of vibrational levels of carbon dioxide molecules as function of discharge current and power dissipation, noting gas heating
13 p2273 A69-28579

Nonlinear homogeneous uniaxial ferromagnetic resonance, analyzing stationary regime lifetime and vibrational spectrum
14 p2503 A69-28989

Pulsar dispersion-removing technique, discussing pulsar mean flux density decrease with age
14 p2517 A69-29091

Sirene 302 thermionic converter lifetime during irradiation in Triton immersion pile, considering effects on conversion efficiency
14 p2481 A69-29198

Self lubricating bearings lifetime calculated as function of lubricant in pores and consumption rate, noting temperature effects
15 p2618 A69-30281

Rate gyro life and reliability, discussing gas bearings separating rotor from stator by thin gas film with conventional oil film characteristics
15 p2608 A69-30410

Load, speed and coating thickness effect on wear life of resin bonded solid lubricant, using oscillating motion and low pressure blocks
[ASLE PREPRINT 69AM 5C-3]
15 p2619 A69-30474

Mass-produced silicon transistors reliability, presenting tables and curves of lifetime tests
15 p2626 A69-30833

Lifetime of structural plastics under vibration loading, considering polystyrene and polyformaldehyde samples under tension
15 p2643 A69-30972

Electron excitation and phase shift method for radiative lifetimes of Ar II UV transitions
15 p2656 A69-31034

Semiconductor rectifiers economic life testing with synthetic circuits utilizing thyristor switch
15 p2579 A69-31041

Integrated circuits screens, developing sequence of life and environmental tests to remove units of potential reliability hazards
15 p2580 A69-31130

Electronic component life test sampling plans based on lognormal distribution and instantaneous failure rate or hazard rate criterion
15 p2630 A69-31137

Equipment life cycle costs computer simulation for design and changes evaluation, including maintenance analysis example
15 p2723 A69-31138

Microwave power loss and semiconductor conductivity relationship measured for carrier lifetime and mobility, noting nonlinearity and accuracy
16 p2825 A69-31617

Lifetime of ground state oxygen molecular ions in sunlight from photodetachment rate by free electron production measurement from ions in buffer gas
16 p2848 A69-31973

Automatic nonrepairable control elements reliability evaluated statistically with differentiable lifetime distribution function
16 p2764 A69-32199

Elastomer hardness criteria ensuring maximum life and performance of rotary shaft seals
16 p2794 A69-32432

Semiconductor life potential evaluation based on electrical parameters measurements at various voltages over wide temperature range
18 p3144 A69-34489

Mean lives of upper decay levels of lithium isotopes accelerated by electromagnetic isotope separator and directed through thin carbon foil
18 p3177 A69-35012

Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications
19 p3320 A69-35555

Injection level effects on minority carrier lifetimes in lithium-doped devices and solar cells irradiated by electrons and reactor neutrons
19 p3252 A69-35698

Bayesian confidence limits for systems reliability, considering exponential and unspecified life distribution subsystems
19 p3328 A69-36041

Electrical slippings assembly development with low dynamic resistance and long lifetime for space simulation testing, noting wear rate of rings and brushes
[AIAA PAPER 69-1035]
22 p3925 A69-40402

Mean adsorption lifetimes and activation energies of Ag and Au on polycrystalline tungsten substrate in ultrahigh vacuum system free of hydrocarbon contamination
23 p4198 A69-41542

Pulsars turn off time compared to Galaxy age, discussing physical theory and pulsar models
24 p4389 A69-43745

LIFE DETECTORS

Extraterrestrial life detection methods based on soil or atmospheric sampling, discussing enzyme activity, DNA determination, microbial growth, etc
01 p0021 A69-11093

Wolf Trap life detector design to sample and culture Martian surface dirt for microorganism growth
02 p0201 A69-11769

Mars biological exploration, discussing life detection, chemical and biological experimental strategy
[AIAA PAPER 68-1122]
03 p0375 A69-13700

Integrated device to detect biological growth and catabolic and anabolic activity in extraterrestrial exploration
15 p2556 A69-31306

Life detection for space missions based on detecting optical asymmetry in biogenic molecules by gas chromatography involving diastereomeric esters synthesis
15 p2556 A69-31315

Experiments integrated into single automated laboratory to detect extraterrestrial life through measuring metabolism and growth in planetary surface material
17 p2912 A69-32969

Extraterrestrial life detection experiments integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication
17 p2912 A69-32970

Life on Mars, past and future missions, possibilities of metabolic system and analysis methods
23 p4212 A69-41612

Spaceborne planetary UV spectroscopic search for atoms and molecules basic to life, specifically molecular N and water vapor photodissociation products
23 p4113 A69-41616

Sequential analyses of planetary surface sample for extraterrestrial life detection, discussing chemistry, morphology, growth and metabolism for life attributes
23 p4213 A69-41623

LIFE RAFTS

Survival of aircrew after successful ejection over water and boarding life raft
06 p0878 A69-16958

Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners
06 p0883 A69-17841

Insulated one man life raft for sea survival in arctic or subarctic conditions, evaluating thermal protection with endurance time and rectal temperature
12 p2020 A69-26550

LIFE SCIENCES

Life sciences and space research - COSPAR Conference, London, July 1967
01 p0016 A69-11073

Superconductors and living matter behavior, studying conditional parallelism via microstructure, cryogenic and electronic fundamentals
04 p0644 A69-15321

Experimental research concerned with origin of life, studying synthesis of precursor polymers and self assembly into protocells
10 p1641 A69-23035

Origin of life in terms of polymers synthesis under thermodynamic and geological conditions
12 p2017 A69-25764

Origin of life data, discussing self ordered polymers, propagative cell-like systems, protozooids, cellular evolution, etc
12 p2018 A69-25781

Gravity independence of life processes in terrestrial organisms concluded from zero gravity experiments with algae, hatched larvae, etc
18 p3095 A69-34692

Life sciences and space research on biological effects of radiation in space - COSPAR Conference, Tokyo May 1968
20 p3474 A69-37612

Evolution of life as creation of order from chaos, noting molecules self ordering capability
21 p3651 A69-38577

Thermal energy effects on life processes, discussing living cell metabolism, biochemical reactions, enzymatic action and protein catalytic functions, etc
21 p3652 A69-38783

Life on Mars, past and future missions, possibilities of metabolic system and analysis methods
23 p4212 A69-41612

LIFE SPAN

Mortality kinetics of Drosophila melanogaster, comparing effects of gamma radiation-induced life shortening and natural aging
15 p2555 A69-30444

LIFE SUPPORT SYSTEMS

NT CLOSED ECOLOGICAL SYSTEMS

NT EMERGENCY LIFE SUSTAINING SYSTEMS

Biological problems in prolonged space voyages including oxygen replacement, water supply and food regeneration
01 p0020 A69-11075

Chlorella and Scenedesmus unicellular algae mixture tested for biological protein value in humans for possible food source
01 p0021 A69-11079

Automatic life support system tried on leeches for space applications
01 p0021 A69-11080

Mathematical models of energy and mass transfer processes in closed loop multicomponent life support systems
01 p0021 A69-11316

Allelopathy, discussing application to gas liberating activity of edible plants as ingredients of space flight life support systems
02 p0198 A69-11509

Automatic bioprobe life support system for long duration interplanetary space flight, discussing blood leech as suitable research animal
02 p0199 A69-11828

Water electrolysis, discussing oxygen generators for spacecraft prototype cells and testing
03 p0379 A69-12987

Parametric analysis of life support systems developing scaling laws adapted to computer solutions, discussing manned orbital missions
[SAE PAPER 680746]
03 p0379 A69-13438

Wet oxidation process for management of organic waste products in closed ecologies of long term multimanned space missions
[SAE PAPER 680714]
03 p0380 A69-13443

Chemical nitrogen fixation methods for life support systems, discussing organometallic chlorides and bromides
03 p0382 A69-14198

Portable astronaut life support systems for extravehicular activities
[AICHE PAPER 42C]
04 p0554 A69-14511

Efficient life support systems for prolonged space missions, discussing scientific and experimental research
[UN PAPER 68-95778]
06 p0879 A69-17040

Astronaut extravehicular protection systems, discussing space suit, life support and thermal control subsystems and micrometeoroid protection
06 p0882 A69-17643

Lunar shelter regenerative life support system performance and manned test
07 p1071 A69-19427

Book on earth atmosphere and outer space influence on human physiology for life support systems design
12 p2024 A69-27074

Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems
[AIAA PAPER 69-620]
17 p2914 A69-33303

Parametric thermal control weight and power requirements for spacecraft life support systems, considering number of cabins, crew activity, heating, cooling and regeneration
[AIAA PAPER 69-621]
17 p2914 A69-33305

Artificial life support systems for sealed environments with application to specific missions, noting cryogenics use
17 p2915 A69-33682

Medical and biological laboratory ground experiments role in development of life support systems and

- suitable environments for prolonged manned space flights
18 p3098 A69-35165
- Regenerative life support systems, discussing water reclamation, carbon dioxide removal, onboard oxygen generation and radio isotope thermal energy sources
19 p3262 A69-36318
- Soviet book on cosmos and microorganism utilization for creating regenerative life support in spacecraft
20 p3467 A69-37230
- Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions
20 p3477 A69-37623
- Life support system sterilization maintenance problem for biosatellite experiment over one year
20 p3477 A69-37624
- Oxygen supply and carbon dioxide absorption in long term life support systems, noting energy balances comparison of ecological systems
20 p3477 A69-37625
- Mathematical model of optimal partially closed life support system consisting of man, recycling unit, storage unit and waste disposal outlet
22 p3892 A69-40272
- Radioisotope thermal energy (RITE) source for integrated life support systems for two man 180 day space station mission, determining optimum material selection and design details
23 p4189 A69-42268
- Dynamic power and life support systems electrical/thermal integration for manned spacecraft using low temperature Rankine cycle generator
23 p4189 A69-42269
- Unstabilized astronaut, hand-held and integrated life support EVA maneuvering units tested in gimbaled six degree of freedom servo driven moving base simulator [AAS PAPER 69-516]
24 p4272 A69-42850
- Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc [AAS PAPER 69-143]
24 p4272 A69-42876
- LIFETIME (DURABILITY)**
U LIFE (DURABILITY)
- LIFT**
NT INTERFERENCE LIFT
NT JET LIFT
NT ROTOR LIFT
- Lifting wing profiles in uniform transonic compressible fluid flow calculated by analog method, noting hodograph method simplification
02 p0187 A69-11536
- Lift from unsteady flow past cascade of slender profiles with stagger angle reduced to solution of Fredholm integral equation
02 p0190 A69-12575
- Aerodynamics of flap balanced swivel airfoils, discussing lift curve slope, incidence change response and application of control forces and movements
03 p0364 A69-13908
- Lift and drag parameters of axisymmetric bodies in Newtonian flow at random incidence by summation of appropriate portions
04 p0542 A69-14745
- Zhukovskii lifting force theorem application to slender wing profile and airfoil lattice in linearized supersonic flow
05 p0697 A69-16023
- Lift fluctuation on airfoil due to transverse and chordwise gusts applied to rotating fan and compressor blade design [ASME PAPER 68-FE-28]
05 p0697 A69-16070
- Rotating turbomachinery design to minimize fluctuating lift on isolated airfoils, presenting cascade geometry by quasi-steady analysis [ASME PAPER 68-WA-FE-12]
05 p0698 A69-16092
- Lifting force and moments acting on slender wing of finite span and arbitrary planform moving at constant mean velocity in unsteady flow
06 p0858 A69-17338
- Three dimensional atmospheric entry trajectories equations for satellite with aerodynamic lift, examining aerodynamic factors and bank angle effects
07 p1230 A69-19608
- Optimal lift and thrust control programs to maximize range of missile in horizontal flight
09 p1610 A69-22086
- Computerized design of optimal direct lift controller for aircraft and aerodynamic surfaces, using Kalman linear state regulator theory
12 p2014 A69-26765
- Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer
13 p2356 A69-27685
- Aerodynamic lift and moment fluctuations of sphere at supercritical Reynolds numbers measured by hot-wire anemometers, noting dependence on time
14 p2390 A69-29573
- Stabilizing methods for supersonic aircraft, noting effect of aircraft characteristic parameters on magnitude of balancing coefficients of lifting force
16 p2735 A69-32127
- Lift and drag determination for moving rectangular coils over infinite plane sheet for magnetic suspension and guidance for rocket sleds
17 p2946 A69-33789
- Direct lift controller design for aircraft approach and landing by computer program based on Kalman linear state regulator theory
17 p2902 A69-34027
- Optimum pressure distribution and airfoil profiles for maximum lift without separation in incompressible flow determined by second order theory [AIAA PAPER 69-739]
18 p3083 A69-34401
- Vortex wakes behind high lift wings, considering effects of height above ground and various tunnel heights and widths for STOL operations [AIAA PAPER 69-740]
18 p3083 A69-34405
- Wind tunnel tests of swept wing fighter aircraft for transonic buffet onset lift coefficient resulting from camber and leading and trailing edge deflection [AIAA PAPER 69-793]
19 p3238 A69-36297
- Rotating turbomachinery design to minimize fluctuating lift on isolated airfoils, presenting cascade geometry by quasi-steady analysis [ASME PAPER 68-WA-FE-12]
19 p3240 A69-36419
- Lift engine inlet development for XV-4B aircraft, discussing tests, pressure distortion and recovery during simulated hover and transitional flight [AIAA PAPER 68-636]
20 p3585 A69-37150
- Potential flow theory applied to determination of airfoil separated vortex flow and maximum lift and Reynolds number dependence
20 p3459 A69-37421
- Schweikhard method for measuring changes in lift, drag and pitching moment of fixed wing aircraft as function of distance from ground
20 p3462 A69-37423
- Engine powered lift civil aircraft certification factors taking into account traffic growth, accident rates, learning rate and acceptable safety level
22 p3862 A69-39962
- Lift coefficients of idealized tunnel type ram wing consisting of truncated semiconical shell computed by lifting surface theory
22 p3860 A69-40819
- Optimum climb trajectories at constant lift coefficient, using variational methods with final altitude and final flight path angle as end point constraints
24 p4254 A69-43727
- LIFT AUGMENTATION**
Lift augmentation by lateral blowing over lifting surface, discussing wind tunnel pressure tests on wings, flaps and stabilizers [AIAA PAPER 69-193]
07 p1051 A69-19554
- Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals [ASLE FICFS PREPRINT 27]
15 p2621 A69-30492
- Monograph on interaction between primary and jet flapped secondary airfoils covering line-vortex use for lift augmentation, aerodynamic characteristics, etc
19 p3242 A69-36820
- Flight control and stability of STOL transport aircraft with powered-lift boundary layer control system augmented lift
20 p3462 A69-37513
- LIFT COEFFICIENTS**
U AERODYNAMIC COEFFICIENTS
- LIFT DEVICES**
Subsonic lifting surface analysis accuracy tested by planar circular wing theory
04 p0543 A69-14818
- Unsteady aerodynamic forces on coplanar lifting surfaces in subsonic flow induced by wing/horizontal tail interference
04 p0543 A69-14819
- Design of high lift devices in relation to fixed wing subsonic transport aircraft, considering lift, drag, stability and control
05 p0695 A69-15544
- Flight evaluation of direct lift control on DC-8 super 63 jet transport
06 p0867 A69-17666
- Numerical method for attacking-lifting problems of general three dimensional wing executing arbitrary motion in potential flow [AIAA PAPER 69-23]
06 p0862 A69-18040
- Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties [AIAA PAPER 69-37]
06 p0865 A69-18167
- Lifting pressure distributions on oscillating surfaces in subsonic flows using doublet lattice method for various surface geometries [AIAA PAPER 68-73]
09 p1430 A69-21946
- Lifting surface theory for cascade of blades in subsonic shear flow, determining blade surface pressure distribution, distinguishing shear and uniform flow compressibility effects
16 p2731 A69-31592
- Weight estimation of structures and systems unique to VTOL aircraft, considering remote fan and high bypass engine lift propulsion concepts [SAWE PAPER 784]
18 p3090 A69-34868
- Monograph on weight and performance tradeoff methodology for selection of high lift devices [SAWE PAPER 761]
18 p3091 A69-34906
- JR 100 F lift jet engines for Japanese national aerospace laboratory produced as part of VTOL developing program
21 p3785 A69-38608
- Book on optimal aerodynamic shapes by means of variational method, covering conventional and triangular thick wing lift systems in supersonic flow
21 p3644 A69-39667
- LIFT DISTRIBUTION**
U FORCE DISTRIBUTION
- LIFT DRAG RATIO**
Hypersonic lifting body configurations for maximum lift drag ratios and subject to volumetric efficiency, nose heating limit and skin friction constraints
02 p0189 A69-12378
- Lift efficiency of and stabilization by square flare on high speed missile, comparing wind tunnel measurements with circular conical flare
02 p0190 A69-12544
- Variable geometry features applied to lifting spacecraft to overcome inherent incompatibility and provide low speed and tangential landing capabilities [AIAA PAPER 68-1164]
03 p0520 A69-13562
- Space vehicle flight automatic optimization for maximum L/D reentry, considering perturbations causing trajectory inclination changes during roller coaster reentry
05 p0830 A69-16045
- Lift drag ratio for conical sector with V-shaped wing at zero incidence
06 p0858 A69-17340
- Lift drag ratio attainable by optimal transversal contour slender conical lifting body at hypersonic speeds
06 p0861 A69-17640
- Approximation formula for calculating descent speed and lift-drag ratio
10 p1633 A69-22873
- Base drag effects on maximum lift drag ratio airfoils determined for moderate supersonic laminar and turbulent flows
10 p1633 A69-24060
- Hydrofoils fully submerged in seaway at up to 140 knots and constant Froude number, discussing foils lift/drag ratios as function of speed and submergence
11 p1871 A69-25122
- Linear and second order theory for maximum lift to drag ratio airfoils at moderate supersonic speed, considering length, thickness and area
13 p2199 A69-28214
- Space vehicle flight automatic optimization for maximum L/d reentry, considering perturbations causing trajectory inclination changes during roller coaster reentry
20 p3618 A69-37954
- Cone-conical-frustum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft
21 p3644 A69-39237
- Hypersonic lifting bodies with high lift-drag ratio, presenting flat-top wing-body combination aerodynamic characteristics
21 p3645 A69-39793
- Wingtip mounted propellers effect on wing lift and induced drag, varying lift to drag ratio by changing in-flight aspect ratio
24 p4250 A69-43713

Wind tunnel model one component magnetic support and balance system for sphere drag investigation at subsonic Mach numbers
[AIAA PAPER 68-401] 24 p4298 A69-43714

LIFT FANS

Tip turbine driven flush thin profile wing or platform lift fan design and operating considerations
05 p0696 A69-15554

Hovering fan powered V/STOL aircraft effects on objects on ground, discussing related dust and debris problems
05 p0701 A69-15565

Aerodynamic effects of lift jet and lift fan inlets in transition flight, analyzing inlet momentum lift, inlet lip lift and drag
[AIAA PAPER 68-637] 12 p2014 A69-26767

Integrated lift, propulsion and control in Aeromobile air cushion vehicle, considering ram wing and gimbal fan plenum chamber vehicles
13 p2201 A69-27543

Plenum chamber obstructions influence on hovercraft lift fan performance, discussing tests and losses due to flat plate at impeller outlet
13 p2202 A69-27546

Turbofan V/STOL with separate lift units for takeoff and landing, discussing commercial and military applications, cost effectiveness and operational characteristics
13 p2203 A69-28354

Self contained lift fan concept and circulation controlled rotor aircraft power plants for high speed VTOL transports
17 p2897 A69-33208

VTOL aircraft lift systems, propulsion, airframes, dynamic and aerodynamic characteristics, control systems, missions, safety, configurations and environment
[AIAA PAPER 68-977] 20 p3461 A69-37149

RB 202 self contained lift fan engine design for high speed interurban civil VTOL operations, considering weight, cost, noise and fuel consumption
22 p3862 A69-39933

LIFTING BODIES

NT HL-10 REENTRY VEHICLE

NT M-2 LIFTING BODY

NT M-2F2 LIFTING BODY

NT RESEARCH AIRCRAFT

NT X-24 AIRCRAFT

Polygonal wing planform pressure distribution in incompressible flow calculated on basis of lifting surface theory
01 p0008 A69-11298

Hypersonic lifting body configurations for maximum lift drag ratios and subject to volumetric efficiency, nose heating limit and skin friction constraints
02 p0189 A69-12378

Hypersonic lifting body optimization under single and combined constraints of volumetric efficiency, heating and skin friction, using numerical search routine
[AIAA PAPER 68-1157] 03 p0362 A69-13557

In-flight measurement of shear, bending moment and torque on lifting or control surfaces and loads on nose and main landing gear
04 p0677 A69-14842

Plane subcritical flow past lifting aerofoil analyzed using conformal mapping and difference scheme on annular mesh inside circle
06 p0859 A69-17470

Lift drag ratio attainable by optimal transversal contour slender conical lifting body at hypersonic speeds
06 p0861 A69-17640

Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties
[AIAA PAPER 69-37] 06 p0865 A69-18167

Hodograph for lifting airfoil with subsonic velocity at infinity, using Chaplygin compressibility law for computation
[ONERA-TP-631] 07 p1049 A69-18416

Lift augmentation by lateral blowing over lifting surface, discussing wind tunnel pressure tests on wings, flaps and stabilizers
[AIAA PAPER 69-193] 07 p1051 A69-19554

Aeroelastic divergence and stability range for cantilevered and end supported structures computed as function of forward resistance and lift caused by wind
16 p2870 A69-31557

Hypervelocity glide vehicle optimum maneuvers, finding lift optimal control law for maximization of final velocity or altitude
17 p3025 A69-32836

Circulation controlled rotor aerodynamics with tangentially ejected air from surface slots of lifting body,

noting performance at advance ratios and thrust coefficients
18 p3089 A69-35232

Second order theory for steady or unsteady subsonic flow past slender lifting bodies of finite thickness
[AIAA PAPER 68-75] 20 p3458 A69-37182

Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance
[AIAA PAPER 69-887] 21 p3647 A69-39413

Lift coefficients of idealized tunnel type ram wing consisting of truncated semiconical shell computed by lifting surface theory
22 p3860 A69-40819

Numerical integration of double integral with Cauchy type singularity for calculation of aerodynamic or hydrodynamic load on lifting body
23 p4182 A69-41913

Nonlinear longitudinal dynamics of lifting orbital vehicle in near circular orbit, considering translational motion components effecting orbital decay or dilatation
[AAS PAPER 69-244] 24 p4392 A69-42857

LIFTING REENTRY VEHICLES

NT HL-10 REENTRY VEHICLE

Lifting body type M2-F1 and M2-F2 aircraft enabling astronauts to make own landings at choice airport
03 p0366 A69-13367

Porous ceramic heat shields for lifting reentry vehicles, noting crack propagation resistance and load redistribution
[SAE PAPER 680643] 03 p0453 A69-13457

Variable geometry features applied to lifting spacecraft to overcome inherent incompatibility and provide low speed and tangential landing capabilities
[AIAA PAPER 68-1164] 03 p0520 A69-13562

Boundary layer transition to turbulence shown to have influence on magnitude of lifting reentry body heating rate
[AIAA PAPER 68-1155] 03 p0416 A69-13674

Lifting body entry vehicles in low speed flight test program for determining handling qualities, discussing M2-F2 glide flights
05 p0702 A69-15571

Lifting reentry spacecraft performance examined in context of realistic aerodynamic characteristics at low flight Reynolds numbers
06 p0860 A69-17634

Lifting reentry dynamic stability of flare stabilizers and flap controls
[AIAA PAPER 69-182] 06 p1017 A69-18053

Angle of attack and bank angle for orbiting reentry glider, determining optimal trajectory for ground landing at given point
[ICAS PAPER 68-41] 11 p1966 A69-24750

Intermittent flow facilities for ballistic and lifting reentry flight simulation including shock tubes, ballistic ranges and shock and gun tunnels
11 p1863 A69-25016

Lifting entry concepts for return from earth orbit, discussing deceleration, heating and heat protection
11 p1968 A69-25720

Thermostructural simulation of lifting vehicle panel design, considering safety and trajectory shaping of flying laboratory
12 p2060 A69-26836

Steerable landing gear system consisting of freely casting corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] 19 p3243 A69-35639

Steepest ascent convergence improved in orbital glider reentry trajectories optimization problems, discussing bang-bang and cosine control-variable changes
19 p3398 A69-35666

Aerodynamic performance tests of autotative unpowered rotor entry vehicle model at various Mach numbers and angles of attack
[AIAA PAPER 68-950] 20 p3458 A69-37155

Subsonic glide landing approach guidance for unpowered lifting vehicles, using perturbation feedback and approximation of heading and position coordinates
[AIAA PAPER 69-865] 21 p3763 A69-39391

Hypersonic lifting bodies with high lift-drag ratio, presenting flat-top wing-body combination aerodynamic characteristics
21 p3645 A69-39793

Boundary layer transition to turbulence shown to have influence on magnitude of lifting reentry body heating rate
[CIAA PAPER 68-1155] 24 p4300 A69-43251

Adaptive control function technique to design lateral stability augmentation system for hypothetical manned, lifting body entry vehicle
24 p4394 A69-43301

LIFTING ROTORS

Tip turbine driven flush thin profile wing or platform lift fan design and operating considerations
05 p0696 A69-15554

Small and full scale model tests for feasibility of retracted rotor aircraft for high speed flight
[AIAA PAPER 69-219] 07 p1055 A69-19550

Wake deformation for horizontal and vertical cylinders present in wake of hovering rotor, using flow visualization technique
[AIAA PAPER 69-228] 07 p1051 A69-19551

Helicopter rotor wake distorted geometry prediction by analytical method, noting experimental results for rotor in forward flight
[AIAA PAPER 69-196] 07 p1051 A69-19553

Lifting rotor blades flapping response to atmospheric turbulence, discussing time averaging and perturbation schemes
[AIAA PAPER 69-206] 07 p1057 A69-19577

Lifting rotor dynamics and undesirable characteristics reduction, discussing feedback control systems for pitch and roll
[AHS PAPER 340A] 17 p2899 A69-33509

Lifting rotors with thrust or tilting moment feedback control, deriving blade equations of motion
[AHS PAPER 340] 17 p2899 A69-33510

Discrete sound radiation theory considering rotational noise as dominant rotor noise and stressing fluctuating forces as typical of helicopter rotor
18 p3090 A69-34323

Air mass mechanics, local lifting surface element aerodynamic response and aeroelastic blade response problems in lifting rotor technology
23 p4061 A69-41370

NT COHERENT LIGHT

NT DAYGLOW

NT GEGENSCHIEIN

NT GEORONAL EMISSIONS

NT NIGHTGLOW

NT SKY RADIATION

NT SUNLIGHT

NT TWILIGHT GLOW

NT ZODIACAL LIGHT

Frequency mixing of IR signals with visible laser light in nonlinear crystals to detect IR signals
01 p0089 A69-10180

Continuous nonresonant visible radiation from Ar ion laser by utilization of wide bore, wall stabilized gas discharges, noting long time frequency stability
01 p0091 A69-10815

Photoinhibition of cell division and growth in Euglenoid flagellates by fluorescent and incandescent visible light
01 p0014 A69-10903

UV and visible light interaction effect on biological activity of Paramecia unicellular infusoria, noting cell division rates and cell deaths
01 p0017 A69-11085

Test method to compare grazing incidence X ray telescope performance in visible light and in X rays
02 p0248 A69-11736

Absorption oscillator strengths of Ba 2 lines in UV and visible spectral regions, using cascade arc in argon with barium vapor
02 p0242 A69-11872

Unsteady phenomena during light pulses interaction in media with polarization, considering group delay, dispersion spreading and space-time analogy
02 p0259 A69-12646

High power output CW laser oscillation measured at 4416 A laser transition in Cd 2 using single isotope of Cd 114
02 p0259 A69-12653

Optical radiation from galaxies, discussing starlight, nonthermal flux and radiation from hot gas
02 p0326 A69-12706

Parametric light generation employing KDP nonlinear crystals with mechanically tuned frequency
03 p0437 A69-13045

Q switched lasers powerful outputs obtainable at sum frequency, discussing frequency mixing in nonlinear dispersive media
03 p0438 A69-13047

Aperture effects in nonlinear optical processes associated with second harmonic and parametric generation of light
03 p0439 A69-13056

Intensity of visible and UV light from beam of positive deuterium molecular ions excited by passage through thin C foil
03 p0471 A69-13166

Visible light extinction properties of continental and maritime air, probing urban, desert and oceanic atmospheres with stable photodiode radiometer
04 p0596 A69-14280

Continuous radiation production in positive plasma column of inert gas considered as manifestation of plasma electrons bremsstrahlung from interaction with gas atoms
05 p0800 A69-15741

Light valving techniques applied to large screen display of computer generated video information, noting electron beam control mechanism for transmitted light
06 p0928 A69-17922

Angular distribution measurements of visible and near IR radiation reflected from carbon dioxide cryodeposits formed on liquid nitrogen cooled surface in vacuum
[AIAA PAPER 69-63] 06 p0959 A69-18131

Visible radiation scattering around Venus spherical atmosphere computed on basis of Venus 4 and Mariner 5 data
07 p1213 A69-18609

Picosecond light pulse measurement by two photon excitation of photographic film
08 p1313 A69-20165

Spherical wave generalization for plane light wave propagating in turbulent medium, describing circular objective averaging effect on intensity fluctuations
08 p1351 A69-20438

Image orthicon tube to detect low intensity pulsed light signals, formulating SNR in terms of resolvable image points
08 p1317 A69-21085

Optical parametric noise in water by ruby laser beam for phase matched four photon process
09 p1539 A69-21751

Light waves refractive index distribution from balloon sounding data found to decrease with height in winter regardless of time of day
09 p1536 A69-21917

Chromium concentrations induced line shift in ruby single crystals spectra, determining principal lines position
10 p1744 A69-23321

Total solar eclipse of September 22, 1968 in Siberia, discussing instrumentation and solar light radiation, corona, prominences, spicules, etc
10 p1782 A69-23696

Light absorption of In and Ga thin films in various gaseous media, noting displacement of irregular absorption band
10 p1747 A69-23792

Pulsed tunable lasers, emphasizing dye lasers for visible and near visible light in specialized spectroscopy
11 p1893 A69-24343

Visible imaging of IR objects by conversion of IR frequency to visible with sum-frequency generation within nonlinear dielectric medium
11 p1897 A69-25037

Absorption characteristics of thin metallic films in standing light wave for mode selection and conversion in lasers
12 p2104 A69-26024

High speed streak camera for recording fast processes, noting changeability from optical to UV spectral range
12 p2085 A69-26155

Holographic recording in spatially incoherent light, describing hologram reconstruction method
12 p2090 A69-26293

Electric vector transformation for three dimensional photoelastic medium irradiated by light in reverse direction, noting optical systems of birefringent plates and rotators
12 p2180 A69-26339

Light interaction with stacked leaves and plant canopy, determining reflectance and transmittance
12 p2097 A69-26985

Law of optical radiation and photometric characteristics of quasars, noting photometric effect of strong emission lines and color dependence on red shift
12 p2168 A69-27052

Light curve shape as function of color, changing period and polarization angle of Crab Nebula optical pulsar
12 p2172 A69-27170

Vela pulsar investigated for optical pulsations, noting negative result for expected brightness
12 p2173 A69-27173

Temporal correlations in light field from laser at threshold of oscillation, measuring He-Ne CW gas laser by photoelectron count
13 p2271 A69-27399

Extragalactic radio sources parameters analyzed for distinguishing quasars from dominant luminous radio galaxies by radio spectra
13 p2348 A69-27801

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies
13 p2318 A69-27885

Hypervelocity impact flash resolved into submicrosecond continuum radiation pulse succeeded by slow rising long duration light pulse from neutral atomic line emission
[AIAA PAPER 69-364] 13 p2313 A69-28296

Electrical conductivity and optical spectra changes of strontium titanate single crystals under constant electric field action
15 p2666 A69-30043

Light intensity during coherent scattering based on complex refraction index of medium, noting scattering by clouds and diffraction by semitransparent hole
15 p2635 A69-31108

Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships
15 p2556 A69-31336

Spectrum of clipped noise in optical spectroscopy, considering double clipping at zero photon number
15 p2571 A69-31486

Photoelectric observations of W Ursae systems, including observed and computed times of minimum light and period change
16 p2863 A69-32399

Metagalactic light measurements by lunar based night sky photography
18 p3189 A69-34242

UBV photoelectric investigation on southern globular clusters NGC 2808 and 1851, presenting star magnitudes and colors in tabular form and estimating reddening
18 p3190 A69-34290

Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses
18 p3200 A69-34994

Intensity changes in visible sidelight emission from carbon dioxide laser switched on and off, calculating vibrational temperatures
18 p3153 A69-35243

Photomechanical and electromechanical effects in semiconductors, considering indentation microhardness decrease caused by light irradiation or electric field
19 p3386 A69-36526

Photographic photometry investigation of Light distribution in spiral galaxies NGC 681, 972 and 1084, discussing mass distribution
20 p3599 A69-37476

Microorganisms death by exposure to high intensity visible and UV light, discussing effect of endogenous photosensitized oxidation on caratoid- containing Rhodotorula glutinus
20 p3475 A69-37613

Eye elemental response to individual frequency jumps in oscillations of light, noting transient effect polarity
21 p3650 A69-38320

Diurnal entrainment deviations and atmospheric turbulence effects on flash photographs from Geos 1
21 p3793 A69-38339

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies
21 p3782 A69-39144

Horizon definition for Apollo space navigation references from examining earth atmosphere visible and far IR spectrum
[AIAA PAPER 69-869] 21 p3763 A69-39395

Luminance additivity for human visual system in terms of photometric methods based on direct brightness matching, incremental threshold, etc
22 p3880 A69-40849

Luminance threshold for compound stimulus detection measured as function of two components relative luminance
22 p3880 A69-40852

Emission lines in optical spectra of radio galaxy nuclei, considering time dependent energy release nature
22 p4034 A69-41174

Flashlamp-excited organic dye lasers capable of tunable emission throughout most of visible spectrum
22 p3966 A69-41219

Heat resistant materials integral and spectral radiative properties in IR and visible regions determined by calorimetry and IR spectrometer
23 p4237 A69-41329

Optical ultrashort pulse compression with paired diffraction gratings in terms of phase shift frequency dependence and Fresnel diffraction analogy
23 p4171 A69-41392

Extragalactic universe major constituents and physical properties of normal, radio and compact galaxies, discussing missing matter existence
23 p4217 A69-42317

Law of optical radiation and photometric characteristics of quasars, noting photometric effect of strong emission lines and color dependence on red shift
24 p4375 A69-42552

Photosynthesis enhancement in seaweed after alternate exposure to gas laser and tungsten lamp white light passed through IR narrow band filter
24 p4270 A69-42580

Rotating mirrors used for light signal Doppler frequency shifting
24 p4351 A69-43806

LIGHT ABSORPTION
U ELECTROMAGNETIC ABSORPTION
LIGHT ADAPTATION

High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and subcortical zones
05 p0709 A69-16515

Darkness adaptation, observing relationship between left and right eye
16 p2745 A69-32448

High intensity light adaptation effects on visibility of raster scan, TV type and avionic displays for symbol luminance needs
16 p2746 A69-32788

High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and subcortical zones
18 p3096 A69-34734

Pigeon visual adaptation to flickering light, attributing ERG b-wave postadaptation rebound to retina bipolar cells inhibition
23 p4084 A69-41463

Rabbits long term reversible retinal function changes due to short high intensity light flashes, noting ERG suppression
23 p4084 A69-41468

Mathematical model construction to simulate light adaptation in human vision based on Maxwell disk experimental results
23 p4110 A69-41985

LIGHT AIRCRAFT
NT G- 91 AIRCRAFT
NT OH- 6 HELICOPTER
NT SC- 7 AIRCRAFT

Light aircraft all-weather flight feasibility, discussing storm and clear air turbulence detection and icing prevention
01 p0111 A69-11049

Fiat G.91Y subsonic light tactical fighter, discussing fixed armaments and weapons facilities
02 p0193 A69-12679

Light passenger aircraft of glass fiber reinforced plastic, using hose construction technique
03 p0454 A69-13822

Light aircraft hazards due to trailing vortex generated by heavy transport aircraft, suggesting specific procedures for takeoff, landing and flight phase
[SAE PAPER 680220] 04 p0549 A69-14930

LFU 205 light aircraft design and construction with fiberglass reinforced plastic
08 p1321 A69-20867

Human survivability in severe light plane slow speed accidents due to stalling, turning, takeoff or approach, discussing crash load vectors and magnitude
[SAE PAPER 690336] 11 p1822 A69-24492

Light aircraft and helicopter manufacturing methods, design concepts and materials, discussing aluminum airframes, riveting, fiberglass, UV curing, etc
[SAE PAPER 690341] 11 p1822 A69-24498

On-off multiple tank fuel systems for single and twin engine light aircraft, noting fail-safe design
[SAE PAPER 690334] 11 p1825 A69-24502

Gas turbine propulsion engines for small single engine helicopters, discussing costs, performance and FAA tests
[SAE PAPER 690310] 11 p1942 A69-24513

Performance correction and nonstandard day performance prediction for analyzing turbocharged reciprocating aircraft engines in light aircraft applications
[SAE PAPER 690309] 11 p1942 A69-24514

Short range passenger aircraft, considering payloads, weights and economical classification
13 p2201 A69-27294

FAA additional airworthiness standards for small aircraft in air taxi and commercial operations, noting safety levels
[SAE PAPER 690320] 15 p2549 A69-30090

Light aircraft emergency downed position indicators installation program, discussing transmitter minimum performance standards, listening watch insurance, etc
17 p2931 A69-34102

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts
[AIAA PAPER 69-766] 19 p3433 A69-35657

All-plastic light passenger aircraft with inflated tube construction for shell, discussing design and performance
21 p3728 A69-38461

Automated design system producing wire format data for cabling avionics subsystems of light attack aircraft
[AIAA PAPER 69-976] 22 p3912 A69-40356

Cockpit noise intensity during normal cruising operations at various altitudes for 15 different single engine general aviation light aircraft
23 p4102 A69-41676

LIGHT AMPLIFIERS

Gas laser amplifier nonlinear behavior in axial magnetic fields and operating with two polarized light signals of strong or weak intensities
01 p0088 A69-10010

Reflection elimination for single dielectric film on solid laser material substrate, calculating reflectance as function of frequency
02 p0256 A69-11926

Bleaching of absorption hologram diffraction gratings for improved light efficiency, discussing bleaching materials results
04 p0596 A69-14284

Electron radiation temperature measurement in carbon dioxide laser with N and He additions by microwave technique, noting average electron energy and optical gain
04 p0611 A69-14445

Nonstationary nonlinear wave phenomena in ultrashort high intensity light pulse formation, discussing nonstationary stimulated Raman scattering and picosecond pump reduction of Raman amplification
[IEEE PAPER H-5] 05 p0774 A69-16316

Laser amplifiers and oscillators, discussing conversion of active atom excitation energy into light energy
06 p0937 A69-18006

Tandem amplifier system of glass and selenium-oxychloride liquid lasers, discussing input power/output pulse relation and population inversion density measurement
07 p1147 A69-18487

Beam distortion in low order Gaussian-Laguerre modes propagating through saturable laser amplifier, noting uniform and Bessel small signal gain distributions
[IEEE PAPER J-3] 07 p1152 A69-19065

Parametric light interactions application to optics stressing nonlinear spectrograph and cavity and traveling wave oscillator
[IEEE PAPER K-5] 07 p1152 A69-19066

Nonlinear amplification of powerful light pulses in Nd glass
08 p1323 A69-19946

Small signal pulsed gas laser amplification limits, discussing time dependency, temperature effects, relaxation rates and energy transfer
08 p1324 A69-20098

Carbon dioxide laser combining gas flow with fluid mixing to achieve high gain
10 p1701 A69-22954

Ultrashort light pulses nonlinear amplification in medium with finite transverse relaxation time and linear radiation losses
10 p1702 A69-23139

Amplification factor of He-Ne traveling wave light amplifier, discussing frequency stability and telescopic wave front broadening for uniform radiation distribution
11 p1894 A69-24623

Carbon dioxide-N-He laser amplifier, noting gain time dependence and thermal relaxation rate after gas heating
11 p1899 A69-25054

Gain decrease due to saturation during amplification of pulses from Q switched carbon dioxide laser oscillator, noting rotational sublevels relaxation rate
11 p1899 A69-25055

Single frequency sealed off carbon dioxide amplifier, giving saturated gain
12 p2109 A69-26640

Optical IR yttrium-iron garnet rectifier increasing light intensity and system Q factor at low external magnetic field
17 p2981 A69-33117

LIGHT BEAMS

Continuous laser beam power output meter based on wire resistance thermometry method
01 p0081 A69-10822

Laser beam phase fluctuations for propagation through turbulent atmosphere, noting interferometer for simultaneous measurements for pairs of rays
01 p0091 A69-10845

Gas lens distortion of Gaussian light beam in sequence of lenses with same aberration, using shuttle pulse technique
01 p0120 A69-10849

One dimensional expansion of laser beam, using pairs of prisms with continuous wave output
01 p0091 A69-10852

Light field inside deep layers of turbid medium illuminated by narrow beam, discussing beam deviations inside medium, deviation dispersions and correlation coefficient
02 p0274 A69-11449

Bragg reflection of electrons by standing light waves of giant pulse laser
02 p0255 A69-11833

Mean square amplitude and phase fluctuations for propagation of light beam with Gaussian amplitude distribution through medium with randomly varying refractivity
02 p0208 A69-12308

Tubular light beam waveguide properties, studying changes related to heating and ionization of medium
02 p0258 A69-12644

Pumping beam width influence on optical range resonator excited coupled oscillations, deriving approximate equations
03 p0437 A69-13043

Ruby laser light beam self focusing in sodium chloride and potassium bromide crystals
03 p0438 A69-13051

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity
03 p0506 A69-13090

Ionizing action of radiation due to heating substance in laser beam focus, discussing highly ionized plasma production
03 p0479 A69-13998

Kerr effect and electrostriction during self focusing of high power laser beam in gases and liquids
04 p0611 A69-14792

Scanned laser beam display techniques based on cathode ray tube technology, noting flying spot scanner and beam deflection
04 p0600 A69-15028

Thermal self actions of CW laser beams in solids and liquids with wind or convection flow, discussing self focusing and defocusing
[IEEE PAPER E-12] 05 p0774 A69-16311

Atmospheric vertical density and pressure profiles determined from satellite measurements of light beam phase shift and refraction angle
05 p0760 A69-16694

Electric and magnetic fields of narrow coherent polarized light beam in free space, noting longitudinal field components due to beam narrowness
05 p0777 A69-16789

Laser resonators, noting relation of light path between mirrors to half wavelength and line equivalence of lenses and resonators
06 p0937 A69-18005

Laser applications to situations requiring highly bunched high power density light beams
06 p0938 A69-18012

Electromagnetic field strength of narrow polarized monochromatic light beam, noting spatial curvature and twisting in beam current line
07 p1147 A69-18524

Velocity measurement by combination of Doppler principle and schlieren method involving reflection, refraction or diffraction of laser beam
07 p1135 A69-19259

IR beam profiles of carbon dioxide laser permanently recorded on foamed polystyrene
07 p1156 A69-19305

Micromachining with laser beam, choosing mirrors and lenses of optical system to provide uniform energy distribution for microwelding or hole boring
08 p1324 A69-19980

Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
08 p1352 A69-20745

Vaporization of mist of small droplets by intense light beam for droplet extinction rate proportional to absorbed radiant energy
09 p1539 A69-21346

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator
09 p1515 A69-21474

Low current arc discharge plasma diagnostics by light probe, analyzing deviation of resonance level population from equilibrium described by Saha equation
09 p1546 A69-21586

Laser beam optical scintillation under atmospheric turbulence conditions, showing log amplitude variance saturation and decrease
09 p1517 A69-22079

Laser beam scintillation at night over long atmospheric horizontal paths, showing log amplitude covariance observation in agreement with theoretical prediction
09 p1517 A69-22080

Fabry-Perot resonator and beam waveguide systems for laser beams, noting mode coupling and separation in laser optical systems
09 p1518 A69-22125

Passive electromagnetic circuit elements for laser light control such as circulators, isolators and phase shifters, discussing coherent light and polarization
09 p1518 A69-22127

Laser beam modulation and deflection methods involving control of amplitude, phase, frequency and direction, noting use of semiconductor p-n junctions
09 p1518 A69-22128

Gaussian laser beam reflection and refraction at curved interface between media of different refractive indices, considering tilted ellipsoidal interfaces
10 p1725 A69-23309

Imaging ultrasound by holography with reconstruction in light, comparing methods using scanned hologram and liquid surface
10 p1695 A69-23543

Sinusoidally modulated light beam propagation in turbid media, studying phase velocity and attenuation coefficient as function of modulation frequency
10 p1658 A69-23951

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media
10 p1725 A69-23971

Conventional and dual beam laser Doppler methods for velocity measurement of solids, liquids and gases
11 p1893 A69-24333

Laser beam for determining instrumental profile of high resolution double pass solar spectrograph, noting influence of slits width
11 p1893 A69-24431

Population inversion distribution and wave processes in optical amplifier, showing beam transformation of constant section and dependence on crystal characteristics
11 p1893 A69-24447

Holographic scanning technique for laser beam deflection, noting two and three dimensional raster scanning
11 p1885 A69-24847

Fluctuations in angle of arrival of laser and thermal radiation beams over near ground path
11 p1840 A69-25570

Three dimensional log amplitude and phase fluctuation distributions of collimated and focused Gaussian beams propagated through random inhomogeneous medium, evaluating mean-square values
12 p2130 A69-26393

Atmospheric effects on laser beam width, using Born approximation and Gaussian model to obtain TEM mode scattered power expressions
12 p2111 A69-27166

Optical detection signals optimization in optical pumping, discussing light beam propagation direction, spectral composition and polarization characteristics 12 p2111 A69-27180

Spiral trajectory winding rate of asymmetrical light beams in nonlinear media analyzed in geometric optics approximation, noting diffraction influence 13 p2298 A69-27662

Vertical refraction effect on gas laser beam propagation near earth surface under various meteorological conditions, comparing index for diffuse light 13 p2220 A69-27827

Weakly divergent intense light beam propagation in laminar optically inhomogeneous medium with self focusing possibility analyzed by perturbation theory 13 p2223 A69-28568

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity 14 p2516 A69-28772

Log amplitude fluctuations of laser beam in turbulent atmosphere, obtaining asymptotic expressions for near field of transmitter aperture 14 p2460 A69-29638

Plasma temperature measurement by resonant laser radiation absorption, assuming Saha-Boltzmann relation 14 p2501 A69-29954

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator 15 p2633 A69-30719

Combined distribution density of elevations and slopes for illuminated areas of stable statistically homogeneous random surface exposed to parallel rays beam 15 p2569 A69-30948

Laser amplifier nonlinear losses effect on light beam propagation, studying arbitrary waveform development into asymptotic steady state pulse /SSP/ 16 p2797 A69-32043

Multibeam transmission in optical beam waveguides by simulation, discussing intensity profiles phase fronts and cross scattering 17 p2974 A69-33400

Electron beam pumped semiconductor laser light beam amplitude and phase distribution, studying effects of inhomogeneous excitation by model 21 p3737 A69-39041

Optical properties of Gabor holograms with pure reference beam, discussing image reconstruction using He-Ne laser 21 p3726 A69-39624

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media 21 p3772 A69-39657

Steady state mathematical modeling of light field structure for narrow collimated light beams propagating in artificial dispersive media 22 p3981 A69-40245

Algorithm for numerical modeling by Monte Carlo method of diffusion bounded light beams in dispersive media, applying to light pulse in cloudlike medium 22 p3981 A69-40248

Holographic technique of coherent light field transformation with desirable phase distribution from laser light beams of arbitrary wavefront characteristics 22 p3950 A69-41115

Light field long term behavior in dispersive medium with finite optical thickness by asymptotic solution of unsteady transport equation 22 p3983 A69-41267

Reconstruction of three dimensional holograms without reference beam, noting thick layered Lippmann emulsions and dyed alkali halide crystals 23 p4166 A69-41969

Log amplitude mean value for Gaussian or laser-like optical beam propagating horizontally in turbulent atmosphere 24 p4282 A69-42970

Beam divergence and multimode laser visible emission influence on power and angular structure of second optical harmonic generated in KDP crystals 24 p4328 A69-43161

Gas lens system for periodic light beam waveguide, describing gas enclosed in circular cylinder and heated by specific temperature distribution 24 p4350 A69-43332

Angular distribution of He-Ne laser beam scattered by artificial fog from data by light detection devices at various angles 24 p4328 A69-43503

LIGHT DURATION

U FLASH
U PULSE DURATION
LIGHT ELEMENTS

Large hydraulic press forgings for light metals, discussing 50,000 ton machine used for Al alloys, tooling and die considerations [ASM PAPER C7-5.1] 04 p6004 A69-14521

Cosmic ray Li, Be and B nuclei measurements, analyzing differential energy spectra, L-M ratio, atmospheric and solar modulation 08 p1380 A69-20638

Model for nucleosynthesis of Li, Be and B in solar system from mass spectrometric measurements of high energy proton production of light elements 08 p1401 A69-20901

Stellar abundances of lithium, deuterium, beryllium and boron indicating nonthermal atmospheric origin 08 p1403 A69-20912

Inelastic interactions between Tev cosmic particles and light element nuclei, describing design and operation of measuring apparatus and derivable data 12 p2093 A69-26583

Photoelectric and visual minima tabulated for eclipsing binaries, calculating light elements 12 p2160 A69-26853

Solar system light elements investigated assuming Li, Be and B abundance as nuclear reaction products of high energy particles accelerated in early sun formation 13 p2354 A69-28495

Stellar light element abundances, discussing evolution models for various star types 16 p2866 A69-32816

Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models 24 p4352 A69-43123

Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei 24 p4352 A69-43125

LIGHT EMISSION

NT BIOLUMINESCENCE
NT CHEMILUMINESCENCE
NT ELECTROLUMINESCENCE
NT FLUORESCENCE
NT LUMINESCENCE
NT LUNAR LUMINESCENCE
NT OPTICAL RESONANCE
NT PHOSPHORESCENCE
NT PHOTOLUMINESCENCE
NT SHOCK WAVE LUMINESCENCE
NT THERMOLUMINESCENCE
NT X RAY FLUORESCENCE

Light emission and transmission generated from laser interaction with lithium hydride in vacuum, noting laser energy variations effects 01 p0127 A69-10281

Continuous and time-resolved absorption and emission spectra studies produced by exploding wires in gases, discussing effects of environment, pressure and electrical energy 01 p0118 A69-10664

Auroral emission rates and heating effects as function of altitudes 02 p0235 A69-11426

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals 02 p0257 A69-12560

Emitted light and excited state populations resulting from two electron collisional radiative recombination related to free electron density 03 p0469 A69-12923

Diurnal, magnetic and solar cycle dependences of auroral emission variations and auroral occurrence 03 p0420 A69-13325

UV induced excited-state properties of DNA using optical emission and electron spin resonance methods 03 p0372 A69-13488

Bistable operating mode of GaAs semiconductor laser involving light emission shifts 03 p0441 A69-14175

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics 04 p0560 A69-15376

Quasar and radio galaxy evolution, discussing energy release rate and particle acceleration effects on radio and optical emissions 05 p0822 A69-15852

Ratio of volume emission rate of 5577 A photons to volume emission rate of one band of positive nitrogen molecule first negative system in aurora 05 p0756 A69-16360

Conversion of emission from pulse tube using neodymium laser with luminophor solution filled active element, discussing pumping nonlinear absorption kinetics 05 p0777 A69-16373

Flaming auroras observations with auroral image orthicon TV systems, calculating electron release points on field line of station 05 p0758 A69-16413

Red light emitting p-n junctions in GaP fabricated by epitaxial growth 06 p0979 A69-16999

Electron impact excitation cross sections for emission from first negative bands of positive N molecule ion 06 p0961 A69-17135

GaAs IR emitters efficiency due to semiconductor material band structure 06 p0894 A69-17248

Light generation by laser organic dye liquid solution with negative absorption on activator molecules and induced combination scattering for solvent molecules 06 p0933 A69-17256

Frequency doubling of laser light with variable Q switched resonator 07 p1158 A69-19753

Energy dissipation of solar particles in atmosphere for 3914 and 5577 A bands, computing light emissions associated with PCA 08 p1378 A69-20186

Properties of ion implanted GaAs diodes fabricated at room temperature, analyzing light emission, resistance and breakdown voltage [ECS PAPER 172] 08 p1284 A69-20369

Time dependent behavior of atomic light emitted from pulsed helium afterglow, noting absorption measurements and spectrometric system 08 p1356 A69-20743

Formation and characteristics of flash produced in air by single pulse of Q switched ruby laser, using holographic interferograms 08 p1317 A69-21022

Ratio of volume emission rates of 5577 A and band of positive N molecular ion first negative system for use in auroral observations 09 p1491 A69-22607

Optical flashes recorded from Crab Nebula M1 close to central double star with periodicity equal to radio pulses discovered earlier 11 p1962 A69-25250

Poisson formula in double logarithmic approximation for photon emission cross section in analysis of bremsstrahlung involving high energy particles 11 p1922 A69-25758

Photochemical attitude control rocket adaptable to self contained command signal or remote signal transmission, discussing light irradiation of propellant for thrust control 12 p2148 A69-26801

Optical radiation detection from pulsar PSR 0833-45 associated with supernova remnant in Vela, noting UV excess from plates using U and B filters 13 p2337 A69-27516

Auroral luminosity determination by two photometers on ESRO 1 satellite 13 p2253 A69-27752

Photon emission from highly relativistic stars, using computed differential light delays to calculate blurring of spherically symmetrical emission pulses 13 p2350 A69-27825

Light emission intensity correlation functions associated with LF oscillations in beam plasma discharge 14 p2498 A69-29814

Aurora electron and proton excitation patterns determined spectroscopically, discussing ground based observations of emission geomagnetic latitude-time distribution 15 p2593 A69-30017

Current effects on quantum efficiency of gallium phosphide junction diodes emitting red light 15 p2575 A69-30174

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals 15 p2633 A69-30257

Sco X-1 fluctuating optical and X ray emission observed simultaneously, determining total energy flux and plasma radius and density 15 p2676 A69-30885

Close binary system components approximated by two nonsimilar ellipsoids, obtaining interpretation of light curves 15 p2695 A69-30957

LIGHT COMMUNICATION

U OPTICAL COMMUNICATION

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics
16 p2752 A69-32123

Pulsating and flaming auroral patches recorded by image intensifier vidicon camera, calculating upward field aligned speeds for luminosity enhancement
16 p2870 A69-32305

Prebreakdown and breakdown electrical properties and light emission during destructive breakdown in thin film capacitors
16 p2761 A69-32323

Electromagnetic /ULF, VLF/ and light emissions development during magnetic substorms, discussing varied pulsations present in development phases
16 p2788 A69-32648

Nanosecond optical pulses from Crab pulsar NP 0532 detection indicating negative observations
16 p2865 A69-32801

Emission intensity ratio change as function of polar auroral height compared to variation in atmospheric concentration ratio of oxygen to nitrogen
17 p2963 A69-33956

Ionospheric processes associated with changes in polar aurora height, noting glow in E layer and soft electron emission into earth atmosphere
17 p2964 A69-33957

Light curve of pulsar NP 0532 represented with oblique rotator hypothesis, assuming concentrated emission at opposite spots on star
18 p3192 A69-34321

White light solar corona brightness distribution observations /1964-1967/, considering solar radio flux relationship and equatorial electron densities
18 p3205 A69-35394

Parametric conversion kinetics of monochromatic light waves in nonlinear crystals, using quantized electromagnetic field to study amplification and generation
19 p3332 A69-35870

Light emitting diodes /LED/, discussing operating voltage vs color, diode materials and applications
20 p3505 A69-37702

Ionospheric currents geophysical DC electric fields measurement from sounding rockets, indicating anticorrelation with auroral luminosity
21 p3710 A69-38508

Coherent light emission by molecules excited by laser pulses having duration comparable to active medium polarization relaxation time
21 p3737 A69-38999

Quantitative criteria imposed on balloon measurements of auroral emissions from Kiruna, considering times of sunrise and sunset at different altitudes
21 p3716 A69-39250

Nonlinear intensity transitions involving order of magnitude increases in visible luminosity of RF generated plasmas, noting inductive field and electron density influence
23 p4196 A69-41546

Auroral short period pulsations in 6300 A O I, discussing percentage modulation, quenching rate, etc
24 p4309 A69-43171

Ionization and light emission cross sections for collisions of protons and hydrogen atoms with atmospheric nitrogen used to analyze auroral events
24 p4368 A69-43177

LIGHT GAS GUNS

Variable resistance strain gages for study of light gas guns operating characteristics, including chamber pressure and piston velocity
19 p3306 A69-35736

LIGHT INTENSITY

U LUMINOUS INTENSITY

LIGHT MODULATION

NT ULTRASONIC LIGHT MODULATION

Laser beam spectra for modulation by electrooptic Doppler shift, considering sawtooth and triangular functions for applied electric field
01 p0091 A69-10843

Optical modulation near intrinsic edge in n-type bulk GaAs due to Franz-Keldysh effect, noting carrier production by photon initiated excitation
02 p0300 A69-12650

Laser display technology, discussing experimental systems, light sources, modulation and scanning
03 p0431 A69-13850

Transverse electro-optical effect in piezoelectric crystals, using light modulation
04 p0639 A69-14427

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics
04 p0560 A69-15376

Wideband multichannel optical signals nonlinear distortions during transmission by electrooptical modulators using Pockels effect
05 p0718 A69-15655

Electron beam modulation of germanium reflectance
05 p0807 A69-15816

Wideband microwave KDP light modulator for amplitude and phase modulation, using ring-plane traveling wave circuit
05 p0732 A69-16553

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs
06 p0934 A69-17466

Optical breakdown in air by mode synchronization operation of ultrashort pulses from neodymium laser
06 p0934 A69-17546

Automatic closed loop distortionless control of magnetic field modulation using light sensitive resistor as one leg of attenuator
06 p0897 A69-17708

External and internal modulation methods in lasers noting phase, amplitude and frequency modulation, birefringence, electrooptics and Stark and Zeeman effects
06 p0937 A69-18010

Absorption edge broadening by electric field in Gunn domain of N-GaAs crystals
07 p1197 A69-18454

Signal conversion by multiple modulation in optical communication system, discussing electrooptic modulators and modulation spectrum
07 p1075 A69-18472

Self modulated radiation modes of Te-doped n-type InAs injection lasers
07 p1148 A69-18685

Laser modulation at optical and near IR frequencies, discussing beam characteristics changes and information transmission
07 p1158 A69-19742

Magneto-optic, acousto-optic, electro-optic and free carrier modulation of IR laser beams
07 p1158 A69-19743

Natural intensity fluctuations spectrum of He-Ne laser, determining modulation coefficient dependence on output
08 p1325 A69-20431

Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
08 p1352 A69-20745

Book on laser communication system design covering modulation and detection methods
08 p1277 A69-20884

Laser beam modulation and deflection methods involving control of amplitude, phase, frequency and direction, noting use of semiconductor p-n junctions
09 p1518 A69-22128

Sinusoidally modulated light beam propagation in turbid media, studying phase velocity and attenuation coefficient as function of modulation frequency
10 p1658 A69-23951

Bias elimination in intensity pattern of incoherent holograms by introducing narrow band time modulation of light
11 p1885 A69-24846

Electro-optic broadband laser light modulator designs and modulation characteristics, computing curve set for evaluation of various materials
11 p1897 A69-25039

Propagation of intensity modulated light rays in semiinfinite isotropic dispersive medium, discussing phase shift and modulation depth
12 p2029 A69-26026

Microwave modulation of GaAs injection laser radiation, using Zaleskii recording method and liquid nitrogen to cool laser diode
12 p2105 A69-26031

Direct modulation characteristics of semiconductor junction laser, analyzing resonance phenomenon, bias current, admittance, modulation frequency limit and emission lifetime
12 p2110 A69-27069

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics
16 p2752 A69-32123

Wideband multichannel optical signals nonlinear distortions during transmission by electro-optical modulators using Pockels effect
16 p2754 A69-32512

Electro-optical crystals resonance modulator for coherent light beams and microwave frequencies,

describing application to multichannel TV transmission system
19 p3266 A69-35763

Laser radiation modulation at EHF by linear electro-optical effect of KDP and ADP crystals
19 p3334 A69-35884

Internal modulation of HeNe laser in asynchronous regime, evaluating range and efficiency with regard to external modulation
19 p3335 A69-36341

Light induced shift of Rb 87 vapor laser emission frequency during modulated optical pumping, discussing elimination by filter temperature and tuning
19 p3336 A69-36344

Indium arsenide injection laser observed for self modulation at LF modes, discussing nonMarkovian character of photon density relaxation
19 p3338 A69-36537

Stable mode generation in ruby laser with ability for modulation, using convex resonator and uniform illumination
20 p3553 A69-37607

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs
20 p3555 A69-37949

Alford and Gold light modulation effect expanded to include one frequency spectrum with Doppler shift, discussing applications to optical radar for range and velocity measurements
21 p3672 A69-38409

Multimode He-Ne laser radiation polarization modulation as function of magnetic field, cavity anisotropy and frequency, using Macaluso-Corbino effect
21 p3739 A69-39447

Distance measuring method limitations for modulated CW laser determined by laser transmitter receiver in conjunction with retroreflector target fixed position
21 p3739 A69-39457

Optical rectification in crystals by excitation of nonlinear /time constant and space variable/ polarization
23 p4174 A69-41874

LIGHT PRESSURE

U ILLUMINANCE

LIGHT SCATTERING

NT HALOS

Light scattering from plasmas embedded in homogeneous magnetic field, discussing solid state and high temperature gas plasmas
01 p0125 A69-10015

Three dimensional holography using scatter plates applicable to transilluminated objects in particular distribution of particles or phase disturbances
01 p0079 A69-10217

Multiple light scattering and reflection elimination from observed light brightness indicatrix to obtain true light scattering indicatrix, discussing error analysis
01 p0074 A69-11184

Atmospheric optical properties stability determination for various optical densities, assuming horizontally homogeneous medium with properties constant during observation
01 p0074 A69-11186

Turbulence characteristics from light wave fluctuation measurements, discussing applications to small scale inhomogeneities in atmospheric temperature distribution
02 p0274 A69-11437

Multiple light scattering in planetary atmospheres, discussing diffuse reflection and transmission by atmosphere of particles with anisotropic scattering pattern
02 p0319 A69-12105

Light-light interaction in homogenous media ascribed to multilevel atomic system simultaneous excitation by both fields
02 p0258 A69-12637

Light wave propagation in gyrotropic crystals, examining laser frequency shift circularly polarized by modulating field
03 p0436 A69-13037

Resonance light pulse propagation in one dimensional medium containing n and m quantum emitters located in Fabry-Perot resonator
03 p0437 A69-13039

Ruby laser to study stimulated Mandelstam-Brillouin scattering in liquids and in various crystals in UV
03 p0438 A69-13053

Particle size distribution determination by measuring light beam extinction in turbid medium with photometer
03 p0428 A69-13110

Hydrodynamic theory of light scattering by dilute monatomic gases generalized by using linearized Burnett equations instead of Navier-Stokes equations
03 p0466 A69-13135

Polarization of laser radiation scattered forward and back in artificial fog and smoke
03 p0393 A69-13275

Ring laser field space-time pattern from light waves scattered at discontinuities, discussing equations of motion of solid state laser
03 p0441 A69-14140

Linear integral equations for brightness coefficients and auxiliary functions in semiinfinite atmosphere, expressing atmospheric albedo using moments and Chandrasekhar function
04 p0662 A69-15237

Light polarization of night sky components scattered by troposphere
04 p0595 A69-15247

Laser light scattering by plasma using theory of ionospheric scattering of radar signals, determining scattered spectrum
05 p0798 A69-15586

Passive Q switching of solid state lasers based on stimulated Mandelstam-Brillouin light scattering
05 p0770 A69-15699

Differential cross section frequency dependence for resonant scattering of monochromatic light by dilute gas atoms
[IEEE PAPER T-8]
05 p0776 A69-16328

Laser scatter measurements in mesosphere and above for optical radar system parameters
05 p0758 A69-16414

Laser beam scattering by acoustic waves of ionized crystal, reconsidering stimulated Brillouin emission theory for ultrasonic yield
05 p0777 A69-16610

Multiple light scattering in spherical planetary atmosphere based on geometrical model, calculating twilight glow brightness
05 p0828 A69-16632

Nonscattered, singly and multiply scattered light of beam from point source analyzed at boundary layer of turbid medium
05 p0789 A69-16640

Attitude stabilized balloon telescope for measuring interplanetary scattered light and nightglow
06 p0999 A69-16972

Directly backscattered light /echoes/ from dielectric plane surface with roughness and volume scattering, comparing indicatrices with moon echo
06 p0887 A69-17173

Rayleigh scattering cross sections for He, C, N and O compared with corresponding absorption coefficients, noting opacity of H deficient stars
06 p1002 A69-17319

Integral equation solution with Mellin inversion formulas for light scattering problems
06 p0949 A69-17887

Water droplet simulation by glass spheres used in study of light scattering at cloud particles
06 p0953 A69-17992

Photoelectric equipment for nephelometric simulation studies of light scattering by cloud particles
06 p0953 A69-17993

Theta pinch plasma electron density and temperature distributions measured using Thompson scattering of laser light and plasma bremsstrahlung
06 p0972 A69-18220

Visible radiation scattering around Venus spherical atmosphere computed on basis of Venus 4 and Mariner 5 data
07 p1213 A69-18609

Laser light scattering with orientation saturation of microsystems by electric field, noting application to optical anisotropy of macromolecules and colloidal particles
07 p1149 A69-18900

Velocity measurement by combination of Doppler principle and schlieren method involving reflection, refraction or diffraction of laser beam
07 p1135 A69-19259

Spectrum of light scattered by particles suspended in turbulent fluid
07 p1157 A69-19417

Quantum mechanical, dipole approximation, nonresonance light scattering cross sections expressed in terms of oscillator strengths and refractive indices
07 p1183 A69-19645

Vector equation of transfer for planetary atmosphere describing light scattering by anisotropic particles and analysis of resonance line scattering
08 p1385 A69-20063

Holography applied to schlieren and phase contrast methods to enable visualization of minute phase change in light scattering object
08 p1313 A69-20176

Collective interactions of electromagnetic waves in plasma, discussing light scattering from electron fluctuations, stimulated emission and anomalous absorption
08 p1361 A69-20220

Scattered light reduction in sunspot photometry, noting eliminating effect when observing spectral lines or narrow spectral regions
08 p1389 A69-20251

Atmospheric turbidity and visibility measuring instrument /videograph/ using light backscattering, noting shipboard, coast guard service, large cities and weather stations applications
08 p1314 A69-20376

Fraunhofer line distortion on scattering from zodiacal dust cloud for various particle density and size distributions, discussing Keplerian orbits
08 p1308 A69-20391

Plasma diagnostics by use of lasers, discussing Thomson scattering and problems arising from light scattering applications
08 p1326 A69-20471

Inhomogeneous laser beams self focusing effects in organic liquids recorded on bases of induced stimulated scattering
08 p1326 A69-20538

Laser operation through semiclassical dispersion theory, presenting dipole moment and population density equations derived from quantum theory
08 p1326 A69-20571

Laser beam propagation in scattering media, noting attenuation coefficients for coherent and incoherent radiation
08 p1328 A69-21092

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements
09 p1588 A69-21367

Spatial distribution of velocity, spatial correlation and ergodicity of turbulent flow, using spectrum of intensity fluctuations of scattered laser light
09 p1493 A69-21491

Stimulated Mandelstam-Brillouin scattering in compressed N and H as function of pressure, using ruby laser pulses
09 p1516 A69-21562

Automatic counter for concentration of cloud condensation nuclei in thermal diffusion chamber, measuring light scattering coefficient of cloud
09 p1494 A69-21640

Spacecraft debris atmosphere effects on observations, discussing contamination of exposed optical surfaces and light scattering by ice particles from cabin water vapor leakage
09 p1487 A69-21654

Optical transfer function in single scattering approximation for light scattering media consisting of large particles
09 p1536 A69-21865

Laser spark image in air photographed in scattered laser radiation light, showing singularities and absence of beadlike structure
09 p1519 A69-22531

Stimulated Mandelstam-Brillouin scattering at second harmonic of ruby laser and neodymium glass laser
09 p1520 A69-22684

First Stokes component of stimulated Mandelstam-Brillouin scattering and line defects caused by self focusing of single pulse laser beam
09 p1521 A69-22686

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem
10 p1689 A69-23970

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media
10 p1725 A69-23971

Laser radiation backscatter along oblique paths in atmosphere, calculating transmission over horizontal and oblique paths
10 p1659 A69-24220

Laser radiation spectrum scattered by low temperature plasma electrons at atmospheric pressure
11 p1922 A69-24233

Spectral broadening measurements of ruby laser light scattered by density fluctuations in theta pinch plasma
11 p1924 A69-24304

Ion and electron temperature and density measurement by Thomson scattering with low resolution monochromator for Salpeter parameter near unity
11 p1925 A69-24310

Laser light scattering in radiation driven breakdown waves in He, using high resolution streak photography to obtain diagnostic data
11 p1915 A69-24420

Integral time characteristics for unsteady light scattering by using solution to corresponding steady state problem of light pulse scattering in medium
11 p1915 A69-24604

Polarization effects of scattered coherent light on laser imagery, determining surface roughness and angle of incidence effects photographically on basis of Fung theory
11 p1896 A69-24849

Atmospheric scattering behavior under reduced visibility conditions for laser wavelengths of 0.69 and 1.06 micron
11 p1837 A69-25040

Single and clad glass fibers radii and refractive indices measurements on basis of laser light scattering
11 p1918 A69-25044

Ruby laser light scattered at 90 degrees by dense plasma focus, analyzing signal detection
11 p1899 A69-25324

Light scattering materials for transparent objects holography, analyzing Christiansen filter and milk white and ground glass plates
11 p1889 A69-25550

Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
11 p1829 A69-25643

Propagation of intensity modulated light rays in semiinfinite isotropic dispersive medium, discussing phase shift and modulation depth
12 p2029 A69-26026

Fiber optics application to fiberscopes and fused fiber optic plates, noting surface coating for light scattering prevention
12 p2084 A69-26150

Flare or stray light measured in long focus photographic objectives by photometric sphere and spherical segments without collimator
12 p2093 A69-26590

IR polarizing microscope with IR corrected objectives and eyepieces providing higher contrast, sharper focusing and less light scattering
12 p2093 A69-26595

Spectroscopy application to spontaneous combination scattering of light
12 p2108 A69-26618

Laser light scattered from arc discharge, observing enhanced plasma oscillations
13 p2307 A69-27629

Lunar surface light scattering data cataloged for various phase angles from photometric observations of lunar features brightness
13 p2344 A69-27648

Light scattering from high reflectivity dielectric mirrors, measuring angular power distribution from beam axis by scanning with narrow slit
13 p2298 A69-27663

Collective scattering of light from ruby laser by cold dense deuterium plasma produced by electrical discharge, deducing density and electron temperature
13 p2273 A69-28366

Spotted scattered background contrast relation to scattering system geometry during laser scattering by suspended Lycopodium spores
13 p2273 A69-28550

Microstructure of light scattering media consisting of large size spherical particles
14 p2481 A69-28737

Double light scattering near critical point, examining angular distribution
14 p2482 A69-28738

Polarization of laser radiation scattered forward and back in artificial fog and smoke
14 p2410 A69-28783

Nonscattered, singly and multiply scattered light of beam from point source analyzed at boundary layer of turbid medium
14 p2482 A69-28796

Light scattering in single component systems near critical point analyzed by critical phenomena classical theory and Rayleigh theory
14 p2485 A69-28995

Light diffusive reflection from rough surface measured as function of angle of incidence in presence of specular component by goniospectrophotometer
14 p2485 A69-29171

Laser radiation conversion during induced combination scattering, discussing stabilization of emission mode of first Stokes component

14 p2460 A69-29648

Transfer equation and Bouguer-Lambert-Beer equation application to multiple light scattering in plane medium

14 p2487 A69-29663

Sunspot equivalent line widths calculated using sunspot models, considering influence of light scatter correction

14 p2525 A69-29721

Helium plasma electron temperature and concentration measured in arc in magnetic field by laser light scattering at electrons

14 p2496 A69-29780

Pulsed HF discharge analysis in hydrogen based on laser light scattering at plasma electrons, noting presence of satellites

14 p2451 A69-29781

Negative dispersion of light in neodymium activated calcium tungstate single crystal using neodymium glass laser source, analyzing interferential bands in spectral diagrams

15 p2632 A69-30051

Polarization and angular distribution of 6328 A He-Ne laser light scattered by latex-sphere hydrosols, comparing coherent and incoherent scattering patterns

15 p2595 A69-30223

Remote polarized light source photometric observation on background of polarized light scattered horizontally, considering atmosphere optical state effect on laser communications

15 p2649 A69-30655

Recording arrangement aperture effect on plasma scattering spectrum during plasma parameter determination by light scattering technique

15 p2664 A69-30996

Optimal parameters of cuvette for use with helium-neon laser as excitation source to record combination light scattering spectra of powdery materials

15 p2635 A69-31105

Light intensity during coherent scattering based on complex refraction index of medium, noting scattering by clouds and diffraction by semitransparent hole

15 p2635 A69-31108

Thermodynamic Green function for Compton scatter cross section of photons by electrons in hot plasma

15 p2664 A69-31479

Wavelength dependence of linear polarization of sunlight scattered by Venus, noting temporal variations in UV

16 p2860 A69-32236

Wavelength dependence of polarization of sunlight scattered by Venus atmosphere, including Rayleigh and Mie scattering mechanisms

16 p2860 A69-32237

Dim astronomical sources observability from sunlight spacecraft, considering coma of micron sized ice crystals influence on scattering by condensation model

16 p2861 A69-32301

Atmospheric gas constituents number densities determined as function of altitude by correlating laser beam scattering and absorption data

16 p2781 A69-32387

Spontaneous and stimulated aspects of light scattering by absorbing media, relating refraction index to temperature variations and external stresses

16 p2798 A69-32449

Polychromatic scattering of light in medium with three energy level atoms

16 p2813 A69-32589

Time dependent radiation diffusion in inhomogeneous stationary medium applied to diffuse reflection of light

16 p2813 A69-32591

Zenith sky Umkehr observed with Dobson spectrophotometer at twilight, discussing light scattering by aerosols in lower stratosphere

16 p2786 A69-32634

Homodyne detection of IR radiation from carbon dioxide laser scattered from moving diffuse target, noting applicability to IR radar, heterodyne spectroscopy, etc

17 p2971 A69-32913

Two polarization light interference scattered by moving and fixed atoms, obtaining forward scattered light intensity

17 p3005 A69-33109

Multiple light scattering solutions accuracy by diffraction peak omission from cloud and haze analytic phase functions compared for optically thick and thin planetary atmospheres

17 p3032 A69-33159

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements

18 p3198 A69-34756

Optical constants changes in germanium determined by modulation method of measuring light reflected at different angles

18 p3173 A69-35014

Plane light wave propagation in homogeneous isotropic medium with fluctuating dielectric constant using perturbation theory and integrating energy conservation law

18 p3173 A69-35127

Coherent light scattering from rough surface, studying effects of target tilt, translation and rotation on speckle patterns produced

18 p3174 A69-35281

Holography application to three dimensional structure determination of weakly scattering semitransparent objects

20 p3546 A69-38198

Continuously operating multipurpose wind tunnel for laser light scattering experiments in supersonic two phase flow

21 p3689 A69-38596

Ozone measurement from satellite by direct beam and scattered light methods employing UV sunlight attenuation

21 p3721 A69-38625

Forced recombination scattering of light on Rayleigh polarization waves in isotropic solid body with small elastooptical constants

21 p3770 A69-38963

Rotation effect of secondary principal axes in scattered light photoelasticity by dual observation method, deriving light intensity

21 p3844 A69-39317

Focal plane observation of granulation phenomena on scattering surface illuminated by coherent light from gas laser

21 p3741 A69-39575

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem

21 p3717 A69-39656

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media

21 p3772 A69-39657

IC 2118 nebula luminosity study by polarimetry and photometry, showing role of light scattering and color properties

21 p3817 A69-39726

Scattered light photoelasticity dual observation method, describing automatic data collecting and interpreting system

22 p3945 A69-40079

Light field long term behavior in dispersive medium with finite optical thickness by asymptotic solution of unsteady transport equation

22 p3983 A69-41267

Radiative transfer theory applied to layer cloud with normal liquid moisture content, discussing volume extinction, scattering and absorption coefficients, etc

23 p4184 A69-42177

Stimulated Brillouin scattering application to measurement of hypersonic velocities and absorption in gigahertz frequency range, laser frequency shifting and Q switching, etc

23 p4167 A69-42183

Distribution function for thermalization distances derived for infinite atmosphere with plane source in noncoherent light scattering

23 p4192 A69-42403

Scattered light methods inaccuracies for nondestructive analysis of generally stressed photoelastic models, noting modified Mini-max method

24 p4396 A69-42737

Instrumentation and data interpretation method for particle size determination by low-angle light scattering

24 p4313 A69-42764

Angular distribution of He-Ne laser beam scattered by artificial fog from data by light detection devices at various angles

24 p4328 A69-43503

Light scattering from ruby laser beam passing through collisionless shock produced by H plasma compression measured by photomultiplier

24 p4360 A69-43748

LIGHT SCATTERING METERS

Multiple light scattering and reflection elimination from observed light brightness indicatrix to obtain true light scattering indicatrix, discussing error analysis

01 p0074 A69-11184

Shipboard standard visibility measurements by means of AEG-FFM scattered light recorder aboard Meteor in Atlantic Ocean during 1965

04 p0628 A69-15158

Scattered light meter accuracy as function of aerosol particles atmospheric distribution according to size, analyzing measurement errors

24 p4343 A69-42966

LIGHT SOURCES

NT ILLUMINATORS

Exploding wires as light source for quantitative spectroscopy, noting optically thin plasma clouds with radial symmetry

01 p0117 A69-10658

Retinal burns from intense light sources using rabbit eyes as function of irradiation rate, exposure time and image size

02 p0204 A69-12496

Mean life measurement of excited ions electronic levels using beam foil light source, emphasizing beam particle monitoring and theoretical equations

04 p0595 A69-14278

Mode locked laser as stroboscopic light source potential by investigating expansion of laser produced plasma by schlieren photography

05 p0774 A69-16315

Detection time to light point source noting response to dark, star field and glare source backgrounds

06 p0881 A69-17215

Strong light flashes detected from fast pulsar NP 0532 in Crab Nebula, discussing time-averaged optical flux

08 p1394 A69-20622

Strong light flashes from pulsar NP 0532 in Crab Nebula, noting UVB photometric analysis of nebular brightness

08 p1394 A69-20623

Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory

08 p1394 A69-20624

Helium-neon gas laser as coherent light source for holograms of vaporizing fuel films and for Michelson interferometer

08 p1327 A69-20874

Holograms with unfiltered radiation obtained from superhigh pressure mercury lamp and incandescent lamp

09 p1495 A69-21671

Thermal diffusion and free thermal convection in fluids by diffraction interferometer, using laser for light source

10 p1702 A69-23431

Stroboscopic generator of trains of high brightness light flashes for hydrodynamic and gas dynamic research, noting electronic control and thyatron circuits

11 p1879 A69-24235

Tilting filter photometer for faint light source spectrophotometry, discussing digital approach used with photomultipliers

11 p1884 A69-24834

Vacuum spark light source for extreme UV noting mechanical trigger, compatibility with clean vacuum system and magnetic confinement of ions

11 p1885 A69-24839

Radioactive light sources in photoelectric photometry, analyzing characteristics, brightness and stability of light flux and energy spectrum

11 p1951 A69-25421

Astronomical wide field cameras of large aperture ratio to detect extended near UV light sources outside atmosphere

12 p2080 A69-26127

Selective microscope with explosive bright light source and microsecond pulse duration for short flash period over large area, noting single frame separation method

12 p2086 A69-26162

Repetitive Q switched laser light source for interferometry, holography and high speed photography

12 p2087 A69-26170

Schlieren high speed photography systems for ballistic projectile studies, discussing use of gas lasers as nanosecond light sources

12 p2088 A69-26182

SiC and GaP diodes used as low power light sources, studying electroluminescence in p-n region under pulsed excitation

14 p2419 A69-29325

Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source

14 p2451 A69-29777

Remote polarized light source photometric observation on background of polarized light scattered horizontally, considering atmosphere optical state effect on laser communications

15 p2649 A69-30655

Nanosecond photography with superradiant light source, X rays or electrons using multipurpose electron accelerator, obtaining stop motion pictures

19 p3305 A69-35721

Dual beam white or nearly monochromatic light source providing programmed repetitive sample illumination with variable intensity, pulse duration and sequence for photosynthesis research

19 p3312 A69-36378

Aircraft measurements of scintillation of ground based light source, calculating autocorrelation functions and intensity fluctuations spectra

19 p3279 A69-36881

Hg injection lamp with high power and variable spectral energy distribution as light source for testing solar radiation effects

20 p3510 A69-37630

Space contamination due to manned vehicles and debris atmosphere effects on dim light source observations

21 p3793 A69-38341

Electron paramagnetic resonance line splitting between two nondegenerate Zeeman levels, using ruby laser as pumping source

21 p3735 A69-38582

Breakdown mechanism in GaAs, Si and CdSe semiconductors under intense light pulses ascribed to thermal impact

21 p3737 A69-39042

Light sources with uniform variable luminance field designed for calibrating cameras used in space exploration

21 p3726 A69-39580

Xenon plasma continuous illumination sources design and operation for night and color aerial photography covering photogrammetric resource surveys, ground traffic, flight paths, etc

22 p3950 A69-41000

Rod signals elicited by flashes in human eye measured, deriving relation between nerve signal size in rods and flashes energy

23 p4099 A69-42119

Light sources in 0.15-20 micron spectral range from published literature, unpublished reports, light source manufacturers and individuals

23 p4191 A69-42190

Brightness discrimination judgments for gray chips by humans, using psychophysical limits method and white, noncoherent red and He-Ne laser light sources

24 p4276 A69-43323

LIGHT SPEED

Constant acceleration relativistic rocket flight from inertial rocket and terrestrial point of view compared, examining light flash transmission and arrival time

09 p1609 A69-21959

Local creation of mass in steady state universe as source of static field energy propagating away at speed of light

09 p1601 A69-22212

Crab Nebula pulsar observations confirming wavelength independence of light velocity in space

12 p2157 A69-26233

Einstein second postulate concerning invariability of light vector in vacuum experimented for validity, using earth and moon as light rays launching and reflecting media

13 p2354 A69-28650

Particle and light motions in Schwarzschild field, discussing acceleration beyond speed of light in reference /S/ frame of time independent coordinate systems

17 p3006 A69-33741

Shock wave structure dissipation in gaseous medium with microscopic particle velocities asymptotically approaching light velocity

17 p2958 A69-34145

Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials

19 p3427 A69-36627

Negative time interval implications for meta particle at superluminal velocity with respect to two reference frames, noting causality paradoxes

20 p3598 A69-37412

Superluminal group velocities in relation to causality axion, considering sound propagation in ultradense matter and particles of imaginary mass (tachyons)

21 p3769 A69-38543

Q switched laser pulse propagation in nonlinear laser amplifier using bitemporal relativity theory, deriving five dimensional wave equation revealing superlight signal existence

21 p3770 A69-38839

LIGHT TRANSMISSION

Optical absorption coefficients for triphenylmethylarsonium tetracyanoquinodimethan complex single crystal, evaluating reflectance

01 p0140 A69-10934

Atmospheric influence on ground visibility reduction of airborne objects, using radiative transfer equation to calculate contrast transmission function

01 p0111 A69-11100

Earth atmosphere transmission coefficients determination by relation between transparency and daytime sky brightness, noting limits of applicability

01 p0074 A69-11185

Atmospheric transmission factor and optical stability determination by photometer, estimating error due to solar aureole

01 p0075 A69-11193

Tinted ophthalmic media effect on detection and recognition of red signal lights in daylight, noting allowable coloration for aviation use

01 p0022 A69-11341

Light field inside deep layers of turbid medium illuminated by narrow beam, discussing beam deviations inside medium, deviation dispersions and correlation coefficient

02 p0274 A69-11449

Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes

02 p0255 A69-11608

Electron plasmas near plane metallic surfaces, determining transmittance and reflectance of incident light waves and surface waves dispersion characteristics

02 p0286 A69-11788

Multiple light scattering in planetary atmospheres, discussing diffuse reflection and transmission by atmosphere of particles with anisotropic scattering pattern

02 p0319 A69-12105

Mean square amplitude and phase fluctuations for propagation of light beam with Gaussian amplitude distribution through medium with randomly varying refractivity

02 p0208 A69-12308

Transparency decrease in plexiglass during interaction with dense plasma, noting absorption independence of plasma pressure and dependence on wavelength

03 p0482 A69-14222

Optical waveguide with optimum refractive index distribution for equalizing group velocities of different modes and minimizing waveform distortion

04 p0575 A69-14749

IR radiation attenuation in transparency windows of atmosphere, using searchlights as radiation sources

05 p0760 A69-16695

Spectrum and amplitude fluctuations of laser light propagating through liquid helium, obtaining spatial correlation function of refractive index fluctuations

06 p0957 A69-17267

Light transmission through body wall of living colorable desert iguanas measured by spectrophotometry, discussing skin pigment effects

07 p1059 A69-18373

Instrument for measuring light transmission in atmosphere to determine runway visual range

07 p1132 A69-18673

Brewster angle lenses for low cost low loss laser beam transmission system

07 p1148 A69-18863

Statistical properties of intensity fluctuations of light fields consisting of incoherent Gaussian component heterodyned with single frequency coherent beam

07 p1182 A69-19416

Optical absorption index for molten beryllium oxide based on measurements of small beryllium/ solid propellant rocket motor exhaust plumes

08 p1351 A69-20149

Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time

08 p1352 A69-20745

Laser beam propagation in scattering media, noting attenuation coefficients for coherent and incoherent radiation

08 p1328 A69-21092

Borrmann effect and abnormal transmission and extinction observed by reconstruction of images of holo-

grams recorded in three dimensional photosensitive medium

09 p1494 A69-21492

Constant acceleration relativistic rocket flight from inertial rocket and terrestrial point of view compared, examining light flash transmission and arrival time

09 p1609 A69-21959

Laser beam scintillation at night over long atmospheric horizontal paths, showing log amplitude covariance observation in agreement with theoretical prediction

09 p1517 A69-22080

Mass displacement in light path due to interaction with gravitational wave accompanying light pulse, discussing general relativity tests for time delay and starlight bending

09 p1540 A69-22081

Atmospheric propagation properties of laser light, discussing particle absorption, gaseous absorption and refractive index disturbance effects

09 p1518 A69-22129

Light waves transmission and beam guidance, analyzing solid lens type guide and automatic light path stabilizer

09 p1518 A69-22130

Carbon dioxide laser beam deflection and thermal defocusing due to wind in absorbing medium

10 p1701 A69-22949

Light flux intensity fluctuation dispersion and averaging effect for passage through circular receiving aperture

10 p1658 A69-23950

Sinusoidally modulated light beam propagation in turbid media, studying phase velocity and attenuation coefficient as function of modulation frequency

10 p1658 A69-23951

Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes

11 p1895 A69-24715

Turbulence induced depolarization of linearly polarized He-Ne laser beam at 6328 A traversing atmosphere near ground level

11 p1896 A69-24842

Atmospheric interference effects on optical PCM signal, analyzing absorption, beam bending, scintillation and correlation with visibility and weather

11 p1888 A69-25308

Laser radiation transmission in atmosphere examined for information transmission applications

11 p1841 A69-25638

Propagation of intensity modulated light rays in semifinite isotropic dispersive medium, discussing phase shift and modulation depth

12 p2029 A69-26026

Fiber optics application to fiberoptics and fused fiber optic plates, noting surface coating for light scattering prevention

12 p2084 A69-26150

Regulated pulse lasers under free oscillation for photographing distant objects by illumination with shortened light pulses

12 p2089 A69-26190

Distortionless propagation of light through optical two level atoms medium, considering relation to Poynting theorem, hyperbolic secant solution and pendulum analogy

12 p2130 A69-26313

Three dimensional log amplitude and phase fluctuation distributions of collimated and focused Gaussian beams propagated through random inhomogeneous medium, evaluating mean-square values

12 p2130 A69-26393

Electromagnetic field in idealized medium of uniformly curved gas lens for light beam waveguide, describing lens radius effects on incident beam spot

13 p2270 A69-27181

Optical surface wave propagation on thin dielectric film waveguides, noting applications to integrated optical data processors

13 p2229 A69-27676

Independently fluctuating Poisson light signals detected by receiver with inertialess photodetector, developing algorithm for estimating amplitude of useful signals

13 p2223 A69-28552

Weakly divergent intense light beam propagation in laminar optically inhomogeneous medium with self focusing possibility analyzed by perturbation theory

13 p2223 A69-28568

Reversibility principle in transilluminated three dimensional photoelastic medium

14 p2535 A69-29359

LIGHTHILL GAS MODEL

Ruby laser reflected and transmitted light intensity following radiation focusing on cuvette containing cyclohexane, noting dependence on incident pulse power 14 p2459 A69-29392

Log amplitude fluctuations of laser beam in turbulent atmosphere, obtaining asymptotic expressions for near field of transmitter aperture 14 p2460 A69-29638

Two photon interaction between ultrashort light pulse and medium, showing pulse propagation through medium without absorption 15 p2634 A69-30966

Pressure and wavelength dependence of molecular O absorption coefficient near 1215 Å, utilizing UV emission from crossed beam atomic collision 15 p2656 A69-31031

Flexible glass fiber optics, discussing total internal reflection, light and image transmission, digit display and waveguide for laser communication 16 p2789 A69-31933

Laser amplifier nonlinear losses effect on light beam propagation, studying arbitrary waveform development into asymptotic steady state pulse /SSP/ 16 p2797 A69-32043

Incident energy transfer to particles due to nonlinear interactions during passage of intense light beam through plasma, considering decay into plasma waves 16 p2822 A69-32046

Phase fluctuation measurements of laser beam propagating through turbulent atmosphere 17 p2927 A69-33855

Laser beam propagation through turbulent medium, investigating statistical distribution of phase shift fluctuations 17 p2976 A69-33857

Self channeling of light in nonlinear isotropic medium using exact solutions of nonlinear Maxwell equations for two dimensional case 17 p3007 A69-33975

Reflection reduction properties of symmetrical, light transmitting three layer coating consisting of zinc sulfide-magnesium fluoride-zinc sulfide films 18 p3173 A69-35147

Monochromatic undulating light vertical refraction path curvature radii calculation based on refractive index 18 p3174 A69-35201

Time dependent collimated light diffuse reflection and transmission by finite inhomogeneous atmosphere, using principle of invariance 18 p3132 A69-35345

Reflection and transmission measurements on as grown surfaces of tetracyanoquinodimethane, obtaining optical constants by Kramer-Kronig method 18 p3183 A69-35477

Nonlinear analog of conical refraction in biaxial crystals, considering birefringence in piezoelectric uniaxial crystals and laser beam propagation 19 p3330 A69-35604

Solar cell integral covers optical losses in vacuum as function of degradation by UV exposure, noting accelerated testing for time-cost reduction 19 p3253 A69-35703

Optical imaging with partially coherent nonthermal light, discussing correlation function propagation, transfer functions, spatial Fourier analysis, weak visibility and matrix form 19 p3372 A69-35907

Hot electrons effect on Fe-doped CdTe optical absorption by measuring optical transmission vs photon wavelength at liquid helium temperatures 19 p3389 A69-36551

Light refraction in Venusian atmosphere from Venera 4 probe measured data, noting horizontal rays traversing planet along circumference at 8.3 km height 19 p3427 A69-36625

Optical and thermal attenuation of current induced by low energy electron bombardment in CdS crystal 19 p3392 A69-36727

Trajectory of light ray propagating through atmosphere based on known refractive index defined by function of special Cartesian coordinates 21 p3675 A69-39245

Spectral dependence of optical absorption in InSb thin films under conditions of quantum dimensional effect, considering allowance for nonparabolic conduction zone 21 p3783 A69-39560

Superwide angle camera with aerial photogrammetric lens system, discussing light distribution, rotary disk shutter, etc 22 p3944 A69-40047

Coherent light propagation through turbulent atmosphere observed by applying He-Ne lasers to simultaneous measurements of scintillation effects over homogeneous optical paths 24 p3434 A69-43114

Fiber optics interferometers, analyzing light propagation along dielectric light pipes and wave interference 24 p3415 A69-43162

Light transmission through curved dielectric rectangular rod, studying optical waveguides of various cross sectional dimensions and radii of curvature 24 p2487 A69-43329

LIGHTHILL GAS MODEL
Inviscid reacting flow free of molecular transport analyzed locally near stagnation point, using Lighthill-Freeman gas model 11 p1876 A69-25560

LIGHTHILL METHOD
Lighthill method based expressions derived for discontinuity shape formed during shock wave diffraction near small angle 02 p0234 A69-12588

Sound radiation from vibrating bodies, noting errors in Lighthill conclusion 02 p0282 A69-12800

LIGHTING
U ILLUMINATING
LIGHTING EQUIPMENT
NT ARC LAMPS
NT FLASH LAMPS
NT ILLUMINATORS
NT MERCURY LAMPS
NT QUARTZ LAMPS
NT RUNWAY LIGHTS
NT XENON LAMPS

Aircraft instrument lighting color effects on posture, scotopic absolute and acuity threshold and legibility for reading of instruments 03 p0380 A69-14073

LIGHTNING
Lightning strikes to aircraft, discussing corona discharge, electric fields and meteorological measurements during thunderstorm in cumulonimbus 03 p0458 A69-13031

Aircraft radomes lightning protection, discussing evaluation by experimental methods and simulation 07 p1142 A69-19535

Susceptibility of high modulus graphite and boron fiber epoxy composites to lightning damage, noting degradation by pulse current 08 p1338 A69-20486

Electromagnetic energy spectra of lightning expressed as function of electric field spectral density of atmospheric 14 p2437 A69-29076

Electromagnetic noise radiation structure during lightning flash by measuring time duration distribution between pulses 14 p2445 A69-29885

Earth-ionosphere waveguide excitation by lightning discharges and geomagnetic field influence on ELF noise spectrum 17 p2928 A69-33865

Terrestrial radio noise from lightning discharges measured by Ariel 3 satellite to deduce sources distribution 21 p3759 A69-39259

Ball lightning as positively charged region of electroluminescent air maintained in dynamic structure and molecular composition by atmospheric electric field 22 p3940 A69-40536

Nighttime atmospherics shape analysis created by lightning and propagating in earth lower ionosphere waveguide 22 p3941 A69-40961

ELF atmospherics excitation, discussing cloud to ground and intracloud lightning discharges Fourier integration and current moment spectrum 23 p4115 A69-41562

Aircraft fuel vent line sensitivity to lightning hazards, using flame propagation and arrester experiments with high voltage and high current facilities [SAE PAPER 690434] 23 p4062 A69-41651

Peak field strengths of atmospheric radio noise bursts from lightning flashes at VHF and flash distance estimates at tropical latitudes 23 p4126 A69-42355

LIGNIN
Lignin presence in New Zealand moss gametophytes observed for characteristic color reaction and UV spectra, noting contrast with north temperate species 17 p2912 A69-34176

LIMBS

Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries 09 p1588 A69-21364

Electronic device utilizing scanning beam to evaluate limb photographs, reducing errors by introducing second generator with frequency proportional to deflecting potential variation 17 p2970 A69-32884

Limb darkening on earth night side observed by Aerobee rocket, with explanation based on atmospheric opacity in water vapor and carbon dioxide bands 17 p2960 A69-33167

Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries 18 p3197 A69-34754

Limb effect of solar Fraunhofer lines determined by telescope equipped with autocollimated type diffraction spectrograph 20 p3607 A69-38044

Photoelectric spectrometer observations of 1966 total solar eclipse, discussing limb darkening curves for regions of continuum 1.5 Å wide around 5728 and 6404 Å 22 p4027 A69-40659

LIMBS [ANATOMY]
NT FOREARM
NT HAND [ANATOMY]
NT LEG [ANATOMY]

Gilson cuvette densitometer used for blood flow measurement in canine forelimb and human forearm and hand during constant intrabrachial arterial dye infusion 23 p4077 A69-41294

LIME
U CALCIUM OXIDES
LIMITATIONS
U CONSTRAINTS
LIMITER AMPLIFIERS

Zero memory frequency independent nonlinearities response to modulated input noting FM limiter, band-pass limiter and AC carrier control systems 01 p0034 A69-11142

Bandwidth requirement of single channel monopulse limiter, discussing signals conversion to IF 16 p2761 A69-32471

LIMITER CIRCUITS
Smooth limiter effect on output of SNR for unbalanced and balanced FM discriminators, noting role of error function 07 p1106 A69-19127

Hard limiting effect on sum of three or four sinusoidal signals noting output amplitudes, signal suppression and negative suppression effect 09 p1451 A69-21311

Limiting incoherent or coherent interference signals at frequency of biphasic or quadriphase digital signal 14 p2413 A69-29483

Performance of oscillating limiter driven by noise corrupted FM signals covering frequency deviations, carrier to noise ratio, etc 14 p2413 A69-29497

Time function multiplex system for simultaneous communication via satellite between number of stations, considering transmission capacity decrease due to hard limiting amplifier 17 p2919 A69-33320

Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter 21 p3676 A69-39450

HF receiver interference blanker, discussing limiter-blanker system, integration, effectiveness and squelch circuit 23 p4141 A69-42221

Cascaded limiter and phase detector, analyzing SNR transfer characteristics for specific PM signals 23 p4131 A69-42525

LIMITS [MATHEMATICS]
Boundedness theorem for all solutions of class of nonlinear second order differential equations 02 p0271 A69-11549

Parametric vibrations of self excited elastic and aeroelastic systems with traveling waves, determining stable vibration boundaries 02 p0337 A69-11561

Limit load analysis of three dimensional rigid perfectly plastic continua by approximate variational method 02 p0338 A69-11721

Geometric optics inverse scattering method for smooth conducting convex bodies of revolution, demonstrating bounds on size and shape 02 p0280 A69-11929

Elasticity theory upper and lower bounds for two and three dimensional inhomogeneous problems and applications to plates

10 p1794 A69-22889

Turbulent transport processes mathematical model, determining upper and lower bounds

10 p1677 A69-22895

Rate estimates of convergence of multidimensional central limit theorem for sequence of identically distributed independent random variables with third order finite moments

10 p1719 A69-23400

Linear differential equations solutions boundedness and unboundedness criteria, determining quantitative relations

12 p2120 A69-26035

Approximate solution of boundary value problems for Fokker-Planck equation to determine probability of exceeding limits in nonlinear automatic control systems

12 p2054 A69-26653

Thermodynamic equivalence of limit theorems for canonical and grand canonical ensembles, discussing Massieu-Planck function analog relation by Legendre transformation

12 p2191 A69-27148

Second order differential equations eigenvalues with Sturm boundary conditions analyzed by difference method

13 p2288 A69-27922

Boundedness in mean square of solutions derived for linear differential equations forced oscillations with nonwhite Gaussian random functions parameters

16 p2873 A69-32058

Simultaneous unbounded solutions existence to homogeneous linear differential equations with continuous positive elastic and dissipative coefficients

16 p2804 A69-32251

Maximum rms error comparison of redundancy reduction techniques, emphasizing limiting slope technique and worst case interpolation error

19 p3273 A69-36264

Existence theorem for limits of minimizing sequences in optimal control problems, applying results to systems governed by partial differential equations

19 p3287 A69-36724

Generalized limit theorem for reliability replacing Drenick exponential theorem

20 p3547 A69-37068

Polya concept of maximum and minimum densities of series applied to entire functions of finite order with positive zeros

20 p3568 A69-37442

Variational problem for nonlinear functionals connected with finite plasticity, extending existence and uniqueness theorems to limit analysis

21 p3837 A69-39157

Homogeneous Markovian sum of sequence of random quantities series, deriving limiting theorem for sum density

21 p3757 A69-39538

Upper and lower bounds for growth or decay rate of solutions of parabolic differential equations for indefinitely increasing time

21 p3757 A69-39565

Upper and lower bounds for certain classes of partial differential equations associated with variational problems in theory of deterministic control processes

22 p3976 A69-41034

Numerical computation of rate-distortion function R/D/ for certain memoryless message sources, discussing bounds, reduction to minimization problem and applications

24 p4284 A69-42719

Bellman equation analyzed for higher derivatives, suggesting bounded partial derivatives of optimal feedback control function

24 p4341 A69-43234

Composite media elastic moduli upper and lower bounds determination using variational principles to characterize displacement and stress in time harmonic deformation

24 p4406 A69-43701

LINCOLN EXPERIMENTAL SATELLITES

Lincoln experimental satellites, discussing transition to UHF bands and orbital launching

07 p1087 A69-19630

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite

[AIAA PAPER 69-298] 09 p1562 A69-21227

Solar cells volt-ampere characteristics calibrated at various solar incidence angles on LES-6 satellite in synchronous orbit

19 p3254 A69-35712

Solar cell degradation experiments on LES 4 and 5 satellites, discussing decay values and times for Si and CdTe cells with different cover thicknesses

19 p3254 A69-35713

Orbital results for Automatic Orbit Control System of Lincoln Experimental Satellite LES 6, using pulsed plasma microthrusters and self contained orbit measurement and control methods

[AIAA PAPER 69-934] 21 p3824 A69-39428

Electromagnetic attitude control system for Lincoln Experimental Satellite 5 in near-synchronous equatorial orbit, noting onboard error detection in closed control loop

21 p3827 A69-39755

LINE CURRENT

Closed analytic expressions for vector potential and magnetic field generated by axisymmetric multipole line currents

06 p0965 A69-17518

Magnetohydrostatic cavity formed round magnetic field of line dipole-line current combination by infinitely conducting plasma at uniform pressure

08 p1369 A69-20998

Plasma cavity shape formed by magnetic field effect due to several parallel line currents

[ISAS-433] 09 p1553 A69-22569

Electric field vertical and radial components for time harmonic electric line sources with piecewise sinusoidal current distribution

11 p1836 A69-24995

LINE SHAPE

Free bounded continuum processes effect in nonequilibrium gases of finite continuous opacity, noting curves of growth for finite plane parallel layer emission lines

01 p0121 A69-10959

Spectral line shapes broadened by electron impacts, taking into account contribution of radiation produced by perturbing electrons

06 p0961 A69-17136

Emission line profiles in spherical atmosphere expanding with constant radial velocity computed by Monte Carlo methods

06 p1009 A69-17965

Satellite components of lines formed in stellar type differentially rotating disk

07 p1219 A69-19336

Green function method for atomic line broadening in plasma radiation, including electron correlations and quantum effects

08 p1361 A69-20147

Line shape for dynamic Stark effect during optical resonance field irradiation calculated as function of relaxation constants and beam intensity

08 p1325 A69-20282

Far IR laser pulse shape and duration

09 p1515 A69-21424

Stigmatic profiles of solar C II doublet resonance lines obtained by rocket-borne echelle spectrograph

09 p1592 A69-21456

Laser induced line narrowing in coupled Doppler broadened transitions, noting mode crossing and spontaneous emission

09 p1519 A69-22282

High pressure arc discharge diagnostics with spectroscopic method relating spectral profiles to central temperature, pressure and temperature distribution

12 p2094 A69-26968

NGC 4151 absolute intensities of wide emission of weak isolated and IR lines determined from photoelectric spectrophotometric measurements

12 p2164 A69-27023

Luminosity changes in quasar 3C 273, describing corrections introduced into luminosity curve obtained by iris photometer

12 p2167 A69-27044

He-Ne laser transition line shape and gain curve through width, considering spectral frequency characteristics, output power and gas temperature and concentration

13 p2272 A69-28115

Light saturation development of line profile component of normal Zeeman triplet in sunspot umbrae

14 p2528 A69-29964

Spatial ion wave echoes emphasizing echo line shape analysis and effects of ion-neutral and ion-ion collisions

16 p2818 A69-31676

Spectral characteristics of B stars group, reviewing causes of spectral line profile deformation

16 p2855 A69-31828

Balmer and Ca II/K line profiles computed by program based on model atmospheres, comparing computed and observed data for F stars

19 p3426 A69-36578

GaAs laser used as optical sweep generator for display of Cs 133 spectral line shape, studying fluorescence and radiation lifetime

19 p3339 A69-36696

Sodium D line profiles in interstellar clouds, determining absorbers velocity distributions

20 p3611 A69-38149

Neutral titanium Fraunhofer lines 4534, 4562, 5210 and 5238 A, investigating profiles and asymmetries using spectrophotoelectrical methods

21 p3795 A69-38467

LINE SPECTRA

NT BALMER SERIES

NT D LINES

NT ELECTRONIC SPECTRA

NT FRAUNHOFER LINES

NT H ALPHA LINE

NT H BETA LINE

NT H GAMMA LINE

NT H LINES

NT K LINES

NT LYMAN SPECTRA

NT PASCHEN SERIES

NT RYDBERG SERIES

NT TELLURIC LINES

Red shift pattern in quasar emission spectra consistent with fractional screening charges on emitting atom nuclei

01 p0153 A69-10855

Jovian atmospheric rotational temperature from rotational lines in methane band

01 p0153 A69-10856

Ionized calcium lines in spectra of light bridges of sunspots, observed by diffraction spectroscopy, indicating similarity to chromospheric flares

01 p0154 A69-10894

Statistical band model and line by line calculations of transmittance for IR bands in absorption spectra of ozone and water vapor

[AFCL-68-0505] 01 p0124 A69-10919

Spectral lines source functions for formation in multilevel atom and radiative transfer in atmosphere of three level Na atoms and four level O atoms

01 p0124 A69-10962

Polarization of nightglow, line vs continuum

02 p0235 A69-11428

Ionized metals emission lines intensity in chromosphere observed with coronagraph, determining hydrogen concentration

02 p0314 A69-11635

Solar growth curves constructed for solar disk center using various metal lines

02 p0314 A69-11637

Line reversal and excitation temperatures in low pressure flames

02 p0350 A69-11709

Spectrophotometric studies of planetary NGC 6543 gaseous nebula, measuring emission line intensities, electron density and temperature

[ARL-68-0200] 02 p0327 A69-12708

Photometric measurement of atomic oxygen green line emissions and high energy electron flux using twilight sounding rocket

02 p0309 A69-12743

Weighting functions for finite optically thick atmospheres, discussing emission line formation

02 p0328 A69-12755

Plasmas in galaxies, spiral structures and radio galaxies, discussing quasar line and continuum spectra

02 p0329 A69-12790

Line identification methods in solar extreme UV and X ray regions

03 p0507 A69-13171

Spectral line identification in quasars, noting emission lines characteristic of emission nebulas and absorption lines of stellar atmospheres

03 p0508 A69-13173

F values for Ti II, Cr II and Fe II by empirical astrophysical line strength analysis, discussing f value determination from stellar growth curve

03 p0508 A69-13175

Absorption oscillator strengths of S I and S II lines between 1100 and 2000 A, using arc burning light source

03 p0479 A69-13968

Solar emission line absorption by oxygen and nitrogen atomic lines, discussing effect on upper atmosphere composition measurements

03 p0425 A69-14019

Arc and HF discharges in Ne-He lasers, comparing output power, spectral line intensities and reduced electric field vs reduced tube radius plots

03 p0441 A69-14139

High temperature measurement based on spectral line displacement and broadening due to Stark effect,

noting diagrams for O, Na, Mg, Al and Si at various temperatures

03 p0481 A69-14146

Beam foil spectroscopy for measuring wavelengths and spectral line intensities

04 p0595 A69-14276

Superradiant and laser spectroscopy in second positive system of molecular nitrogen

04 p0609 A69-14285

Time variations of chromospheric network of bright points covering solar disk in spectrograms, noting contrast and interspaces variation with 11-year solar cycle

04 p0651 A69-14372

Hydrogen spectral line broadening under combined action of ions and electrons, tabulating values for calculation of absorption coefficient

04 p0651 A69-14373

Far IR observations of atmospheric molecular lines, using high altitude aircraft platforms

04 p0628 A69-15146

Emission lines structure in quasar spectra, analyzing problem of weak absorption lines identification

04 p0662 A69-15236

Hydrogen spectral line widening by plasma electrons emphasizing Lyman, Balmer and Paschen series

04 p0638 A69-15239

Diminished RF intensity of neutral hydrogen line near radio source W 49 due to diminished kinetic temperature of gas

04 p0662 A69-15253

Spectral study of crystal lattice of gallium phosphides for influence of vacancies and impurities on band formation

04 p0643 A69-15258

Line profile and optical interferometry in astronomy and geophysics

05 p0760 A69-15590

Spectral line reversal method of measuring high temperatures of gases

05 p0761 A69-15763

Lithium abundance determination difficulties for undisturbed solar photosphere, noting Li I resonance line identification and model choice

05 p0821 A69-15849

Red, blue and no bias light effects on spectral response of copper sulfide-cadmium sulfide cell, using model incorporating photoconductive layer

05 p0808 A69-16358

Oxygen absorption coefficients for atomic silicon in spectral range of Schumann-Runge bands

06 p0960 A69-17090

Identification of emission lines from 3200 to 7000 Å in Eta Carinae spectrum, noting P Cygni-like absorption lines

06 p1002 A69-17263

Mass motions in solar flares using line profiles and filtergrams

06 p0993 A69-17427

Solar moustaches H alpha profiles spectroscopic studies indicating near symmetry

06 p0994 A69-17435

Oxygen line absorption at elevated temperatures in Schumann-Runge system, estimating line widths

06 p0962 A69-17803

Non-equilibrium low temperature plasma theory for ionization and particle distribution based on discrete and continuous spectra states, discussing electron distribution function

06 p0969 A69-17906

Lunar occultations of galactic center region observed at 1667 MHz indicating OH absorption origin in uniform rotating cloud

06 p1009 A69-17961

Planetary nebulae NGC 7662 and IC 418 forbidden line spectra compared with computer model predictions, noting evidence for dynamical effects and filamentary structure

06 p1009 A69-17963

Radio recombination lines in populations of highly excited states of hydrogen, discussing collisional transition effects

06 p1010 A69-17970

Velocities of neutral and ionic species in MPD flow determined from Doppler shift of selected spectral lines

[AIAA PAPER 69-109] 06 p0971 A69-18116

Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc

[AIAA PAPER 69-110] 06 p0972 A69-18171

Spectral line profiles of 3 Centauri A during microdisturbance, showing turbulent velocity and metal element abundances

07 p1211 A69-18407

Jovian limb H alpha line due to auroral emission obtained from high dispersion spectra with long light path through upper atmosphere

07 p1214 A69-18614

Evening twilight nitric oxide density profile in gamma bands deduced from rocket measurements

07 p1125 A69-18842

Water vapor absorption line for nitrogen and oxygen mixtures with frequency measurements at various pressures and temperatures, discussing attenuation and line breadth

07 p1184 A69-18911

He-Ne and He-Xe laser lines in IR tuned by axial magnetic field, observing Stark patterns of organic molecules

[IEEE PAPER C-5] 07 p1150 A69-19050

Time resolved spectrum of high current pulsed argon laser discharge, noting primary laser output and afterglow

[IEEE PAPER L-12] 07 p1152 A69-19068

Collision broadened spectral line shape obtained in impact approximation using Anderson formulation compared to output of gas lasers

[IEEE PAPER T-6] 07 p1154 A69-19083

Franck-Condon factors for high rotational levels of nitrogen calculated in Morse potential approximation for application to plasma diagnostics

07 p1185 A69-19169

Stokes phenomenon, considering continuity solution of differential equations across Stokes lines

07 p1174 A69-19220

Forbidden S I lines due to transitions within ground configuration identified in Fraunhofer spectrum of sun, noting photospheric abundance of S

07 p1217 A69-19237

Solar spectral line profiles for photosphere disturbed by short period acoustic waves

07 p1217 A69-19239

Fe II lines relative intensities in eta Carinae spectrum, discussing possible intrinsic reddening of object and representation of visible and near IR continuum

07 p1217 A69-19253

Iodine fluorescence spectra excited by krypton ion laser, analyzing spectral series and vibrational rotational levels

07 p1156 A69-19304

Spectrum data of Nova Vulpeculae /1968/ summarized concerning dispersion figures

07 p1220 A69-19337

Lines displacement in binary star spectrum due to blending, presenting graphs displaying magnitude of effect under various conditions

07 p1223 A69-19624

Strong line profiles computed for models of hot expanding extended atmospheres of OB supergiants

07 p1223 A69-19637

IR absorbance of CO below room temperature, determining strength and half widths of lines in R branch of fundamental band

07 p1183 A69-19644

Planetary nebula IC 4642 spectral line intensities measured by photographic spectrophotometry compared to previous measurements, noting no evidence for changes

08 p1383 A69-19898

Paschen line intensity measured as function of position across Orion Nebula

08 p1384 A69-20058

Hartree-Fock calculations of coronal forbidden transition lines in Ar I isoelectric sequence, obtaining wavelengths, magnetic dipole and electric quadrupole transition probabilities

08 p1385 A69-20071

Radiative transfer equation solution for spectral line formed in two dimensionally varying atmosphere extended to continuum radiation in inhomogeneous atmospheres

08 p1386 A69-20077

Spectra of envelope star HD 217050, analyzing metallic lines as function of central depths

08 p1387 A69-20121

Absolute excitation cross sections for emission of second positive bands of nitrogen under electron impact

08 p1355 A69-20208

Nine spectra of recurrent Nova T Pyxidis during fifth /1966/ outburst compared to previous outbursts

08 p1391 A69-20396

Electron-ion collisions during forbidden lines excitation in gaseous nebulae, using Hartree-Fock functions and variational principles

08 p1391 A69-20530

Forbidden resonance line of Ca II in Arcturus from spectrograms at widely different times of year

08 p1392 A69-20558

Mean square radii for assigned terms of Fe I energy level diagram for Van der Waals line broadening

08 p1392 A69-20559

Low latitudes observations of 21 cm line of H I in galactic center direction, giving contours maps of brightness temperature

08 p1392 A69-20562

Electron temperatures and internal turbulence in H II regions of Sagittarius arm measured by high resolution interference method

08 p1392 A69-20566

Mass loss observed in Of, Wolf-Rayet and OB supergiant stars from P-Cygni profiles in far UV resonance lines

08 p1395 A69-20641

Spectroscopic residual intensities variation of metallic and hydrogen lines of eclipsing system R Canis Majoris with phase, discussing surrounding gaseous matter

08 p1396 A69-20646

Emission line galaxy NGC 5253, discussing radial velocity, line width and excitation and similarity to Seyfert galaxies

08 p1407 A69-21132

RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Cassiopeia A source

09 p1586 A69-21295

Water molecules radio spectral lines from microwave emission sources in Galaxy studied for variability, size and polarization

09 p1587 A69-21307

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph

09 p1590 A69-21380

Molecular line intensity requirement in line of sight for detecting interstellar water vapor cloud, assuming transparent atmosphere and ideal radio telescope

09 p1591 A69-21446

Detection of micron Ne emission line from planetary nebula IC 418 using IR spectrometer

09 p1591 A69-21452

Stigmatic profiles of solar C II doublet resonance lines obtained by rocket-borne echelle spectrograph

09 p1592 A69-21456

Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin

09 p1485 A69-21533

Physical conditions in nuclei of various Seyfert galaxies deduced from line intensities, noting permitted and forbidden lines formation in different regions

09 p1596 A69-22056

Helium-like ion resonance satellite lines in laboratory and solar plasmas, noting coincidence between solar satellite energy and energy level interval

09 p1598 A69-22158

Subdwarf HD 25329 studied with model atmosphere approach, using H alpha, Na I and Mg I profiles for effective temperature

09 p1600 A69-22199

Green and red coronal line polarization observed during solar eclipses, discussing nonpolarization of red line and observation instrument error

09 p1600 A69-22204

Rotational Raman scattering in planetary atmospheres, analyzing spectra of deep solar Fraunhofer lines

09 p1601 A69-22207

Red autoionizing lines relative gf values for calcium measured by shock tube experiment

09 p1601 A69-22208

Helium I line profiles including forbidden component, discussing electron and ion Stark broadening and thermal Doppler broadening

09 p1601 A69-22209

Boltzmann plots derived from spatially integrated spectral line intensities emitted from nonuniform gaseous plasmas, discussing Boltzmann temperature

09 p1552 A69-22251

Radio recombination lines of galactic hydrogen as sensitive test for low energy cosmic ray existence in interstellar medium

09 p1580 A69-22273

Line blanketing for two level atom with spectral line formed in pure absorption and noncoherent scattering, studying wavelength and depth dependence

09 p1606 A69-22424

Atomic line spectrum computation for F-K supergiant or cepheid, using observational data on standard star spectrum

10 p1771 A69-22854

Auroral spectrum observations for absolute brightness of nitrogen Meinel and ING systems, con-

- sidering background night airglow and atmospheric extinction
10 p1681 A69-23161
- Chromium concentrations induced line shift in ruby single crystals spectra, determining principal lines position
10 p1744 A69-23321
- Laser emission lines produced by pulsed electrical discharge through ammonia
10 p1704 A69-23666
- Coronal line intensity distribution for period of proton flare
10 p1763 A69-23732
- Active prominence during solar flare with loop-like shape of spectral line profiles, discussing turbulent velocities and limb flares
10 p1764 A69-23739
- Isotope shifts in 4416 Å cadmium laser, showing change of double peaked to single peaked profile with doubled active tube length
10 p1705 A69-23812
- Mode interactions in argon lasers between two spectral lines noting effect on output
10 p1705 A69-24003
- Spectral lines relative intensities for bright medium excitation gaseous planetary nebula IC 3568, using photoelectric spectrum scanner and spectrophotometry technique
10 p1787 A69-24117
- Spectral measurement of luminous trails produced by injecting high velocity submicron diameter iron particles into gaseous targets compared with meteor spectra
10 p1790 A69-24142
- Tunable Fabry-Perot interferometer for photoelectric measurements of absorption and emission line contours and line center particle concentrations
10 p1698 A69-24212
- Line spectrum of flare gamma radiation due to atmosphere nuclei excitation by high energy proton acceleration
11 p1945 A69-24241
- He I 10830 Å line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness
11 p1955 A69-24391
- B star HD 191980 spectral variations from B-3 to B-8 noting helium to carbon line intensity ratio, interstellar D line strength and radial velocity measurements
11 p1958 A69-24594
- Magnetic fields, green corona emission and filaments relationship at high solar latitudes using synoptic charts
11 p1964 A69-25416
- IR absorbance data for atmospheres of ammonia and ammonia nitrogen mixtures at various wavelengths indicating absorption in strong line region for gas pressures used
12 p2132 A69-26247
- Forbidden solar corona lines transition probability in vacuum UV region
12 p2157 A69-26334
- Spectral line formation in nonlinear multilevel atom line transfer problems, considering radiation transfer through plane parallel atmospheres of H and Mg atoms
12 p2133 A69-26967
- Resonance line radiation transfer in finite homogeneous cylinders of various shapes and optical thicknesses using Monte Carlo method
12 p2191 A69-26970
- NGC 4151 absolute intensities of wide emission of weak isolated and IR lines determined from photoelectric spectrophotometric measurements
12 p2164 A69-27023
- Red shift determinations and line identifications for quasars, using spectrograph with electro-optical converter
12 p2168 A69-27048
- Ionized gas cloud eruption from galactic nucleus deduced from observed hydrogen line at 5.1 cm
12 p2171 A69-27068
- Spectrum of abnormal B-type star HR 3817, noting Balmer line profiles and instrumentation
12 p2172 A69-27160
- Shift of certain Hg spectral line by high power pulse from Nd laser through perturbation of atomic energy levels
13 p2270 A69-27202
- Statistical tests for cosmological hypothesis for origin of absorption lines in spectra of quasars, considering red shifts
13 p2234 A69-27307
- Scorpius XR-1 X ray emission spectra, discussing Fe emission line near 7 keV plasma models, supernova mass and cosmic abundance
13 p2325 A69-27313
- Relative intensities of selected Si two multiplets calculated and compared with solar spectrum and plasma source ZETA values
13 p2326 A69-27551
- NGC 4194 galaxy emission line spectrum analysis showing presence of highly excited gas in nucleus and in bright central region similar to NGC 7714
13 p2339 A69-27571
- Line absorption effect on opacity and main sequence model stars noting luminosity, radius and mass of convective core
13 p2340 A69-27578
- Expected IR line spectra of gaseous nebulae based on physical conditions, listing line intensities
13 p2342 A69-27595
- Potassium vapor radiative perturbation by ruby laser radiation in glass cell with end windows, studying emission line structure
13 p2271 A69-27656
- Dielectronic recombination influence on radio recombination lines of carbon under typical nebular conditions
13 p2346 A69-27703
- Astronomical unit determined by measuring radial velocity of radio wavelength spectral line source
13 p2350 A69-27822
- Magnetic A star HD 152107 anomalous intensification of Balmer series H lines observed by spectrograms
13 p2352 A69-27873
- He-Ne laser transition line shape and gain curve through width, considering spectral frequency characteristics, output power and gas temperature and concentration
13 p2272 A69-28115
- Excited hydrogen RF spectral lines from nebula NGC 6618, calculating frequency for transitions by Balmer formula
13 p2353 A69-28433
- Interstellar gas radio and optical spectral lines of neutral H compared with Ca and neutral Na, discussing critically low velocity gas distribution
14 p2519 A69-29135
- Spectral lines emitted from low voltage discharge in cesium filled diode with hot cathode, giving current-voltage characteristics as function of pressure and temperature
14 p2491 A69-29260
- Forbidden transition probabilities of solar corona lines in vacuum UV range
14 p2519 A69-29355
- Emission line fluxes of southern planetary nebulae in Magellanic Clouds and Galaxy measured photoelectrically, giving upper limit to H beta emission of Magellanic planetary
14 p2520 A69-29376
- X ray investigation of niobium, aluminum and niobium-aluminum systems to obtain K-spectra and L-spectra
14 p2508 A69-29664
- Fe and Ti line growth in 12 July 1961 solar flare spectrum, finding ionized titanium, neutral and ionized iron excitation temperatures
14 p2514 A69-29720
- Electron densities measurement in plasmas in magnetic fields from profiles of spectral lines, noting Stark and Zeeman effect
15 p2657 A69-30027
- Spin temperature of interstellar neutral hydrogen calculated from 21 cm absorption spectra line profiles
15 p2681 A69-30411
- Spectral emission of active prominences, showing looplike lines during quiet phases and differences in turbulent velocities magnitude
15 p2674 A69-30510
- Lasing kinetics, emission spectrum and directivity of ruby laser with spatially homogeneous population inversion
15 p2634 A69-30729
- Canum Venaticorum variable A star spectrum, listing all lines observed between 5000 and 6650 Å
15 p2692 A69-30773
- Solar Mg b and Na D line spectra, computing profiles for Doppler cores of lines for multilevel model atoms and selected chromospheric parameter ranges
15 p2693 A69-30779
- Coronal limb enhancement photometric study by spectroheliograms, comparing maximum brightness profiles in lines of different temperature in extreme UV
15 p2693 A69-30781
- Spectral Pt II lines in Ap stars of Hg class observed during analysis of double lined spectroscopic binary HR 4072
15 p2695 A69-30891
- Transition probabilities of spectral lines in helium-like ions estimated from hydrogen magnetic dipole transitions, discussing single photon decay
15 p2695 A69-30892
- Electron excitation and phase shift method for radiative lifetimes of Ar II UV transitions
15 p2656 A69-31034
- Relative intensities of lines in vibration and rotation bands of isotopic carbon dioxide in planet Venus, tabulating partition functions
15 p2656 A69-31154
- RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source
15 p2697 A69-31226
- Quasi-stellar and related objects emission and absorption red shifts tabulation suggesting absorption lines origin
15 p2701 A69-31532
- Bound excitons spectra in Cu doped gallium arsenide crystals, analyzing line oscillation structure and uniaxial compression effect
16 p2824 A69-31571
- Spectral characteristics of B stars group, reviewing causes of spectral line profile deformation
16 p2855 A69-31828
- Thermosphere neutral wind speed measured from observing Doppler shift in O I 6300 night airglow line with Fabry-perot interferometer
16 p2776 A69-32093
- Green line suppression in type B aurorae based on negative ion-electron chemistry below O transition region
16 p2778 A69-32191
- Radial velocity and spectral line variations of HD 124224, suggesting main sequence star of B6 to B9 spectral type
16 p2859 A69-32223
- Chromospheric spectrum outside of eclipse, wave lengths 3040 to 9266 Å, listing emission lines taken at McMath solar telescope
16 p2861 A69-32257
- Transition probability for 5577 Å auroral green line determined from measuring number density of O atoms in oxygen-helium discharge and emitted line intensity
16 p2781 A69-32319
- Error analysis of one bit autocorrelation method of spectral estimation, noting decrease in spectral variance with increased sampling rate
16 p2752 A69-32390
- Electron impact broadening of isolated spectral lines emitted by neutral atoms in plasma
16 p2823 A69-32468
- Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin
16 p2783 A69-32528
- RF spectral line detection from ortho hydrogen ions in Omega Nebula and NML Cygnus
16 p2864 A69-32571
- Asymptotic formulas for X and Y functions for resonance radiation scattering in layer, analyzing Doppler absorption and line profiles
16 p2813 A69-32588
- Hydrogen line profiles, equivalent widths and electron densities for peculiar alpha 2 CVn and gamma Lyr stars
16 p2864 A69-32594
- Spectroscopic study of P Cygni showing ionization temperature, Balmer decrement agreement with calculated value and chemical composition
16 p2864 A69-32595
- MH alpha 328116 /Cygnus/ spectrum noting three Fe IV lines
16 p2866 A69-32815
- Wolf 359 flare spectra obtained with Palomar telescope, noting hydrogen and He line enhancement, broadening and violet shifting
16 p2852 A69-32817
- Cloud scattering corrections added to synthetic spectrum analysis of carbon dioxide bands and water vapor line in Venus spectrum
17 p3032 A69-33161
- Cross sections threshold behavior for Cs II resonance lines excitation due to Cs ion-He collision
17 p3008 A69-33388
- Spectral lines radial velocities and profiles observed on 48 Librae from 1950-1962
17 p3038 A69-33722
- Red shift table for six galaxies near Coma Cluster from spectrograms of absorption lines
17 p3044 A69-34182

Ionization stratification and chemical abundances in planetary nebula NGC 7662, discussing density fluctuations effect on N II and O II lines
18 p3191 A69-34294

Absolute gf values for Fe I and Fe II lines between 3190 and 3315 Å measured by spectral absorption through shock heated gas containing Fe
18 p3175 A69-34304

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph
18 p3198 A69-34768

Electronic levels excitation in S I and II by beam foil method
18 p3177 A69-35015

Quiet aurora atomic O red and green lines intensity ratio measured from rocket
18 p3201 A69-35192

Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile
18 p3177 A69-35239

Cloud layer multiple scattering in Jovian atmosphere, discussing influence on Lorentzian contour of planetary absorption lines
18 p3203 A69-35332

Atomic and molecular absorption lines and width measurement in spectrum of WZ Cassiopeiae carbon star in visual and IR region
18 p3204 A69-35350

Spectroheliograms interpretation obtained in line cores of neutral oxygen IR multiplets
18 p3204 A69-35388

Emission line spectrum for ionization and excitation in solar coronal structures, tabulating intensities from ground based eclipses observations
19 p3422 A69-36217

Forbidden lines emitted by gaseous nebulae, emphasizing relative intensities of O II and O III lines
19 p3422 A69-36220

Forbidden lines of O I, O II, S II, N II and A III in red and near IR spectra of NGC 1976, IC 418 and II 4997
19 p3422 A69-36222

Spectral lines due to magnetic dipole transitions in fine structure levels in collisionally excited neutral H clouds, discussing theoretical difficulties in interpretation
19 p3379 A69-36225

Forbidden lines in slow nova RR Tel spectrum, comparing ionization rate with RR Pic
19 p3423 A69-36230

Intensity variations of Eta Carinae emission lines
19 p3423 A69-36231

Forbidden transitions in emission line spectra of variables near minimum light, finding origin in hot chromosphere
19 p3424 A69-36232

MH alpha 328-116 spectral characteristics noting weak continuum, emission lines from forbidden transitions and absence of absorption
19 p3424 A69-36233

MH-alpha 328-116 / V 1016 Cyg/ star spectrum, indicating object evolution toward higher ionization states
19 p3424 A69-36234

Forbidden emission lines used to study interstellar gas, discussing gas ionization, neutral hydrogen, calcium lines, etc
19 p3424 A69-36235

Forbidden emission lines in spectra of normal, radio and Seyfert galaxies and quasars, giving information about quasi-stellar mean densities, temperatures, ionization, etc
19 p3424 A69-36236

He I 1.083 micron resonance line in evening twilight airglow spectrum, discussing maxima, minima, decay patterns, etc
19 p3303 A69-36484

Solar atmosphere line source function showing frequency dependence as consequence of spectral line disappearance at solar limb
20 p3588 A69-37540

Solar corona Fe XII emission spectral lines relative intensity analyzed as function of temperature electron density
20 p3603 A69-37548

Relative oscillator strengths of 3500-5600 Å Fe I lines in emission of arc burning in Ar with iron chloride admixture
20 p3581 A69-37823

Giant stars UVB reddening line slopes determined from photometric data
20 p3608 A69-38047

Effective thinness approximation for spectral line formation from photon degradation processes and random walk of scattered photons, discussing optical thickness
20 p3612 A69-38159

Autoionization lines effect on stellar structure by computing contributions to Rosseland mean opacity
20 p3612 A69-38165

Ce II line reversal from absorption to emission in solar spectrum, noting reversal position dependence on wavelength and line source function scattering term
20 p3613 A69-38168

Absorption spectrum of diatomic oxygen excited by AC silent discharge photographed with vacuum spectrograph, associating lines with Schumann-Runge band
20 p3581 A69-38276

Magnetic ordering in dysprosium phosphate observed by high resolution spectral line intensity measurements, finding Neel temperature
21 p3773 A69-38331

Intensity integral inversion for Doppler core of strong solar absorption lines to obtain line source function for solar atmosphere
21 p3796 A69-38478

Diurnal intensity variations in OI 5577 Å line emission connected with vertical movements in 90 km level of atmosphere
21 p3713 A69-38525

Electron paramagnetic resonance line splitting between two nondegenerate Zeeman levels, using ruby laser as pumping source
21 p3735 A69-38582

Line statistics for representation of line absorption coefficient distribution for solar type stars
21 p3801 A69-38762

Tabulation of solar UV spectrum features between 3650 and 3000 Å from intercomparison of photoelectric records and Second Revised Rowland, indicating wavelength relocations
22 p4014 A69-40146

Fourier spectrum analysis of solar line oscillation sequences, discussing power spectra and lifetime of oscillation phase
22 p4019 A69-40286

P Cygni spectroscopy indicating existence and atmospheric structure of accelerating envelope about star, computing line profiles
22 p4023 A69-40471

Radiative energy transport in moving gaseous media in local thermodynamic equilibrium, assuming spectral line shifts by temperature and pressure variations
22 p3982 A69-41018

Emission lines in optical spectra of radio galaxy nuclei, considering time dependent energy release nature
22 p4034 A69-41174

Xenon laser CW operation on unclassified spectral lines of high ionization states, using laser induced spectroscopy
23 p4172 A69-41399

Interferometrically measured wavelengths tabulated for Th lines in 2747-4572 Å range, using liquid nitrogen cooled hollow cathode lamp and Fabry-Perot interferometer
23 p4191 A69-42150

Carbon monoxide presence in Martian atmosphere from Mars line spectra, giving content, surface pressure and concentration
23 p4220 A69-42379

Daylight observations of Comet Ikeya-Seki 1965-f at perihelion passage, discussing resulting emission line spectra within comet head
23 p4221 A69-42386

Carroll Fourier transform method applied to stellar spectra lines to determine small rotational velocities
23 p4222 A69-42404

Neutral He lines at 537 Å and 584 Å obtained by spectroheliometer on OSO 4, studying differences between quiet and active regions
23 p4222 A69-42405

Red shift determinations and line identifications for quasars, using spectrograph with electro-optical converter
24 p4375 A69-42551

Photoelectric measurements of emission line intensities for low density planetary nebula with moderate excitation located near north galactic pole, deriving abundances
24 p4376 A69-42662

Tabulation of photographic and photoelectric spectrophotometrically obtained relative spectral line intensities for planetary nebula IC 5217, discussing interstellar absorption
24 p4376 A69-42663

Model atmosphere analysis of line identifications and equivalent width data for relatively cool Ap star HD 204411, discussing atmospheric composition
24 p4376 A69-42664

Absorption lines in stellar spectra and significance in cosmogony, discussing ionized Ca K line detection during delta Orionis study, K and H lines components, etc
24 p4383 A69-42999

Multichannel spectral line receiver for 210 ft Australian radio telescope with front ends covering wide frequency range
24 p4283 A69-43115

Free Na atoms production for spectral line reversal procedure, facilitating procedure by replacing NaCl and chromium carbonyl by sodium azide
24 p4297 A69-43589

He I 10830 Å line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness
24 p4390 A69-43781

P Cygni characteristics and spectrum analysis, describing absorption lines, line widths, atmospheric composition, light variations, etc
24 p4391 A69-43803

LINEAR ACCELERATORS

H resonator for charged particle beams combination at output of double beam linear accelerator
05 p0727 A69-15639

Linear ion accelerators noting particle motion, RF cavity design, RF power sources, injection and applications
09 p1553 A69-22697

H resonator for charged particle beams combination at output of double beam linear accelerator
16 p2762 A69-32497

LINEAR ARRAYS

NT ENDFIRE ARRAYS NT YAGI ANTENNAS

Planar arrays of linear antennas above stratified medium, showing antenna impedance and current distribution expressed in terms for free space environment
01 p0042 A69-10343

Phased array radar antennas emphasizing beam steering of transmitting linear array with number of phase shifters
01 p0049 A69-11390

Green function for linear antennas in warm plasma fed by coaxial air filled transmission line, computing current distribution and input admittance
02 p0215 A69-11942

Dual band shunt slot linear array for S and X band radiation patterns generated from single aperture
02 p0219 A69-12344

Triangular lattice arrays radiation characteristics similarity to linear tapered arrays, noting sidelobe level
04 p0570 A69-14308

Planar array multiple beam generation and position determination using N-port Butler matrices
04 p0570 A69-14309

Asymptotic decay of coupling for infinite phased arrays proved valid for infinite parallel linear plate array immersed in magnetized cold plasma
04 p0571 A69-14314

Mutual coupling and element efficiency for infinite linear arrays of dipoles
04 p0571 A69-14317

Electronic scanning antenna system consisting of ceramic rod linear array, power distributor, electronic ferrite phase shift feed and driver
04 p0572 A69-14327

Random phase errors in end-fed linear antenna arrays
04 p0578 A69-15211

Propagation constant and radiation of center fed linear antenna with feed points displaced transverse to antenna axis and immersed in warm compressible plasma
06 p0896 A69-17476

Synthesis of symmetrical linear array space factors in main beam and grating lobes by spacing distributions and element excitation adjustment
07 p1108 A69-19466

Coupling between array antennas shown to reduce reflecting properties of Van Atta reflector consisting of linear half wave dipoles
08 p1282 A69-20037

Self focusing linear array for communication satellites, evaluating reradiated field taking into account mutual coupling between elements
08 p1289 A69-20970

Converging solutions for imaginary admittance and current distribution in linear cylindrical antennas
08 p1295 A69-21165

Laplace transform applied to linear array analysis and synthesis, discussing transform singularity correspondence to array structure

09 p1532 A69-21600

Velocity, lifting force, pressure moment and circulation around linear array of thin foils with direction normal to profile chords calculated by Birnbaum-Glauret method

11 p1817 A69-24348

Atmospheric turbulence effect on linear antenna gain in direction of radiation pattern maximum determined together with antenna dimensions

11 p1844 A69-24435

Approximate method for calculating linear multipole antennas parameters in terms of power requirement, considering equidistant/nonequidistant element antennas

11 p1849 A69-24969

Passive magnetic elements array calculation for radiation pattern, discussing emitter position

13 p2235 A69-28513

Current distribution along linear antenna array taking into account interaction between neighboring elements and effect on antenna radiation characteristics

13 p2236 A69-28572

Spatial frequency distribution of linear array with randomly located elements from probabilistic analysis

17 p2929 A69-33873

Interrelations among mutual coupling, element efficiency, active impedance and radiation patterns in linear arrays derived from infinite order difference equation

17 p2929 A69-33874

Linear array composed of dual mode elements radiating into parallel plate region, obtaining scan angle compensation of element impedance

17 p2929 A69-33875

Cramer-Rao and split-beam tracker techniques compared for optimum bearing error attainable with linear passive sonar array in spatially incoherent noise environment

20 p3576 A69-37322

Scattered field of linear array of center loaded cylindrical elements illuminated by plane electromagnetic wave

20 p3494 A69-37838

LINEAR CIRCUITS

Small signal characteristics and frequency response of diode-stabilized integrated linear circuits, discussing feedback, impedance, bias- diode, etc

01 p0041 A69-10204

Wide range linear delay circuit with compensated bootstrap circuit generating linear ramp waveform and regenerative Schmitt trigger comparator

01 p0041 A69-10241

Computer analysis of linear active nontime varying circuits by two graph topological approach based on Binet-Cauchy theorem

01 p0037 A69-11349

Linear integrated circuit communication systems based on subsystem approach, showing example of IF strip and audio AGC/squelch amplifier

01 p0035 A69-11389

Stability of linear passive time variable circuits, discussing validity of circuit elements replacement by gyrator equivalents

05 p0739 A69-16348

Noise description of linear n ports obtainable from spot noise parameters of two ports formed from n port

05 p0741 A69-16732

Transversal equalizer circuit consisting of delay line and variable sampler and reinsertion coupler for microwave frequencies

07 p1102 A69-18671

Linear noisy two port preceded by nonreciprocal lossless network analyzed, showing existence of associated quantity invariant under lossless transformation

07 p1104 A69-18891

Control system utilizing digital and linear integrated circuits for low power testing of Pewee 1 reactor of Rover program [IEEE PAPER 2B-6]

07 p1179 A69-19188

Linear electronic circuit canonical synthesis by computer, using algorithm based on linear and nonlinear programming

09 p1472 A69-21781

Linearized radio circuits frequency characteristics calculations using digital computers, noting system nodes number influence on computer rate

09 p1472 A69-21783

Computer programs for linear systems fault isolation, discussing technique theory and limitations

12 p2040 A69-26568

LINEAR EQUATIONS

Linear partial differential equations for nonlinear intensive heat and mass transfer, discussing analogy between transfer processes and electromagnetic waves distribution

01 p0174 A69-10104

Linear ordinary differential equations with exponential coefficients, giving solutions asymptotic behavior for large values of independent variable

01 p0103 A69-10231

Second order systems of linear differential equations eliminating all nonessential difficulties associated with initial value problem

01 p0104 A69-10316

Approximate solution for Dirichlet problem for linear Karman differential equation used in thin plate deflections obtained by Bubnov- Galerkin method

01 p0105 A69-10700

Exchange rule to solve system of linear matrix equations in sense of Chebyshev, giving various algorithms

01 p0105 A69-10705

A priori and a posteriori estimates of direct methods accuracy in solving linear algebraic equations

01 p0105 A69-10727

Approximate solution convergence for linear operator equation in Hilbert space by least squares method

01 p0105 A69-10728

Difference schemes stability for solving linearized gasdynamic equations obtained by representing transition matrices in form of two matrix sum

01 p0060 A69-10729

Reduction principle for study of linear differential equations stability

01 p0106 A69-10956

Soviet book on linear differential equations in Banach space covering equations with unrestricted operators, continuous semigroups, partial differential equations and asymptotic methods

01 p0106 A69-10996

Linear stationary thermoelasticity equations for Cosserat continua, discussing static and kinematic conditions, anisotropy and centrosymmetric isotropy equations

02 p0336 A69-11557

Linear integrodifferential motion equations for turbulent flow within Heisenberg statistical turbulence theory

02 p0230 A69-11869

Integration for equations governing linearized thermoelastic transformations of incompressible solids

02 p0340 A69-12033

Approximate solution of linear functional, singular integral and integrodifferential equations by general theory of approximate methods

02 p0272 A69-12163

First boundary value problem for linear second order parabolic equation with unbounded lowest order discontinuous coefficients and free terms, discussing solvability

02 p0272 A69-12222

Soviet book on linear and quasi-linear second order elliptic equations, emphasizing boundary value problems in various functional spaces

02 p0273 A69-12566

Lic algebra of second order linear differential equations

02 p0273 A69-12841

Integral prediction method for arbitrary continuous function on right hand side of nonhomogeneous linear differential equation with constant coefficients

03 p0455 A69-13022

Zero solution asymptotic stability for linear differential equations with continuous functions

03 p0465 A69-13129

Finite difference method for symmetric positive linear differential equations, discussing methods to solve finite difference equations generated

03 p0455 A69-13370

Linearized time dependent equation for photovoltaic distribution in nonuniformly illuminated p-n junction

03 p0486 A69-13636

Linear differential equation theory corresponding to metric theory of dynamic systems, proving theorems with results of qualitative theory of differential equations

04 p0621 A69-14358

Comparison and oscillation theory of linear differential equations, discussing zeros of solutions and Sturm type theorems

04 p0622 A69-14598

Green matrix of periodic boundary value problem for system of linear differential equations

04 p0624 A69-15098

Doubly infinite sets of simultaneous linear equations used in electromagnetic boundary value problems solved by Asymptotic Anticipation Method

04 p0560 A69-15214

Linear integral equations for brightness coefficients and auxiliary functions in semiinfinite atmosphere, expressing atmospheric albedo using moments and Chandrasekhar function

04 p0662 A69-15237

Ascent algorithm for Chebyshev solution of inconsistent linear equations, noting use for linear programming

04 p0626 A69-15318

Approximate method to determine nonstationary thermal fields in solid bodies with thermal capacity and thermoconductivity coefficient depending linearly on temperature

04 p0688 A69-15409

First order linear differential equations having complementary solutions of exponential type to determine effective initial and boundary conditions

05 p0786 A69-15926

Phase error mean square value in phase lock loop determined from linear differential equations to determine output SNR and noise threshold

05 p0720 A69-16342

Linear differential equations with sinusoidal coefficients analyzed with aid of trinomial recursions

05 p0787 A69-16464

Existence of minimal solutions of doubly infinite trinomial linear recursions of Poincare-Perron type

05 p0787 A69-16465

Analog simulation of water hammer type phenomena governed by linear constant coefficient partial differential equations

05 p0751 A69-16475

Optimal control of system governed by linear parabolic equation with white noise inputs, using mathematical model to generate distributed system analog

05 p0740 A69-16599

Linear equations for three dimensional perturbations in boundary layer of viscous incompressible fluid flow on plane surface, discussing Tollmein-Schlichting waves

06 p0909 A69-17329

Second order half linear differential equation solutions compared with linear equation, investigating differences

07 p1172 A69-18262

Hyperbolic sine creep law, discussing limiting stresses for approximation by linear or exponential relationship

07 p1235 A69-19384

Galerkin method of moments applied to stochastic bounded linear operator equation, discussing statistically homogeneous operator case and electric field in dielectric

07 p1174 A69-19472

Unstable regions prediction for reciprocal system governed by linear equations with periodic coefficients, noting application to rotating shaft and helicopter rotor

08 p1413 A69-20401

Plane H polarized electromagnetic wave diffraction incident on array of rectangular rods described by linear algebraic equations

08 p1275 A69-20433

Singular perturbation problem for elliptic linear partial differential equation, studying asymptotic expansion of solution in vicinity of singular points in nonconvex domain

08 p1352 A69-20751

Duality between effect and influence problems in linear elastoplasticity, obtaining rules for influence functions plotting

09 p1612 A69-21604

Normal solutions of linearized Boltzmann equation for initial and boundary conditions in hydrodynamics solved by approximation

09 p1480 A69-21667

Linear elliptic partial differential equations, deriving sufficient conditions on coefficients for equations to be oscillatory in certain unbounded domains

09 p1533 A69-22771

Five parameter class of linear iterative methods for solution of linear equations systems in application to elliptic boundary value problems

10 p1718 A69-22878

Iterative processes for solution of linear algebraic equations for n dimensional vectors in given space

10 p1718 A69-23208

Probable spectrum stability criterion and reducibility derived for linear differential equation having recursion or almost periodic coefficients

10 p1720 A69-23562

LINEAR FILTERS

Correction of linear functional differential equations with time delay showing error due to incorrect interchange of order of integration involving Stieltjes integral

10 p1721 A69-23642

Iterative method for numerical solution of linear algebraic equations for stationary probability distributions in queueing and reliability theory

10 p1721 A69-23691

Uniqueness and nonuniqueness of solutions of initial value problems for second order semilinear parabolic equations

10 p1722 A69-24069

Wave propagation in connected space-time for linear second order hyperbolic partial differential equation, describing unitary invariant theory

11 p1908 A69-24356

Mixed boundary value problem in theory of axisymmetric potential of three dimensional boundary layer reduced to solution of linear integral equation

11 p1918 A69-24787

Linear thin shell theory in complex dependent variable form for determining fourth order partial differential equations, considering elastic shells with edge loads

11 p1978 A69-24811

Green tensor construction for systems of linear differential equations with constant coefficients

11 p1996 A69-25730

Observation process optimization in system described by linear differential equations of motion reduceable to optimal control problem

12 p2027 A69-25882

Linear differential equations solutions boundedness and unboundedness criteria, determining quantitative relations

12 p2120 A69-26035

Nonlinear multivariable control systems synthesis, considering synthesis expressibility in known linear formulation

12 p2048 A69-26077

Cauchy problem solution for linear/nonlinear differential equations with analytic right hand sought in form of power series

12 p2120 A69-26199

Periodic solution to boundary value problem for quasi-linear parabolic equation with nonlinear boundary conditions obtainable by Rothe method

12 p2121 A69-26282

Linear two dimensional partial differential equations solved by Laplace transforms on analog computer

12 p2123 A69-26717

Dirichlet problem of linear degenerate second order differential elliptic systems with independent variables

12 p2123 A69-26729

Enclosures for large eigenvalues of ordinary second and fourth order differential equations based on asymptotic solutions of linear homogeneous second order differential equations

12 p2124 A69-26892

Linear difference equations with exponential coefficients for numerical methods of integrating differential equations

13 p2288 A69-27526

Nonnegative solutions of second order linear divergence structure parabolic differential equations, discussing Cauchy problem solution, Green function, etc

13 p2290 A69-28539

Functional analysis methods to solve Cauchy problem for linear nonhomogeneous differential equations with delayed argument

15 p2643 A69-30101

Book on solution of linear ordinary differential equations and simultaneous systems using bar statics-equivalent beam method

15 p2711 A69-30929

Optimization of control system described by linear parabolic integrodifferential equation, using dynamic programming approach

15 p2645 A69-31024

Automatic hybrid apparatus for solving linear equations, using Gauss-Seidel iterative method and stressing control arrangement, communication circuits, etc

15 p2572 A69-31089

Bilinear covariant of linear differential form involving $2n$ independent variables used for grouping to achieve symplectic and contact transformations

16 p2804 A69-31623

Boundedness in mean square of solutions derived for linear differential equations forced oscillations with nonwhite Gaussian random functions parameters

16 p2873 A69-32058

Book on quasi-linear equations systems and application to gasdynamics, including problems involving systems of quasi-linear hyperbolic equations with two independent variables

16 p2771 A69-32113

Simultaneous unbounded solutions existence to homogeneous linear differential equations with continuous positive elastic and dissipative coefficients

16 p2804 A69-32251

Generalized finite difference approximations of linear partial differential operators in space based on functional approximations

16 p2756 A69-32552

Optimal linear mean square filtering for piecewise linear correlation functions

17 p2933 A69-33621

Wave propagation in two dimensional anisotropic media with several perturbation speeds, using Lundquist linear equations ensuring lacunas presence

17 p2925 A69-33841

Local radiation characteristics calculation method, consisting of reducing integral equations to linear algebraic equations, applied to solve radiative heat exchange problems

18 p3229 A69-34713

Linear boundary value problem solution using iterative method

18 p3165 A69-35050

Simplification of linear equation of first kind with Tikhonov smoothing functionals

18 p3165 A69-35052

Elastic stability of sandwich materials in microvolume under compressive force analyzed using three dimensional linearized equations for small subcritical strains

18 p3226 A69-35374

Krein solution method for linear integral equations of first kind and related differential equations

19 p3360 A69-35780

Structural analysis of thin walled conical shell with variable external loading and Winkler-base elastic filler, using linear differential equation with variable coefficients

19 p3436 A69-35846

Linearization of equations of motion for three body problem, emphasizing linear far side libration point as related to possible landing

19 p3402 A69-35961

Engineering equations for elastic thin plate oscillations of materials with properties described by linear integral Volterra-Boltzmann operators

19 p3437 A69-35989

Atmospheric temperature and moisture fields obtained by linear equations and objectively analyzed, considering underlying sea surface energy and cumulus cloud distribution

20 p3523 A69-37351

Continuous optimal control problems, proving direct solutions existence for case of differential equations system linearity in control and state variables

21 p3684 A69-38431

Linearized dispersion equation for isotropic electron plasma without external fields solved by harmonic function model

21 p3775 A69-38564

Iterative processes for solution of linear algebraic equations for n dimensional vectors in given space

21 p3756 A69-39149

Operational calculus for n -variable functions analogous to Mikusinski method for single variable functions, giving applications to linear partial differential equations with constant coefficients

21 p3756 A69-39500

Asymptotic methods for differential equations containing parameter, discussing reduction to integral equations system

22 p3976 A69-41124

First boundary value problem for linear second order parabolic equation with unbounded lowest order discontinuous coefficients and free terms, discussing solvability

23 p4182 A69-41973

Positive cyclic systems of linear differential equations, proving existence and projective uniqueness of solution having positive n components for all t

24 p4340 A69-43131

P-Q norms generalized inverse concept of matrix derived from extension of Penrose best approximate solution of linear equations

24 p4342 A69-43703

LINEAR FILTERS

Optimum linear filters for signal detection against background noise using Hodges-Lehmann method

02 p0223 A69-11565

Linear filter performance degradation due to modeling error in estimate of state vector of stochastic linear dynamic systems

02 p0225 A69-11971

Proper digital filters devoid of transient response analyzed as extension of time invariant filters

02 p0213 A69-12815

Linear processing effect on digital communications systems performance by channel impulse response and input-output relationship as distributional convolution equation

03 p0391 A69-13226

Linear and nonlinear filtering, discussing models for signal process, linear white noise problem, optimal estimates, colored noise and finite dimensional approximation

04 p0581 A69-14696

Spectral density of response of linear discrete filter with multiple input and output periods to random signal

04 p0584 A69-15419

Limited memory optimal filter theory, output and standard filter divergence due to errors

06 p0905 A69-17946

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas

06 p0905 A69-18121

Design and construction of linear digital filters for signal processing, discussing digital filtering of various signals for space research

08 p1297 A69-20303

Kalman filter with delayed states as observables, discussing extra computer effort and modeling technique

09 p1473 A69-22438

Discrete Fourier transforms, discrete linear filters and spectrum weighting for purpose of sidelobe reductions

10 p1666 A69-23888

Linear active adjustable VLF filters for polynomial transfer functions

11 p1859 A69-25392

Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination

12 p2045 A69-26059

Deterministic linear observation systems and Kalman optimum linear filters application to performance improvement of inertial navigation systems

12 p2128 A69-26065

Smoothing problem for linear discrete time system, converting problem to special case of standard linear filtering problem

12 p2122 A69-26525

Optimal filtering of linear distributed parameter systems corrupted by boundary and/or volume stochastic disturbances

15 p2565 A69-30183

Linear mean square estimator for restoration of images degraded by system with bandlimited spread function

15 p2611 A69-31032

Microwave bandpass linear phase filters design and synthesis for simultaneous flat amplitude and delay response

16 p2759 A69-31941

Optimal linear mean square filtering for piecewise linear correlation functions

17 p2933 A69-33621

Continuously powered deep space vehicle orbit determination, discussing state estimation accuracy and use of continuous data filtering

19 p3402 A69-35939

Temporal position of pulse signal on noise background determined by measuring signal passage time through linear filter zero point

19 p3278 A69-36596

Book on linear digital filtering and discrete spectrum analysis, emphasizing frequency domain description of signals and systems

20 p3487 A69-37146

Remote sensors discrimination and performance, discussing linear filter system, contrast ratio, tricolor systems and multispectral scanning system

20 p3493 A69-37743

Sequential filter equations for nonlinear system dynamics and observational model with linear estimator, comparing difference between white and colored noise filter results

21 p3686 A69-39371

Stable linear system /shaping filter/ synthesis transforming stationary white noise into random process having given covariance function

21 p3688 A69-39661

- Minimax sensitivity criteria used to synthesize filters for estimating state of first order plant subject to dynamic and/or statistical parameters uncertainties 22 p3918 A69-41016
- Linear filtering effects in channel with binary direct sequence antipodal biphase modulation in presence of white noise and sinusoidal interference, noting variance 23 p4122 A69-41774
- Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination 23 p4146 A69-42446

LINEAR PREDICTION

- Linear random processes including law of large numbers, covariance estimation and linear to normal process relationship 01 p0029 A69-10555
- Algorithms for error analysis, optimum filtering sensitivity and fixed interval smoothing solutions to linear estimation problems 02 p0224 A69-11961
- Optimal filter design for estimating state of linear dynamical system in presence of high measurement noise 04 p0582 A69-14877
- Nonlinear programming computational algorithm for recursive optimal estimates of constrained states of linear system 06 p0902 A69-17403
- General linear state estimation from algebraic viewpoint without probability theory concepts, establishing least squares parameter estimation 23 p4182 A69-41880

LINEAR PROGRAMMING

- Book on advanced linear programming computing techniques covering algebraic theory and construction of computer programs 01 p0035 A69-10701
- Incorrect variational and linear programming problems in optimal control theory, emphasizing regularization technique by Tikhonov 03 p0409 A69-13067
- Optimum structural design based on linear, nonlinear and dynamic programming [SAE PAPER 680752] 03 p0525 A69-13437
- Levinson duality theorem for linear programs in complex space proved on basis of duality theorem for linear programming in real space 04 p0623 A69-14947
- Ascent algorithm for Chebyshev solution of inconsistent linear equations, noting use for linear programming 04 p0626 A69-15318
- Iterative Chebyshev approximation for computerized network design by linearizing original nonlinear programming 08 p1299 A69-21170
- Linear electronic circuit canonical synthesis by computer, using algorithm based on linear and nonlinear programming 09 p1472 A69-21781
- Processing of data obtained in continuous tracking of space objects using computer algorithms 10 p1791 A69-24193
- Linear programming algorithms for optimal structural weight design 12 p2181 A69-26566
- Information collection by remote sensing and related economic principles, presenting mathematical formulation of linear programming model 12 p2193 A69-26988
- Incorrect variational and linear programming problems in optimal control theory, emphasizing regularization technique by Tikhonov 14 p2424 A69-28749
- Tolerance limits for uncertain requirements vector in linear programming with random variation, introducing nonparametric statistics with sensitivity analysis [AAS PAPER 69-079] 24 p4340 A69-42821

LINEAR SYSTEMS

- Multiple transmission principles, examining linear systems, synchronous and asynchronous codes and channel interference 01 p0026 A69-10068
- Optimal control of discrete and continuous stochastic linear dynamical systems, discussing algorithms for instantaneous weighted minimum mean square error performance 01 p0051 A69-10439
- Controllability of dynamic systems obtained by studying vector function increments along system trajectories 01 p0051 A69-10698

- Algorithms for linear system of first order differential equations, emphasizing equations associated with computer oriented circuit design 01 p0036 A69-10708
- Random order linear homing systems analyzed by frequency methods employing method of proportional navigation, noting use of transfer functions 01 p0113 A69-10805
- Single frequency oscillations in stochastic quasi-linear differential equations with delay 01 p0170 A69-10825
- Kalman optimal filter for linear distributed parameter systems with Gaussian disturbances and measurement noise 01 p0034 A69-11143
- Two parameter dynamic system of fourth order optimization based on gradient method modified for discrete optimization 02 p0224 A69-11594
- Asymptotic stability conditions for delayed quasi-linear nonautonomous systems periodic solutions derived by Shimanov method 02 p0280 A69-11705
- Optimal adaptive control of discrete linear systems with unknown gain, considering Gaussian distribution functions and random disturbances 02 p0224 A69-11962
- Computational algorithm for determining piecewise-constant feedback gains for linear system optimal control 02 p0224 A69-11964
- Optimal control problem for linear regulators with constant external disturbance 02 p0225 A69-11970
- Pulse transfer function estimation for single input and output linear stationary discrete systems using iterative algorithm and quasi-linearization method 02 p0225 A69-11972
- Correlation of overshoot with gain crossover frequency, phase crossover frequency, phase margin and velocity error constant for linear feedback control systems 02 p0225 A69-12026
- Circuit for linear voltage amplitude to pulse width conversion using controlled unijunction monostable multivibrator 02 p0217 A69-12151
- Book on dynamics of linear and nonlinear systems covering mathematical methods for control system design 02 p0225 A69-12228
- Book on stability criteria for linear mechanical engineering systems covering response characteristics, encirclement theorem, Routh and Hurwitz criterions, root loci, D partition, etc 02 p0281 A69-12276
- Thermal noise from passive linear multiports, noting influence of temperature and absorption coefficients 02 p0211 A69-12443
- Matrix representation of linear active two port noise figures and charts in terms of power wave variables 02 p0211 A69-12444
- Linear differential equations zero solution stabilization by control formed as linear combination of measured coordinates of object 03 p0408 A69-12972
- Linear pulse control systems monotone stabilization, estimating required number of controls 03 p0409 A69-12975
- Passive linear FM pulse compression radar systems detection capability compared with matched filter performance 03 p0390 A69-13218
- Role of second order internal resonance in problem of stability of equilibrium of system neutral in linear approximation 03 p0466 A69-13404
- Necessary conditions for stability of trivial solutions of parabolic systems of partial differential equations 03 p0456 A69-13405
- Linear transistor models synthesis based on measured characteristics of four terminal admittance parameters 03 p0404 A69-13596
- Synthesis of optimal second order systems with linear control 03 p0410 A69-13864
- Book on qualitative theory of sampled data systems 04 p0630 A69-14563
- Optimal control of linear stochastic systems using noise measurement data mathematical model 04 p0581 A69-14569

- Optimal linear controller synthesis with minimized trajectory sensitivity achieved by using quadratic cost function 04 p0582 A69-14941
- Linear mechanical systems idealized by single degree of freedom system with viscous damping subjected to combined deterministic and random excitation 04 p0680 A69-14968
- Nonsteady coordinates of linear delay system determined from observable linear combination of phase coordinates 04 p0583 A69-15094
- Periodic cycles in linear closed loop integral pulse FM systems, discussing existence conditions, periodic formulae and stability criterion 05 p0737 A69-15865
- Stability theorems for discrete linear circulatory systems with N degrees of freedom for static and dynamic loss of stability in presence of velocity dependent forces 05 p0836 A69-15875
- Solution regularity for class of quasi-linear second order elliptic systems, applying results to regularity of extremals of particular integral 05 p0786 A69-15927
- Linear optimal control problems with quadratic performance indices, developing system equivalence for matrix Riccati equation [ASME PAPER 68-WA/AUT-17] 05 p0738 A69-16175
- Sensitivity matrix in multivariable feedback control systems, discussing loop gain matrix design to achieve desired insensitivity to system error sources [ASME PAPER 68-WA/AUT-9] 05 p0738 A69-16179
- Analytical measure of quality of controllability for linear dynamic system and computational procedure for maximizing adjustable structural parameters [ASME PAPER 68-WA/AUT-4] 05 p0738 A69-16182
- Autocorrelation function distortion determined for Barker signal passing through linear system and RC filter, noting passband influence on function shape 05 p0720 A69-16443
- Explicit solubility of asymptotically periodic linear systems of differential equations 05 p0788 A69-16483
- Root sensitivity of linear feedback control systems calculated with signal flow graph and transforming circle 05 p0740 A69-16588
- Invariant subspaces, controllability and observability of linear dynamic systems 05 p0740 A69-16597
- Synthesis of linear controlled systems with variable parameters, reducing parameter determination problem to Chobyshev approximation of relations between linear components 06 p0899 A69-16829
- Linear theory of equilibrium and nonequilibrium gas flows applied to steady two dimensional nonequilibrium flow of inviscid nonheat-conducting gas 06 p0909 A69-17327
- Linear distributed parameter system identification by stochastic approximation, obtaining constant parameters sequentially 06 p0900 A69-17358
- Identification of finite memory, time discrete linear systems by Kiefer-Wolfowitz stochastic approximation procedures, presenting two algorithms for sequential identification 06 p0900 A69-17359
- Finite amplitude longitudinal wave propagation in lattices analyzed by study of compressive wave in chain of mass points with nearest neighbor interaction 06 p1022 A69-17367
- Analysis and synthesis of optimal linear time invariant systems with uncertain or unknown parameters, considering mean square error 06 p0902 A69-17405
- Optimal control of linear systems with state variables generated by linear feedback from output variables, considering time variance 06 p0903 A69-17406
- Linear network analysis by topological formulas for derivation of k-tree terms without generation of k-trees of graph 06 p0903 A69-17409
- Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field 06 p0895 A69-17460
- Digital simulation design for linear dynamic systems, noting role of digital transfer function 06 p0906 A69-17491

Synthesis of optimum linear antenna using algorithm
06 p0897 A69-17543

Optimization procedure developed and applied to minimum fuel midcourse guidance of spacecraft, discussing optimal closed loop control of linear stochastic systems
06 p0955 A69-17576

Linear recurring sequences over finite fields, discussing application to error correcting codes
06 p0948 A69-17863

Maximum likelihood smoother using measurements containing correlated noise for application to continuous linear dynamic systems such as inertial navigation
06 p0956 A69-17938

Stochastic approximation algorithms for adaptive linear discrete time system identification using noisy input
06 p0904 A69-17940

Optimization of control independent cost functions in multidimensional system with linear controllers
06 p0905 A69-17945

Linear state variable feedback to obtain asymptotic stabilization of linear dynamic systems
06 p0905 A69-17947

Linear closed loop control system poorly damped response to deterministic inputs improved by stability constraint for minimization of mean squared error
06 p0905 A69-17950

Nonautonomous linear systems stability, with coefficient varying with bounded time function and bounded derivative
08 p1296 A69-19922

Homogeneous linear systems conditions for asymptotic growth of solutions of nonhomogeneous linear differential equations system
08 p1342 A69-20348

Multiplication of solutions of homogeneous linear differential systems
08 p1342 A69-20349

Bandwidth restriction effect on performance of linear codes for digital communication with space vehicles, noting bit and word error probabilities
08 p1276 A69-20597

Command inputs handling by linear optimal control theory, investigating Riccati matrix differential equation convergence
08 p1298 A69-20856

Book on analysis and synthesis of linear active networks covering filter design, negative resistance, network theorems and stability, amplifier role, etc.
08 p1298 A69-20885

Optimal control synthesis for linear plant operating in noise environment, applying dual control theory
08 p1299 A69-21070

Linear shift register synthesis algorithm found to coincide with Berlekamp iterative algorithm for decoding BCH codes
09 p1470 A69-21317

Optimum gathering of information for linear automatic control system with distributed parameters in presence of random input disturbance
09 p1471 A69-21437

Decoupling by state variable feedback and determination of inverse extended to linear time varying multivariable system
09 p1472 A69-21680

Continuous signal over finite time intervals represented by impulse functions of linear channel
09 p1454 A69-21723

Linear systems analysis by generalized numbers method, discussing algorithms for manual or computer analysis
09 p1472 A69-21778

Equations adaptable to computer for RLC circuits containing linear and nonlinear n-terminal networks derived by nodal method
09 p1472 A69-21779

Optimal controls for linear systems with matrix elements and vector components discrete functions of time
09 p1473 A69-21787

Optimal linear quick response problem solving by fast convergence iterative procedure
09 p1473 A69-21791

Orthogonal projection derived equation to optimally estimate state of nonstationary linear discrete systems with time delay, developing Kalman type filter
09 p1473 A69-22437

Optimal closed loop control system for linear time varying system with two independent parameters, noting trajectory sensitivity in large launch booster
09 p1473 A69-22439

Adaptive control algorithm operating on-line to make discrete time adjustments in controller parameters of continuous time control system
09 p1474 A69-22441

Stationary controller design for linear time varying control systems with state variables not always accessible for feedback
09 p1474 A69-22443

Correlation between responses of linear systems for transient input as performance criterion for servomechanisms
09 p1475 A69-22536

Nonlinear one element control system design based on correlation between responses of linear systems
09 p1475 A69-22537

Time varying linear system with input-output relation described by differential equation calculated for impulse response using Taylor series
09 p1459 A69-22580

Optimal control of discrete processes with bounded phase coordinates, proving optimality conditions
09 p1475 A69-22668

Control system controllability under discontinuous control constraints, presenting optimal response rate linear system synthesis with continuous restriction on control function
09 p1475 A69-22670

Liapunov direct method in stability problems for semilinear and quasi-linear systems of hyperbolic partial differential equations with independent variables
09 p1534 A69-22799

Time optimal controlled linear systems with optimally chosen parameters, considering arbitrary second order oscillator controllability
10 p1666 A69-22922

Root sensitivity of characteristic equation of linear automatic control system to system parameter changes applied to aircraft angular stabilization
10 p1666 A69-23610

Optimal control of time invariant uncontrollable linear systems, noting asymptotic stability
10 p1666 A69-23887

Optimal controls for differential system nonlinear in state function and linear in control function
10 p1667 A69-24057

Time varying linear optimal control system sensitivity obtained by comparing closed loop with open loop sensitivity to parameter variations
10 p1667 A69-24058

Differential games solution value function constructible from solutions to associated one player optimal control problems
10 p1667 A69-24059

Magnitude limited random excitation effect on linear system response, using single degrees of freedom model representing idealized mechanical structure [ASME PAPER 69-VIBR-41]
10 p1807 A69-24179

Multiparameter optimum damping for harmonically excited linear stable strictly dissipative n degrees of freedom system, locating multivariable saddle points [ASME PAPER 69-VIBR-42]
10 p1807 A69-24180

Displacement and acceleration criterion for synthesizing optimum linear vibration isolator systems subject to random input [ASME PAPER 69-VIBR-44]
10 p1807 A69-24182

Conjugated gradient components of optimization criterion in automatic control determined by applying sensitivity method to computation
11 p1857 A69-24367

Drift elimination in linear system identification using binary m-sequences by crosscorrelating over two periods of output
11 p1834 A69-24547

Order of finite order linear continuous completely controllable completely observable system, using impulse response matrix and order of corresponding differential equations
11 p1858 A69-24567

Steady state and dynamic characteristics of linear plant with constant lag element based on correlation function moments
11 p1859 A69-24965

Kalman equations of optimal recursive filter for linear discrete system extended to continuous system through limiting procedure
11 p1859 A69-25408

Open loop suboptimal control for linear time dependent tradeoff between energy expenditure and probability of target set entry
11 p1860 A69-25443

Modeling errors in linear discrete stochastic system effects on Kalman filter state estimates
11 p1860 A69-25448

Asymptotic stability of discrete homogeneous linear minimum-variance estimation formulas
11 p1860 A69-25449

Stability of linear time-varying systems via examples, comparing various techniques
11 p1861 A69-25452

Optimal multivariable linear control system design, based on Pontryagin principle using Laplace transform method, providing good approximation to finite interval controllers
11 p1861 A69-25663

Transient response of linear time invariant system from state transition matrix, eliminating evaluation of eigenvalues
12 p2120 A69-25913

Feedback design for monotonically stabilized linear sampled data control system
12 p2045 A69-25961

Linear bridge circuits design having proportional output signal to first or second derivative of input signal envelope
12 p2037 A69-25962

Terminal optimal control problem for linear system having control criterion not dependent on all phase coordinates
12 p2045 A69-25965

Linear automatic control system floating response to harmonic effects achieved by coinciding open loop system transfer function poles with disturbance pattern poles
12 p2045 A69-25967

Linear vibrational systems natural frequencies and damping characteristics determined from system reaction to pulse effect
12 p2178 A69-26004

Digital control algorithm based on self adaptive linear model of multivariable processes used for feed-forward control of output signals
12 p2046 A69-26063

Deterministic linear observation systems and Kalman optimum linear filters application to performance improvement of inertial navigation systems
12 p2128 A69-26065

Group theory application to multidimensional symmetrical linear dynamic control systems optimization, considering natural vibrations of three material points
12 p2129 A69-26071

Matrix transfer functions factorization to obtain irreducible representations of multivariable control systems used for studying invariant linear multidimensional processes
12 p2047 A69-26072

Canonical forms for observable and controllable linear time invariant systems by simultaneous transformations of system state and input and output vectors
12 p2048 A69-26075

Stability conditions for control systems consisting of linear multivariable stationary neutral plant and multivariable pulse frequency modulator, using Liapunov direct method
12 p2049 A69-26080

Optimal control trajectories computation for bilinear regulator problems including neutron kinetics of nuclear reactor
12 p2049 A69-26083

Third order multivariable control systems calculation with linear differential equations describing plant for design and digital optimization
12 p2049 A69-26085

Controllability of linear multivariable time invariant optimal systems with additive parameters using Kalman controllability definition, noting role of Pontryagin principle
12 p2050 A69-26086

Sampled data time optimal control of linear multivariable system based on determination of system state variables control time and minimum sampling intervals
12 p2050 A69-26088

Time optimal controls for multivariable linear systems by computer programming of iterative calculations /Neustadt and fast convergence methods/
12 p2050 A69-26090

Discrete linear optimal control system with quadratic performance index synthesized by dynamic programming method, obtaining matrix equations
12 p2050 A69-26091

Dynamic properties and reliability of linear time invariant multivariable control systems
12 p2051 A69-26093

Equivalent subsystems for designing multivariable linear automatic control system

12 p2052 A69-26280

Integral representation for continuous linear stochastic processes with independent pieces, assuming convergence in probability for sequence of random variables

12 p2121 A69-26365

Optimal control of discrete time linear system with random parameters, noting case of additive noise in measurements

12 p2052 A69-26501

Feedback control of linear systems subject to sudden changes in parameter values

12 p2052 A69-26502

Near optimum regulator design technique for high order linear systems, using singular perturbation method to reduce system order

12 p2052 A69-26503

Nondeterministic differential games with imperfect state information, emphasizing linear system with quadratic cost functional and additive white Gaussian noise

12 p2053 A69-26505

Complete observability in linear time invariant systems decoupled via state-variable feedback, deriving sufficient conditions

12 p2053 A69-26514

Asymptotic controllability of linear system, giving stabilization procedures based on solutions to limiting differential equations

12 p2053 A69-26515

Feedback controller compensator for invariant linear systems having unstable modes

12 p2054 A69-26517

Controllability of stationary linear multivariable systems using frequency domain criterion with application to optimal control laws for minimum fuel and time control problems

12 p2054 A69-26519

Lumped linear system state estimation with optimal linear smoothing instead of filtering, noting smoothing lag and variance

12 p2122 A69-26524

Smoothing problem for linear discrete time system, converting problem to special case of standard linear filtering problem

12 p2122 A69-26525

Linear closed loop control systems with periodically varying parameters analyzed by harmonics method using Fourier transforms

12 p2054 A69-26720

Asymptotically stable discrete time closed loop linear systems synthesis, presenting feedback matrix as illustration

13 p2287 A69-27238

Eigenvalue approximation for first order systems by introducing artificial periodicity through successive impulse functions of alternate sign

13 p2287 A69-27242

Stability test for linear unit feedback control system with second order lag and dead time compensated by PIO controller

13 p2238 A69-27395

Optimal controller design and transfer functions in linear stabilization systems subjected to unknown disturbances determined by variational calculus

13 p2259 A69-27425

Soviet monograph on design and theory of linear induction pumps for liquid metals covering electromagnetic phenomena, optimized dimensions, etc

13 p2209 A69-27926

Parameter identification in linear dynamical systems with transport lags, discussing linear differential-difference equations and finite difference theory

13 p2289 A69-27945

Iterative solution of linear systems for computation of global stiffness matrix reciprocal

13 p2365 A69-28249

Linear automatic control optimization by modified Newton method for determining real function zero value of real argument

13 p2239 A69-28436

Set of states for control system described by linear differential equation with constant coefficients and brought to zero phase coordinates

13 p2239 A69-28437

Quasi-L-analytic functions for ordinary linear operator L

13 p2290 A69-28484

Energy separability method for linear systems in transient evolution using two new identities

13 p2370 A69-28634

Optimal linear control systems with time limits on transient processes synthesized by reducing optimization to algebraic equations solution

14 p2425 A69-28820

Linear control design to synthesize system with prescribed spectrum, deriving formula yielding control coefficients as function of eigenvalues

14 p2425 A69-28821

Compensating /feedback/ loops determination method for linear two dimensional control system, achieving self regulation

14 p2425 A69-28908

Input signal piecewise linear approximation for investigating response of dynamic automatic control systems to nonstandard input signal

14 p2426 A69-29143

Linear dynamic stability of spinning satellite in elliptic orbit, applying perturbation method to determine Floquet solutions

14 p2534 A69-29318

Multivariable linear time-variant systems noninteracting control problem, discussing realization by state variable feedback

15 p2582 A69-30024

Optimal filtering of linear distributed parameter systems corrupted by boundary and/or volume stochastic disturbances

15 p2565 A69-30183

Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming

15 p2582 A69-30601

Power spectral density response of uniform beams to random pressures, evaluating joint acceptance of systems with pressure field

15 p2713 A69-31143

[ASA PAPER SVT2]

Equilibrium cracks propagation in linear hereditary elastic media using Volterra principle

15 p2715 A69-31201

Linear fluid amplifier with beam-deflection proportional active element, discussing optimum maximally flat frequency response

15 p2553 A69-31299

Linear high resolution gate function in blocking out analog signals or reproducing signal amplitudes at output, noting semiconductor elements utilization

15 p2581 A69-31523

Singular and sliding modes /unique extremals/ in calculus of variations for optimal control problems with nonlinear equations and linear control

16 p2764 A69-31629

Book on correlation theory of statistically optimal systems covering linear continuous, discrete, nearly optimal, nonlinear, decision element and adaptive systems

16 p2764 A69-32114

Autocorrelation function distortion determined for Barker signal passing through linear system and RC filter, noting passband influence on function shape

16 p2753 A69-32475

Optimal control synthesis for linear plant operating in noise environment, applying dual control theory

16 p2765 A69-32485

Linear feedback additive noise communication systems formulated in terms of arbitrary operations at transmitting and receiving points

17 p2944 A69-33626

Linear computer-controlled closed loop systems sensitivity analysis, deriving estimation error incremental covariance to demonstrate quality deterioration under perturbed initial conditions, parameters, etc

17 p2944 A69-33742

Observer theory application to hybrid inertial navigation systems, discussing error estimation and correction, real time mechanization, eigenvalues, etc

17 p3003 A69-34099

Network Analysis for Systems Application Program development for batch and on-line solution of circuit problems

18 p3111 A69-34680

Algorithm for minimizing expected value of quadratic performance index in closed loop optimal control of linear time varying systems

18 p3111 A69-34688

Random vibrations in linear systems during spectral and correlation analysis, noting nonlinear systems

18 p3227 A69-35491

Quadratic Liapunov function existence for exponentially stable linear system with varying coefficients described by vector differential equations

19 p3359 A69-35617

Linear optimal control problem for system with variable terminals, proving maximum principle and transversality conditions under minimum constraints

19 p3285 A69-35859

Stability of interrelated linear dynamic control systems with distributed parameters evaluated by using differential equations

19 p3286 A69-35892

Algorithms for equivalence equation to approximate transient processes in higher order linear system by transient processes of lower order linear models

19 p3286 A69-36191

Linear-elastic fracture mechanics applied to environment enhanced crack growth /stress corrosion cracking/

19 p3349 A69-36888

Optimal linear recursive estimators for uncertain observation, considering false alarm probability

20 p3485 A69-36922

Invertibility of linear time invariant dynamical control systems, discussing L-inverses, sequential circuits, inherent integration, reproducibility, pointwise and functional inverses

20 p3509 A69-37138

Linear time varying processes minimal time control by maximum principle to construct extremal control as explicit time function

20 p3509 A69-37139

Trajectory sensitive vector introduction into closed loop linear optimal control, considering linear or nonlinear formulations

20 p3509 A69-37141

Book on stochastic optimal linear estimation and control, discussing probability theory, models and continuous and discrete time linear systems

20 p3509 A69-37143

Continuous signal over finite time intervals represented by impulse functions of linear channel

20 p3488 A69-37459

Damped linear system asymptotic stability inferred from dynamical equation structure, considering matrix eigenvalues and Thomson-Tait-Chetaev stability theorem

20 p3623 A69-37531

Linear radar system theory including Fourier transforms, linear superposition and input/output ratio for deterministic and random signals, discussing filter and sampling theory

20 p3489 A69-37633

Difference method for initial value problems in quasi-linear hyperbolic first order approximations extended to wider quasi-linear problems, assessing convergence

20 p3568 A69-37833

Monograph on frequency response characteristics of mechanical oscillator chains, calculating forced vibrations in linear systems

20 p3577 A69-37920

Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field

20 p3508 A69-37943

Linear nonstationary system with singular point analyzed for stability necessary and sufficient conditions using Riemann-Mellin conversion integrals and Laplace transforms

21 p3685 A69-38451

Self excited oscillations in systems with one linearity symmetrical with origin determined by harmonic balance method

21 p3685 A69-38463

Large parameter variations effect on linear feedback control systems performance, optimal or suboptimal

21 p3685 A69-38726

Random variable used as model for unknown parameter in linear system, describing orthonormal expansion for evaluating mean-integral-squared error

21 p3685 A69-38727

Dynamic stability of linear systems with periodic coefficients based on iterative formulas, evaluating transition matrix

21 p3685 A69-38779

Control system generating compensating reactions for correcting trajectory deviations due to uncontrollable random factors, discussing linear automatic control system optimization

21 p3770 A69-38853

Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems

21 p3764 A69-39410

[AIAA PAPER 89-885]

LINEAR TRANSFORMATIONS

Linear multichannel spatial motion control systems for vehicles orbiting in earth atmosphere at supersonic velocities

21 p3766 A69-39645

Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization

22 p3917 A69-40116

Controllability and linear closed-loop controls in linear periodic systems

22 p3917 A69-40572

Linear flight control system synthesis by using optimal control theory associated with quadratic performance index

22 p3864 A69-40588

Approximation of linear unsteady dynamic systems at finite time interval expressed in Bessel or degenerate hypergeometric functions

22 p3917 A69-40616

Suboptimal linear regulators design method yielding feedback controller for multivariable linear systems subject to parameter variations

22 p3918 A69-41012

Robbins-Monro stochastic approximation method using algorithms for identifying finite memory time-discrete time-stationary linear system from noisy input-output measurements

22 p3918 A69-41013

Cauchy problem for partial differential equations linear parabolic system with coefficients depending on unknown functions

23 p4181 A69-41410

Bounded input-output stability for lumped distributed systems by poles examination in S plane, considering transient response of linear time invariant systems

23 p4144 A69-41568

Linear system propagation time measurement independent of input or output time functions

23 p4165 A69-41700

Optimal control problems, discussing properties of signal producing response signals with transient functions at independent outlets of linear dynamic system

23 p4145 A69-41958

Absolute invariance of perturbations affecting dynamic plant achievable by inertial measurement of highest derivatives

23 p4145 A69-42369

Matrix method for free and forced oscillations of complex linear damping system with known linear vectors

23 p4236 A69-42484

Kalman-Bucy filtering technique for estimation of initial conditions and smoothing in linear dynamic systems, noting rectilinear motion of randomly accelerated spacecraft

23 p4132 A69-42546

Electromagnetic processes analysis in autonomous inverters simplified by linear graph method to derive characteristic equation

24 p4255 A69-42571

Pattern classification and iterative methods of linear/nonlinear dynamic plants identification, introducing phi machine as universal plants model

24 p4284 A69-42672

Weighting function of linear dynamic plant with steady random sampling determined with iterative method similar to stochastic approximation

24 p4289 A69-42951

Optimal deterministic estimation and feedback control for linear nonstationary process and measurement systems defined by Riccati equations, including Kalman-Bucy filter

24 p4291 A69-43276

Suboptimal closed loop controller for linear time varying process subject to additive random disturbances and measurement noises

24 p4292 A69-43285

Feedback controller for linear stationary differential systems with time lag and fixed unknown parameters, noting closed loop transfer function role

24 p4293 A69-43293

Minimal time closed loop controller design for linear systems with bounded control amplitudes and rates

24 p4293 A69-43304

Frequency domain stability criteria for open and closed loop distributed parameter linear time invariant systems

24 p4294 A69-43309

Time-invariant multivariable linear systems, discussing structure theorem for controllable systems and application to decoupling problem

24 p4294 A69-43314

State variable feedback design of m-input, m-output time invariant linear systems requiring noninteraction and exact transfer functions, considering coupled core nuclear reactor

24 p4294 A69-43315

Stability of linear systems with convolution operator in forward loop and time-varying gain in feedback loop analyzed for frequency- and time- domain conditions

24 p4295 A69-43316

Parameter identification algorithm identifying linear dynamic systems by digital computer used to identify human operator characteristics in closed loop control situation

24 p4276 A69-43320

LINEAR TRANSFORMATIONS

Quasi-linear approximation for spectrum analysis of LF plasma wave oscillations in steady electric field

14 p2492 A69-29468

Numerical absolute stability test for nonlinear discrete systems using bilinear transformation

17 p2994 A69-32848

Statistical characteristics of linear transformations of gravity field anomalies by linear operators, noting computation of covariance function

21 p3716 A69-39247

LINEAR VIBRATION

Normal modes and natural frequencies of combined linear elastic structures resting on immovable base

04 p0678 A69-14870

Limiting amplitude of output shaft vibrations of servodrive operated in linear region as function of frequency

04 p0584 A69-15417

Rotors linear vibrations due to unbalanced shaft rotating on lubricated bearings taking into account lubricant damping

07 p1235 A69-19441

Hydropendulum bearing linear horizontal vibration effect on vertex vibration, analyzing zero initial phase using precession theory

10 p1697 A69-24086

Linear and torsional vibration parameters measuring methods, discussing transducer characteristics

22 p3943 A69-39926

LINEARITY

NT COLLINEARITY

Book on nonlinear boundary value problems for ordinary second order differential equations, illustrating difference between linear and nonlinear problems concerning existence and uniqueness

04 p0622 A69-14600

Articles on automatic control systems stability, discussing relation between method of Lure and Popov criteria

05 p0740 A69-16667

Linearity range of viscoelastic properties of fiberglass reinforced plastics, calculating stress-strain state

18 p3163 A69-35364

Ordinary differential equations in linear topological space extended from Fattorini investigation, emphasizing use of linear operator

19 p3360 A69-36599

LINEARIZATION

Pulse transfer function estimation for single input and output linear stationary discrete systems using iterative algorithm and quasi- linearization method

02 p0225 A69-11972

Nonlinear boundary value problems direct generalized solutions based on linearization of Bubnov-Galerkin and Ritz method

02 p0272 A69-12136

Method of particular solutions for use with quasi-linearization in solving nonlinear boundary value problems

02 p0273 A69-12550

Statistical linearization of nonlinear memory type elements with stationary Gaussian input, applying Wiener method to one class of problems

03 p0409 A69-13005

Statistical linearization coefficients for arbitrary nonlinearities in automatic control systems via techniques applying characteristic functions

03 p0409 A69-13071

Dynamic programming application to function generation, determining breakpoints for best linear approximation of one dimensional function

03 p0401 A69-13765

Nonlinear constitutive equations for mixture of two elastic solids linearized, assuming small displacements and subsequent temperature changes

03 p0529 A69-14063

Random motion of particle with nonlinear damping, obtaining velocity spectrum by solving associated nonstationary Fokker-Planck equation and using equivalent linearization technique

04 p0561 A69-15454

Linearizing circuit for low velocity hot-wire anemometry, using analysis of transistor circuit to generate desired function

06 p0927 A69-17701

Linearization unit for compensating hyperbolic characteristic of capacitive displacement sensor used for contactless displacement measurement

08 p1317 A69-20879

Bilinear hysteretic system undergoing random vibration, substantiating linearization analysis with analog computer simulation and comparing lifetime to linear system [ASME PAPER 69-VIBR-25]

10 p1806 A69-24173

Statistical linearization coefficients for arbitrary nonlinearities in automatic control systems via techniques applying characteristic functions

14 p2424 A69-28753

Statistical linearization of strong nonlinearity in series with random-gain amplifier element, deriving formulas for statistical gain parameters

14 p2425 A69-28920

Distribution function, harmonic and statistical linearization methods applied to study forced oscillations in nonlinear oscillatory system

16 p2813 A69-32284

Quasi-linearization algorithm for solution of boundary value problems for ordinary differential equations, formulating representation and convergence theorems

17 p2994 A69-32835

Linearization of relationship between stress concentration factor and reciprocal of strain hardening exponent enabling shakedown to pressure vessels formulated by mathematical model

20 p3620 A69-37002

Quasi-linearization to overcome dynamic programming dimensionality difficulties, reducing computer memory requirement and computation time

21 p3754 A69-38751

Retarding potential analyzers determining ionospheric structure, noting linearization of analysis

22 p3940 A69-40523

Digital signal processing electronic device for linearizing signals from sensors with nonlinear frequency output by modifying time signal frequency

22 p3915 A69-40935

LINERS

U LININGS

LINES

Early type stars spectrophotometric parameters, discussing hydrogen beta, gamma and delta line widths, magnitude, etc

10 p1777 A69-23387

LINES [GEOMETRY]

NT CHORDS [GEOMETRY]

Visual backward masking experiment for studying overlapping and nonoverlapping contours of target and masking stimuli straight line

22 p3879 A69-40843

Visual succession threshold for sides of square contour affected by presenting single line on parallel contour sides

22 p3882 A69-40868

LINES OF FORCE

Free access of low energy galactic particles to solar wind lines of force due to stochastic nature of lines

01 p0147 A69-11238

F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines at magnetically conjugate point

02 p0238 A69-11681

Characteristic time on motion of magnetic lines of force in medium with Hall effect

02 p0290 A69-12399

Graphical representation of stress distributions and forces on dislocations

03 p0529 A69-13973

Magnetic lines curvature behind pseudostationary hydromagnetic shock determined, assuming parallel magnetic field and velocity vectors

04 p0638 A69-15092

Neutral sheet structure and orientation in geomagnetic tail, computing field lines on basis of Explorer 14 magnetic field measurements

05 p0753 A69-16256

Oscillating electric dipole in cold plasma with ideal conductivity along lines of force of external magnetic field

06 p0921 A69-17743

- Computational techniques for determining magnetic field geometry for backscatter reflections
07 p1125 A69-18850
- Magnetic lines of force penetration into magnetosphere accompanied by plasma insertion generating ring current responsible for main phase of magnetic storm
10 p1687 A69-23923
- Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere, noting inhomogeneous conductivity, Hall effect and lines of forces role
10 p1687 A69-23926
- Stochastic and ergodic aspects of magnetic lines of force, discussing cosmic ray diffusion in interplanetary magnetic field
10 p1770 A69-24111
- F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines magnetically conjugate point
13 p2257 A69-28712
- Hydromagnetic waves propagation in finitely conducting fluid mass immersed in nonuniform magnetic field, using curvilinear coordinates based on lines of force
14 p2491 A69-29336
- Magnetic field lines curvature effect on plasma instabilities due to ion temperature gradient, noting frictional gravitation field simulation
16 p2816 A69-31636
- Horizontal magnetic variation peak at eight degree dip latitude, noting F region contribution to magnetic tubes of force integrated transverse conductance
16 p2778 A69-32189
- Geomagnetic field lines coordinates calculation based on coefficients obtained in spherical harmonic analysis
20 p3522 A69-37060
- High latitude limit of closed geomagnetic field lines indicated by high latitude electron boundary in outer radiation zone during Alouette satellite energy particle experiment
20 p3531 A69-37875
- Topology of interplanetary field lines in magnetotail, using solar electrons as tracers with moon as absorber
20 p3609 A69-38078
- LF hydromagnetic waves propagation along geomagnetic field lines in gyrotronic ionosphere model taking Hall effect into account
23 p4157 A69-41864
- LING-TEMCO-VOUGHT AIRCRAFT**
U A-7 AIRCRAFT
U XC-142 AIRCRAFT
- LING-TEMCO-VOUGHT MILITARY AIRCRAFT**
U MILITARY AIRCRAFT
- LINGUISTICS**
U MACHINE TRANSLATION
U SEMANTICS
- LININGS**
NT ROCKET LININGS
Dielectric properties of high loss nonmagnetic microwave materials used for waveguide absorbers and anechoic chamber linings
12 p2079 A69-26047
- LINKAGES**
Planar linkages kinematic synthesis and design, using Newton-Raphson iteration technique to solve nonlinear equations
04 p0604 A69-14517
- Daily communication link geometry between spacecraft in elliptical orbit and landed capsule, establishing spacecraft visibility contours for landing site latitude
[AAS PAPER 68-110] 21 p3805 A69-39223
- LINKING**
U JOINING
- LILOUVILLE EQUATIONS**
Liouville and Poisson equations solutions for locally ellipsoid stellar velocity distributions with constant coefficients
02 p0310 A69-11455
- Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems
09 p1540 A69-21882
- General solution of Liouville equation for collisionless system of gravitationally interacting particles, with distribution function locally isotropic in momentum space
09 p1605 A69-22412
- Time dependent evolution of probability pressure distribution maximum obtained from Liouville equation
14 p2472 A69-29406
- Fokker-Planck plasma collision equation derived from Boltzmann equation, Markov process and Liouville equation
23 p4195 A69-41516
- LIPID METABOLISM**
Acetate carbon 14 utilization in centrifuged rats, analyzing metabolism by measuring plasma glucose, FFA and lipids synthesis
07 p1067 A69-19429
- Hypothermia induced alterations in biochemical processes studied with isolated rat liver perfused at low temperature
10 p1642 A69-23119
- LIPIDS**
NT LIPOPROTEINS
Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
11 p1832 A69-25641
- Physical and psychic stress effects on phosphatidyl glycerol and related phospholipids concentration in human and rat blood plasma
23 p4088 A69-41815
- LIPOPROTEINS**
Structural phospholipoprotein isolated from hydrogenomonas facilis and neurospora crassa
22 p3871 A69-40049
- LIPSCHITZ CONDITION**
Boundary value problems for second order differential equation with continuous f satisfying local Lipschitz condition
07 p1173 A69-18730
- Existence and uniqueness for nonlinear boundary value problems satisfying Lipschitz condition
10 p1721 A69-23640
- Synthesis for nonlinear second order differential equations with terms satisfying Lipschitz condition, using two person games optimal strategy
11 p1910 A69-25602
- LIQUEFIED GASES**
NT LIQUID AMMONIA
NT LIQUID HELIUM
NT LIQUID HYDROGEN
NT LIQUID NITROGEN
NT LIQUID OXYGEN
Liquefied propane fog dispersal at Medford-Jackson airport, Oregon
04 p0585 A69-14918
- Thermal design and test for liquefied gas vessels under unsteady insulation cooling conditions
04 p0687 A69-15162
- Simple fluids viscosity dependence on density analyzed by molecular theory, exemplifying with liquid argon
13 p2299 A69-28036
- Cooldown of vacuum insulated transfer lines using liquid N and H, discussing flow characteristics reproduction by digital computer program
[NAS-NRC PAPER I-1] 22 p4050 A69-40625
- LIQUID AMMONIA**
Reaction rate and mechanism for low temperature reaction between lithium hydride and liquid ammonia, noting chemisorbed ammonia dissociation at interface
01 p0025 A69-11285
- Electrochemical oxidation of fuels in liquid ammonia, evaluating electrode surfaces as catalysts
[ECS PAPER 212] 03 p0382 A69-13857
- ATS 3 spacecraft ammonia-fueled resistojet engine test performance
[AIAA PAPER 68-553] 21 p3786 A69-39754
- LIQUID ATOMIZATION**
Mean drop size generated in vapor pressure regime of liquid water jet, noting effect of water temperature and orifice diameter
09 p1483 A69-21995
- Fuel jet shape in air stream/mechanical atomization calculated as function of stream and fuel injection parameters
11 p2002 A69-25336
- Thermodynamic atomization in MHD energy conversion through convergent-divergent nozzles, noting nozzle efficiency and droplet size
13 p2245 A69-27477
- Quantitative analysis of interaction between spray and ambient atmosphere, discussing atomization of flat sheet and drop behavior relationship to operating conditions
15 p2717 A69-30465
- LIQUID COOLED REACTORS**
NT LITHIUM COOLED REACTOR EXPERIMENT
NT NRX REACTORS
NT PLUM BROOK REACTOR
- Liquid metals as coolants in breeder and space vehicle reactors for stable two phase flows
05 p0803 A69-15998
- LIQUID COOLING**
NT FILM COOLING
Water cooling jackets of plastic textile reinforced film for high inside temperature reduction in protective clothing
06 p0883 A69-18027
- Liquid fuel rocket engine design for cooling by propellant counter flows
08 p1376 A69-20588
- Personal cooling in inadequately air conditioned cockpits, considering dry air, air ventilated suits and liquid circulated tubes near skin
[AGARDOGRAPH-111] 08 p1267 A69-20684
- Argon ion laser with water cooled mercury pool cathode shielded by U-bent section trap, considering advantages as compared to oxide cathodes
12 p2107 A69-26326
- Spray oil cooling to reduce aircraft generator weight, enhance reliability and lengthen overhaul intervals
15 p2552 A69-30326
- Temperature distributions in layer with internal heat source and turbulent fluid flow cooling, deriving differential heat transfer equations
15 p2718 A69-31169
- Heat transfer characteristics in evaporative, transpiration cooled porous systems
21 p3851 A69-39037
- Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique
21 p3852 A69-39433
- LIQUID CRYSTALS**
Cholesteric liquid crystals application to trace contamination detection, describing color response measurement
06 p0885 A69-17842
- Liquid crystals for photographically recording microwave holograms, noting impossibility of three dimensional image reconstruction with side-looking radar zone plates
12 p2079 A69-25917
- Skin friction measurement in aerodynamic tests using thin liquid crystal coatings with changes in maximum light scattering wavelength in response to shearing forces
14 p2427 A69-29029
- Cholesteric liquid crystal film application to test surfaces for thermal mapping, giving technique for flaw pattern determination
15 p2631 A69-31507
- LIQUID DROPS**
U DROPS [LIQUIDS]
- LIQUID DYNAMICS**
U FLUID DYNAMICS
- LIQUID FILLED SHELLS**
Soviet book on vibrations of elastic shell partly filled with fluid covering different stages in procedure for shells of axisymmetric configuration
02 p0346 A69-12480
- Finite difference schemes for axisymmetric oscillations of shells of revolution filled with liquid
03 p0523 A69-12951
- Soviet collection of articles on dynamics of fluid-containing bodies under weightlessness conditions
03 p0417 A69-13808
- Primary frequency of oscillations of ideal liquid in cylindrical vessel with axially directed weak gravitational field
03 p0418 A69-13812
- Bubble motion inside liquid in spherical cavity, allowing for bubble surface deformation
03 p0418 A69-13813
- Motion and stability of solid body with cavity containing rotor and two incompressible nonmixing liquids with surface tension
03 p0418 A69-13814
- Stability of steady motion of body with cavity containing one or several nonmixing liquids as problem of bounded oscillations about motion
03 p0418 A69-13815
- Magnetoelastic vibrations of fluid filled cylindrical cavity in infinite solid medium in presence of uniform axial magnetic field
03 p0528 A69-13927
- Approximate method for finding solution of weak free convection in partially filled vessel in gravitational field
04 p0685 A69-14619
- Axisymmetric oscillation modes and frequencies of hemispherical shell partially filled with liquid, using moment theory of shells
04 p0679 A69-14922

Temperature distribution and thermal stresses in liquid filled cylindrical shell 04 p0682 A69-15413

Liquid rise in partially filled circular cylinder with free surface accelerated from rest to constant angular velocity [ASME PAPER 68-FE-13] 05 p0747 A69-16065

Whirl dynamics of partially liquid filled spinning rotor mounted on elastic shaft, noting synchronous critical speed and asynchronous whirl speed [ASME PAPER 68-WA/APM-25] 05 p0768 A69-16189

Equations of motion solved for solid body with ellipsoidal cavity containing ideal incompressible fluid in uniform eddy motion 06 p0957 A69-16823

Dynamics of carrier rockets and space vehicles having complex three dimensional thin walled constructions with cavities containing liquids [UN PAPER 68-95622] 06 p1013 A69-17051

Oscillations of cylindrical orthotropic three layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions 06 p1022 A69-17186

Ritz method for natural oscillations of ideal liquid in spherical vessel with various filling levels, considering vertical perturbing force 06 p0910 A69-17333

Liquid filled cylindrical container motion with longitudinal forces applied to base, obtaining stability conditions for natural oscillations 08 p1419 A69-21181

Coaxial cylindrical shells oscillation frequencies with interspace filled with incompressible liquid determined as functions of liquid level and interspace width 09 p1612 A69-21483

Axisymmetric vibration modes of cylindrical-hemispherical membrane tank partly filled with liquid [AIAA PAPER 67-75] 09 p1482 A69-21940

Vibration characteristics of circular cylindrical shells containing water under axial excitation, investigating bubble formation and shell-liquid interaction [ASME PAPER 69-VIBR-4] 10 p1805 A69-24162

Natural frequencies and mode shapes for longitudinal oscillations of liquid filled elastic circular cylindrical tank with flexible inverted conical bulkhead [ASME PAPER 69-VIBR-11] 10 p1806 A69-24165

Formula in Prandtl-Batchelor theory describing motion of incompressible fluid in sphere interior verified experimentally 11 p1868 A69-24755

Boundary value problem for gravity induced wave motion of ideal fluid in axisymmetric vessel with annular ribs, noting application to bodies of revolution 11 p1868 A69-24769

Motion of body with cavity containing liquid based on Kharlamov solution, noting gyrostatic moment and liquid sloshing effect 11 p1868 A69-24775

Kharlamov method for influence of turbulent motion of liquid in cavity on inertial motion of body containing cavity 11 p1868 A69-24788

Liquid filled elastic shells natural frequencies and oscillation modes, deriving eigenfunction system from liquid velocity potential boundary conditions to determine dynamic load 11 p1870 A69-24951

Large amplitude symmetric and asymmetric irrotational motion of inviscid incompressible fluid with liquid-vapor interface in accelerating cylindrical container of revolution 11 p1871 A69-25124

Cylindrical propellant tanks dynamic stability and parametric resonance, analyzing axial preload, liquid depth, top impedance and ullage pressure by Donnell theory 11 p1899 A69-25499

Solid body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body 12 p2061 A69-25884

Blood vessel model in form of cylindrical shell filled with liquid for studying cardiovascular system dynamic and static problems 12 p2018 A69-25989

Frequency equation for thickness effects on axisymmetric radial and rotatory vibrations of empty or fluid filled isotropic spherical shell 13 p2363 A69-28185

Nonlinear equations for motion of rigid body with cavity partially filled with ideally incompressible liquid 14 p2432 A69-29626

Soviet book on partially liquid filled solid body dynamics from viewpoint of space and aircraft applications 14 p2530 A69-29815

Axially symmetric vibrations of thin elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness 16 p2873 A69-32129

Plane oscillations of liquid in rectangular elastic vessel determined to obtain frequencies and mode shapes of natural oscillations from velocity potential boundary conditions 17 p2950 A69-33200

Stable motions determination of solid bodies with liquid filled cavities and satellites motions stability in central Newtonian force field 17 p3005 A69-33228

Stationary liquid under pressure effect on energy dissipation of rectilinear pipelines under pure bending 17 p2904 A69-33930

Rotary motion stability of axisymmetric solid body or gyroscope suspended on string and containing ellipsoidal cavity filled with liquid 18 p3135 A69-34558

Liquid filled rigid bodies motion stability defined and solved for system with infinite number of degrees of freedom 19 p3301 A69-36810

Thermal stress concentration near elliptical hole in thin walled liquid filled cylindrical shell in presence of temperature gradient across shell cross section 20 p3622 A69-37325

Perturbed motion of solid body containing axisymmetric cavities partially filled with ideal incompressible fluid, solving boundary value problems of fluid oscillations 20 p3518 A69-38296

Fluid motion in free falling partially filled cylindrical vessel due to sudden vertical velocity change, considering free surface disturbances 21 p3692 A69-38684

Asymmetrical oscillations of cylindrical shell with elastic bottom containing liquid, discussing liquid level influence on natural oscillation frequencies 21 p3834 A69-38718

Natural oscillations of free surface liquid and elastic bottom of cylindrical cavity determined by integrodifferential equations based on liquid level 21 p3693 A69-38720

Rotating stratified fluid in thermally insulated cylinder, studying angular velocity abrupt change effects under stable temperature distribution 21 p3694 A69-38768

Optimal control of vibrations of liquid in cylindrical container with vertical generatrix and flat bottom, using dynamic programming 21 p3694 A69-38849

Optimal control of liquid vibrations in rectangular container moving in horizontal direction, deriving algebraic equations system for optimal functional 21 p3694 A69-38854

Optimal control of ideal noncompressible fluid vibrations partially filling rectangular container moving in horizontal direction 21 p3695 A69-38892

Motion of body with cavity completely filled with viscous fluid about center of mass in potential mass-force field, applying small parameter method 22 p3980 A69-40109

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method 22 p3929 A69-40111

Spherical vessel partially liquid-filled and supported by equatorial ring, studying axisymmetric oscillations under external forces 24 p4300 A69-43069

Energy dissipation in oscillating sphere filled with viscous fluid, giving fluid response by solving Navier-Stokes equation 24 p4305 A69-43587

Pressure wave transmission in liquid filled tubes, determining attenuation and phase shift for hemodynamics applications 24 p4279 A69-43798

LIQUID FLOW NT OPEN CHANNEL FLOW NT WATER FLOW

Time dependent interaction of hot gas bubble with chemically reactive liquid stream, detailing thermal boundary layer theory 01 p0058 A69-10162

Pressure pulses propagation in nonsteady fluid flow through expansible tubes, noting computer solution 02 p0232 A69-12477

Irrotational almost uniform plane flow of two immiscible inviscid liquids on horizontal bottom in channel, noting permanent gravity waves 04 p0590 A69-15055

Velocity profiles for laminar flow of homogeneous liquid in pipe inlet at small and moderate Reynolds numbers 05 p0743 A69-15578

Liquid rise in partially filled circular cylinder with free surface accelerated from rest to constant angular velocity [ASME PAPER 68-FE-13] 05 p0747 A69-16065

Liquid flow systems dynamic response to periodic disturbances of system structural supports 05 p0747 A69-16073

Viscous electrically conducting liquid flow through insulating porous medium in presence of transverse magnetic field in region of validity of Darcy law 05 p0805 A69-16603

Cauchy problem for nonstationary linearized Navier-Stokes equations for fixed container partially filled with liquid 06 p0959 A69-17888

Liquid flow field about oscillating flat plate, comparing visualization results with numerical solution of Navier-Stokes equations [AIAA PAPER 69-226] 07 p1121 A69-19565

Electrodes behavior for fuel cells with liquid electrolyte under high-g and weightlessness conditions, discussing spontaneous liquid motion 08 p1259 A69-21038

Kharlamov method for influence of turbulent motion of liquid in cavity on inertial motion of body containing cavity 11 p1868 A69-24788

Parallel flow of viscous liquid film with free surface down inclined plane, noting growth of initially infinitesimal amplitude waves and finite amplitude wave stability 11 p1869 A69-24891

Forced discontinuous vibrations of liquid in conduit experimentally analyzed, discussing test devices and procedures 11 p1875 A69-25485

Radial electric field effect on pressure drop in isothermal laminar flow of dielectric liquid through stainless steel tube, considering ion drag 12 p2136 A69-26401

Liquid flow MHD alternating current generator design, considering induced current in rotor and resulting magnetic field in pole gap 13 p2206 A69-27495

Liquid metal MHD power plant system tested under open and closed loop conditions for liquid circulation 13 p2208 A69-27510

Displacement of liquid by insoluble liquid from horizontal circular tube during laminar flow, analyzing flow characteristics 14 p2431 A69-29607

Water vapor recondensation effect on structure of liquid particle flow into vacuum 16 p2769 A69-31869

Pressure in sealing groove and increase time due to pumping action of moving wall applied to force cylinder of translational motion, considering liquid in groove laminar 16 p2736 A69-32135

Liquid draining motion from transversely moving cylindrical tank in time varying gravity field with outlet pipe at bottom, discussing flow rate and free surface [AIAA PAPER 69-679] 17 p2953 A69-33440

Fluidic sensor for measuring gas and liquid velocities, describing design and principles of operation 18 p3133 A69-34308

Micropolar liquid basic flows, considering case with coupling constant relating microstructure to macroscopic flow greater than viscosity coefficient 18 p3121 A69-34786

Temperature distributions and heat transfer in thermal entrance region for Hartmann liquid flows under constant pressure gradient between parallel electrically conducting walls at rest 21 p3847 A69-38442

Nonlinear differential equations for flow of viscous liquid thin sheet on horizontal plane, solving initial value problems for zero slope bed 21 p3697 A69-39680

Forced convection liquid flow past heated flat plate with variable viscosity and thermal conductivity, analyzing velocity and temperature distribution in boundary layer 22 p4051 A69-40685

Pressure activated superfluid valve design and operation for liquid He transfer from reservoir to cold finger 22 p3870 A69-41237

Hot-wire anemometer calibration technique for measuring velocity of very slowly moving liquids
[ASME PAPER 69-HT-A] 24 p4316 A69-43527

LIQUID-GAS MIXTURES

NT AEROSOLS
NT FOG

Experimental apparatus for measuring heat transfer coefficients into boiling K in tubes, investigating vapor-liquid mixtures hydrodynamic and electrical properties
03 p0534 A69-14150

Combustion in heterogeneous systems, considering diffusion flames and fine droplets dispersed into gaseous oxidizer in fog form
06 p1032 A69-17421

High velocity gas stream induced shattering of liquid drops, disintegration rate and breakup time
[AIAA PAPER 68-83] 09 p1482 A69-21947

Spark ignition of liquid fuel droplets atomized in air analyzed by spark discharge visualization for two phase mixture
09 p1623 A69-22220

Two phase MHD generator with gas in liquid metal emulsions, discussing loops efficiency
13 p2306 A69-27479

Sound effects on turbulent flame in gasoline-air mixture jet in Toepfer device with pulsed light source, measuring ionization in combustion zone
17 p3069 A69-33141

Energy balance equation for two phase liquid-gas mixture ignition process, deriving formula for speed of combustion zone movement
18 p3231 A69-35123

Automatic ultrasonic method for determining dissolved gases content in liquid sample, using increasing acoustic oscillations amplitude for bubble development
19 p3308 A69-35822

LIQUID HELIUM

Liquid helium cooled broadband parametric amplifier, discussing circuits and noise performance
02 p0221 A69-12458

Book on properties of liquid and solid helium 3 and 4 physical characteristics, phase behavior and experimental techniques
04 p0630 A69-14688

Nuclear radiation influence on pool boiling heat transfer to liquid helium, using irradiated copper as boiling surface
[ASME PAPER 68-WA/PID-3] 05 p0791 A69-16164

Velocity of 1 MHz sound waves in He 4 along isotherms just above critical temperature, noting specific heat ratio for 4.5 and 5 K isotherms
06 p0957 A69-17142

Spectrum and amplitude fluctuations of laser light propagating through liquid helium, obtaining spatial correlation function of refractive index fluctuations
06 p0957 A69-17267

Helium cooled low noise high gain parametric preamplifier for satellite communication by stagger tuning stages
07 p1098 A69-18460

Helium closed cycle cooled very low noise high gain parametric amplifier for investigating interstellar atomic hydrogen radiation
07 p1098 A69-18461

Helium cooled low noise high gain wideband parametric amplifier for spacecraft communication
07 p1099 A69-18462

Liquid helium vented and nonvented storage container design and handling techniques
10 p1810 A69-24016

Aerobee rocket-borne liquid helium cooled telescope for IR night sky observations
11 p1885 A69-24852

Dielectric constant of liquid hydrogen and hydrogen-helium mixtures measured with resonance method
14 p2487 A69-29668

Heat transfer from cylindrical copper surface to liquid helium at 4 degrees K, discussing temperature fluctuations in nucleate boiling region
17 p3074 A69-33780

Steady state performance of multistrand superconducting compound conductors in current sharing state, using heat measurement from metal surface to He bath
17 p3016 A69-33786

Transition temperature depression in rotating liquid He based on increased inertial density of excitations
23 p4192 A69-42335

LIQUID HYDROGEN

Ball bearings lubrication and wear in cryogenic hydrogen turbopumps by transfer films provided from self lubricating cage
01 p0084 A69-10109

High pressure transfer system to deliver liquid hydrogen to testing equipment and liquid hydrogen/liquid oxygen engines
01 p0013 A69-11145

Liquid hydrogen circulation pump design emphasizing heat leaks
01 p0087 A69-11148

Gaseous and liquid H refractive index variations with pressure and density below room temperature, noting Lorentz-Lorentz function variations
02 p0281 A69-12180

Current mode amplifier circuit used with carbon resistors for measuring low flow rates of liquid hydrogen from small containers
04 p0577 A69-15025

Radioisotopic propulsion stage design with liquid hydrogen working fluid, stressing tank insulation and hydrostatic flight behavior
05 p0811 A69-15595

Natural convection heat transfer for incipient vapor formation in liquid H and N and for nucleate boiling of liquid H
[ASME PAPER 68-WA/PID-4] 05 p0848 A69-16165

Whirling liquid hydrogen layer thermal and hydrodynamical conditions, noting application to cold neutrons source in high flux beam reactor
05 p0849 A69-16818

Fluid and thermodynamic modeling for ground test simulation of nuclear rocket vehicle liquid hydrogen propellant behavior
[SAE PAPER 690201] 07 p1178 A69-18306

Dielectric constant of liquid hydrogen and hydrogen-helium mixtures measured with resonance method
14 p2487 A69-29668

Neutron and photon transport properties in liquid hydrogen obtained from measuring radiation environment in propellant tank mockup suspended above NERVA reactor
[AIAA PAPER 69-475] 16 p2810 A69-32716

Fluorine injectors for main tank injection of space vehicle liquid hydrogen tank, including study of hypergolicity and reaction product freezing
[AIAA PAPER 69-528] 16 p2767 A69-32717

Pressurant gas requirements for pressurized discharge of liquid hydrogen from propellant tanks for optimum pressurization system designs
[AIAA PAPER 69-526] 16 p2845 A69-32737

Hydrogen check valve with low cracking pressure and flow pressure drop for hydrogen vent system at Saturn launch pad
[AIAA PAPER 69-578] 16 p2845 A69-32738

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
[AIAA PAPER 69-549] 16 p2845 A69-32759

Slush hydrogen for spacecraft propulsion, discussing fabrication, conservation and storage
17 p3017 A69-33339

Twin spool hydrogen turbopump performance at zero net positive suction pressure (NPSP) saturated fluid in propellant tank, including steady state and simulated transient engine tests
[AIAA PAPER 69-550] 18 p3140 A69-34414

Liquid hydrogen pumping for Phoebus reactor, discussing feed systems, nozzles, configurations, design, testing, etc
[AIAA PAPER 67-478] 21 p3769 A69-39751

Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc
[AIAA PAPER 69-1007] 22 p4021 A69-40381

Liquid solid mixtures of parahydrogen flow characteristics in pipe, globe valve, orifices and venturi, determining pressure loss
[NAS-NRC PAPER F-5] 22 p3998 A69-40626

Slush H and N gels preparation and characteristics, including measurements of weight bearing capacity of gel as function of percent mass silica gelant
22 p3998 A69-40632

Optimal design and materials for cryogenic storage of O and H on lunar surface
[AAS PAPER 69-051] 24 p4296 A69-42882

Hydrodynamic inlet conditions effect on film boiling and near critical hydrogen heat transfer, using data from electrically heated various geometry test sections
[ASME PAPER 69-HT-27] 24 p4412 A69-43541

LIQUID INJECTION
NT WATER INJECTION

Nosetip cooling system based on discrete subsonic forward liquid injection through ablative nosetip opening of blunted reentry vehicle
[AIAA PAPER 68-1141] 03 p0532 A69-13559

Electric components encapsulation by combining liquid resin techniques and transfer molding
04 p0607 A69-14955

Hydraulic control valves for guidance of rockets by secondary liquid injection into nozzle skirt, discussing structure, single nozzle missile and mass gain
07 p1230 A69-19293

Combustion in high power jet engine combustion chamber in case of continuous and intermittent liquid fuel injection
08 p1421 A69-20762

Lateral spreading of liquids injected into supersonic flow, discussing dependence on Mach number and scattered light and schlieren photographs of spray structure
09 p1482 A69-21966

Stationary radial source flow of liquid particles into vacuum, discussing boundary value problem equations, parameters effects on flow structure and flow field characteristics
13 p2248 A69-28210

LIQUID LASERS
Solid state liquid and semiconductor lasers, detailing conditions for producing stimulated emission and applications
01 p0092 A69-11068

Liquid lasers compound range of organic type, circulating system of inorganic type and power peaks
01 p0092 A69-11194

Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra
02 p0258 A69-12617

Dye solution laser wavelength shift and simultaneous oscillations at different wavelength ranges for pumping by another dye laser
02 p0258 A69-12620

Frequency mixing of organic dye solution laser radiation with ruby laser radiation, showing broader UV spectrum
04 p0610 A69-14424

Laser based on xanthene series dyes and excited by neodymium laser second harmonic radiation, noting radiation spectra
06 p0932 A69-16914

Lasing threshold and spectral characteristics of organic dye solutions, using excitation of second harmonic of monopulse ruby laser
06 p0933 A69-17255

Light generation by lasing organic dye liquid solution with negative absorption on activator molecules and induced combination scattering for solvent molecules
06 p0933 A69-17256

Q switching and mode locking of neodymium selenium oxygen chlorine liquid laser, discussing power output and nature of pulses
06 p0935 A69-17776

Tandem amplifier system of glass and selenium-oxochloride liquid lasers, discussing input power/output pulse relation and population inversion density measurement
07 p1147 A69-18487

Spontaneous and stimulated Raman emission in liquids, obtaining picosecond pulse duration and laser light linewidth
[IEEE PAPER H-6] 07 p1152 A69-19063

Circulating liquid laser system using neodymium in selenium oxochloride, discussing cooling advantages and components
[IEEE PAPER M-70] 07 p1153 A69-19069

Output properties of Nd-selenium oxochloride liquid laser, detailing cell construction and output dependence on cell geometry and optical feedback
[IEEE PAPER M-8] 07 p1153 A69-19070

Correlation effects in water and heavy water laser transitions based on cascade effects, discussing lines in resonator arms
09 p1515 A69-21349

Liquid laser gain measurement via luminescence intensity, noting optical pumping thermal effect
09 p1520 A69-22683

Dye lasers CW operation feasibility, showing sufficient quenching of rhodamine 6G triplet state by oxygen dissolved in methanol
11 p1893 A69-24344

Liquid lasers properties and composition including organic complex compounds, organic dyes, rare earth elements in polyphosphoric acid, etc
11 p1893 A69-24353

Power output and radiation spectra of trivalent Nd doped liquid lasers based on phosphoryl chloride with tin and titanium chlorides
11 p1894 A69-24620

LIQUID LEVELS

Passive Q switching of chemical laser operating on vibrational-rotational line of vibrational transition of HCl

16 p2796 A69-31840

Frequency and time dependent gain characteristics of dye lasers, using computer program for rate equations for populations

17 p2980 A69-33025

Mode locking of organic dye laser by pumping laser with mode locked pulse train from Nd-glass laser, obtaining spectral bandwidth

21 p3740 A69-39545

High output laser amplifier consisting of glass and selenium oxychloride/Nd liquid lasers

23 p4173 A69-41565

LIQUID LEVELS

Ritz method for natural oscillations of ideal liquid in spherical vessel with various filling levels, considering vertical perturbing force

06 p0910 A69-17333

Level signaling device for high temperature conducting fluids, describing sensor construction and circuitry

20 p3536 A69-36980

Natural oscillations of free surface liquid and elastic bottom of cylindrical cavity determined by integrodifferential equations based on liquid level

21 p3693 A69-38720

Circular baffle mounted above flat-bottomed cylindrical tank outlet, discussing effect on remaining tank fluid volume and flow behavior under low gravity conditions

21 p3696 A69-39232

LIQUID-LIQUID INTERFACES

Shape and stability of interface between liquids subjected to surface tension and mass force field in vessel

03 p0417 A69-13809

Motion and stability of solid body with cavity containing rotor and two incompressible nonmixing liquids with surface tension

03 p0418 A69-13814

Temperature profiles and heat transfer coefficients in two phase liquid-liquid stratified laminar flow of variable immiscible film thickness with surface evaporation

09 p1622 A69-21904

Displacement of liquid by insoluble liquid from horizontal circular tube during laminar flow, analyzing flow characteristics

14 p2431 A69-29607

Normal modes stability analysis of fluid layer adjacent to flat plate submerged in liquid, considering effects of interfacial surface tension and buoyant forces [AIAA PAPER 69-386]

15 p2590 A69-30476

Plane incompressible fluid interface stability in presence of transverse electric field, deriving equation of motion for perturbation amplitude

15 p2652 A69-30911

LIQUID MERCURY

U MERCURY [METAL]

LIQUID METAL COOLED REACTORS

U LITHIUM COOLED REACTOR EXPERIMENT

LIQUID METALS

NT MERCURY [METAL]

NT MERCURY VAPOR

Vaporization waves in metals, discussing thermodynamic function of carrying liquid metal through successive states on liquidus line in two phase region

01 p0117 A69-10655

Liquid copper electrical conductivity temperature dependence at very high temperatures from magnetic diffusion and flux penetration measurements, noting exploding wires role

01 p0119 A69-10673

Condensing injector cycles internal efficiency for high velocity liquid metal flows in closed cycle MHD power plants

02 p0194 A69-11582

Metallic dismountable thermionic converter enclosed in mica sealed vacuum chamber, giving I-V characteristics, optimal temperature of liquid cesium phase and output power

02 p0194 A69-11587

Thermodynamic study of carburization of liquid titanium and zirconium, examining effects of atmosphere, graphite porosity and alloying elements

03 p0446 A69-13572

Alloy elements effect on spreading of liquid titanium and zirconium alloys on graphite

03 p0446 A69-13573

Liquid metal adsorption induced embrittlement, noting bond strength reduction and grain boundaries penetration

03 p0448 A69-13872

Stability of ductility and fatigue strength of stainless steel under longtime static loads in vacuum and in liquid lithium

03 p0450 A69-13912

Temperature dependence of isotope thermotransport in liquid K and Rb using steel capillary cells

03 p0533 A69-13970

Electromotive force along magnetic field induced by liquid metal flow /alpha effect/, giving foundation for self excitation of electromagnetic field

04 p0635 A69-14547

Liquid metals as coolants in breeder and space vehicle reactors for stable two phase flows

05 p0803 A69-15998

Nitrogen solubility measured in liquid Fe-Cr-Ni-Al alloys, noting solubility increase with increasing Al content

06 p0942 A69-17228

Nitrogen solubility in liquid Fe-Cr-Ni alloys increases with increased Cr concentration between 1550-1700 C and at one atm N pressure

06 p0942 A69-17229

Alloying elements effect on nitrogen solubility in liquid Fe-Cr-Ni alloys, defining quantitatively changes in solubility

06 p0943 A69-17234

Liquid metal MHD systems efficiency when operating with pressure jump in diffuser nozzle

06 p0872 A69-17921

Dielectric constant of liquid metals emphasizing Green function techniques for Wick theorem, Feynman diagrams, Dyson equation and diagrams in impulse space

07 p1196 A69-18298

Thermodynamic properties of binary and ternary liquid metal systems, noting electromotive force and vapor pressure measurements

07 p1165 A69-18939

Metal bath surface conditions for floating aluminum trioxide inclusions in pure iron and carbon steels

07 p1167 A69-19342

Safety problems associated with transient boiling of liquid metals in fast nuclear reactors, emphasizing behavioral differences between liquid metals and water

08 p1420 A69-20101

Momentum and energy transfers analogy in turbulent convection fluid flow emphasizing difficulties in case of liquid metals

09 p1480 A69-21687

Nitrogen solubility in molten niobium and molybdenum at high temperatures in argon flow

10 p1710 A69-23213

Hydrogen solubility in solid and liquid Ti close to melting point, showing no effect on welds and castings porosity

11 p1905 A69-24963

Wetting and sessile drop contact angles between liquid binary Al alloys and solid Be, boron carbide and graphite under vacuum and in He [ACS PAPER 15-C-68F]

12 p2114 A69-26301

Shock tunnel hypersonic flow effect on critical Weber number for zirconium drop breakup in partially and fully molten states

12 p2063 A69-26802

Speed of sound and shock waves in two phase flows of liquid metal MHD generators, considering droplets uniformly dispersed in gaseous phase

13 p2245 A69-27475

Laser Doppler method for measuring local particle velocities in two phase flows of liquid-metal MHD generators

13 p2260 A69-27476

Two phase MHD generator with gas in liquid metal emulsions, discussing loops efficiency

13 p2306 A69-27479

Energy conversion with liquid metal working fluids in MHD generators, discussing single stage fully Carnotized process

13 p2372 A69-27482

Liquid metal multistage injection efficiency with sodium and potassium working fluids, noting preheating

13 p2372 A69-27483

Thermal efficiencies of liquid-metal MHD generator cycles, analyzing optimum parameters, working fluid and partial irreversibilities

13 p2205 A69-27484

Liquid metal two phase flow MHD generators efficiency prediction, discussing end losses and flow velocity

13 p2205 A69-27485

Optimal cycle parameters for liquid metal single component MHD cycle, employing condensing ejector in front of generator

13 p2205 A69-27488

Liquid metal MHD generator cycles thermodynamic analysis, considering multicycle operation improvement with heat regeneration

13 p2372 A69-27489

Piston-like laminar liquid metal flow in MHD generator to increase thermodynamic efficiency of cycle and to generate electricity by synchronous principle

13 p2206 A69-27491

Liquid-metal MHD space power generation system using intermittent vaporization slugs shooting at 2700 R peak temperature

13 p2206 A69-27492

Liquid metal MHD induction generators design and performance, considering effect of geometry, operating conditions, fluid properties and power level on efficiency

13 p2207 A69-27503

Single wavelength design with compensation compared to multiwavelength design without compensation for liquid metal MHD induction converter, discussing optimization

13 p2207 A69-27504

Transient response in liquid-metal conduction MHD generators, analyzing constant magnetic field using differential equation

13 p2207 A69-27506

Optimal mean radius and half height of channel of liquid metal coaxial linear induction MHD generator with unilateral and bilateral excitation

13 p2207 A69-27507

Rayleigh-Taylor instability in synchronous liquid metal MHD generators, showing stabilization by channel positioning and threshold power rating

13 p2307 A69-27508

Liquid metal induction MHD generator I-V characteristics at no load permitting self excitation with capacitors

13 p2208 A69-27509

Liquid metal MHD power plant system tested under open and closed loop conditions for liquid circulation

13 p2208 A69-27510

Induction, helical and straight through liquid metal MHD generators tested under independent and self excitation conditions

13 p2208 A69-27512

Three phase high temperature liquid metal induction MHD generator performance, noting velocity profile nonuniformity influence

13 p2208 A69-27513

Heats of solution of Ag and Cu in dilute Ag-Cu-Sn alloys at 720 K, using liquid metal-solution calorimeter

13 p2279 A69-27759

Soviet monograph on design and theory of linear induction pumps for liquid metals covering electromagnetic phenomena, optimized dimensions, etc

13 p2209 A69-27926

Luminous spherical fog layer surrounding burning zirconium droplet during free fall through oxygen containing atmosphere, noting effect on mass and heat transfer processes

13 p2380 A69-28462

Sessile drops contact angles of alkali liquid metals on Re, W, Mo, Ta and Nb substrates related to substrate surface bare work function

14 p2506 A69-29270

Nuclear energy conversion for long space missions, comparing dynamic Brayton, liquid metal MHD gas, dynamic Rankine and LMMHD Rankine cycles

16 p2810 A69-31748

Heats of solution of Au and Cu in dilute Au-Cu-Sn alloys determined using liquid metal solution calorimeter, calculating self interaction coefficients

17 p2987 A69-33077

Silicon and boron carbides wettability with liquid metals during contact reactions at various temperatures, discussing wetting mechanism

18 p3156 A69-35153

Liquid metal sprayer design including calculation of nozzles for subsonic and supersonic gas outflow

21 p3728 A69-38613

MHD losses in liquid metal converters due to nonideal magnetic field profile and to flow hydraulics

21 p3649 A69-39483

LIQUID NITROGEN

Liquid nitrogen dispersed flow film boiling data accounting for droplet breakup by vapor acceleration, drag coefficient and heat transfer from wall [ASME PAPER 68-HT-44]

02 p0351 A69-12203

Nucleate pool boiling heat transfer of liquid nitrogen from circular disks with different surface conditions including copper and nickel mirror finishes, roughness and coatings

02 p0352 A69-12207

Bistable operating mode of GaAs semiconductor laser involving light emission shifts

03 p0441 A69-14175

Gamma irradiated silver carbonate EPR at liquid nitrogen temperatures

05 p0716 A69-15915

Natural convection heat transfer for incipient vapor formation in liquid H and N and for nucleate boiling of liquid H
[ASME PAPER 68-WA/PID-4]

05 p0848 A69-16165

Inception of nucleate boiling with liquid nitrogen, noting surface finish effects
[ASME PAPER 68-WA/PID-10]

05 p0848 A69-16167

Liquid nitrogen inertant for continuous suppression of pressurized fuel tank explosion

05 p0703 A69-16505

Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion

06 p0962 A69-17817

Axisymmetric liquid nitrogen turbulent jet propagating under supercritical pressure in gaseous nitrogen medium

07 p1049 A69-18398

Film boiling of subcooled liquid nitrogen in turbulent flow tubes, using one dimensional mathematical model of rod-flow regime

07 p1243 A69-19737

Coherent radiation brightness increased from liquid N Raman laser, using off-axial pumping

09 p1520 A69-22533

Transformation of Q switched neodymium laser radiation into Stokes component during stimulated combination scattering in liquid nitrogen

11 p1900 A69-25751

Noise sources in S band parametric amplifier with GaAs varactor diode measured at liquid nitrogen temperature, considering noise reduction

15 p2578 A69-30636

Al cryogenic quenching using liquid N for slow and uniform heat removal to eliminate distortion

18 p3150 A69-35419

Slush H and N gels preparation and characteristics, including measurements of weight bearing capacity of gel as function of percent mass silica gelant

22 p3998 A69-40632

Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment
[ASME PAPER 69-HT-26]

24 p4412 A69-43542

LIQUID OXIDIZERS

Pressure effects in spontaneous ignition of interimpinging hydrazine and red fuming nitric acid (RFNA)/ liquid streams in evacuated test chamber

24 p4415 A69-43667

LIQUID OXYGEN

Soviet papers on apparatus and machines of oxygen and cryogenic installations covering film boiling, gas vessel, thermal design, etc

04 p0686 A69-15160

Heat release during boiling of downward flowing liquid oxygen film

04 p0687 A69-15161

LOX prevalue accumulator system with He pressurant for prevention of Pogo effect on Saturn 5

04 p0666 A69-15298

Liquid oxygen shear viscosity dependence on temperature and pressure obtained by measuring electrical characteristics of immersed torsional vibrating crystal

05 p0846 A69-15916

Vulcanizable elastomers suitable for contact with liquid oxygen, discussing preparation, mechanical properties, transition temperature and structure

05 p0717 A69-16497

Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility

05 p0717 A69-16498

Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion

06 p0962 A69-17817

Specific heats of oxygen at coexistence from triple point to critical point and corresponding values for liquid phase

10 p1808 A69-23187

Tabulating experimental constant volume specific heats of fluid oxygen from triple point to 300 K at pressures to 350 atm

10 p1808 A69-23188

LOX thermodynamic properties from triple point to 250K and pressures to 350 atm, tabulating at uniform densities and temperatures

10 p1808 A69-23189

Oxygen boiling point studied via calibration of capsule type platinum resistance thermometers

14 p2540 A69-29888

Helium gas shaft seal for spacecraft electrically driven LOX pump, noting advantages of floating carbon face seal type
[ASLE FICFS PREPRINT 24]

15 p2621 A69-30498

Aircraft breathable LOX purity, water percentage and carbon dioxide and methane proportions, determining other contaminants after concentration by refrigeration

21 p3666 A69-39273

Saturated liquid oxygen dielectric constant measurements to calculate polarizability
[NAS-NRC PAPER D-3]

22 p3998 A69-40620

Optimal design and materials for cryogenic storage of O and H on lunar surface
[AAS PAPER 69-051]

24 p4296 A69-42882

Raman scattering during external and internal motion of oxygen molecules condensed phases, observing gamma and liquid phase bandwidths during stretching vibrations

24 p4353 A69-43808

LIQUID PHASES

Lattice gas model liquid-vapor phase properties calculated with allowance for thermal expansion

06 p1029 A69-16896

Liquid phase radical oxidation with intermediate and end products in same phase, discussing products, hydroperoxidation and liquid systems explosiveness

06 p1032 A69-17425

Liquid and vapor phase microscale panel cokers applied to screening synthetic lubricants for aircraft turbine engines
[ASLE PAPER 68-LC-22]

07 p1140 A69-19309

Thermodynamic consequences of Lindemann mechanism for fusion of pure body, discussing application to isolated equilibrium system of solid and liquid phases

07 p1242 A69-19322

Microstructural changes during liquid phase sintering of alloys, considering temperature effect on carbide grain growth and activation energies

07 p1168 A69-19599

Specific heats of oxygen at coexistence from triple point to critical point and corresponding values for liquid phase

10 p1808 A69-23187

Materials and products fluid state processing in space, discussing g, zero-g and induced forces effect on fluid matter and process, cost and operational effectiveness

19 p3324 A69-35588

Hall coefficient and conductivity measured as function of temperature for liquid Au, Cu and Ag tellurides and liquid alloy systems Bi-Te and Ti-Te

20 p3584 A69-38024

Gas phase arrest peak analogy with liquid phase oxygen cut-off during final stages of hydrocarbons gaseous oxidation reactions, noting active centers

21 p3669 A69-38805

Electrical conductivity of rare earth metals La, Ce, Pr and Nd in solid and liquid states by rotating magnetic field method

21 p3781 A69-39070

Soviet book on liquid binary systems covering physicochemical analysis and quantitative methods

21 p3670 A69-39529

Vapor pressure measurements on liquid fluorine from triple to critical point at one degree K intervals
[NAS-NRC PAPER H-2]

22 p3998 A69-40624

Carbon trioxide formation during ozone photolysis in liquid carbon dioxide and sulfur hexafluoride, noting ozone disappearance quantum yield independence of oxygen/ozone ratio

23 p4112 A69-41338

LIQUID POTASSIUM

Experimental apparatus for measuring heat transfer coefficients into boiling K in tubes, investigating vapor-liquid mixtures hydrodynamic and electrical properties

03 p0534 A69-14150

Oxygen effects in Type 316 stainless steel, Nb-Zr alloy liquid potassium system, discussing thermal convection and forced circulation loops and corrosion rates

12 p2112 A69-25943

Effective electrical conductivity of two phase vapor-potassium flow in flat duct at flow temperature 800 C, showing dependence on volumetric vapor content

13 p2306 A69-27480

LIQUID PROPELLANT ROCKET ENGINES

NT F-1 ROCKET ENGINE

NT HYDRAZINE ENGINES

NT HYDROGEN OXYGEN ENGINES

NT M-1 ENGINE

NT RL-10-A-1 ENGINE

Combustion chamber equation for liquid fuel rocket engine, considering time varying ignition lag

01 p0142 A69-10090

Nondestructive testing of brazed liquid propellant rocket engine components and assemblies, describing radiographic, ultrasonic, thermographic, and leak test methods

01 p0085 A69-10534

Solid, liquid and advanced propulsion techniques in France, discussing Diamant program and Europa booster

02 p0334 A69-11919

Pressurization system for liquid rockets, analyzing inert weight and complexity reduction using Saturn 5 S-4B stage

02 p0305 A69-12386

Liquid propellant space launch vehicles longitudinal modes natural frequency, discussing coupled engine-propellant supply system stability
[AIAA PAPER 68-289]

02 p0335 A69-12393

Combustion oscillations in liquid and solid propellant engines, noting destructive effect of LF vibrations and acoustic instability

02 p0305 A69-12494

High pressure rocket engine design, considering complete combustion, propellant feed system overall efficiency and thermodynamic gain

03 p0495 A69-12888

Liquid fuel rocket engine design for cooling by propellant counter flows

08 p1376 A69-20588

Performance analysis for electrothermal thruster using lithium propellant with supersonic heat addition
[AIAA PAPER 69-286]

09 p1567 A69-21267

Space storable propulsion system comparison, discussing liquid propellants performance and thermodynamic analysis
[AIAA PAPER 68-614]

09 p1570 A69-21981

Radiographic, ultrasonic, thermographic and leak test quality control for brazed liquid propellant rocket engine components

10 p1699 A69-23054

Simplified model of ignition tests with liquid propellant rocket engines under high vacuum conditions, giving possible parameter for evaluation of simulation of real conditions
[DVL-831]

10 p1754 A69-24022

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies

11 p1967 A69-25498

Combustion instability problems in rocket motors, emphasizing strongly coupled pressure oscillations in combustion chambers

11 p2003 A69-25597

Liquids in zero g environment for controlling position of propellant within tank for restart of rocket engine, noting minimum energy principle applications

11 p1944 A69-25599

Electron beam welding of Lunar Module Descent Engine, emphasizing variable area injector element and manifold assembly problems and techniques

12 p2102 A69-26621

Helmholtz resonance in rocket injectors as function of frequency response of interaction between chamber pressure and dissolved gas-fuel injection flow rate

12 p2148 A69-26806

Galerkin method applied to axial, transverse and three dimensional linear combustion instability problems in liquid propellant rocket motors

14 p2538 A69-29021

Mixture ratio distribution, injector/chamber performance and nozzle effects on specific impulse of liquid propellant rocket engine using hydrazine and oxygen

16 p2828 A69-31724

Combustion in liquid propellant rockets, discussing acrothermochemical steady state and nonsteady behavior analysis and experiments

16 p2835 A69-31732

Feed-system-coupled combustion instability linearized mathematical models for liquid fuel rocket engines, discussing nonrigid injector and method for instability elimination

16 p2836 A69-32001

Vaporization interaction liquid rocket performance model, discussing performance loss evaluation and test data
[AIAA PAPER 69-470]

16 p2838 A69-32663

- Droplet vaporization model representing combustion processes of longitudinal oscillations in liquid rocket combustor [AIAA PAPER 69-483] 16 p2841 A69-32689
- Test programs utilizing pitot probes to map exhaust plumes from liquid bipropellant engines in low ambient pressures conducted to verify calculations [AIAA PAPER 69-575] 16 p2869 A69-32746
- Electroforming methods in design and fabrication of liquid propellant rocket motor injectors and composite thrust chambers [AIAA PAPER 69-583] 16 p2794 A69-32757
- Cost optimization of mixture ratio control systems for liquid propellant launch vehicles, considering open and closed loop systems [AIAA PAPER 69-441] 16 p2870 A69-32775
- Interagency Chemical Rocket Propulsion Group method of treating measurement error for liquid rocket engine performance parameters, using uncertainty model [AIAA PAPER 69-734] 16 p2846 A69-32781
- Rocket engine with turbopump supplied liquid propellant, describing ejector, pump assembly, gas generator and control devices 17 p3019 A69-33341
- Soviet monograph on liquid rocket as controlled plant covering rocket bodies, liquids motion stabilization and gyrosystem positioning 18 p3206 A69-34333
- Liquid, solid, hybrid propellant and nuclear, electric and air breathing rocket engines, discussing orbiting payload cost, controllability, operating environments, velocity, etc 19 p3395 A69-36321
- Nonlinear periodic oscillations in liquid rocket combustion chambers for different chamber models and burning rate response formulations 19 p3449 A69-36352
- Loaded bipropellant liquid propulsion system sterilization studies on structural and nonmetallic materials suitability for use in oxidizer [AIAA PAPER 68-631] 21 p3785 A69-39025
- Liquid propellant rocket injectors response to HF chamber pressure oscillations using one dimensional model 21 p3786 A69-39235
- Liquid fuel propulsion systems for geostationary satellites, discussing transfer orbits, payload increase and required thrust for various satellite trajectories [DGLR-69-014] 23 p4202 A69-41929
- LIQUID ROCKET PROPELLANTS**
- NT AEROZINE
- NT CRYOGENIC ROCKET PROPELLANTS
- NT GELLED ROCKET PROPELLANTS
- NT HYPERGOLIC ROCKET PROPELLANTS
- NT MONOPROPELLANTS
- Solubility of helium in liquid fluorine increases with temperature exhibiting reverse order 01 p0142 A69-11258
- Rocket propellant safety, discussing thermal, mechanical and impact sensitivity tests of solid and liquid propellants 02 p0302 A69-11525
- Dry heat sterilization and ethylene oxide decontamination test equipment for bipropellant liquid propulsion system 02 p0228 A69-11764
- Pressure and flow transients in liquid rocket engine feed systems predicted by method of characteristics 03 p0495 A69-12991
- Characteristics of liquid propellant explosions, analyzing detonation, shock wave formation and deflagration 04 p0645 A69-14474
- Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model 04 p0645 A69-14475
- Yield and combustion physics of liquid propellant explosions determined from analytic charts 04 p0646 A69-14477
- Mixing function vs time relationship for liquid propellant explosion hazards prediction, noting thermocouple grid for maximum information 04 p0646 A69-14478
- Wedge shaped charge technique for evaluation of detonation hazards of liquid explosives 04 p0646 A69-14479
- Liquid explosive testing from point of view of liquid mobility 04 p0646 A69-14481
- Method for solving propellant sloshing in rotationally symmetric rocket tanks with arbitrary internal boundaries 04 p0665 A69-14840

- Optimal length conditions of liquid rocket combustion chambers, considering propellants, injection conditions, etc, noting graphs and differential equations solutions 08 p1376 A69-20606
- Hydrodynamic effects in flame spreading, ignitability and steady burning of liquid fuels, using analogy of films floating on water 11 p1999 A69-24484
- Liquid rocket propellants chemical reactions identification during kinetic expansion [WSCIP PAPER 68-7] 11 p1942 A69-24906
- Soviet book on liquid fuel rocket engines design covering gas expansion in nozzles, mixture formation, heat transfer, injectors and supply systems 12 p2148 A69-27078
- Propellant pressurization system for British Black Arrow composite vehicle, describing valve design and performance 14 p2509 A69-29629
- Advanced liquid fuels and oxidizers development from rocket propulsion reaction principle 16 p2828 A69-31747
- Liquid propellant injector design for rocket thrust chambers, discussing mass and mixture ratio regulation 16 p2836 A69-31999
- Liquid expulsion by direct pressurization of propellant tank in spinning missile system, demonstrating feasibility with subscale hardware [AIAA PAPER 69-527] 16 p2838 A69-32651
- ICRPG liquid propellant thrust chamber performance evaluation methodology, reviewing imperfections and limitations [AIAA PAPER 69-468] 16 p2838 A69-32657
- Analytical model for liquid fluorine no-vent loading operations noting application to flightweight upper stage systems [AIAA PAPER 69-579] 16 p2767 A69-32715
- Contaminants formation during pulse mode operation of liquid bipropellant attitude control rocket engine, discussing exhaust plume effects [AIAA PAPER 69-574] 16 p2870 A69-32774
- Rocket performance optimization by extending injector design technology to high performance injectors for space storable FLOX/LPG propellants [AIAA PAPER 69-506] 16 p2846 A69-32778
- Modified liquid fueled pulsating combustion chamber operating as Helmholtz cavity resonator, measuring chamber pressure as function of time 17 p3074 A69-33410
- Physical and physiological hazards of cryogenic liquids, emphasizing fire and explosion problems associated with storage and handling 17 p3017 A69-33684
- Liquid rocket combustion investigated by pulsed ruby laser holography at sea level rocket engine test stand, noting laminated glass acrylic window byproduct [AIAA PAPER 69-471] 17 p3075 A69-34200
- Temperature, applied stress and pressurization effects on materials corrosion by liquid F and F containing oxidizers 21 p3748 A69-39485
- Multiple outlets for reducing stratification-induced liquid propellant supply temperature rise, preventing cavitation problems in supply pumps [AAS PAPER 69-395] 24 p4363 A69-42830
- LIQUID ROTATION**
- U ROTATING LIQUIDS**
- LIQUID SLOSHING**
- Spherical false bottom influence on propellant sloshing in circular tank [DVL-843] 03 p0416 A69-13665
- Method for solving propellant sloshing in rotationally symmetric rocket tanks with arbitrary internal boundaries 04 p0665 A69-14840
- Electric field influence on fluid oscillation modes for Korteweg-Helmholtz force density on incompressible dielectric liquid immersed in electric field 04 p0591 A69-15504
- Axisymmetric vortex free motion of ideal fluid in conical container with spherical bottom under axial acceleration 06 p0910 A69-17335
- Hydraulic analog for determining acoustic behavior of baffle cell used in liquid rocket engines, comparing ring and spoke type baffles 09 p1570 A69-22004
- Incompressible fluid nonlinear oscillations in rectangular basin analyzed by Green function for mixed problem, calculating velocity potential and free surface approximations 09 p1483 A69-22711

- Motion of body with cavity containing liquid based on Kharlamov solution, noting gyrostatic moment and liquid sloshing effect 11 p1868 A69-24775
- Liquid filled elastic shells natural frequencies and oscillation modes, deriving eigenfunction system from liquid velocity potential boundary conditions to determine dynamic load 11 p1870 A69-24951
- Wave propagation on heavy fluid surface forming splashes in container with vertical walls 13 p2247 A69-27746
- Liquid sloshing in vessel of complex geometry reduced to boundary value problem 14 p2428 A69-28969
- Nonlinear equations for motion of rigid body with cavity partially filled with ideally incompressible liquid 14 p2432 A69-29626
- Liquid free surface response to mass force variation during space flight near zero-g, discussing effects on ignition 16 p2866 A69-31735
- Plane oscillations of liquid in rectangular elastic vessel determined to obtain frequencies and mode shapes of natural oscillations from velocity potential boundary conditions 17 p2950 A69-33200
- Satellites and space vehicles attitude control mathematical model accounting for nonrigidity, sloshing and energy dissipation in vehicle interior 17 p3048 A69-33239
- Hele-Shaw and porous medium fuel tank systems behavior in simulated low gravity environment, studying sloshing, wetting, funnelling and fuel-driver gas interface stability [AIAA PAPER 69-678] 17 p3021 A69-33444
- Soviet monograph on liquid rocket as controlled plant covering rocket bodies, liquids motion stabilization and gyrosystem positioning 18 p3206 A69-34333
- Tank configurations allowing for sloshing in liquid fuel reaction control system in spinning satellite 18 p3219 A69-34796
- Acoustic pumping system for propellant control at zero gravity, describing system operation by hydraulic analogy for liquid sloshing prevention 20 p3548 A69-37294
- Rocket body elastic vibrations, liquid fuel supply oscillations and engine thrust vibrations effects on system stability 20 p3617 A69-37604
- Fluid motion in free falling partially filled cylindrical vessel due to sudden vertical velocity change, considering free surface disturbances 21 p3692 A69-38684
- Optimal control of liquid vibrations in rectangular container moving in horizontal direction, deriving algebraic equations system for optimal functional 21 p3694 A69-38854
- Optimal control of ideal noncompressible fluid vibrations partially filling rectangular container moving in horizontal direction 21 p3695 A69-38892
- Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects [AIAA PAPER 69-1004] 22 p3921 A69-40378
- LIQUID SODIUM**
- Standing Alfvén wave resonances in liquid sodium 01 p0131 A69-10820
- Heat transfer rates from high temperature spheres into subcooled liquid sodium during forced convection, noting surface vapor formation [ASME PAPER 67-WA/HT-32] 02 p0351 A69-12202
- Liquid sodium corrosive action on vanadium, niobium, titanium and zirconium involving oxygen exchange from liquid to solid metal phase and energy of formation 10 p1713 A69-23821
- Thermodynamic efficiency of MHD cycles for liquid Na with multistage injection and injection condensation 13 p2205 A69-27487
- Sodium liquid-metal jet MHD generators tested under constant and rising magnetic fields and off and on loads 13 p2208 A69-27511
- Limiting heat power transported by sodium heat pipes dependent on capillary network geometry, inclination angle and operating temperature 14 p2538 A69-29205
- Liquid sodium penetration into stainless steel grain boundaries, using laser microprobe 18 p3154 A69-35473

LIQUID-SOLID INTERFACES

Liquid oxides wetting and spreading capabilities on refractory metal surfaces, noting chemical reaction oxide reducing effect
02 p0265 A69-11884

Heat conduction with change of phase in three dimensional melting and solidification problem under isothermal conditions and balanced energy at interface
02 p0354 A69-12548

Thermodynamic study of carburization of liquid titanium and zirconium, examining effects of atmosphere, graphite porosity and alloying elements
03 p0446 A69-13572

Dynamic and interfacial fluid effects in mechanical face seals, discussing hydrodynamic pressure generation
04 p0606 A69-14798

Microscopic time lapse movies in solid/liquid interface profile during melting and freezing of materials for spacecraft thermal control as reversible heat sink [AIAA PAPER 69-95]
06 p1038 A69-18126

Liquid surface active media /kerosene, water, castor oil/ effect on strength of V notched polymethyl methacrylate specimens
09 p1528 A69-21852

Vibration characteristics of circular cylindrical shells containing water under axial excitation, investigating bubble formation and shell-fluid interaction [ASME PAPER 69-VIBR-4]
10 p1805 A69-24162

Thin liquid film equilibrium on rotating sphere, determining conditions for detachment as function of angular velocity
12 p2061 A69-25886

Wetting and sessile drop contact angles between liquid binary Al alloys and solid Be, boron carbide and graphite under vacuum and in He [ACS PAPER 15-C-68F]
12 p2114 A69-26301

Electrical end losses in liquid-metal MHD generators with variable conductivity, noting working fluids and aspect ratios
13 p2206 A69-27493

Sessile drops contact angles of alkali liquid metals on Re, W, Mo, Ta and Nb substrates related to substrate surface bare work function
14 p2506 A69-29270

Seal selection criteria based on maintaining fluid film between faces, discussing facial heat generation and dissipation, speed and size effects, etc [ASLE FICFS PREPRINT 25]
15 p2620 A69-30488

Evaporation of liquid droplets from heating wall observed cinematographically, noting heat transfer by violent film boiling and conduction through thin vapor layer
15 p2718 A69-31117

Self ignition of solid/fluid particles suspended in gas flow, discussing heat transfer coefficient, critical temperatures, etc
17 p3070 A69-33142

Liquid oxides wetting and spreading capabilities on refractory metal surfaces, noting chemical reaction oxide reducing effect
18 p3156 A69-35044

Electron reactivity of one equivalent oxidizing agents at ZnO surface by electrochemical reduction
19 p3392 A69-36731

Stress corrosion cracking mechanisms in liquid-solid metal combinations and solvent exposed plastics, discussing adsorption processes and cathodic polarization inhibition
19 p3349 A69-36887

Book on heat transfer from horizontal heating surfaces to stationary boiling liquids, heating surface roughness effect and bubble formation
20 p3633 A69-37917

Liquid solid mixtures of parahydrogen flow characteristics in pipe, globe valve, orifices and venturi, determining pressure loss [NAS-NRC PAPER F-5]
22 p3998 A69-40626

LIQUID SURFACES

Parametric instability of horizontal surface of ideally conducting or very high dielectric constant liquid in varying perpendicular electric field
06 p0957 A69-17542

Free surface of electrically conducting liquid in gradually varied supercritical regime in horizontal rectangular channel
08 p1362 A69-20273

Interfacial charge relaxation overstability in tangential electrical field, discussing electromechanical polarization surface waves propagation and dielectrophoretic orientation of liquids in zero gravity space
08 p1353 A69-20792

Draining liquid surface dip formation in tanks of arbitrary shapes and drain hole positions
09 p1483 A69-21999

Imaging ultrasound by holography with reconstruction in light, comparing methods using scanned hologram and liquid surface
10 p1695 A69-23543

Integral representation for velocity and pressure fields produced by horizontal motion of two dimensional bodies below or on free surface of viscous liquid
11 p1866 A69-24278

Characteristic frequencies approximation formula for gas bubbles in liquids compared with exact solutions
11 p1915 A69-24582

Cavity formation on water and wet cement surfaces by impingement of axisymmetric air jet noting cavity shape, depth and diameter
11 p1869 A69-24888

Wave propagation on heavy fluid surface forming splashes in container with vertical walls
13 p2247 A69-27746

Gas chromatography based on sampling gas-vapor phase at liquid surface for determining volatile oxygen containing compounds in biological media
13 p2216 A69-28627

Laser beam light pressure bending of incompressible liquid surface leading to beam self focusing in linear medium
14 p2461 A69-29674

Liquid free surface response to mass force variation during space flight near zero-g, discussing effects on ignition
16 p2866 A69-31735

Nonlinear free surface effects in low gravity tank draining, finding domains of validity for linearized and nonlinear analyses [AIAA PAPER 69-680]
17 p2953 A69-33450

Surface tension gradients caused thermocapillary convection solved for spherical fluid film under weightlessness conditions
19 p3452 A69-36392

LIQUID-VAPOR EQUILIBRIUM

Lattice gas model liquid-vapor phase properties calculated with allowance for thermal expansion
06 p1029 A69-16896

Gravitational effects on thermodynamic variable equilibrium composition of liquid-vapor binary mixtures near critical point, discussing changes in phase with altitude
11 p1999 A69-24914

Vapor-liquid transition in inert gases based on Monte Carlo method, including comparison with van der Waal equation and plasma ionization equilibrium
15 p2655 A69-30981

Surface tension of simple liquids consisting of interacting spherical particles, considering density variation in liquid-vapor phase transition zone
19 p3452 A69-36725

Einstein development of theory of fluctuations applied to homogeneous nucleation, calculating activation energy, liquid drop-vapor system equilibrium state peculiarity, etc
22 p3938 A69-40448

LIQUID-VAPOR INTERFACES

Liquid nitrogen dispersed flow film boiling data accounting for droplet breakup by vapor acceleration, drag coefficient and heat transfer from wall [ASME PAPER 68-HT-44]
02 p0351 A69-12203

Pressure induced variations in stability constant characterizing bubble structure in two phase boundary layer of several liquids during boiling with natural convection
03 p0534 A69-14149

Hot inert gas bubble thermal stability in cool reactive liquid
11 p1998 A69-24475

Large amplitude symmetric and asymmetric irrotational motion of inviscid incompressible fluid with liquid-vapor interface in accelerating cylindrical container of revolution
11 p1871 A69-25124

Effective electrical conductivity of two phase vapor-potassium flow in flat duct at flow temperature 800 C, showing dependence on volumetric vapor content
13 p2306 A69-27480

Air-water and steam-water flows in two phase Laval nozzles, measuring flow rates and temperature and pressure variation
13 p2245 A69-27481

Steam-water convergent condensing injector with supersonic inlet vapor, discussing axial pressure profiles and discharge pressure
13 p2372 A69-27486

Microlayer thickness in nucleate boiling, studying liquid-vapor interface motion of growing bubble near heated surface
13 p2375 A69-27789

Gas-liquid chromatography of natural protein amino acids in biological substances, noting separation characteristics
13 p2217 A69-28258

Liquid-vapor interaction in loop plates with different heat pipe capillary geometries using water as heat transporting medium
14 p2539 A69-29207

Water-air interface models unreliability in calculating atmospheric heat and humidity turbulent flow over ocean
14 p2443 A69-29839

Noncontacting minimum leakage dynamic seal requiring liquid-vapor interface with leakage tolerance [ASLE FICFS PREPRINT 40]
15 p2620 A69-30485

Lubrication and leakage control mechanics of face seals, considering liquid to vapor boundary within interface [ASLE FICFS PREPRINT 22]
15 p2620 A69-30486

Froude number for scaling wind stress at air-water interface, verifying logarithmic wind profile and relating shear velocity to surface roughness
17 p2996 A69-33152

Surface tension of simple liquids consisting of interacting spherical particles, considering density variation in liquid-vapor phase transition zone
19 p3452 A69-36725

Vapor pressure equation for oxygen and nitrogen derived by adding nonanalytic term, correlating equation with observed data [NAS-NRC PAPER H-1]
22 p4051 A69-40628

Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects [ASME PAPER 69-HT-28]
24 p4411 A69-43540

- Hypothermia induced alterations in biochemical processes studied with isolated rat liver perfused at low temperature
10 p1642 A69-23119
- Hepatic tyrosine transaminase rhythm in rats under various conditions of lighting, food consumption and dietary protein content
17 p2910 A69-33755

Acetate-2-C 14 conversion to C 14 carbon dioxide and C 14 fatty acids in rats with 2/3 of liver removed
19 p3257 A69-35976

Long microextensions on cultivated human liver cells, using scanning electron microscope
20 p3480 A69-38287

Successive X ray doses effect on oxidative phosphorylation of vitamin B 1 in white rats liver tissue ultrastructure during and after irradiation, establishing thiamine biosynthesis suppression
21 p3658 A69-39056

Mitochondrion-endoplasmic reticulum connection in hepatocytes, discussing possible protein molecule transfer
23 p4083 A69-41455

Neodymium laser radiation effect on electrical and histomorphological properties of liver in rats and hamsters
23 p4111 A69-42344

Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions
24 p4269 A69-43565

LIZARDS

Light transmission through body wall of living colorable desert iguanas measured by spectrophotometry, discussing skin pigment effects
07 p1059 A69-18373

LOAD DISTRIBUTION [FORCES]

Thin cylindrical shell deformation and stress under concentrated radial loading, analyzing singularity at load point
01 p0166 A69-10301

Yield surface after prestraining under radial loading, analyzing formation of yield corner
01 p0166 A69-10303

Hollow finite cylinder stress-strain analysis under normal loads on end faces solved by four partial differential equations
01 p0168 A69-10359

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution
01 p0168 A69-10380

Helicopter structures design for maximum practicable crashworthiness and survivability, comparing load factors and deformations with indicated human impacts tolerance
[AHS PAPER 225] 01 p0009 A69-10408

Plastic zone generation by slots cut in tensile test specimens before and during loading, discussing redistribution
01 p0098 A69-10762

Deflection of orthotropic sandwich plates with unequal facing thickness with edges subjected to uniform and concentrated loading
01 p0172 A69-11270

Uniqueness formulation of concentrated load problem in linear theory of couple-stress elasticity
02 p0338 A69-11720

Bending of freely supported plates of polygonal planforms under transverse load with aid of R functions
02 p0341 A69-12140

Elastic analogue in creep stress analysis under time dependent boundary conditions and strain hardening theory
02 p0345 A69-12418

Matrix displacement method for nonlinear elastic analysis of shells of revolution under symmetrical and axisymmetrical loadings
02 p0346 A69-12511

Internal elastoplastic stress distribution within reinforced plastics subjected to force normal to internal filaments direction
02 p0347 A69-12513

Point load subjected deflections of cantilevers and circular rings found using electronic analog computers
03 p0522 A69-12865

Equilibrium stability of elastic circular arch constrained in rigid cavity and subjected to uniformly distributed parallel loading
03 p0524 A69-13066

Integral equation solution for plate with internal support
03 p0528 A69-13799

Load diffusion from transverse tension bar into semiinfinite elastic sheet, considering line and area contact methods of stringer attachment
[ASME PAPER 68-WA/APM-15] 04 p0669 A69-14396

Large finite deflections of clamped thin elastic circular plate subject to transverse concentrated load at center solved by power series
04 p0675 A69-14596

Annular plate clamped at inner and outer boundaries and subject to point load, computing deflection
04 p0676 A69-14725

Kirchhoff-Love hypothesis error dependence on stressed state variability index in theory of elasticity for closed spherical shell under uniform surface load
04 p0680 A69-14927

Symmetrical bending of laterally loaded circular micropolar plates
04 p0682 A69-15291

Plane shear pressure wave propagation in elastic-plastic half space for various combined normal and shearing loadings
05 p0835 A69-15798

Plastic moments calculation of continuous steel beams under various loading patterns
05 p0837 A69-16035

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads
[ASME PAPER 68-WA/DE-4] 05 p0839 A69-16169

Creep properties of EP-376 steel under slowly varying loads
05 p0782 A69-16692

Post-wrinkling nonlinear behavior of conical shell of revolution subjected to bending loads
[AIAA PAPER 69-90] 06 p1027 A69-18074

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] 06 p1028 A69-18133

Current load distribution for optimizing MHD generator efficiency determined by variational method, noting dependence on relative length
07 p1058 A69-19012

Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement
[AIAA PAPER 69-203] 07 p1054 A69-19546

Plasticity theories for nonisothermal loading, considering plastic strain
07 p1237 A69-19681

Stability of cylindrical shells under concentrated annular loads using finite difference method, discussing critical loads, moments and errors
07 p1238 A69-19688

Differential equation reduction for vibrational motion of rectangular plates subjected to variable tangential forces, discussing dynamic stability
08 p1415 A69-20666

Plastic yielding of tensile V-notched aluminum alloys elements with intermediate thickness and various shoulder ratios, studying thickness effect on yield load
09 p1612 A69-21499

Governing equations for bending of fixed isotropic circular sandwich plate subjected to eccentric concentrated load
09 p1615 A69-21926

Uniform gravity load effect on buckling of beam continuously supported by soft foundation and subjected to uniform lateral load
09 p1615 A69-21927

Fatigue life evaluation by programmed fatigue strength tests, using frequency distribution of load set amplitudes
09 p1620 A69-22573

Gyrorotor center axial displacements due to axial load, noting equal load distribution between bearings with resilient cover plates
09 p1502 A69-22703

Plates stability and corner stress-strain state under variable loads calculated by method analogous to structural mechanics
10 p1792 A69-22849

Concentrated loads in elastic Cosserat continuum involving body moments and small deformations
10 p1799 A69-23151

Superimposed tool vibration function in deep drawing, ironing and cold forging, discussing equipment instrumentation, emphasizing dynamic force measurement
[ASME PAPER 69-VIBR-8] 10 p1700 A69-24164

Strength analysis of revolving shallow shell with jumpwise thickness variations under axisymmetric distributed load, considering rigidity and plastic deformation
11 p1968 A69-24318

Statistical parameters of critical load distribution in buckling of imperfectly sensitive elastic structures, noting probability of failure
11 p1969 A69-24415

Elastic isotropic half plane weakened by circular hole with concentrated force applied along hole contour, considering stress distribution
11 p1972 A69-24653

Strain energy for two and three dimensional crack systems subjected to varying loads, detailing loading and crack geometry effects on fracture criterion
11 p1974 A69-24669

Differential equations for effect of sinusoidal force with slowly varying frequency on dynamic behavior of nonlinear vibrator, using phase surface technique
11 p1916 A69-24760

Vibration problem of supported beam elastically restrained against rotation at both ends solved by Hermitian and linear differential operators
11 p1976 A69-24794

Optimum design of shells loaded by concentrated forces, discussing thickness relation to middle surface, loading point and manufacturing considerations
11 p1979 A69-24812

Finite deformation equations for flat annular membranes deduced from equations for thin shells of revolution, discussing displacement equations and fixed edge forces
11 p1979 A69-24813

Symmetrically loaded weak moment shells of revolution made of materials with different moduli of elasticity
11 p1980 A69-24819

Time scales for creep stress redistribution in structures subject to step loading
11 p1980 A69-24879

Thin conical elastic shell stress-strain state calculated by computer for arbitrary thicknesses and loading conditions, considering temperature and edge forces effects
11 p1981 A69-24943

Gas turbine disk calculation and plastic flow theory, considering loading conditions and elastoplastic strains due to centrifugal forces and nonuniform heating
11 p1982 A69-24945

Limit loads for circular and annular plates of smoothly varying profile under uniformly distributed transverse loads
11 p1982 A69-24946

Stress analysis of reinforced cylindrical shells under external loading, using Vlasov semimomentless theory
11 p1982 A69-24949

Bent plates elastoplastic stress-strain state determination by elastic solution and finite differences, considering linear strengthening under uniform distribution of load
11 p1985 A69-25175

Rectangular aluminum alloy rods carrying capacity under compression loads applied eccentrically to rod ends
11 p1986 A69-25326

Nonlinear equations solvability for elastic cylindrical shells found existing for arbitrary load and clamping conditions
12 p2177 A69-25881

Warping rigidity effect on stability of cantilever bar under eccentric follower end load, discussing bending torsional flutter and buckling
12 p2179 A69-26212

Clamped edge anisotropic elliptical plate bending under varying loads, assuming torsional rigidity bearing constant ratio to geometric mean of bending rigidities
12 p2180 A69-26269

Optimal additional loading at zero moment stress-strain state in simply connected shell of complex design under external loads, using successive approximation
12 p2181 A69-26610

Axisymmetric deformation of thin orthotropic laminar spherical shells under internal loads calculated on computer using Legendre polynomials
12 p2181 A69-26611

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution
12 p2182 A69-26679

Nonlinear structure undergoing arbitrary load history including temperature variations solved by computerized force and subordinated step procedure
12 p2185 A69-26823

Orthotropic properties and stress fields for configurations of fiber or whisker reinforced composite materials subjected to nonaxial loading, considering infinite elastic matrix
12 p2186 A69-26824

Load deflection equation solution based on row operations, involving three passes of coefficient matrix, using wavefront processing and modified Gauss algorithm
13 p2358 A69-27208

Matched asymptotic expansions to obtain slider bearing load carrying capacity
[ASME PAPER 68-LUBS-18]

13 p2266 A69-27270

Helicopter rotors with rigid blades performance from viewpoint of controllability and load distribution

13 p2201 A69-27295

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads
[ASME PAPER 68-WA/DE-4]

13 p2360 A69-27420

Variational method used to determine accuracy of approximation technique for dielectric slab on sidewall of rectangular waveguide

13 p2233 A69-28072

Discrete element plastic analysis of long prismatic bars under transverse loading in longitudinal direction, based on matrix displacement method

13 p2365 A69-28237

Donnell small displacement equations for arbitrary open noncircular cylindrical shells under arbitrary normal pressure loadings

13 p2365 A69-28248

Stress intensity for Griffith crack with asymmetric distribution of surface tractions

13 p2369 A69-28352

Autonomous and nonautonomous transient processes in conservative and nonconservative nonlinear systems, deriving equations describing perturbations under loads, solving by asymptotic method

13 p2300 A69-28529

Infinite cylindrical shell stability under circular load solved by linearization about bending moment stress state and Galerkin method

14 p2531 A69-28808

Plasticity theory approximation variants for complex loading, analyzing strain trajectories using Prandtl-Reiss theory

14 p2532 A69-28978

Book on fatigue strength in construction covering structural strength and stability, load design, metal physical properties, elasticity and plasticity theories, stress concentration, strain buildup, etc

14 p2534 A69-29333

Bending of elastic triangular plates with free and supported corners under uniformly distributed transverse load determined using Ritz method

14 p2535 A69-29410

Strains determination for laterally edge loaded rectangular plate and sagittas determination of perpendicularly loaded plate proved analogous

15 p2704 A69-30295

Structural fatigue-inducing random load spectrum analyzed and computed for laboratory simulation

15 p2705 A69-30363

Bending theory of orthotropic plates with variable elastic modulus under transverse loads, utilizing stress-strain relations and Kirchhoff-Love hypothesis

15 p2708 A69-30661

Surface displacements at end of elastic semiinfinite circular cylinders due to annular axisymmetric loading, employing Boussinesq solution

15 p2711 A69-30872

Panel flutter under loads along profile, evaluating constraints dynamic characteristics by Hamilton principle

15 p2712 A69-31001

Cylindrical shell bending subjected to internal pressure and force uniformly distributed on round section solved by numerical integration of differential equations

15 p2653 A69-31195

Rotatory cylindrical shells supported at corners under symmetric load, determining deformation in arbitrary locations by moire method

15 p2715 A69-31546

Linear static deformation and buckling of shallow spherical shells under asymmetric load by solving two dimensional finite difference equations

16 p2871 A69-31897

Buckling load of cylindrical shell with inclined stiffeners, using method for stability of thin walled cylinder under transverse end load at free end

16 p2872 A69-31912

Stress and deformation in cross section of beam during complex loading using steepest-descent method

16 p2873 A69-32132

Parabolic and cardioid plates bending under uniform load by using point matching technique

16 p2874 A69-32166

Load carrying capacity of circular plates under axisymmetric load

16 p2875 A69-32289

Local buckling of infinite continuous plane elastic membrane under longitudinal load in form of concentrated forces

16 p2875 A69-32293

Aircraft and missile dynamic characteristics for heavy loads and large heat flux, noting small harmonic vibrations of heated structures in plastic domain
[ICAS PAPER 68-38]

17 p3061 A69-33589

Thin circular ring stability under uniform external transverse loading at various angles, discussing transverse shear deformation effects and buckling

17 p3061 A69-33707

Carrying cables shape optimization for suspended structures under load, using minimum weight criterion

18 p3212 A69-34354

Cylindrical and conical panels dynamic responses to time varying load distributions, using trigonometric series coupled with finite difference methods
[ASME PAPER 69-APM-22]

18 p3214 A69-34396

Load analysis for elastoplastic bodies by Prandtl-Reuss theory and Mises yield condition, considering avoidance of difficulties associated with nonlinear partial differential equation solution

18 p3216 A69-34571

Toroidal, spherical and conical shells limiting equilibrium under various loading and support conditions

18 p3216 A69-34572

Ponderable annular region under symmetrically applied concentrated forces, obtaining solution for stress state by successive approximations

18 p3216 A69-34577

Longitudinal oscillations of homogeneous elastic rod under nonconservative force at one end, deriving equations of motion and stability conditions

18 p3216 A69-34578

Lightweight structural design problem of stress concentration associated with load diffusion in rectangular panels with constant stress flanges

18 p3219 A69-34785

Stress-strain state of shells under concentrated loading, emphasizing positive Gaussian curvature

18 p3219 A69-34832

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression

18 p3224 A69-35318

Phenomenological creep theory for woven fiberglass reinforced plastic under moderate loads

18 p3226 A69-35373

Strength analysis of three layer rectangular plates under complex load and support distributions

19 p3434 A69-35827

Residual deformation of elastoplastically bent thin circular plate after perfect unloading from large deflection, considering equilibrium and compatibility conditions

19 p3438 A69-36306

Elastic shell theory to regularize singular integrodifferential equation, investigating load transfer from reinforcing ribs to circular cylindrical shell and numerical solution correlation

19 p3443 A69-36792

Bending of normally loaded simply supported rectangular plates in large deflection range solved by nonlinear differential equations and minimum potential energy principle

19 p3445 A69-36828

Elastic stiffness, kinematically equivalent loads and initial loads due to initial strains of FUGA 6 element, describing program for matrices generation

19 p3447 A69-36852

Optimal plastic design of circular sandwich ring assuming symmetric loading, minimum plastic resistance and cost justification of stronger cross section

20 p3625 A69-37590

Torsional-flexural buckling of thin walled open sections under eccentric load, emphasizing singly symmetric sections loaded in plane of symmetry

20 p3625 A69-37653

Energy formulation extended for plane anisotropic rectangular plates, handling nonuniform properties and loadings

20 p3627 A69-37766

Load carrying capacity of orthotropic circular cylindrical shell under uniformly distributed normal load, considering edge support conditions

20 p3629 A69-38075

Solution procedure for torus with given surface loads or displacements, using series expansion of generalized analytical functions, discussing stress concentration near toroidal cavity

21 p3839 A69-39192

Plasticity of tubular steel annealed in vacuum furnace and subjected to complex tension and torsion along deformation trajectories containing salient point

21 p3839 A69-39197

Cylindrical shell stability during loading by uniform external pressure represented by Fourier series, determining critical pressure by solving nonlinear equations

21 p3846 A69-39715

Postbuckling of filled circular cylindrical shell using Ritz energy method for load deformation relation, discussing stabilizing effect of core

22 p4038 A69-39895

Load transfer to sheet metal plate from bonded strip axially loaded by single force, assuming linear viscoelastic adhesive layer

22 p4038 A69-39896

Cosserat theory on couple stresses applied to stress distribution in semiinfinite plate, using Fourier transform method

22 p4038 A69-39902

Strain anisotropy matrix construction for various strain anisotropies from elastic properties of expression relating stress and elastic strain deviators

22 p4039 A69-39915

Momentless orthotropic spherical shell of variable thickness stress analyzed, assuming large deformations under uniform axisymmetric load distribution

22 p4039 A69-39916

Elastoplastic analysis of thin plates deformation, discussing loading conditions effects

22 p4041 A69-40064

Stress analysis fundamental equation for variable thickness plate under concentrated load, using two dimensional Dirac delta function

22 p4041 A69-40144

Stress distribution on surface of stator vane loaded statically as cantilever derived by brittle coatings, strain gages and three dimensional photoelasticity

22 p4042 A69-40310

Dynamic stability of circular isotropic plate with central hole subjected to torsional moment uniformly distributed over both edges by equilibrium equation

22 p4043 A69-40455

Solid viscosities effects on dynamic load factors of hollow sphere subjected to uniformly distributed impulsive loads, using three element model

22 p4044 A69-40598

Wrinkling of pressurized cylindrical and conical fixed free membrane column under lateral load, considering membrane sheets elastic properties

22 p4045 A69-40814

Photoelastic technique of stress-freezing and slicing to determine bending stresses in transversely loaded plate supported at corners

22 p4045 A69-40900

Meridional crack problem for cylindrical and spherical shells solved for uniform membrane load and bending moment, obtaining stress intensity components

22 p4046 A69-41041

Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges

22 p4046 A69-41061

Pressure loads and balancing force determination in kinematic pairs of link gear of landing mechanism

23 p4062 A69-41415

External load distribution in bracket between bolts and joint, verifying Reshetov mounting bolt formulas

23 p4168 A69-41417

Statics of axisymmetric deformation of cylindrical and conical shells of revolution of moderate thickness under uniformly and nonuniformly distributed loads

23 p4226 A69-41705

Stress analysis of cylindrical tubes under torsional and transverse static loads based on vibrational theory, applied to rectangular cantilever tube

23 p4228 A69-41916

Plates and shells under concentrated loads, analyzing stress-strain state

23 p4228 A69-41986

Rib cross sections distribution for cylindrical shell under concentrated longitudinal forces obtainable by designing for minimum strain energy

23 p4228 A69-41988

Tilttable conventional radio telescopes possibilities of passing gravitational limit for diameter and shortest wavelength, discussing dead load

23 p4231 A69-42138

Field transfer matrices for simultaneous treatment of free and forced vibrations and buckling through axially loaded Timoshenko beam

23 p4234 A69-42400

Plane problem of infinite strip weakened by crack, determining crack form under uniformly distributed tensile loads applied to edges

24 p4395 A69-42592

Local stress distribution in cylindrical shells at concentrated load area solved by shallow shell theory
24 p4395 A69-42593

Structural materials deformation response to loading conditions and stress or strain cycle analysis to predict failure, including creep and stress relaxation
24 p4398 A69-42771

Single series solution for rectangular plate deflection under arbitrarily located concentrated load, considering monolithic slab beam connection case
24 p4404 A69-43593

Crack propagation in plate with stiffening ribs /riveted stringers/ under concentrated and tensile loads, determining rivet points displacements
24 p4406 A69-43709

LOAD FACTORS

U LOADS [FORCES]

LOAD TESTING MACHINES

Low speed four-ball lubricating oil testing machine eliminating thermal effects associated with frictional heating for load carrying capacities of thin lubricant films
07 p1140 A69-18968

Analytical method for designing pressure circular bearings verified by experiments concerning loading capacity
16 p2792 A69-31560

Tension-torsion-compression load testing machine of technological possibilities and accuracy [ONERA-TP-596]
17 p2945 A69-33065

LOAD TESTS

Europe 1 carrier rocket prelaunch wind load calculations as base for launch or delay decision
01 p0160 A69-10032

Off-axis test for hard orthotropic composite materials, discussing fixture design to reduce shear coupling effect
01 p0103 A69-11273

Harmonic oscillations in tunnel diode circuits for three intersection points of loadline with characteristic curve, discussing larger total positive circuit resistance case
06 p0898 A69-17801

Static endurance of aircraft structural elements under single and multiple loading, based on real alloys and crystalline materials theories
07 p1231 A69-18554

Yield points compared for axial and biaxial tensile loading of aluminum alloy sheets
10 p1801 A69-23849

Compact device for low temperature neutron irradiation of deformed specimens under tensile stress, emphasizing specimen carrier
11 p1862 A69-24901

Rod load capacity changes due to random overloads constituting upper limit of stress probability distribution density function used in programmed fatigue tests
11 p1985 A69-25180

Trident 2E and 3B structural design and fail- safe tests, noting difference in fuselage length
13 p2202 A69-27972

Design and test criteria for dynamically loaded structures from various viewpoints, discussing statistical variations, load strength and limitations
15 p2618 A69-30368

Saturn 5 boost phase environment simulation on Apollo stages, discussing fixtures, load devices, instrumentation and ground test
15 p2588 A69-30405

Sealing mechanism theory with face seal applications, taking into account load carrying capacity and no leakage pressure gradient [ASLE FICFS PREPRINT 18]
15 p2620 A69-30489

Clamped circular plates impulse load tests with sheet explosives, showing finite difference program for computing large deflection dynamic response
15 p2709 A69-30675

Aluminum models of single cell simply supported folded plates to study instability phenomena possibly occurring in actual structure
15 p2709 A69-30679

Fatigue life estimation for irregularly varying loads with emphasis on ground-air-ground stress cycles in aircraft
17 p3052 A69-32977

Moire reflection technique applied to study of stress-strain state of partially clamped rectangular cantilever plates under various loads
17 p3058 A69-33203

Fatigue test loading spectra calculation methods, discussing helicopter rotating and nonrotating components tests [AHS PAPER 373]
17 p2945 A69-33515

Load capacities of graphite lined journal bearings, discussing factors affecting wear rates [SAWE PAPER 68-LC-9]
18 p3148 A69-35002

WC-Co alloys structural changes under loads near yield limit, noting formation of slip bands
18 p3158 A69-35261

Structural design optimization based on reliability analysis stressing proof-load test and weight savings consideration under cost constraint
19 p3437 A69-36033

Simply supported rectangular plates experiments showing prediction on buckling load
19 p3447 A69-36854

Anisotropy coefficients obtained during annealed Al sheet tests based on stress-strain characteristics, noting fading memory effects
19 p3447 A69-36857

Cage and roller slip in high speed roller bearings over steady radial loads by measurement and theory
20 p3547 A69-37066

Vestibulometric tests for flight surgeon appraisal of applicants in flying profession, comparing Coriolis forces cumulative load tests with conventional tests
20 p3481 A69-37278

Experimental facility for studying heat conductivity of multicontact metallic and nonmetallic materials /plates/ in vacuum at low temperatures under various loads
21 p3721 A69-38639

Estimation of program fatigue life curves from equivalent load program using Miner law
21 p3846 A69-39810

LOADING

Helical and log conical helical antenna width reduction by loading of traveling wave antenna elements with isotropic material
11 p1852 A69-25315

LOADING FORCES

U LOADS [FORCES]

LOADING MOMENTS

Concentrated loads in elastic Cosserat continuum involving body moments and small deformations
10 p1799 A69-23151

Weak moment shells made from materials with different elastic moduli, developing theory based on undeformable normals
18 p3225 A69-35367

Complex representation of strain and displacement state in spherical shell using membrane theory, deriving shear forces resulting from single moment loading
21 p3831 A69-38416

LOADING OPERATIONS

Order-disorder transformations in nickel alloys under loading operations
11 p1904 A69-24706

Airport planning for large aircraft loading of passengers, baggage and cargo containers
17 p2948 A69-34208

Aircraft design determined by airport environment and facilities defined as pavement strength, passenger and baggage loading and aircraft handling, noting noise abatement
17 p2948 A69-34209

Technical problems in converting long service civil aircraft to obtain more volume, easier loading access or greater flexibility
20 p3461 A69-36919

Jumbo jet passenger loading devices including overwing bridges, transporters and terminal integration
20 p3511 A69-37916

Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
20 p3511 A69-38181

LOADING RATE

Fatigue endurance of structural elements determined from stress rupture strength under high and low loading rates
04 p0673 A69-14536

Plastic deformation in bcc, fcc and hcp metals as function of initial impact load energy, noting strain hardening effects
07 p1166 A69-19144

Loading rate effects on fracture energy in carboxy terminated liquid Hycar toughened cantilever cleaved epoxy resin
08 p1338 A69-20491

Reliability of individual components of multicomponent systems under variable loads, using asymptotic distribution of minimal values
08 p1322 A69-21103

Heat release in combustion chambers of propulsion and lift engines considering various parameters of materials and design problems
09 p1625 A69-22619

Progressive accelerated fatigue testing for reliability in determining fatigue limits
10 p1800 A69-23349

Deformation rates effect on failure of cast aluminum alloys under various loading rates for tension and compression
21 p3746 A69-38958

Loading rate effects on fracture characteristics of unidirectional fiber reinforced materials, discussing fiber-resin interface strength
22 p3974 A69-41212

Plane strain fracture toughness of S-200 grade Be for 77-533 K temperature range, noting effects of loading, heat treatment and neutron irradiation
23 p4178 A69-42450

LOADING WAVES

NT WING LOADING

Hollow rolling elements for reducing centrifugal load on high performance bearings, discussing production, fatigue life, etc
01 p0085 A69-10294

Crack growth in ceramics from velocity measurements on glass and sapphire as function of applied force, temperature and moisture environment
01 p0101 A69-10767

Handbook on fatigue properties for product design covering metals stress conditions, machine parts load and stress determination, cyclic stress, etc
01 p0170 A69-10918

Uniqueness formulation of concentrated load problem in linear theory of couple-stress elasticity
02 p0338 A69-11720

Limit load analysis of three dimensional rigid perfectly plastic continua by approximate variational method
02 p0338 A69-11721

Ti for high temperature use in supersonic aircraft, noting compressibility limit on maneuvering load factor and cooling by H
02 p0192 A69-11891

Dispersion equation for two dimensional periodic slow wave structure formed by periodically sequential loading
03 p0407 A69-13981

Photoelastic analysis of HF stress waves propagating in bars and plates subjected to damped sinusoidal loading [ASME PAPER 68-WA/APM-27]
04 p0669 A69-14397

Two point boundary value problems for determining buckling behavior of two hinged circular arches [ASME PAPER 68-WA/APM-18]
04 p0669 A69-14399

Thin cantilevered plate theory extended to large in-extensional deflections to account for geometry changes in bending moments [ASME PAPER 68-APM/BB]
04 p0670 A69-14401

Plates yield point loads limit determination formulated as mathematical programming problem, using finite element representations for velocity and moment fields [ASME PAPER 68-WA/APM-21]
04 p0670 A69-14405

Legendre transformation application to plane elastoplastic loading waves, examining shock front formation in interaction region
04 p0673 A69-14495

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens

04 p0614 A69-14573

Turbine blade loading in terms of surface diffusion and loading factors, discussing tandem and jet flap blades and vortex generators
[ASME PAPER 68-WA/GT-11]

05 p0812 A69-16136

Transistorized frequency detector for sensing system load changes affects speeds of control valves of prime movers

06 p0896 A69-17478

Dynamic stability of systems with distributed parameters subjected to parametric loading, considering parametrically excited systems with infinite degrees of freedom

07 p1231 A69-18502

Accuracy of deformation theory in case of simple loading, analyzing external forces under conditions not satisfying loading theorem

07 p1237 A69-19684

Minimum weight analysis of Michell trusses transmitting given load to bars within allowable range of axial stress

08 p1410 A69-19893

Optimization of plane smooth rectangular panels of constant cross section subjected to loading and heating conditions

08 p1417 A69-20821

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis

08 p1328 A69-21190

Holonomous and sclerononomous dynamic systems steady state motion stability under effect of generalized forces derived on basis of Liapunov theory

10 p1724 A69-22929

Deformation of thermoplastics under tensile loading, discussing types of loading

10 p1716 A69-22942

Stress concentration in isotropic plates weakened by curvilinear holes subjected to loading at infinity, noting curvature at corner points of holes

11 p1972 A69-24655

Plastic analysis of shallow spherical rigid plastic shell, using shell deflection equations to establish load-deflection relationship

11 p1980 A69-24823

Elastic two cavity revolving hyperboloid deformation by arbitrary forces solved by spherical functions

11 p1984 A69-25169

Electric analogy technique for torsion and flexure functions of uniform beams with terminal loads, considering Neumann boundary value problem

11 p1995 A69-25649

Hydraulic servo actuators load effect included in control loop actuator simulation

12 p2016 A69-26266

Dynamic response of imperfect circular cylinder to constant velocity load, noting applicability of Hoff nonlinear equation for dynamic buckling of columns

13 p2359 A69-27260

Load carrying capacity and friction calculated for pivoted pad journal bearings for machine design use
[ASME PAPER 68-LUBS-27]

13 p2266 A69-27275

Thermal and mechanical stability of fused silica lightweight mirror structures, examining impact and shear strengths of fused joints

13 p2261 A69-27954

Load factor role in nonequilibrium ionization process in Faraday-type generator, determining relationship with conductivity

13 p2314 A69-28361

MOS unitoron switching circuit operation subjected to nonlinear load, using analytic approximations of current-voltage characteristics

13 p2234 A69-28507

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens

15 p2638 A69-30274

Expression derived for arbitrary system subjected to external loading, using Cauchy equations for relationship between external plane forces and internal stresses

15 p2713 A69-31018

Bending theory for two layer plate made of isotropic material under sinusoidal load obtained by elasticity and classical theory based methods

15 p2714 A69-31198

Full stress design feasibility as function of load conditions, indeterminacy order and structure topology

16 p2872 A69-31915

Loading path criterion for total strain /deformation/ plasticity theory based on Sanders loading function, discussing case of thermally loaded bar

17 p3062 A69-33711

Muscle power output relation to imposed load modified to accommodate inverse relationship between generated force and contraction speed for determining maximum strength

17 p2916 A69-34011

Flexure functions of triangular sections under terminal loads, using electric analogy to study function effect on section shape and material Poisson ratio

17 p3066 A69-34050

Nonlinear partial differential equations solutions in theory of thin elastic spherical shells subjected to temperature fields and external loading

17 p3067 A69-34147

Growth rate of stability loss intrinsic modes in elastic shells under severe load, discussing stress distribution during buckling

18 p3217 A69-34598

Positive Gaussian curvature shell under concentrated forces, analyzing stresses and strains relation to load distance using Thompson and Legendre functions

18 p3218 A69-34601

Plastics behavior under loading and performance prediction, considering engineering design applications

18 p3161 A69-34609

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis

18 p3152 A69-35159

Transient processes of strain wave propagation in elastic shells and plates under time varying loads

18 p3224 A69-35321

Limiting equilibrium stress state of unbounded brittle body with elliptical crack under monotonically increasing tensile or compression load, noting influence of crack curvature

19 p3441 A69-36745

Equations of deformation for elastoviscoplastic bodies with different properties under loading and unloading conditions

19 p3445 A69-36812

Turbine rotors load dependent unstable motions, considering exciting forces origins, external and internal damping, etc

20 p3628 A69-37918

Cutting tools measured as function of cutting rate and cutting tool geometry during boring of Cr-Ni steel pipe blanks

21 p3731 A69-38878

Spring mass nonlinear systems under constant force excitation, studying step function responses of systems with various restoring force characteristics

21 p3836 A69-38985

Strain rate-load relations in elastoplastic shells reaching yield point, discussing variational method applicability

21 p3838 A69-39189

Automatic structural analysis by matrix force method, giving diagrams of load paths, equilibrium sequence and flow chart

21 p3843 A69-39311

Film thickness and normal load effect in thin films solid friction, noting dependence on deformation at contact

22 p3955 A69-40407

Strain gage and mechanical types of load-determining bolts selected on basis of application requirements and installation costs

22 p3957 A69-40829

Elasticity boundary value problems solution based on equilibrating method and differential equation

22 p4046 A69-40967

Pairs existence of symmetrical equilibrium forms in nonlinear shallow shell under load made applicable to nonshallow shells equilibrium

22 p4047 A69-41062

Time averaged and fluctuating wind load effects on large radio telescope structures, discussing wind shear and turbulence influence on steady and unsteady loading

23 p4230 A69-42125

Stressed state of thin plate with circular hole under normal and breaking force applied over hole perimeter

23 p4233 A69-42341

Stress concentration in shallow spherical perforated shell under loads, reducing boundary value problem to infinite algebraic equations solution

23 p4233 A69-42342

Time independent interaction surface bounds to shells shakedown domain obtained for multiparameter loadings

24 p4396 A69-42732

LOCALIZATION

U POSITION [LOCATION]

LOCATION

U POSITION [LOCATION]

LOCI

Control system analysis and synthesis by means of generalized root-locus method on digital computer

07 p1114 A69-18291

Time optimal control of soft spring showing switching locus changes

24 p4289 A69-42955

LOCKHEED AIRCRAFT

NT C-5 AIRCRAFT

NT C-130 AIRCRAFT

NT C-141 AIRCRAFT

NT F-104 AIRCRAFT

NT L-1011 AIRCRAFT

NT XH-51 HELICOPTER

NT XV-4 AIRCRAFT

Lockheed 1011 Tristar with three turbofan engines for large capacity medium range service, noting configuration, aerodynamics, structure and cutaway drawings

08 p1255 A69-21143

YF-12A interceptor aircraft development and testing, discussing titanium alloys application, aerodynamics and thermodynamics, escape systems for high speed and altitude tests

[AIAA PAPER 69-757] 19 p3245 A69-35652

Lockheed 1011 propulsion system design relating to system and component maintainability, reliability, performance and noise

[SAE PAPER 690390] 23 p4201 A69-41665

LOCKHEED CL-595 HELICOPTER

U XH-51 HELICOPTER

LOCKHEED MILITARY AIRCRAFT

U MILITARY AIRCRAFT

LOCKHEED XV-4A AIRCRAFT

U XV-4 AIRCRAFT

LOCKHEED 186 HELICOPTER

U XH-51 HELICOPTER

LOCKING

Lock-on characteristics of automatic tracking systems evaluated for case of variable vector signal, calculating transient response

11 p1861 A69-25716

LOCOMOTION

NT ASTRONAUT LOCOMOTION

NT WALKING

Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships

15 p2556 A69-31336

Rats locomotion in centrifugally generated gravity fields determined for in-space behavioral studies of earth organisms gravity requirements

19 p3263 A69-36457

Cell interactions and motions correlation for animal locomotion

21 p3662 A69-39708

LOG PERIODIC ANTENNAS

Helical log periodic and log periodic dipole arrays impedance and radiation patterns measurements have similar characteristics

02 p0219 A69-12337

Extensive air shower radio pulse polarization, using log periodic EW- and NS-arm antennas

04 p0595 A69-15425

Log-periodic circuits for application to microwave amplifiers in antenna design, noting bandwidth

05 p0739 A69-16554

Phasing of active region of log-periodic array antennas by modulated impedance feeders, discussing monopole and slot arrays

08 p1281 A69-20015

Log periodic antenna with vertically polarized omnidirectional radiation constant over bandwidth

08 p1281 A69-20033

Backfire log periodic cavity-backed slot array, giving H plane power patterns with near field plots along array

08 p1281 A69-20035

Space frequency filter antennas, using multiple terminals for signal processing as function of frequency and angle

08 p1290 A69-20977

Radiation field of log periodic dipole array calculated as function of observation point and dipole currents

10 p1664 A69-23802

Log periodic dipole array antennas simulated with simple RLC circuit loading uniform transmission line

11 p1850 A69-24977

Vertically polarized log periodic antenna consisting of unipole vertical radiators with side radiators for achieving minimum size
16 p2763 A69-32580

Deployable cross log periodic dipole /LPD/ array on conducting cone as potential application to spacecraft or missile requiring frequency independence in VHF-UHF band
22 p3913 A69-40693

LOG SPIRAL ANTENNAS

Electromagnetic multipole left- and right-hand circularly polarized modal fields for multiarm log spiral antennas, discussing current distributions, multipole coefficients and field patterns
08 p1281 A69-20018

Dispersion and coupling impedance of logarithmic spiral resting on anisotropic magnetodielectric layer for microwave devices design
13 p2235 A69-28512

Monograph on radiation zones and phase center of two arm conical logarithmic spiral antenna covering wideband design, near field measurements and far field integration
17 p2937 A69-33572

Asymmetric surface waves in radial spiral structures above conducting plane, analyzing spiral thickness and plane influence on dispersion and energy characteristics
22 p3916 A69-40951

LOGARITHMIC RECEIVERS

Reflected radar signal random fluctuations suppressed by using antenna, receiving channels and logarithmic amplifiers
04 p0556 A69-14490

Logarithmic amplifiers amplitude characteristics accuracy obtained by gain variations or successive summation of voltages, plotting curves illustrating error variations vs gain
15 p2574 A69-30128

Noise parameters at output of logarithmic detector separating two AM signals with overlapping spectra
15 p2564 A69-30148

LOGARITHMS

Iterated logarithm law proved for class of stationary series extended to systems of dependent random variables with complete couplings
11 p1910 A69-25699

LOGIC

Majority logic decoding of Euclidean or projective geometry codes in two steps
06 p0891 A69-17867

Sensory and logic behavior model of sequence selection based on received information, considering perception, sense, desire, concept and criteria levels
23 p4109 A69-41976

LOGIC CIRCUITS

NT THRESHOLD GATES

Monolithic sense amplifier for laminated-ferrite memories including provision for strobing, detecting, pulse forming and internal inversion logic using thermal feedback control
01 p0039 A69-10174

Gunn effect application in fast logic circuit devices including comparators, adder and shift register circuits
01 p0042 A69-10438

Universal NOR element design with resistors, determining permissible combinations for static mode of operation by computer method
01 p0037 A69-10746

Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
01 p0047 A69-11000

Full multiplier design based on stable iterative array cells interconnected to provide logical functions, noting capabilities for binary numbers
01 p0048 A69-11138

Fluid logic circuits miniaturization for flow in straight and curved channels of various cross sections
02 p0196 A69-12084

Variable time delay achievement in fluid logic circuits based on Coanda effect devices
02 p0196 A69-12085

Noise susceptibility of integrated circuits in digital systems, discussing sources and specifications
03 p0410 A69-13579

CASSANDRE programming language for digital systems, noting application to logic systems
03 p0401 A69-14179

Comparison of electric, electronic and fluidic logic circuits
04 p0583 A69-15083

Transistor-transistor logic switching circuits design for use in frequency dividers with variable division ratios in frequency processing systems
05 p0729 A69-15963

Requirements for analysis and synthesis of diagnostic tests for detecting faults in combinational logic circuit
06 p0892 A69-17408

Closed loop time optimal control achieved by exploiting generalization properties of threshold logic networks
[AIAA PAPER 69-77] 06 p0905 A69-18092

Gunn effect diodes application to ultrafast pulse electronic circuitry for computer logic
07 p1089 A69-18244

Self organizing trainable logical networks /TLN/ as stable controllers in multiaxis vehicle control problem, reviewing TLN concepts and training theory
07 p1070 A69-18388

Gunn effect pulse devices with resistive loading, discussing logic, circuits and low power consumption
07 p1097 A69-18453

Two signal four quadrant multiplier design having subnanosecond response
07 p1103 A69-18879

Logic circuit for semiconductor current gain sensing switch
07 p1113 A69-19744

MOS technology developments for higher speeds in logic circuits
07 p1113 A69-19765

Gunn effect memory loop in pulse diodes consisting of two Gunn diodes connected in series
08 p1279 A69-19912

Computer aided design methods for electronics and logic systems, noting linear circuits and one dimensional transistors
08 p1278 A69-19970

MOS transistor logic circuit performance optimization through component geometry and feed voltage
08 p1280 A69-19977

Nonlinear feedback shift register circuit design by logical sequences
08 p1298 A69-20835

Pure fluid amplifying logic and energy converting elements, discussing parameters, characteristics and working principles
[AGARDOGRAPH-118] 08 p1257 A69-20951

Peripheral fluidic devices for sequencing and monitoring machinery in hazardous areas, describing circuits
[AGARDOGRAPH-118] 08 p1257 A69-20954

Ultrahigh speed systems and logic circuits specifications implementation into electrical design, discussing circuit selection, line propagation delays, noise margins and temperature effects
[AGARDOGRAPH-114] 08 p1298 A69-20985

Catastrophic failures in logic circuit and system design, considering thermal effects, complexity, statistical methods and computer use
08 p1299 A69-21107

Cesium microthruster system using beam deflection for satellite control, describing ion engine subsystem and control logic/power conditioner subsystem
[AIAA PAPER 69-292] 09 p1569 A69-21875

Engine usage indicator to cumulate small gas turbine engine exposure to certain deterioration, presenting circuit logic block diagram
[ASME PAPER 69-GT-69] 09 p1572 A69-22519

Analog multiplier with controlled current splitting devices and feedback technique for stabilization of transfer characteristics, noting implementation in bipolar transistor
09 p1475 A69-22584

Suboptimum decision feedback communications systems incorporating simple digital processing compared with optimum Wald scheme
10 p1656 A69-23534

Wall attachment phenomenon /Coanda effect/ basis for jet elements in digital and/or pulse-mode systems
10 p1638 A69-23553

Associative holographic memories, discussing recall systems, logic circuits, etc
10 p1697 A69-23868

Solid logic technology /SLT/ computer circuits, discussing IBM 360 computer reliability, failure analysis information retrieval, SLT module and failure rate
11 p1843 A69-24341

Digital logic techniques for high speed satellite communications, noting general purpose logic cards
12 p2040 A69-26465

Lower bound for time required for group multiplication by logic circuits, using modified Winograd method for Abelian group
12 p2034 A69-26752

Logic family with low power consumption subjected to 1 Mev electrons analyzed within telemetry circuit concept for space application
15 p2625 A69-30830

Third generation computer reliability including preparation and test of integrated logic circuits
15 p2626 A69-30832

Arbitrary single gate failures diagnosis in combinational logic circuits not requiring fault table construction
15 p2583 A69-31112

Logic circuits abstract synthesis for detecting signals against noise background using known conditional quantized signal distributions
16 p2749 A69-31627

Computer aided design of machines with custom LSI arrays, describing error detection procedures and MOS logic circuits
17 p2942 A69-34121

Analytical, graphical and graph-analytical methods for synthesis of passive circuits ensuring air removal from chambers of pneumatic logic control and servomechanisms
18 p3093 A69-34831

Pneumatic control circuits design based on logic functions and truth tables, noting fluid logic application
19 p3256 A69-36714

Book on digital magnetic logic, considering digital magnetic core circuits consisting of magnetic components and interconnecting conductors
20 p3498 A69-37144

Photon actuated switch consisting of 10 input binary logic gate and solid state relay to reduce aerospace vehicles self generated noise
20 p3505 A69-37289

Current mode gates and flip-flops with subnanosecond propagation delay for integrated logic circuits, discussing memories dimensions, LSI arrays, etc
20 p3505 A69-37342

Integrated logic circuits assembly for digital computers, considering high density, mechanical environment, reliability, accessibility and costs
20 p3505 A69-37401

Multistable logic circuitry with 10 stability levels based on phased pulse principle, noting efficiency and complexity in man machine interface
21 p3686 A69-39065

Electromagnetic interference /EMI/ characteristics of various digital logic ICs
23 p4141 A69-42219

Logic networks of Boolean analogs analyzed by algebraic signal flow theory, introducing variational derivative for test detection in combinational and sequential networks
[AAS PAPER 69-236] 24 p4288 A69-42811

Hybrid techniques to produce thin and thick film microcircuits and logic system parameters
24 p4286 A69-42906

Integrated TTL flip-flop circuits, describing functional principles of circuits with DC and capacitive coupling
24 p4287 A69-43130

LOGIC DESIGN

Book on error detecting logic for digital computers covering error detection codes, logic circuits, checkers in data paths, etc
02 p0212 A69-11453

Comparison of electric, electronic and fluidic logic circuits
04 p0583 A69-15083

Device and logic/system designers and design aids interaction, emphasizing engineering trends in large scale integration area using MOS arrays
04 p0568 A69-15356

Digital nth order phase locked loop for FM demodulation
04 p0561 A69-15452

Predictive logic control of on-off system with one position sensor
[ASME PAPER 68-WA/AUT-14] 05 p0830 A69-16134

Digital controller weighting function sectionalization to simplify logic in developing adaptive control system
05 p0739 A69-16386

Computer aided design methods for electronics and logic systems, noting linear circuits and one dimensional transistors
08 p1278 A69-19970

Multistable logic circuitry with 10 stability levels based on phased pulse principle, noting efficiency and complexity in man machine interface
21 p3686 A69-39065

Computer organization design employing distributed processor to provide general purpose computing while taking advantage of large scale integration
21 p3856 A69-39133

Computer memory reduction through Fortran higher level language, discussing tradeoff between costs saved and additional logic hardware
[AIAA PAPER 69-963] 22 p3905 A69-40344

Digital data systems fault detection and isolation, describing diagnostic programs and hardware
[AIAA PAPER 69-967] 22 p3906 A69-40348

CRT display system coupling interface with magnetic storage determined from algorithms and time diagrams, describing character storage and system logic design
22 p3908 A69-40936

Fluidic amplifiers development and logic applications, describing various elements and circuits
22 p3870 A69-41239

Fluid logic feedback control circuit synthesis using synthesis table, describing procedure to assign memory valves and switching signals
24 p4292 A69-43290

LOGICAL ELEMENTS

Universal NOR element design with resistors, determining permissible combinations for static mode of operation by computer method
01 p0037 A69-10746

Pneumatic elements, discussing development from process control via modules systems to logic elements and fluid sensors
02 p0197 A69-12795

Large scale integration and batch-fabricated processing of logic and storage elements for fourth generation computer, discussing partitioning design
04 p0567 A69-15355

Chronological development and future trends in high speed logic and memory hardware technology and implementation
04 p0569 A69-15366

Pure fluid amplifying logic and energy converting elements, discussing parameters, characteristics and working principles
[AGARDOGRAPH-118] 08 p1257 A69-20951

Large scale integrated circuit accumulator chip as control element for design of digital system by design automated techniques
12 p2037 A69-25942

Self adaptive system for recognition of dynamic shapes, discussing self structuring by learning, incomplete pattern recognition, logic element network, etc
12 p2054 A69-27080

Microwave interferometer with digital-logic elements for phase shift measurements in pulsed plasmas without frequency range limitations
14 p2452 A69-29802

Counter for decimal counting and numeric display applications using integrated fluid logic elements
15 p2616 A69-31295

Fluidic logic elements using suction to influence main jet, outlining operation principles
16 p2736 A69-31835

Aircraft solid state electric system logic level tested functionally by built-in test equipment (BITE) operated on ground during preflight tests
17 p2977 A69-34110

Tristable fluid amplifiers, analyzing J functions of staticized variable, ternary logical characteristics, input equations, flow stability and switching measurements
24 p4255 A69-43298

LOGISTICS

NT LUNAR LOGISTICS

NT SPACE LOGISTICS

Helicopters and fixed wing STOL and VTOL aircraft for intertheater military logistics transportation, discussing C-5A role in 1970s
07 p1053 A69-19177

Simulation to correlate integrated logistic support recommendations for dynamic analysis of planned logistic network
10 p1668 A69-22975

Model simulation in program planning for space station with emphasis on accommodation of logistics
10 p1669 A69-22976

On job training of logistic publications engineers, emphasizing technical publications and system engineering and development for Minuteman program
10 p1811 A69-22977

Integrated Logistics Support (ILS) cost effectiveness, discussing management of systems elements in addition to prime equipment including computer programs, training, maintenance, etc
15 p2722 A69-31126

Development, manufacturing and logistic costs of reliability improvement in electronic equipment design
18 p3231 A69-34485

Ballistic missile and aircraft operational effectiveness, discussing data collection, reliability, availability and capability surveillance by computer
18 p3145 A69-34500

Maintainability and maintenance analysis in managing integrated logistic support (ILS) system
19 p3455 A69-36035

C-5 air force logistic transport, discussing structural design, configuration, payload, aerodynamics and flight testing
[AIAA PAPER 69-758] 19 p3248 A69-36295

Logistics management developed for Apollo Applications Program of NASA Manned Spacecraft Center [AAS PAPER 69-204] 24 p4417 A69-42812

LOH HELICOPTER

U OH-6 HELICOPTER

LONG RANGE NAVIGATION

U LORAN

LONG RANGE WEATHER FORECASTING

Satellites role in observing and forecasting global atmospheric behavior, discussing World Weather Watch and Global Atmospheric Research Program
06 p0916 A69-16854

Eole program to further data acquisition for climatology and weather forecasting
[UN PAPER 68-95831] 06 p0950 A69-17073

Long range prediction of zonal westerlies based on lunar cycles or quasi-biennial oscillations, considering aliasing problem
07 p1175 A69-18945

Long range weather forecasts attempt from relation between northern Atlantic Ocean water temperature anomaly and monthly satellite cloud data changes
20 p3569 A69-36987

Weather prediction, considering mathematical and empirical procedures, computer applications, atmospheric instability, etc
21 p3757 A69-38324

Soviet book on synoptic climatological and heliogeophysical long term weather forecasts, discussing monthly and seasonal anomalies, sun-earth interrelations, solar corpuscular elements, etc
21 p3759 A69-39523

LONG TERM EFFECTS

Atmospheric model development relating temperature, density, moisture and energy measurements from satellite observations for long term weather forecasting
[UN PAPER 68-95397] 01 p0108 A69-10463

Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results
01 p0077 A69-11237

Secular perturbations produced by comet belt beyond Neptune on orbits of periodic comets of large aphelion
01 p0158 A69-11327

Long term creep characteristics of metal structures from short duration relaxation tests, summarizing data on rheologically stable materials
[ONERA-TP-639] 02 p0337 A69-11626

Automatic bioprobe life support system for long duration interplanetary space flight, discussing blood leech as suitable research animal
02 p0199 A69-11828

Quasi-biennial oscillation in tropical stratosphere as result of long period gravity waves interaction with zonal wind
03 p0461 A69-13342

Cylindrical wave approximation modified to include axial effects, discussing time histories of deflection and applicability range
04 p0671 A69-14410

Long term electrochemical oxidation performance of n-octane based fuels containing aromatic, olefinic and naphthenic components
[ACS PAPER 94] 05 p0716 A69-16235

Permissible radiation doses for extended space missions, discussing clinical tests on dogs
05 p0708 A69-16508

Orthostatic intolerance, with assessment of circulatory problem of weightlessness in prolonged space flight
06 p0873 A69-17016

Leisure time and recreation facilities during long duration space missions, discussing astronaut selection procedure, active recreation, passive enjoyment and exercise programs
06 p0880 A69-17209

Dogs blood coagulation system functional state after 22 day space flight onboard Cosmos 110
08 p1262 A69-19830

Long term modulation of cosmic rays by solar activity explained by Parker solar wind model, noting confirmation by direct satellite measurements
08 p1379 A69-20533

Long time physiological effects of rotating systems, surveying acceleration effects and rotation experiments on humans and rats
08 p1265 A69-21183

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys
09 p1485 A69-21534

Total planet interaction energy of comets passing through solar system, showing non-Gaussian shape of distribution
10 p1774 A69-22970

Barbamy effect with and without somatotrophic hormone injection in mice during prolonged isolation and hypokinesia, noting sleep duration
10 p1646 A69-23576

Secular perturbations of remote satellites within lunar gravitation field, comparing observations and analytical data
10 p1779 A69-23614

Deimos and Phobos mutual secular perturbations from calculated masses and orbital elements, using canonical systems of equations
10 p1780 A69-23615

Various glacial periods mechanism ascribed to combination of long term solar activity cycle and polar migration
11 p1877 A69-24409

Drift velocity of earth magnetic field based on spherical harmonic analysis of geomagnetic secular variation
12 p0777 A69-27111

Nickel base superalloys long time carbide and intermetallic phases stability at high temperatures
13 p2277 A69-27405

Earth mantle and core friction interaction suggested as cause of secular change in orbital motion obliquity
13 p2253 A69-27821

Secular instability of steadily rotating stars, analyzing meridional motions in radiation zones by linear perturbation theory
13 p2354 A69-28566

Closed life support systems tests, describing effects of long term /one year/ confinement of three human subjects
13 p2216 A69-28612

Pharmacology for long term manned space flights
13 p2211 A69-28613

Geomagnetic field secular variations relation to variations of magnetic field of optimum dipoles, noting earth core role
14 p2436 A69-29061

Lacerta OB 1 B spectroscopic binaries periods and orbital elements, noting limits for secular variation
14 p2519 A69-29137

Secular terms for parallel component of electric current parallel to permanent magnetic field in toroidal MHD oscillations
14 p2492 A69-29369

First order secular and aperiodic perturbations in Keplerian orbital elements of synchronous satellite due to earth gravitational field eccentricity
14 p2521 A69-29466

Secular fluctuations of atmospheric circulation over Northern Hemisphere analyzed using isobaric and composite-kinematic surface maps, discussing analogies with Southern Hemisphere
14 p2478 A69-29836

Secular decline in absolute brightness of comet Encke from photometric curves obtained during past and present century
15 p2684 A69-30518

Transient and long lasting space environment stresses, discussing accelerations, vibrations, shocks, rapid descent in vacuum, temperature variations, gravity, etc
15 p2625 A69-30824

Aluminum alloys high temperature creep effects distinguished from effects of long period at high temperature, discussing tensile test data and deformation-time curves
16 p2800 A69-31781

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys
16 p2783 A69-32529

Cosmic ray electron spectrum data obtained by balloon flights, showing electron flux reduction above 500 Mev with increasing solar activity
16 p2851 A69-32566

Long range perturbations of satellites and asteroids with arbitrary inclination and eccentricity, illustrating motion around moon, oblate and spherical planets using energy integral
17 p3031 A69-33098

Vacuum and thermal environment long term influence on thermal resistance for Mg to aluminum and Mg to Mg bolted joints
[AIAA PAPER 69-628] 17 p3073 A69-33309

Permissible radiation doses for extended space missions, discussing clinical tests on dogs
18 p3095 A69-34727

Cowell equations modified for exact integration of pure Keplerian orbits, considering secular effects
18 p3165 A69-34842

Upper limit of solar oblateness determined from secular stability of differential rotation during evolution
18 p3202 A69-35214

Long term stability of orthotropic cylindrical shells under transverse shear stresses, calculating critical stress using Kirchhoff-Love model
18 p3225 A69-35357

Long term creep rupture data based on short term tests in form of Larson-Miller time-temperature curves
18 p3150 A69-35422

Materials evaluation for devices with long term underground exposure, including field tests at tropical locations
19 p3321 A69-35568

Modified Monte Carlo model applied to computerized meteorite orbit evolution, simulating secular perturbations by imposing sinusoidal variation on orbital elements
19 p3414 A69-36117

Geomagnetic field total vector modulus secular variations from airborne measurements
20 p3522 A69-37061

Oxygen supply and carbon dioxide absorption in long term life support systems, noting energy balances comparison of ecological systems
20 p3477 A69-37625

Gravitational constant secular change from considering relativistic cosmology and galactic structure, deriving equations of Newtonian cosmology
22 p4017 A69-40173

Strain measurement by interferometer with gas laser source emphasizing long period measurement problem
22 p3960 A69-40189

Laser range measurement from earth to lunar retroreflector to study earth tipping and gravitational constant secular decrease
22 p3960 A69-40190

Light pressure induced secular effect contributing to planetary satellites and lunar orbits evolution calculated by numerical integration
22 p4033 A69-41084

Anomalies of isotropic cosmic ray secular variations at high latitudes based on supermonitor neutron data
23 p4206 A69-41854

High reliability of solenoid and pressure regulating valves under long duration space missions, considering design, tests and controls
[AAS PAPER 69-238] 24 p4319 A69-42854

Acoustic analyzer response of man during prolonged noise effect of varying pitch and intensity
24 p4278 A69-43408

LONG WAVE RADIATION

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters
03 p0458 A69-13271

Propagation of long electromagnetic waves in ionosphere and exosphere, discussing thunderstorm noise spectrum
03 p0396 A69-13702

Long wave radio stations field intensity spectral analysis data evaluated to determine vertical ionospheric displacements at sunset and sunrise
06 p0922 A69-17752

Calibrating long wave actinometric instruments designed for Soviet meteorological satellites
06 p0929 A69-17978

Vertical distribution of ascending long wave radiation, employing actinometric radio sondes
06 p0953 A69-17990

Long wave radiative water vapor cooling in troposphere determined by numerical prediction model, including vertical distribution of cloud and moisture effects
07 p1175 A69-18896

Long wave propagation at 164 kHz in India during 1966 and 1967, determining D region recombination coefficient and long wave absorption diurnal variation
10 p1659 A69-24065

Long wave radiation fields calculations based on radiation transport equations, identifying differences between associated transmission functions
12 p2125 A69-25951

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters
14 p2471 A69-28779

Extraatmospheric long and short wave radio astronomy since first artificial satellite, including device carriers effectiveness of earth satellites, lunar orbiters, rockets and balloons
15 p2682 A69-30504

Filamentary composites elastic constants calculation extended to hexagonal symmetry by long waves method
17 p3061 A69-33666

Saturn emission peak and flux density at 408 MHz determined by cross telescope, discussing mechanism for enhanced radiation at long wavelengths
17 p3041 A69-33813

Long wave radiation influx toward atmospheric layers generated naturally by clouds, discussing radiation cooling of atmosphere in cloudy and clear weather
21 p3758 A69-39112

LONGITUDE

U SOLAR LONGITUDE

LONGITUDE MEASUREMENT

Simultaneous observations of altitudes of stars and moon for determination of longitude without time by navigators
14 p2479 A69-29855

LONGITUDINAL CONTROL

Semipassive attitude control system providing one degree pointing accuracies in all axes
07 p1226 A69-18326

Hypersonic vehicles multivariable flight control systems, analyzing flight path in terms of equation of motion of longitudinal mode
12 p2128 A69-26066

Spacecraft longitudinal control during reentry of lunar orbiter into atmosphere, analyzing final range prediction, trajectory tracking and accelerometers performance
13 p2355 A69-27681

Lifting rotor dynamics and undesirable characteristics reduction, discussing feedback control systems for pitch and roll
[AHS PAPER 340A] 17 p2899 A69-33509

Fighter aircraft higher order control system dynamics effects on longitudinal handling qualities evaluated by in-flight simulator for role of pilot induced oscillations tendencies
19 p3245 A69-35655

Aircraft characteristics influence on longitudinal handling qualities during carrier approach from visual landings on moving base simulator
[AIAA PAPER 69-768] 19 p3245 A69-35655

Aircraft characteristics influence on longitudinal handling qualities during carrier approach from visual landings on moving base simulator
[AIAA PAPER 69-894] 21 p3648 A69-39418

Longitudinal flying qualities evaluation by pilots in carrier approach flight simulation, describing experiment apparatus, procedures and results
[AIAA PAPER 69-895] 21 p3648 A69-39419

Aircraft flying qualities research program, discussing Navy test pilot evaluations and longitudinal handling characteristics for simulated carrier landing task
[AIAA PAPER 69-897] 21 p3648 A69-39421

Longitudinal flying qualities of aircraft, comparing attitude and altitude control data
[AIAA PAPER 69-898] 21 p3648 A69-39422

LONGITUDINAL STABILITY

Equations of motion of point restricted tethered parafoil for investigating longitudinal and lateral dynamic stability
01 p0009 A69-10415

Liquid propellant space launch vehicles longitudinal modes natural frequency, discussing coupled engine-propellant supply system stability
[AIAA PAPER 68-289] 02 p0335 A69-12393

Longitudinal short wave stability in conducting quasi-one dimensional gas flow, considering regions of high thermal emission
02 p0233 A69-12487

Aircraft stability during sideslip, discussing influence of fuselage/wing interference
04 p0548 A69-14824

Root locus method applied to longitudinal and lateral stability of aircraft with flexible fuselage and wing
04 p0677 A69-14835

Longitudinal dynamics of VTOL aircraft during hover-forward flight transition, using multiple time scale analysis
[AIAA PAPER 69-130] 06 p0869 A69-18157

Longitudinal stability of V/STOL aircraft at low speeds, discussing three tilt wings and quad ducted propeller configurations
[AIAA PAPER 69-194] 07 p1055 A69-19566

Longitudinal stability of unsteady motion of flight vehicle along ballistic trajectory, using linear differential equations
07 p1230 A69-19701

Saturn 5 unstable longitudinal oscillation due to coupling of structure and LOX line frequencies solved by helium injection
11 p1967 A69-25497

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies
11 p1967 A69-25498

Electrically driven thin fluid jet stability in longitudinal field between two plate electrodes, discussing role of Ohm law in calculating jet potential
12 p2136 A69-26402

Aircraft neutral stability empirical and mathematical aspects, considering control stabilization, damping and phugoid motion
15 p2551 A69-31012

Saturn 5 longitudinal instability /POGO/ precluded by lowering S-IC stage propulsion system resonance below structural frequency
[AIAA PAPER 69-548] 16 p2868 A69-32658

Droplet vaporization model representing combustion processes of longitudinal oscillations in liquid rocket combustor
[AIAA PAPER 69-483] 16 p2841 A69-32689

Close coupled accumulators for suppressing missile longitudinal oscillations /POGO/ developed for Gemini and Titan 3, including pump interaction
[AIAA PAPER 69-547] 16 p2869 A69-32729

Stability criteria for longitudinal combustion instability tested for generality using data from various solid propellant formulations
[AIAA PAPER 69-480] 16 p2834 A69-32736

Satellite three axis attitude control analysis showing rolling and longitudinal stabilization possibility by flywheel, with validity tested by analog simulation
17 p3048 A69-33240

Wing flaps and blow-off and suction effect on longitudinal balance of landing TU-104 aircraft, noting air suction at wing leading edge
19 p3247 A69-35818

Homogeneous magnetoactive plasma longitudinal oscillations stability with fast monoenergetic ions addition, noting ion temperature increase stabilizing effect
22 p3990 A69-40789

Pitching characteristics of three dimensional peripheral jet ground effect machines with compartment partition along pitch axis, considering longitudinal static stability and dynamic pitching motion
22 p3866 A69-40818

Nonlinear longitudinal dynamics of lifting orbital vehicle in near circular orbit, considering translational motion components effecting orbital decay or dilatation
[AAS PAPER 69-244] 24 p4392 A69-42857

LONGITUDINAL WAVES

NT COMPRESSION WAVES

NT PLANE WAVES

Electric field in plasma half space determined by longitudinal wave normal mode analysis, using BKG particle conserving collision model
01 p0134 A69-11287

Instability of longitudinal plasma waves propagating across magnetic field in plasma with electrons and ions drifting with different velocities across field
02 p0286 A69-11830

Planetary long waves behavior in atmospheric models, explaining unsteady components by means of filtered equations
03 p0459 A69-13274

Nonlinear interaction between waves in relativistic plasma, determining probability between transverse and longitudinal waves with different phase velocities
03 p0397 A69-13710

Technique to obtain desirable longitudinal oscillation mode for radiation of He-Ne laser
03 p0441 A69-13844

Longitudinal thermoelastic wave propagation in infinite body, proving generalized Kirchhoff theorem
03 p0528 A69-13924

Propagation of longitudinal transverse loading and unloading waves /with cylindrical symmetry/ in non-homogeneous elastic/viscoplastic medium, accounting for plastic dilatational strains
03 p0528 A69-13929

Longitudinal and transverse elastic waves propagation in medium with random inhomogeneities, deriving scattering coefficients in Born approximation for Fraunhofer region
04 p0667 A69-14262

Longitudinal stress pulse propagation in finite length free-free bar with variable cross section, noting stresses in projectile impacting plane target
04 p0671 A69-14412

Higher modes of longitudinal wave propagation in dispersive thin elastic rod, noting response to laser pulse
04 p0678 A69-14869

Torsional or longitudinal vibrations of nonuniform bar with elastic end constraints, developing frequency and mode form equations suitable for computer
04 p0681 A69-15196

Longitudinal acoustic waves propagation in partially ionized gas in external electric field, taking into account ionic collisions with electrons and neutral particles
06 p0963 A69-17079

Time averaged optical holographic interferometry of standing longitudinal acoustic waves in square cross section duct
06 p0923 A69-17150

Finite amplitude longitudinal wave propagation in lattices analyzed by study of compressive wave in chain of mass points with nearest neighbor interaction
06 p1022 A69-17367

Large amplitude longitudinal wave propagation in elastic rod solved by method of characteristics, prescribing end velocity as step function of time
07 p1233 A69-19176

Longitudinal and transverse vibrations of viscoelastic rods excited by inertia with aid of linear oscillator subjected to harmonic stress, using Kelvin-Voigt model
07 p1233 A69-19326

Longitudinal electrostatic oscillations in plasma with Fermi distribution of energies, noting oscillation frequency dependence on electron density
08 p1359 A69-19985

Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
08 p1367 A69-20796

Beam-plasma dispersion relations, obtaining dispersion equation for plasma waves and dispersion curves for longitudinal waves
11 p1925 A69-24366

Elastic waves propagation in micropolar cylinder, treating longitudinal and torsional monochromatic waves in Cosserat medium
11 p1995 A69-25606

Transformation of longitudinal plasma wave into electromagnetic wave during collision with dielectric in plasma
11 p1934 A69-25708

Asymptotic solution of two dimensional problem of elastic impact of bars, showing longitudinal and surface waves decay with time
11 p1996 A69-25737

Viscoelastic models for solving longitudinal oscillations of one degree of freedom system under dynamic load, taking into account energy dissipation
12 p2177 A69-25995

Planetary long waves behavior in atmospheric models, explaining unsteady components by means of filtered equations
14 p2472 A69-28782

Equatorial jet stream excitation of longitudinal waves, analyzing plasma beam instability and spectrum of short wave inhomogeneities by quasi-hydrodynamic equations
14 p2437 A69-29073

Acoustic bulk-surface wave transducer for shear or longitudinal wave transformation in nonpiezoelectric material at HF
15 p2607 A69-30167

Collisional emission and absorption of longitudinal waves due to particle encounters in numerical experiments on one dimensional one species plasma
15 p2661 A69-30921

Maser amplification of 9.5 GHz longitudinal elastic waves in divalent nickel impurity ions doped sapphire by stimulated emission from inverted spin population
16 p2795 A69-31554

Electronic-ultrasonic amplifiers with external electron stream and longitudinal or surface wave studied for damping influence, deriving dispersion equation
16 p2761 A69-32061

Elastoplastic boundaries of wave propagation of combined longitudinal and torsional stresses at tube end
[ASME PAPER 69-APM-13]

Longitudinal plasma waves collision damping calculations using Rostoker test particle method
18 p3213 A69-34389

18 p3179 A69-34439

Longitudinal and transverse wave propagation in homogeneously deformed isotropic elastic solids, considering Hadamard and Green materials
19 p3440 A69-36588

Longitudinal waves propagation in unbounded thermoelastic medium expressed as surface integrals generalizing Kirchhoff theorem
19 p3444 A69-36804

Longitudinal elastic waves produced in truncated hollow Al cone due to steel spheres impact
[ASME PAPER 69-APMW-15]
24 p4401 A69-43101

LOOK ANGLES

U AZIMUTH
U ELEVATION ANGLE

LOOP ANTENNAS

Low polarization error HF loop antenna array direction finder performance tests, comparing measured bearings with polarimeter and conventional crossed loops data
01 p0048 A69-11006

Electromagnetic scattering from thin wire loops under various impedance loadings, considering positive and negative resistors effect combined with reactive networks
11 p1837 A69-25000

Radiation field produced by parasitic loop counterpoise antenna, obtaining far field from geometrical diffraction theory
20 p3507 A69-37840

Microwave breakdown characteristics predictable for circular loop antennas from near electric field analysis
21 p3683 A69-39281

LOOPS

Hybrid loop properties determination using quadrupole algebra, noting frequency dependence of input impedance and voltage transmission
04 p0582 A69-15072

Data transition tracking in digital communication systems by decision directed phase tracking loops
07 p1082 A69-19108

Frequency feed forward open loop technique for lowering threshold and linearity of FM demodulators
07 p1106 A69-19128

LORAN

Long distance VLF multirange navigation fix errors as function of angles of cut of position lines and range errors, presenting error isograms
14 p2478 A69-29484

Doppler and inertial self contained systems for long range navigation, considering air traffic control separation standards
15 p2651 A69-31544

Software remechanization of conventional hyperbolic LORAN for totally passive closed loop one way direct range measurements to individual LORAN transmitters
17 p3002 A69-34079

Navigation equations, discussing earth geometry, coordinates, gravity, dead reckoning and radio computations with regard to LORAN
18 p3169 A69-34845

Geographical position coordinates of radio operator determined by distance difference measurement using Loran and digital computer methods
23 p4186 A69-42027

LORAN C

Visual receiving equipment for consistency determination of Loran-C sky wave signals apparent arrival times
12 p2029 A69-26052

Atomic and astronomical time and frequency measurement via Loran C and VLF/Omega phase tracking receivers
15 p2615 A69-31285

Loran C system for master station time and frequency dissemination, discussing application, coverage, timing accuracy and restrictions
23 p4116 A69-41601

LORENTZ FORCE

Lorentz force sustained energy discharge, discussing cesium added argon flow across magnetic field in disk channel
06 p0969 A69-17910

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance
11 p1955 A69-24392

Hall type electromagnetic plasma accelerator, with thrust affected only by Lorentz forces in external magnetic field, compared to pure Hall accelerator
11 p1866 A69-25214

MHD Stokes flow for rotating disk in parallel magnetic field, showing Lorentz force inhibiting effect on fluid motion
13 p2305 A69-27325

Rayleigh-Taylor instabilities in two fluid hydraulic model, noting perturbation direction and Lorentz forces effects on instabilities growth time
13 p2310 A69-28033

Plasma rotation by Lorentz force in homopolar gas discharge device, considering centrifugal forces effect on flow pattern
13 p2315 A69-28556

Hot electron plasma formation by injecting megaelectron volt ion beams followed by Lorentz trapping, noting advantages of DC operation
15 p2661 A69-30925

Electrically charged earth satellite motion under action of Lorentz force produced by geomagnetic field interaction, relating field trajectories to acceleration
19 p3431 A69-36615

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance
24 p4390 A69-43782

LORENTZ GAS

Electron distribution function of isotropic homogeneous Lorentzian plasma subjected to frequency modulated electric field calculated by successive approximation method
02 p0285 A69-11543

Weighting functions effect in calculating average scalar electrical conductivity in Lorentzian gas
04 p0638 A69-15317

Boltzmann equation for weakly ionized gas electron component, solved by transformation to integral equation, applied to Lorentz gas in alternating electric field
05 p0795 A69-15619

Equations for frequency portions of electron-velocity distribution function in Lorentz plasma under influence of time periodic electromagnetic fields with two fundamental frequencies
05 p0800 A69-15743

Electrical conductivity of partially ionized plasma, noting nonapplicability of Enskog-Chapman method and use of Lorentzian gas model
09 p1546 A69-21584

Transport coefficients for almost Lorentzian mixture, computed as perturbation to coefficients for true Lorentzian mixture, compared to Chapman-Enskog method results
11 p1997 A69-24286

Elastic collision operator for relativistic Lorentz gas converted to differential form using Fokker-Planck limit for anisotropy segments
16 p2817 A69-31668

Boltzmann equation for Lorentzian plasma in elliptic magnetic field solved by expanding distribution function in Legendre polynomials
17 p3009 A69-32827

Lorentz gas approximation to Boltzmann collision operator generalized for heavy molecule nonMaxwellian gas distribution function, obtaining equilibrium distribution applicable to ionized gas
18 p3179 A69-34438

Nonlinear electron conductivity of Lorentz plasma subjected to frequency modulated electric field
21 p3778 A69-39573

Time dependent diffusion of light particles of Lorentz fluid approximated by Boltzmann equation leading to microscopic telegrapher equation
22 p3984 A69-40530

Boltzmann equation for electron distribution function of Lorentzian plasma traversed by transverse traveling wave, showing existence and uniqueness of solution
24 p4354 A69-42675

LORENTZ TRANSFORMATIONS

Lorentz invariant theories of gravitation compared with Einstein general relativity tests with respect to one body motion observations
02 p0318 A69-12094

Electromagnetic fields in vacuum extended to fields in presence of matter, deriving field equations covariant under Lorentz proper and improper transformations
02 p0281 A69-12196

Validity of Lorentz invariance, discussing nuclear magnetic resonance test on torque for spin of electrons, muons and neutrons
18 p3176 A69-35007

Second rank Dirac spinors with invariant components relative to Lorentz group transformations
19 p3361 A69-36817

Planck-Einstein equation derivation in special theory of relativity, discussing relativistic measurement of thermodynamic values in terms of Lorentz transformations 24 p4349 A69-42748

LOSSES

Reynolds and Mach numbers influence on loss coefficient magnitude at straight airfoil lattice 03 p0364 A69-13788

Loss factors effects on substrate choice in production of microwave printed circuit components 04 p0578 A69-15199

Active region doping effect on laser diode threshold current, noting current dependence on loss coefficient in interband transition model without selection rule 06 p0933 A69-17257

Aerodynamic losses and stage efficiency in partial admission turbines, using flat bladed rotor experiments and rotors of different blade pitch 15 p2547 A69-30290

LOSSLESS EQUIPMENT

Linear noisy two port preceded by nonreciprocal lossless network analyzed, showing existence of associated quantity invariant under lossless transformation 07 p1104 A69-18891

Networks of ideal inductors, capacitors and periodically operated switches with no energy loss, deriving frequency-power formulas from response functions 18 p3111 A69-34682

LOST WAX PROCESS

U INVESTMENT CASTING

LOUVERS

Thermal considerations of spacecraft external panel effects on specular louver systems, discussing heat dissipation and computer program [AIAA PAPER 69-26] 06 p1037 A69-18097

Optimal design for improving thermal performance of existing spacecraft thermally actuated louver system by increasing open-to-closed emittance ratio [AIAA PAPER 69-627] 17 p3071 A69-33269

LOVE WAVES

Monochromatic waves propagation in infinite micropolar elastic plate, treating Lamb and Love waves 11 p1995 A69-25605

Love-wave propagation at UHF observed by thin film surface wave transducers 13 p2218 A69-27203

Love stress function derivation from equilibrium equations 13 p2364 A69-28233

Love wave amplitude data satisfying earth model with intrinsic internal friction at depths assumed due to single thermally activated relaxation 15 p2596 A69-30624

Generalized Love functions in axisymmetric micropolar elasticity, deriving stress functions expressing all static components 19 p3440 A69-36585

LOW ALTITUDE

Monograph on flight mechanics and control technology of low flight vehicles at high flight velocities, discussing altitude control design, power spectra, etc 11 p1823 A69-24638

Navigation and guidance systems for low altitude aircraft flight safety noting position determination, cockpit environment and fail-safe operation 17 p3002 A69-34080

Low altitude trapped protons in inner radiation belt during solar minimum period, using emulsion detectors on polar-orbiting satellite 18 p3187 A69-34944

LOW ALTITUDE SUPERSONIC VEHICLES

U F-111 AIRCRAFT

LOW ASPECT RATIO

Vortex breakdown effect on aerodynamic coefficients of small aspect ratio delta wings during yawing 04 p0543 A69-14821

Slender wing theory extension to not-so-slender wings approached as singular perturbation problem, using matched asymptotic expansions method 04 p0544 A69-14891

LOW ASPECT RATIO WINGS

NT DELTA WINGS

NT TRAPEZOIDAL WINGS

Theoretical nonlinear method for calculating aerodynamic forces on low aspect ratio wings at high angles of attack and wide range of Mach numbers 21 p3644 A69-39084

LOW DENSITY FLOW

Ion collecting cylindrical electrostatic probes as flow field tracing instruments in low density slightly ionized flows 19 p3291 A69-35718

Quantitative photographs of low density flowfields during shock tunnel tests using electron beam excitation with image intensifier tube detector 19 p3292 A69-35723

Surface pressure, skin friction and heat transfer measurements on sharp flat plates and wedges in low density hypersonic flow, noting slip velocity 20 p3458 A69-37186

Carbon dioxide free jet expanding from conical nozzle into low density atmosphere, using freeze up method 22 p4000 A69-40594

LOW DENSITY GASES

U RAREFIED GASES

LOW DENSITY MATERIALS

Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures 23 p4179 A69-41715

Shear load, cohesion and internal friction measurements of low bulk density particulate silicates of complex shape, noting significance for lunar comparison 24 p4383 A69-43040

LOW DENSITY RESEARCH

High speed streak cameras applicability to low density theta pinch studies, describing image converters design, operation and block diagrams 14 p2496 A69-29787

LOW DENSITY WIND TUNNELS

Diagnostic techniques for high speed low density DVL plasma wind tunnel noting problems of pressure, temperature, hot-wire and calorimetric measurements [DVL-849] 04 p0584 A69-14823

Plasma parameters, except ion temperature, obtained from current-voltage characteristics of flowing plasma measured by electrostatic probes in low density wind tunnel 16 p2816 A69-31637

Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump [AIAA PAPER 69-653] 17 p2954 A69-33458

LOW FINENESS RATIO

U FINENESS RATIO

LOW FREQUENCIES

Transistorized LF generator, discussing tradeoff due to frequency range, harmonic distortion and output stability 04 p0579 A69-15225

Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations 11 p1925 A69-24315

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations 11 p1956 A69-24401

LF measurements with positive or negative temperature coefficient resistors based on current-voltage characteristics 11 p1845 A69-24522

LF negative resistance of X band Gunn diodes with lumped components, using coaxial circuit 12 p2039 A69-26387

LF wave propagation and emission in magnetosphere, discussing steady noise and discrete emissions 12 p2072 A69-26745

High efficiency LF oscillations in avalanche diodes, noting evidence for parametric generation and condition for high efficiency 13 p2227 A69-27239

Extragalactic radio sources, observing nonlinear LF spectra for quasars and linear LF spectra for radio galaxies 13 p2351 A69-27867

Soft damping system required by LF vibrational loads 18 p3171 A69-34563

Hearing at LF, comparing noise and tone thresholds 21 p3664 A69-38986

Near field effects on accuracy of LF shielded enclosure measurements compared to open field environment 23 p4141 A69-42226

LF instability in plasmas and hydromagnetic fluids, discussing MHD equations, Rayleigh-Taylor instability, interchange mode, Kelvin-Helmholtz instability, etc 24 p4355 A69-42683

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations 24 p4391 A69-43791

LOW FREQUENCY BANDS

NT VERY LOW FREQUENCIES

LF ground based absorption results compared with rocket measured D region electron density profiles 16 p2778 A69-32188

LOW GRAVITY

U REDUCED GRAVITY

LOW LATITUDES

U TROPICAL REGIONS

LOW LEVEL TURBULENCE

Low altitude atmospheric turbulence model evaluated from analysis of A-6A aircraft gust load data, comparing model estimates with aircraft response characteristics 01 p0056 A69-11053

SNR improvement during low level turbulence measurements, examining correlation between hot-wire anemometers, including error analysis 14 p2446 A69-29018

LOW MASS

U MASS

LOW NOISE

Noise generation and propagation in linear N cascaded mismatched two port networks, noting application to microwave measurements in low noise technology 02 p0211 A69-12445

Dual reflector antenna design methods for obtaining necessary phase and amplitude illumination across secondary aperture in low noise applications 11 p1852 A69-25316

Multimode tracking /SYMMTRAC I and II/ feeds for low noise antennas, noting feed performance 11 p1852 A69-25317

LOW PASS FILTERS

Filter uncertainty for time or frequency resolution in analysis of waveform, decomposing characteristic functions and determining least uncertain realizable filter 02 p0226 A69-12306

Generalized digital low pass filter synthesis by recursion technique, noting coefficient sensitivity simplification 03 p0403 A69-13227

Narrow bandpass filters based on ripple adjustment in response of low or high pass prototype 04 p0574 A69-14345

Active RC low pass filters sensitivity to component changes, discussing effect of below minimum limit value 04 p0578 A69-15070

Digital filter design with complex coefficients for analytic signals and complex envelopes 04 p0579 A69-15460

Digital spectra analysis by Fourier transform and comb filter for determination of voltage and power spectra 05 p0722 A69-16762

Presampling filtering, discussing effects on rms interpolation error for sampled data systems 07 p1083 A69-19129

Surface effects at interface between linear and nonlinear media representing transmission lines of low pass filter type 07 p1088 A69-19755

Error probability for discriminator detection of wide-band PCM/FM, considering IF bandwidth/bit duration product and low pass filtering effect 08 p1271 A69-19864

Transfer function of low pass filters with Chebyshev attenuation characteristic in stopband and predetermined phase or delay time realized by ladder network 08 p1300 A69-21171

Digital sampled data spectra conditioning, deriving linear functions for low pass, bandpass and band rejection numerical filters and spectrum shaping 10 p1654 A69-23292

Low pass filters synthesis based on Chebyshev polynomials properties noting requirements of critical frequency, frequency response decline rate and tolerance range 11 p1887 A69-25210

Ultra lowpass filter circuit with two point contact Ge diodes and capacitor 12 p2039 A69-26379

Low pass quasi-optical waveguide filters, using metal strips in dielectric material to obtain broad stopband and low dissipation loss

13 p2229 A69-27675

Chebyshev polynomial of even order used in synthesis of equally terminated low pass lumped and distributed filters of even order

13 p2233 A69-28068

Mathematical optimization to achieve near equal-ripple response in passband for coaxial low pass filters having unequal line lengths

16 p2757 A69-31583

High pass filters reflection group delay compared with low pass filters transmission group delay with Butterworth, Chebyshev and elliptic responses

21 p3686 A69-39139

Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter

21 p3676 A69-39450

LOW PRESSURE

NT HIGH ALTITUDE PRESSURE

Qualitative mechanisms to explain Langmuir paradox, discussing wall mechanism for Maxwellian distribution formation in low pressure discharges

06 p0960 A69-16922

Low pressure measurement by electron scattering using Born approximation

07 p1181 A69-19218

HF instability of low pressure discharge in magnetic field, discussing plasma diffusion and oscillations

11 p1927 A69-24912

Magnitude and type of wall losses from small opening in discharge tube for positive plasma column of low pressure glow discharge in hydrogen

14 p2493 A69-29691

Monograph on large scale cloud distribution in extratropical low pressure regions, using classical meteorological observations and Tiros weather satellites data

15 p2650 A69-31212

Inflight spontaneous pneumothorax case of civilian pilot lung collapse experience during exposure to reduced ambient pressure, discussing etiology, incidence, treatment and disposition

17 p2909 A69-33183

Bayard-Alpert type ionization gage for low pressures with and without modulation, discussing role of electron oscillations

20 p3464 A69-37407

Portable multiunit low pressure chamber with locks, permitting water replenishment, feeding of animals under continuous pressure and gas mixtures

22 p3891 A69-40217

White mice survival rates and blood morphology and sedimentation rates in low ambient pressure confinement following infectious bacteria injection

24 p4267 A69-43397

LOW PRESSURE CHAMBERS

U VACUUM CHAMBERS

LOW SPEED

Vortex motion of separated flow from slender wings and rotor loading, discussing computer role in low speed aerodynamic research

05 p0696 A69-15562

LOW SPEED HANDLING

U CONTROLLABILITY

LOW SPEED STABILITY

Test facilities and techniques for low speed flight problems of aircraft handling qualities, stability, control and performance

05 p0741 A69-15575

Longitudinal stability of V/STOL aircraft at low speeds, discussing three tilt wings and quad ducted propeller configurations

[AIAA PAPER 69-194] 07 p1055 A69-19566

LOW SPEED WIND TUNNELS

NT SUBSONIC WIND TUNNELS

Diffusion characteristics of turbulent flow produced by square mesh grid in low speed wind tunnel

13 p2250 A69-28496

LOW TEMPERATURE

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers

03 p0488 A69-13885

Audio frequency noise in p channel MOST at cryogenic temperatures, noting trap contribution

06 p0979 A69-17151

Pyroelectric thermometry for measurements at low temperatures with emphasis on calorimetry, discussing pyroelectric coefficients, dielectric constants and resistivities

09 p1493 A69-21423

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers

11 p1938 A69-25686

Low temperature specific heat of praseodymium magnesium nitrate

12 p2026 A69-25784

LOW TEMPERATURE BRAZING

Low temperature low cost dip brazing technique for light weight magnesium alloy electronic packaging structures, noting distortion

09 p1509 A69-22346

LOW TEMPERATURE ENVIRONMENTS

Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation

01 p0176 A69-10847

Low temperature effects on calf thymus deoxynucleoprotein, crystalline egg albumin and fibrillar actin, noting molecular weight and viscosity changes

01 p0018 A69-11089

Silica glass hardness relationship to pressure induced densification at low temperatures

03 p0453 A69-13616

MOST devices characteristics at cryogenic temperatures, studying variation in gain over audio frequency range

03 p0405 A69-13642

Free electron kinetic equation including inelastic electron-atom collisions derived for nonequilibrium low temperature plasma, showing interrelated electronic and atomic energy distribution

05 p0802 A69-15889

Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage

05 p0784 A69-16487

Film processing effects on cryogenic mechanical properties of polyethylene terephthalate

05 p0785 A69-16490

Cryogenic mechanical properties of epoxy resins and glass/epoxy composites

05 p0785 A69-16491

Mechanical behavior of polyethylene terephthalate at cryogenic temperatures

05 p0785 A69-16494

Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments

05 p0797 A69-16495

Vulcanizable elastomers suitable for contact with liquid oxygen, discussing preparation, mechanical properties, transition temperature and structure

05 p0717 A69-16497

Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility

05 p0717 A69-16498

Bearing lubrication at low temperature, examining safety limits, working fluid in liquid or gaseous state

[IME PAPER 9] 07 p1138 A69-18565

Human body temperature regulating factors in low temperature environment, studying metabolism, lung ventilation and onset of shuddering

10 p1648 A69-23298

Cryogenic conductive heat transfer in solids, low temperature insulation and liquid-vapor interfaces, discussing boiling heat transfer, injection cooling and frost formation

11 p1998 A69-24461

Lubrication and operation of Hamilton Standard propellers in high altitude and low temperature environments

[SAE PAPER 690323] 11 p1822 A69-24515

Model for shock propagation from point energy source into cold atmosphere with exponential density variation

11 p1871 A69-25123

Germanium surface IR radiation absorption in vacuum at low temperatures, obtaining modulated interval reflection spectra

13 p2317 A69-27879

Deep freezing of nuclear precession magnetometer elements for improving instrument characteristics

14 p2446 A69-29083

Alloying elements effects on low temperature metal fracture, considering changes in ductile-brittle transition flow due to solute

17 p2988 A69-33551

Supereconducting cavities for resolving optically induced changes in dielectric constant of CdS at 4.2 K

17 p3016 A69-33782

Adaptor for Debye-Scherrer powder camera to take high quality photographs even at liquid N temperature

19 p3313 A69-36493

Stress corrosion cracking of alpha Ti in liquid nitrogen tetroxide and various methanol environments, considering failure mechanisms

19 p3352 A69-36906

Solid state chemical heat sources aboard unmanned planetary landing vehicles to maintain batteries and experiments operability during cold planetary nights

23 p4070 A69-42275

Adhesive bonding of optical components, discussing material types, test methods, problem of operation at cryogenic temperature, etc

24 p4326 A69-43465

LOW TEMPERATURE PHYSICS

Heisenberg ferromagnet dynamics at low temperatures, calculating spectral weight function and other properties with low density expansion

01 p0135 A69-10016

Specific heats of Cu, GaAs, GaSb, InAs and InSb measured over low temperature ranges

01 p0140 A69-11252

Microscopic theory of superconductivity, considering quantitative physical properties of low temperature electric current flow

02 p0293 A69-11432

Graphite specific heat temperature dependence at low temperatures, noting Wigner effect for neutron irradiation

02 p0269 A69-11782

Fluorescence and phosphorescence from tryptophan powders stimulated at low temperatures with UV, vacuum UV, fast electrons and X rays

03 p0372 A69-13487

Low temperature conductance peaks observed in tunneling measurements on aluminum-phosphosilicate glass-degenerate silicon sandwich structures

03 p0493 A69-14183

Transitions in glasses at low temperatures, noting molecular relaxation dependence on copolymer composition

04 p0621 A69-15308

Self Q switching of ruby lasers at 77 K, noting saturable absorber giant pulse process obtained by shielding part of laser rod from pump

05 p0776 A69-16332

Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin

05 p0808 A69-16357

Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage

05 p0784 A69-16487

Mechanical relaxation of poly 4 methyl pentene 1 at cryogenic temperatures, discussing temperature dispersion curve and secondary absorption associated with thermal motion of side chains

05 p0785 A69-16492

Polymer glasses low temperature transitions, relating structure and transition temperature

05 p0717 A69-16493

Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments

05 p0797 A69-16495

Magnetoresistance of tellurium single crystals with various current carrier concentration at liquid helium temperatures

06 p0978 A69-16986

Quantum oscillations of Maggi-Righi-Leduc (MRL) effect in n-InSb and n-InAs samples from single crystals at liquid helium temperature

06 p0979 A69-16992

Electron irradiation annealing and modification of 35 and 65 K defects in n-type Ge induced by 1 Mev electrons at low temperature

06 p0980 A69-17757

IR absorptance of CO below room temperature, determining strength and half widths of lines in R branch of fundamental band

07 p1183 A69-19644

Thermal expansion of polymers at cryogenic temperatures

07 p1172 A69-19730

Very low temperature dependence of thin single crystal Al plates electrical resistance, noting Umklapp processes contribution

10 p1711 A69-23620

Composition and thermodynamic properties of gaseous system reacting at low temperatures with con-

densified phase formation, discussing iterative process convergence in approximation

11 p2001 A69-25223

Temperature effects on noise levels in field effect transistors, discussing Lorentz spectrum

11 p1853 A69-25391

Hydrogen viscosity temperature dependence at constant density below room temperature

11 p2003 A69-25704

Low temperature method for measuring breakdown threshold parameters of liquid and gaseous He by laser beam, observing stimulated Mandelstam-Brillouin scattering

16 p2796 A69-31799

Low temperature creep mechanisms, discussing thermal activation of dislocation slip in perfect crystals

17 p2985 A69-32909

Radiative and conductive heat transport mechanisms at cryogenic temperature applicable to thermal energy transport minimizing technique in containment system

17 p3074 A69-33680

Thermal conductivity coefficient of gas mixtures at low temperatures obtained using quantum diffusion model and Chapman-Enskog method for Boltzmann equation

21 p3848 A69-38638

Nernst effect in pyrolytic graphite at low temperatures including thermal EMF, electrical conductivity, thermal conductivity and magnetoresistance coefficients

21 p3753 A69-39562

LOW TEMPERATURE TESTS

Mechanical properties of AZ5G-Zr-Cr alloy welded sheet subjected to biaxial stress at low temperature

01 p0088 A69-11152

Relaxation mechanism of low temperature internal friction peaks in niobium quenched to room temperature

03 p0447 A69-13617

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens

04 p0614 A69-14573

Mechanical properties and stress concentration sensitivity of structural alloys at low temperature

04 p0614 A69-14574

Mechanical and physical properties and cryogenic wear tests performed on composite materials, considering NERVA cryogenic turbopump bearing retainer development

[ASME PAPER 68-WA/LUB-10]

05 p0768 A69-16133

Cryogenic mechanical properties of epoxy resins and glass/epoxy composites

05 p0785 A69-16491

Cooling requirements for high speed polytetrafluorethylene lubricated ball bearings operating in cold hydrogen gas, developing minimum gas flow rate equation

07 p1141 A69-19310

Compact device for low temperature neutron irradiation of deformed specimens under tensile stress, emphasizing specimen carrier

11 p1862 A69-24901

Thermal expansion coefficients of Nb-Zr-Ti alloy and plexiglass at 10-300 K from dilatometric measurements

11 p1905 A69-24917

Peltier measurements below 4 K capable of measuring low Seebeck coefficient on high resistivity alloys and in presence of magnetic field

14 p2449 A69-29563

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens

15 p2638 A69-30274

Mechanical properties and stress concentration sensitivity of structural alloys at low temperature

15 p2638 A69-30275

Temperature effects on fracture of various alloys, presenting strength and toughness values tested at cryogenic temperatures

17 p2990 A69-33567

Alpha Ti-Al and Ti alloys plastic deformation at low temperatures, noting slip and twin mechanisms role

18 p3158 A69-35444

Fuel resistant elastomers evaluated for seal compounds for low temperature capability, noting epichlorohydrin-ethylene oxide as promising sealant

19 p3356 A69-35534

Low temperature bond failures of room temperature vulcanizing methyl-phenyl adhesive bonds attributed to thermal stress cracking of primer, presenting in-process tests

19 p3321 A69-35563

Solar cell characteristics at low temperatures, noting efficiency increase with decreasing temperature

19 p3251 A69-35691

High speed brittle fracture of polycarbonate resin subjected to static bending in liquid nitrogen determined from crack propagation speed of surface coating

19 p3358 A69-35776

Voltage and temperature dependence of zero-bias anomaly in GaAs p-n junction at 0.40-60 K, investigating voltage dependence of differential resistance

19 p3388 A69-36542

InSb instabilities and time dependence of transverse breakdown, performing Hall effect measurements on n-type InSb at 77 K

19 p3389 A69-36546

Optical pumping in pure Si at 77 K, noting dichroism conditions for dipolar electric transitions in cubic crystal

19 p3389 A69-36548

High resistivity gallium arsenide single crystal LF current oscillations at low temperature, investigating electron heating effect and mechanisms

19 p3391 A69-36609

Protective coatings for high melting point metals, discussing prevention of low temperature coating breakdown due to oxidation

20 p3561 A69-37375

Experimental facility for studying heat conductivity of multicontact metallic and nonmetallic materials /plates/ in vacuum at low temperatures under various loads

21 p3721 A69-38639

Al alloys sheet, plate and weldments crack behavior and fracture toughness at cryogenic temperatures, using notched and surface flawed plane strain specimens

[ASM PAPER W9-19.3]

21 p3743 A69-38669

Rat survival rate after prolonged gradually decreased body temperature without motion restraint or kept in fixed position

22 p3877 A69-40278

Tensile cryostat for low temperature strain measurement, discussing design, insulation and vacuum sealed environment for heat leak reduction

[NAS-NRC PAPER J-3]

22 p3947 A69-40627

Mechanical properties of welded joints in Kh 18N9T steel at very low temperatures using austenitic-ferritic and austenitic welds

22 p3958 A69-41204

Low temperature mechanical properties of structural materials for high energy propulsion systems, using low boiling point propellants as liquid hydrogen, fluorine and oxygen

23 p4177 A69-42159

LOW THRUST

NT MICROTHRUST

Satellites trajectories under influence of earth oblateness and low radial thrust acceleration by nonlinear mechanics asymptotic method, discussing osculating orbits

16 p2856 A69-32009

Numerical integration of plane orbital transfers with multiple powered arcs, minimizing propellant expenditure of small thrust chemical rocket

19 p3400 A69-35673

LOW THRUST PROPULSION

NT ELECTROMAGNETIC PROPULSION

NT ELECTROSTATIC PROPULSION

NT ION PROPULSION

NT PLASMA PROPULSION

NT SOLAR PROPULSION

Optimum control determination for low thrust spacecraft to minimize time for passing through radiation belt

01 p0113 A69-10571

Low thrust spacecraft motion continuous correction by dynamic programming, assuming continuous information on system state including fuel consumption

01 p0113 A69-10572

Spacecraft orbital maneuvers by means of low thrust, discussing optimization and several orbital transfer examples

03 p0522 A69-14086

Power requirements of low thrust space engine for maneuvers and optimum overlappings theory for selection of power plant

04 p0666 A69-14920

Low thrust nuclear engine using hydrogen suitable for transfer missions

05 p0791 A69-15598

Minimum fuel consumption for low thrust jet engine propelled space vehicles maneuvering in circular trajectories

05 p0829 A69-15879

Optimum low thrust interplanetary transfers involving swingby trajectory past intermediate planet analyzed, assuming impulsive velocity change at planet

06 p1006 A69-17572

Spacecraft optimum low thrust trajectory analyzed by Hamilton-Jacobi perturbation theory, obtaining canonic constants of motion

06 p1007 A69-17574

Spacecraft electric propulsion parameters and launching vehicle characteristics in low thrust mission simulation, discussing spacecraft path

09 p1584 A69-21202

Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thruster efficiency

09 p1584 A69-21204

Interplanetary low thrust mission analysis model, discussing major elements interactions

09 p1585 A69-21206

Low thrust mission analysis techniques and computer programs, discussing electric propulsion

09 p1585 A69-21208

Low thrust interplanetary trajectories optimization, discussing hardware design considerations

09 p1585 A69-21209

Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization

09 p1585 A69-21211

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite

[AIAA PAPER 69-298]

09 p1562 A69-21227

30 cm diameter mercury bombardment low impulse thruster development for potential space applications, discussing performance and control

[AIAA PAPER 69-238]

09 p1566 A69-21256

Electron bombardment thrusters for low specific impulse operation, discussing electrode structures fabrication by bonding alumina disk to metal electrode

[AIAA PAPER 69-301]

09 p1568 A69-21730

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements

[AIAA PAPER 69-300]

09 p1569 A69-21880

Low thrust space probe mission to Halley comet, utilizing nuclear electric propulsion

10 p1772 A69-22864

Low thrust propulsion devices high response impulse testing, describing limitations imposed by solenoid valve time response

10 p1672 A69-23278

Optimum control determination for low thrust spacecraft to minimize time for passing through radiation belt

15 p2651 A69-30741

Low thrust spacecraft action continuous correction by dynamic programming, assuming continuous information on system state including fuel consumption

15 p2651 A69-30742

Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses

16 p2857 A69-32177

Minimal electric propulsion systems for interplanetary spacecraft, discussing payload, reduced trip time and low thrust systems for Jupiter flyby

[AIAA PAPER 69-499]

16 p2844 A69-32714

Low thrust reaction control for space missions, summarizing range and specific impulse characteristics for solid and hybrid systems

[AIAA PAPER 69-433]

16 p2834 A69-32745

Continuous mode operation in hypergolic bipropellant low thrust rocket motors, discussing high temperatures reached by combustion chamber walls and cooling solutions

17 p3019 A69-33335

Optimal overlapping theory to select nonthrottled low thrust spacecraft engines power, noting spacecraft mass invariability

18 p3184 A69-34583

Feasibility of automatic stationkeeping for synchronous satellites by using solar sailing techniques and low thrust systems

[AAS PAPER 68-151]

19 p3429 A69-35950

Halley Comet rendezvous mission, comparing low thrust mode with ballistic Jupiter or Saturn swingby mode

[AIAA PAPER 69-933]

21 p3809 A69-39360

Low thrust guidance for multirevolution trajectory required for earth parking orbit transfer to parabolic orbit insertion, noting advantages over high thrust scheme

[AAS PAPER 69-403]

24 p4379 A69-42832

LOW VISIBILITY

- Low visibility instrument landing of aircraft using ILAS and inertial guidance
01 p0114 A69-11012
- Low visibility landing, discussing problems of radio guidance geometry, visibility measurement, aircraft dynamics, pilot psychology, regulation and politics
01 p0114 A69-11391
- Optical measurements through retrorocket plumes of landing spacecraft, investigating reduced landing site visibility and modulation transfer function
02 p0248 A69-11765
- Low visibility aircraft landing, discussing total system approach, modern electronic developments, collision avoidance, safety and air traffic control
03 p0465 A69-13853
- Atmospheric scattering behavior under reduced visibility conditions for laser wavelengths of 0.69 and 1.06 micron
11 p1837 A69-25040
- Monograph on low visibility landing in civil aviation, considering visibility determination methods and equipment and IR sighting devices
20 p3574 A69-38064
- Low visibility VSTOL instrument landing system and associated electronic structures, discussing instrument to visual flight transition
22 p3979 A69-40675

LOW VOLTAGE

- Low voltage He-Ne laser, noting outputs for various pressures and grid anode separations
10 p1704 A69-23652
- Low voltage Knudsen arc in cesium-argon mixture for thermal emission converters
14 p2403 A69-29248

LOW WING AIRCRAFT

- Safety measures for aircraft ditching at sea, discussing low wing configuration advantages and life rafts
14 p2392 A69-29697

LOWER ATMOSPHERE

- NT OZONOSPHERE
NT STRATOSPHERE
NT TROPOPAUSE
NT TROPOSPHERE
- Venus lower atmosphere noting graphically wide variation of surface pressure estimates
02 p0319 A69-12103
- Mars lower atmospheric pressure, temperature and composition, noting consistency between photometric, spectroscopic and occultation techniques
02 p0319 A69-12104
- Molecular O 0.7620 micron absorption band in pure O and air, noting rotational lines mean half width and lower atmosphere transmission function
03 p0458 A69-13272
- Meteorological PTU/pressure, temperature, humidity/probe for lower atmospheric layers, discussing detectors and assembly qualities
04 p0601 A69-15229
- Lower atmosphere pressure field determination based on meteorological satellite observations of amount and types of clouds and upper boundary altitude
06 p0952 A69-17987
- Acoustic and electromagnetic energy propagation in lower ionosphere and atmosphere for energy pulse generation by chemical explosion
07 p1078 A69-18844
- Meteorological observation problems from satellites, considering lower atmosphere measurements and accuracies
09 p1537 A69-22690
- Cosmic ray electrons and gamma quanta at lower atmosphere recorded with balloon equipment, plotting vertical profiles of electron energy spectra
10 p1758 A69-22830
- Fluctuations in angle of arrival of laser and thermal radiation beams over near ground path
11 p1840 A69-25570
- Radiation attenuation in hazy lower atmosphere, calculating attenuation coefficients and using spherical model of haze particles and empirical formula for haze spectra
11 p1913 A69-25571
- Statistical turbulence theory applied to turbulent flow transport properties in lower atmosphere
12 p2125 A69-25894
- Turbulent boundary layer in lower atmosphere downwind of abrupt change of surface roughness, determining surface shear stress and roughness height
12 p2125 A69-26014

- Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths
12 p2033 A69-27001
- Molecular O 0.7620 micron absorption band in pure O and air, noting rotational lines mean half width and lower atmosphere transmission function
14 p2487 A69-28780
- Remote sensing of lower atmosphere refractive structure, using Rake tropospheric scatter channel-sounding technique
14 p2448 A69-29525
- Atmospheric circulation by energy concepts, giving quantitative analysis of interaction between upper and lower atmosphere
14 p2477 A69-29825
- Earth based microwave data revealed isothermal layer in extrapolating Venus atmosphere profile below region probed by Mariner 5 and Venera 4
16 p2852 A69-31553
- Soviet collection of papers on physics of atmospheric boundary layer covering wind profile, turbulent energy balance, etc
20 p3571 A69-37694
- Wind velocity below 100 meters from Laikhtman atmospheric boundary layer model, solving equations for horizontally homogeneous, stationary and nonadvective air flow
20 p3571 A69-37695
- Components of turbulent energy balance at 1 and 4 meter heights, discussing average motion energy transformation into turbulent energy
20 p3571 A69-37696
- Planetary boundary layer top formation, considering particle velocity, earth surface roughness role, geostrophic wind, etc
21 p3715 A69-38566
- Venus, Mars and Jupiter lower atmospheric motions, considering atmospheres thermal and chemical composition
21 p3811 A69-39511
- Lower atmospheric temperature continuous radio measurement as function of altitude, calculating temperature gradient
24 p4342 A69-42677
- Simultaneous lower atmosphere clear air turbulence analysis by multiwavelength radar, jet aircraft and special rawinsondes
24 p4342 A69-42894

LOWER IONOSPHERE
NT D REGION

- Ionosphere studies in France noting lower ionosphere dynamics, ionospheric winds, plasma electron densities, electron and ion temperature and ion-neutron collision frequency
02 p0242 A69-11903
- VLF phase measurements for apparent and equivalent diurnal height variation for lower ionosphere waveguide
05 p0752 A69-15666
- Solar cycle influence on winds in lower ionosphere
05 p0759 A69-16421
- Mars lower ionosphere ionization from spectroscopic and Mariner 4 occultation data, discussing various ionization sources
07 p1213 A69-18607
- Acoustic and electromagnetic energy propagation in lower ionosphere and atmosphere for energy pulse generation by chemical explosion
07 p1078 A69-18844
- Lower ionosphere and earth-ionosphere waveguide effects on polarization characteristics of transmitted radio whistlers
08 p1306 A69-20181
- D region electron density vertical profiles measured using partially reflected echoes from lower ionosphere
08 p1307 A69-20189
- Lower ionosphere effect on LF electromagnetic disturbances, comparing propagation and damping of clockwise and counterclockwise polarized waves
09 p1487 A69-21637
- Ionization in lower ionosphere over polar cap under solar corpuscular fluxes measured by radio wave absorption
10 p1759 A69-22838
- Electron production rates variations in lower ionosphere cosmic layer related to meteorological, geomagnetic and cosmic conditions
10 p1759 A69-22839
- Cosmic ray absorption and modulation in lower ionosphere at midlatitudes, considering 11 year variations, Forbush effects and solar radiation on electron concentration
10 p1759 A69-22840

- Low energy particle effects on midlatitude lower ionosphere conditions after July 7, 1966 proton flare, using ground based measurement
10 p1684 A69-23782
- Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere, noting inhomogeneous conductivity, Hall effect and lines of forces role
10 p1687 A69-23926
- Lower ionosphere electron densities measured during solar eclipse by Nike-Apache rockets
12 p2073 A69-26861
- Nonuniform two dimensional hydromagnetic waves incident on idealized lower ionosphere, discussing validity of various models
12 p2074 A69-26960
- Neutral gas ionization in lower ionosphere, discussing physicochemical reactions, recombination coefficients, equilibrium processes, etc
13 p2255 A69-28540
- Lower ionospheric homonuclear O combinations nonequilibrium processes by simplified balance equations, determining height distributions and ozone concentration
13 p2255 A69-28542
- Ion pair annihilation average rate by single aerosol particle action in lower ionosphere noctilucent clouds
14 p2434 A69-28941
- Nighttime molecular O densities between 100-130 km determined from Schumann-Runge absorption data for successive far UV spectra of hot star
14 p2435 A69-28959
- Effective recombination coefficient in lower ionosphere determined from charged particle spectra obtained by rocket sounding in Canada
14 p2511 A69-28960
- Radio wave absorption coefficient in lower ionosphere related to total radiation absorption and electron concentration profile
14 p2411 A69-29075
- Seasonal variations of electron density profiles in lower ionosphere measured by differential absorption using partial reflections
14 p2438 A69-29109
- Polar cap absorption riometer recorded during 2-6 September 1966 event compared to satellite measurements of solar protons, discussing diurnal variations and oxygen role in associative detachment reactions
14 p2440 A69-29126
- Waveguide mode propagation theory for determining earth-ionosphere spherical waveguide upper boundary height diurnal variation for VLF waves
15 p2595 A69-30224
- Corpuscular radiation intensity during geomagnetic disturbances measured during rocket flights at 50-100 km, discussing effects on lower ionospheric radio absorption
15 p2677 A69-31327
- Fresnel irregularities calculated from radio wave partial reflection from lower ionosphere measured by rocket probes
15 p2604 A69-31420
- Lyman alpha radiation ionization rate in lower ionosphere, noting various charged particle concentration parameters
15 p2605 A69-31438
- Strong vertical wind in low ionosphere due to short period reflected gravity waves, obtaining standing wave system
15 p2606 A69-31449
- Partial reflections method of Gardner and Pawsey for determining vertical profile of electron collision frequencies in lower ionosphere and upper D layer
16 p2775 A69-32034
- Electron production rate in low ionosphere, discussing parameters of ionizing solar cosmic rays and earth environment
17 p3022 A69-33035
- Rocket-borne AM radio receiver for Faraday rotation experiments to measure lower ionosphere electron density, giving circuit diagrams
17 p2936 A69-33062
- U shaped polar auroras development, examining relation with magnetic activity and current system configuration in lower ionosphere
17 p2963 A69-33952
- High latitude geomagnetic disturbances, incoming electron fluxes and riometric absorption relationship in lower ionosphere studied by X ray bremsstrahlung with sounding balloons
17 p2964 A69-33961
- Lower ionosphere electron concentration confirmed as function of electron and ion temperature by satellite and probe data
17 p2966 A69-33981

Ionospheric absorption and virtual heights relationships for electron density distribution in lower ionosphere, computing model profiles

18 p3125 A69-34248

ELF and VLF wave propagation examined for heavy ions and lower ionospheric disturbance effects using numerical integration, noting standing wave field role for interpretation

18 p3125 A69-34254

Ion and temperature effects on lower ionosphere refractive index for VLF radio wave propagation

18 p3102 A69-34971

Physical process providing EMF for maintaining electrical structure of stratosphere and mesosphere shown to center in lower ionospheric thermally driven tidal motions

18 p3130 A69-35103

Lower ionosphere electric fields and currents vertical profiles above geomagnetic equator under quiet geomagnetic conditions from rocket data

20 p3521 A69-37053

Lower ionosphere geomagnetic field local gradients determination by partial reflection method

20 p3522 A69-37055

Inhomogeneities time buildup in lower ionosphere weakly ionized plasma during charged particle concentration perturbations and source temperature variations

20 p3525 A69-37658

Lower ionosphere radiation absorption at 4.01 MHz determined using A-3 method in measuring radio wave field between radio transmitters

20 p3528 A69-37675

Lower ionospheric effective electron collision number from cosmic noise recordings and radio wave absorption data obtained by vertical sounding rocket

20 p3528 A69-37679

Corpuscular radiation indicated as ionization source in lower ionosphere from rocket sounding data, noting role in D region formation

21 p3787 A69-38352

Lower ionosphere over geomagnetic equator during evening twilight characterized by solar disturbances, using rocket-borne Langmuir and plasma noise probes

21 p3702 A69-38353

Turbulent field structure between 90-120 km estimated from sodium clouds diameters variation ejected from rockets

21 p3713 A69-38524

Sharply bounded homogeneous ionospheric model to solve modal equation, discussing lower ionospheric conductivity from VLF transmission sudden enhancements of strength /SES/

21 p3714 A69-38554

Ionosphere drift measurements in LF range, noting relationship between correlation and similar-fade analyses for velocity data

21 p3714 A69-38557

Nighttime atmospherics shape analysis created by lightning and propagating in earth lower ionosphere waveguide

22 p3941 A69-40961

Solar L alpha and X ray emission contribution to lower ionosphere ion production, discussing altitudinal, latitudinal and temporal variations

22 p4008 A69-41096

Lower ionosphere vertical wind velocity profiles determined from rocket-released grenade glow cloud photographs, developing cloud buoyancy effect empirical model

23 p4154 A69-41305

WE and SN wind components models from 60 to 130 km for different months and latitudes, discussing meridional and interhemispheric circulations

23 p4154 A69-41306

Thermotidal energy transfer from lower neutral atmosphere to and above lower ionosphere, considering tidal wave transmission mechanism

23 p4155 A69-41561

Earth sphericity and earth-ionosphere waveguide effects on terrestrial atmospherics, deriving form by computer

23 p4157 A69-41860

Ionospheric electron content and distribution at low altitudes from satellite S 66 data, describing seasonal variations of equatorial anomaly peak

24 p4367 A69-43010

Lower ionosphere atmospheric density, temperature and pressure profiles diurnal variations from data of radio meteor echoes

24 p4311 A69-43504

LOX [OXYGEN]

U LIQUID OXYGEN

LOX-HYDROGEN ENGINES

U HYDROGEN OXYGEN ENGINES

LRC CIRCUITS

U RLC CIRCUITS

LRV [VEHICLE]

U LUNAR ROVING VEHICLES

LSI

U LARGE SCALE INTEGRATION

LUBRICANT TESTS

Sulfide addition agents for diester lubricating grease and organic resin solid film lubricants, noting formulation and tests for steel and molybdenum

01 p0102 A69-10907

Low speed four-ball lubricating oil testing machine eliminating thermal effects associated with frictional heating for load carrying capacities of thin lubricant films

07 p1140 A69-18968

Bearing deposition test for evaluating degradation characteristics of aircraft gas turbine engine lubricants

10 p1700 A69-24070

Dry lubricant films of soft metals, self lubricating plastics and crystalline powders, noting design and tests

15 p2642 A69-30328

Test methods for lubricants vapor pressure and flash point determination

[ASLE PAPER 68-LC-23] 15 p2642 A69-30607

Lubrication properties of mineral oils for power hydraulics using Stanhope-Shell four ball test machine

17 p2991 A69-32948

Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether

[ASME PAPER 69-LUBS-18] 18 p3140 A69-34378

Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F

18 p3149 A69-35177

Aircraft gas turbine engine lubricant evaluation and systems design from standpoint of effective oil life and lubricant stability requirements

[SAE PAPER 690424] 23 p4200 A69-41648

LUBRICANTS

NT GAS LUBRICANTS

NT HIGH TEMPERATURE LUBRICANTS

NT LUBRICATING OILS

NT SOLID LUBRICANTS

Friction and wear behavior of mechanical face seals, considering techniques and lubricants for increasing product of pressure and sliding velocity

02 p0253 A69-12160

Idealized slider bearings with Maxwell liquid as lubricant, analyzing elasticity effects on pressure, load capacity and friction

02 p0253 A69-12413

Sodium nitrite and sodium stearate as grease additives for lubrication of ball bearings running in helium

[IME PAPER 1] 07 p1137 A69-18559

Bearing lubrication at low temperature, examining safety limits, working fluid in liquid or gaseous state

[IME PAPER 9] 07 p1138 A69-18565

Liquid and vapor phase microscale panel cokers applied to screening synthetic lubricants for aircraft turbine engines

[ASLE PAPER 68-LC-22] 07 p1140 A69-19309

Pressure properties of fluorides and silicofluorides as cutting and grinding lubricants for titanium

[ASLE PAPER 68-LC-20] 07 p1141 A69-19311

Angular inertia of lubricant in MHD hydrostatic thrust bearings, obtaining critical angular speed of rotor

09 p1503 A69-21443

Load support and leakage from microasperity lubricated face seals, developing hydrodynamic lubricant films

[ASLE FICFS PREPRINT 21] 15 p2622 A69-30500

Test methods for lubricants vapor pressure and flash point determination

[ASLE PAPER 68-LC-23] 15 p2642 A69-30607

Synthetic lubricants characteristics and aircraft applications, describing common products and properties

18 p3163 A69-35481

Wear resistance of briquetted lubricants from fluoroplast and molybdenum disulfide under pressure

21 p3733 A69-39805

LUBRICATING OILS

Erosion damage of bearing alloy lining in thin lubricating oil film, considering Cu-Pb alloy and tin base white metal

01 p0094 A69-10313

Mechanical properties of free rolling contact surfaces subject to high loads, discussing effect of oil film separation and fatigue crack initiation

02 p0339 A69-11989

Thin film lubricant effect on machine dynamic performance, proposing inclusion with machine structure for reducing vibration effect

03 p0435 A69-13948

Quantitative amounts of contaminants oil from piston engine and life of oil lubricant in engine

04 p0604 A69-14500

Oil lubricant vapors under frictional working conditions in vacuum analyzed by mass spectrometer and gas-liquid chromatography concerning molecular weight and composition

[IME PAPER 11] 07 p1137 A69-18558

Analytic solution for whirl in finite journal bearing with continuous lubricating film using Fedor approach [ASME PAPER 69-VIBR-55]

10 p1700 A69-24147

Spectrometric oil analysis procedure /SOAP/ for predicting failure of oil wetted parts in small turboprop aircraft engines

[SAE PAPER 690325] 11 p1941 A69-24508

Load capacity, stiffness and flow requirement of capillary and orifice compensated oil lubricated externally pressurized rectangular thrust bearings

12 p2102 A69-26239

Physicochemical and operational properties of trimethylol propane esters as lubricating oils under static and dynamic conditions

12 p2103 A69-27090

Life margin tests of oil lubricated oscillating caged needle roller bearings under service conditions duplicating helicopter rotor hinge pin locations

[ASLE PAPER 68-LC-7] 15 p2622 A69-30609

Jet engine intershaft bearing oil feed design, discussing use of nonrotating feed link and improvement of oil scavenging at high altitudes

15 p2671 A69-30702

Hydrodynamic conical and spherical spiral grooved grease bearings replacement of gyro ball bearings for extended space missions

[AIAA PAPER 69-836] 21 p3732 A69-39367

Engine oil analysis applied to commercial airline operations, ensuring lubricating qualities retention and detecting oil-wetted component failures

[SAE PAPER 690423] 23 p4169 A69-41647

Aircraft gas turbine engine lubricant evaluation and systems design from standpoint of effective oil life and lubricant stability requirements

[SAE PAPER 690424] 23 p4200 A69-41648

Oil high temperature and oxidation conditions in aircraft piston engines, including physicochemical changes

24 p4321 A69-43141

LUBRICATION

NT BOUNDARY LUBRICATION

NT SELF LUBRICATION

NT SPACECRAFT LUBRICATION

Ball bearings lubrication and wear in cryogenic hydrogen turbopumps by transfer films provided from self lubricating cage

01 p0084 A69-10109

Radial face seals lubricating mechanism noting surface waviness effect on film thickness fluctuations

01 p0087 A69-10910

Jet fuel lubricity evaluation by ball-on-cylinder device

[ASLE PREPRINT 68AM 4A-2] 01 p0083 A69-10914

Elastohydrodynamic lubrication, discussing film thickness and dependence on fluid hydrodynamics and contact zone deformation

01 p0088 A69-11324

Rayleigh step journal bearings, considering pressure distribution, load capacity and attitude angle and optimal film thickness ratio for incompressible fluid lubrication

04 p0605 A69-14587

Dynamic and interfacial fluid effects in mechanical face seals, discussing hydrodynamic pressure generation

04 p0606 A69-14798

Transverse magnetic field effect on three dimensional nonisothermal lubrication layer of conducting gas at small magnetic Reynolds number

04 p0607 A69-14990

Miniature ball and jewel bearings and gear lubrication in ultrahigh vacuum tests for space environment operation

[IME PAPER 6] 07 p1138 A69-18562

Rotors linear vibrations due to unbalanced shaft rotating on lubricated bearings taking into account lubricant damping

07 p1235 A69-19441

Lubrication and operation of Hamilton Standard propellers in high altitude and low temperature environments

[SAE PAPER 690323] 11 p1822 A69-24515

- Elastohydrodynamic lubrication of square section high pressure face seals mounted on rigid housings, considering design charts for load and leakage [ASLE FICFS PREPRINT 16] 15 p2621 A69-30493
- Lubrication - Conference, Atlantic City, October 1968 15 p2622 A69-30604
- Lubrication and lubrication systems literature including compressible and incompressible fluid films, automotive, bearing, gear, friction, wear and boundary lubrication, seals and sealing systems 15 p2628 A69-30900
- Contact conformity effects on spinning torque and friction coefficient in angular contact ball bearings from lubricated and unlubricated tests [ASME PAPER 68-LUB-10] 15 p2628 A69-30901
- Elastohydrodynamic lubrication film thickness in finite elliptical contact determined by two dimensional Reynolds equation in inlet region, using finite difference approximation [ASME PAPER 69-LUBS-17] 18 p3120 A69-34379
- Ball bearing lubrication simulation by rolling disk apparatus, emphasizing surface slip and related thermal effects alterable by geometric expansion [ASME PAPER 69-LUBS-16] 18 p3140 A69-34380
- Elastohydrodynamic solution for ball torque spinning without rolling in nonconforming groove, showing increase in torque with stress and spinning and decreasing conformity [ASME PAPER 69-LUBS-11] 18 p3140 A69-34381
- Elastohydrodynamic theory of spherical bodies in normal approach contact, discussing lubrication and elasticity equations [ASME PAPER 69-LUBS-3] 18 p3213 A69-34384
- Finite element method application to minimum principle for incompressible lubrication problem, noting flow boundary conditions and squeeze film effects 22 p3955 A69-40406
- Pressure distribution in gas lubrication layer of infinite radial sliding bearings, approximating differential equation by simple formulas 23 p4168 A69-41412
- High speed radially resistant ball bearing, analyzing effect of lubrication film on axial rigidity 23 p4169 A69-41555
- Elastohydrodynamic lubrication of cylindrical rubber surface sliding over glass plate, using optical interference technique 23 p4171 A69-42531
- LUBRICATION SYSTEMS**
- Space lubrication system for Orbiting Solar Observatory program, discussing theoretical high vacuum principles and flight performance and environmental test data 02 p0252 A69-11766
- Optimum geometrical design of multipad externally pressurized journal bearings 07 p1141 A69-19439
- Lubrication systems for high speed machinery, discussing wet and dry sump arrangements, gearbox heat rejection, oil flow requirements, X-22A aircraft, etc [ASME PAPER 69-DE-65] 14 p2454 A69-28845
- Face seals for jet engine mainshaft bearing compartments, emphasizing oil film and gas film seals [ASLE FICFS PREPRINT 28] 15 p2620 A69-30487
- Lubrication and lubrication systems literature including compressible and incompressible fluid films, automotive, bearing, gear, friction, wear and boundary lubrication, seals and sealing systems 15 p2628 A69-30900
- Electromagnetic field pumping effects in electrically conductive gas lubricants, producing gas film between surfaces without external pressurization 15 p2629 A69-31003
- Aircraft engine lubrication system design, discussing bearings reduction, oil compartment scavenging, scaling, cooling, pressurization, etc 18 p3185 A69-35244
- Aircraft engine lubrication system design, discussing bearings reduction, oil compartment scavenging, scaling, cooling, pressurization, etc 24 p4363 A69-42780
- Total load factor static vertical component and lubricant flow rate square related to pocketed hydrostatic journal bearing revolutions 24 p4321 A69-43091
- LUCITE [TRADEMARK]**
U POLYMETHYL METHACRYLATE

- LUDER BANDS**
U PLASTIC DEFORMATION
U YIELD POINT
- LUMENS**
Coronary vessel lumen changes under oligemic hypotension resulting from circulating blood volume decrease in anesthetized cats, discussing constrictory coronary vessel responses 23 p4084 A69-41470
- LUMINAIRES**
U ARC LAMPS
U FLASH LAMPS
U MERCURY LAMPS
U QUARTZ LAMPS
U RUNWAY LIGHTS

01 p0128 A69-10347
- Intense laser emission interaction with current carriers in semiconductors, analyzing dependence of thermoelectric field produced by light absorption on intensity, frequency and temperature
01 p0139 A69-10895
- Thermoluminescence intensity of dolomite specimens from Kaali meteorite craters, discussing meteorite impact thermomechanical effect and crystal lattice defects
01 p0159 A69-11371
- Mean annual intensity distribution of 5303 angstrom coronal line on solar limb determined for 11-year solar activity cycle
03 p0506 A69-13084
- Particle size distribution determination by measuring light beam extinction in turbid medium with photometer
03 p0428 A69-13110
- Intensity of visible and UV light from beam of positive deuterium molecular ions excited by passage through thin C foil
03 p0471 A69-13166
- Zodiacal light isophotes and near-earth component from relationship between brightness at various geomagnetic latitudes and position of moon
03 p0512 A69-13693
- Q switches transparency as function of incident light intensity
04 p0610 A69-14385
- Optical generation in organic luminophor solutions in 400-650 nm range
04 p0612 A69-15374
- Aircraft instrument panel lighting color and intensity preference by pilots for taxiing, takeoff, cruising flight and landing
05 p0715 A69-16622
- Flare star AD Leo observations by continuous photoelectric monitoring, noting light curves properties
06 p1008 A69-17697
- Laser applications to situations requiring highly bunched high power density light beams
06 p0938 A69-18012
- Photographic investigation of gegenschein and cloud satellites at L sub 5 earth-moon libration point, noting gegenschein intensity peak
07 p1212 A69-18602
- Nightglow intensities correlated with atmospheric ozone concentration and stratospheric temperatures
07 p1123 A69-18675
- Solar eclipse variations of E layer critical frequency explained by quasi-equilibrium between electron density and ionizing soft X ray radiation
07 p1204 A69-18823
- Laboratory measurement data of low light level TV performance converted to anticipated real world performance data
07 p1132 A69-18948
- Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation
07 p1177 A69-19208
- Luminosity distance, distance by apparent size, number counts, background radiation and apparent angular motion of sources in homogeneous anisotropic model universe
07 p1218 A69-19282
- Simultaneous photographic and radar observations of meteors, determining absolute stellar magnitude of meteor as function of parameters
08 p1390 A69-20337
- Natural intensity fluctuations spectrum of He-Nc laser, determining modulation coefficient dependence on output
08 p1325 A69-20431
- Light intensity dispersion logarithm calculated along axis of laser beam propagating in atmosphere
08 p1351 A69-20437
- Picosecond light pulse generation by solid state laser interpreted by fluctuating intensity spikes arising from random emission interference in out-of-phase modes
08 p1326 A69-20548
- Kine films of gas flows within highly luminous transient arc taken by laser schlieren technique
08 p1316 A69-20615
- Solar phenomena correlation with brightness variations of comet Alcock 1963b, noting sunspot maximum followed by maximum in absolute magnitude of comet
08 p1394 A69-20620
- Strong light flashes from pulsar NP 0532 in Crab Nebula, noting UVB photometric analysis of nebular brightness
08 p1394 A69-20623
- Luminous discharge at nonabsorbing surface when exposed to single pulse ruby laser beam, suggesting photoionization in surface layer
08 p1327 A69-21021
- Whipple and Douglas-Hamilton systematic corrections for periodic comets, considering constant coma brightness of P/Tempel 2 since 1874-1904 observations
08 p1408 A69-21137
- Differential brightness of night airglow spectrum, obtaining rotational temperature by comparison with synthetic spectra
09 p1488 A69-21656
- Bright celestial IR sources in Ursa Major detected in spectral region by rocket-borne telescope, discussing luminosities of quasi-stellar sources
09 p1603 A69-22230
- Gamma ray luminosity of typical type I supernovae remnant computed by assuming Ni 56 radioactive decay energy origin of optical luminosity
09 p1581 A69-22409
- Bolometric luminosity-red shift relations of Friedmann dust universes corrected for inhomogeneities, using locally inhomogeneous Swiss cheese models
09 p1605 A69-22411
- Liquid laser gain measurement via luminescence intensity, noting optical pumping thermal effect
09 p1520 A69-22683
- Radiometric observations of Venus brightness temperature variation used to determine phase effect at 8.6 mm wavelength
10 p1773 A69-22959
- Maximum indicative absolute magnitudes of 33 supernovae, discussing usefulness as distance indicators
10 p1774 A69-22967
- Magnetograph in Italian observatory for weak solar magnetic field longitudinal components avoiding differential amplifier by electronic compensation
10 p1693 A69-23311
- Dark adaptation mechanisms studied from light intensity recovery after experimental flash, using electroretinography methods
10 p1647 A69-23588
- Intensity interferometry by two photon excitation of fluorescence trace for three mode laser under phase locking, free running and FM-like conditions
10 p1705 A69-23811
- Moving striations in plasmas, presenting measurements of relative phases of electron temperature, plasma potential and luminous intensity near Pupp current limit
10 p1741 A69-23859
- Radar and photographic studies of meteors from Leonid and Perseid showers, presenting velocities, luminescence and ionization
10 p1783 A69-23895
- Light flux intensity fluctuation dispersion and averaging effect for passage through circular receiving aperture
10 p1658 A69-23950
- Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem
10 p1689 A69-23970
- Center to limb variations of sunspot-photosphere brightness ratio, considering umbra darkening and radiative equilibrium
11 p1946 A69-24426
- Photoelectric measurements of nightglow intensities during sunspot minima by zenith photometer, considering background continuum
11 p1877 A69-24584
- Transistorized electrophotometer for polarimetric and photometric analysis of weak light fluxes, noting pulse amplifying and shaping circuits
11 p1884 A69-24735
- Tilting filter photometer for faint light source spectrophotometry, discussing digital approach used with photomultipliers
11 p1884 A69-24834
- Model for radiative transfer in atmosphere-ocean system by Monte Carlo method, considering Rayleigh and Mie scattering
11 p1877 A69-24851
- Evolutionary stages of visual binary components based on magnitudes and color indices
11 p1962 A69-25111
- Pulsars and ancient chinese records of supernova explosions, relating luminous intensities, radio sources and evolution
11 p1963 A69-25253
- Radioactive light sources in photoelectric photometry, analyzing characteristics, brightness and stability of light flux and energy spectrum
11 p1951 A69-25421
- Photoelectric polarimeter to record sky light intensity in form of polarized components, detailing construction and operation
12 p2078 A69-25892
- Nightglow intensity variations at sunspot minimum from measurements in South West Africa, considering relationship to ionospheric vertical movements and density variations
12 p2066 A69-26133
- Standard phenomenological laser rate equations for population inversion and light intensity generalized by

considering intensity dependent losses and Einstein coefficients

12 p2110 A69-27014

Spiral galaxy nuclei, relating nuclei luminosity to galactic luminosity

12 p2165 A69-27028

Photographic magnitudes of galactic nuclei, presenting plots for stellar magnitude distribution of galactic nuclei

12 p2165 A69-27029

Radio galaxy identification and luminosity measurement, noting limitations of red shift observation methods

12 p2165 A69-27032

Absolute radio luminosity relation to surface brightness of extragalactic radio sources, finding volume radiation coefficient of spiral and radio galaxies

12 p2166 A69-27035

Luminosity changes in quasar 3C 273, describing corrections introduced into luminosity curve obtained by iris photometer

12 p2167 A69-27044

Quasar properties from cosmological nature, discussing red shift, luminosity, radiation intensity, absorption features, distribution, chemical composition, etc

12 p2168 A69-27049

Galaxies NGC 4402 and NGC 4438 structure, luminosity and color from two color photometric study of Virgo cluster center

12 p2169 A69-27058

Photoelectric observation of RR Lyrae stars in globular clusters to estimate reddening near galactic poles, considering color indices

12 p2172 A69-27157

Recently discovered comets including Comet Thomas, discussing magnitudes and perihelions

12 p2172 A69-27161

Light curve shape as function of color, changing period and polarization angle of Crab Nebula optical pulsar

12 p2172 A69-27170

Optical identification of radio source 3C 230, suggesting removal from quasar list

12 p2173 A69-27171

Star twinkling absence for lunar observation laboratory, noting star distance measurement and laser action in stellar atmospheres

12 p2173 A69-27172

Relative intensities of selected Si two multiplets calculated and compared with solar spectrum and plasma source ZETA values

13 p2326 A69-27551

Galactic H II regions of high surface brightness in radio continuum surveyed at 1.95 cm wavelength with high resolution and positional accuracy

13 p2339 A69-27568

Optical wavelength backscattering functions for nebulae in Pleiades cluster, noting color differences and surface brightness

13 p2340 A69-27577

Auroral luminosity determination by two photometers from ESO 1 satellite

13 p2253 A69-27752

Photometric data and law of rotation in symmetry plane for constructing mathematical model of mass and luminosity distribution in M 31

13 p2351 A69-27870

Q switches transparency as function of incident light intensity

14 p2456 A69-28758

Mean annual intensity distribution of 5303 A coronal line on solar limb determined for 11-year solar activity cycle

14 p2515 A69-28766

Photoelectric observations of NGC 1275, noting increase in nucleus brightness

14 p2517 A69-29086

Emission line fluxes of southern planetary nebulae in Magellanic Clouds and Galaxy measured photoelectrically, giving upper limit to H beta emission of Magellanic planetary

14 p2520 A69-29376

Ruby laser reflected and transmitted light intensity following radiation focusing on cuvette containing cyclohexane, noting dependence on incident pulse power

14 p2459 A69-29392

Photoelectric observation of passage of stars through meridian, detailing error sources and corrective technique

14 p2521 A69-29507

Luminescent material density distribution in comet Arend-Roland 1956h head determined from observed brightness variation with distance

14 p2524 A69-29711

Plasma electron temperature determination by line intensity ratio of beryllium-like ions, noting excitation functions

14 p2496 A69-29789

Light emission intensity correlation functions associated with LF oscillations in beam plasma discharge

14 p2498 A69-29814

Amplitude and scale of microscopic fluctuations of electron density within M8 from brightness ratios of O II lines, using multiple shell model

14 p2514 A69-29949

IQSY night airglow photometric observations, summarizing zenith intensity and north/south intensity ratio data

15 p2594 A69-30019

Measured atmospheric refraction of bright astronomical objects less than calculated data for large zenith distances

15 p2679 A69-30161

Secular decline in absolute brightness of comet Encke from photometric curves obtained during past and present century

15 p2684 A69-30518

Surface brightness distribution in comet Arend-Roland tail from diffusion model and photometric investigation of photographs obtained by 40-cm astrograph

15 p2684 A69-30519

Seyfert galaxy NGC 4151 electrophotometric investigation in UVB, confirming nucleus optical variability observed in visible and IR

15 p2686 A69-30536

Radial brightness and color variation curves for Seyfert galaxies plotted from measurements with concentric diaphragm in UVB

15 p2686 A69-30537

Crab Nebula lunar occultation observed by Cassegrain array of deep space communication facility, finding radio brightness distribution similar to optical

15 p2687 A69-30539

Planet Mars stellar magnitude found dependent on processes occurring in atmosphere and at surface

15 p2689 A69-30566

Cometary tails maximum lengths compared with orbit parameters and absolute magnitudes, proposing classification scheme

15 p2689 A69-30566

Earth reflected solar radiation spatial, angular and spectral distributions measured by telephotometers onboard Cosmos 149

15 p2596 A69-30650

Rotation curve, mass and M/L ratio of Sc galaxy NGC 6574, discussing nucleus and systemic velocity

15 p2691 A69-30764

Scintillation magnitude related to range and turbulence strength in near earth optical propagation, using pulsed and helium-neon laser

15 p2570 A69-31030

Light intensity during coherent scattering based on complex refraction index of medium, noting scattering by clouds and diffraction by semitransparent hole

15 p2635 A69-31108

Spectrum of clipped noise in optical spectroscopy, considering double clipping at zero photon number

15 p2571 A69-31486

Optical generation in organic luminophor solutions in 400-650 nm range

16 p2797 A69-32121

Sudden enhancement of atmospheric recorded during IGY, noting time lag between flare and SEA maximum

16 p2778 A69-32192

Spectroscopic observations of HD 4174 star by superimposition of emission and M1-I absorption spectra, revealing intensity and radial velocity variations

16 p2858 A69-32214

Four color photoelectric photometry of bright galaxies in Virgo Cluster, analyzing properties in nuclear regions

16 p2860 A69-32230

Transition probability for 5577 A auroral green line determined from measuring number density of O atoms in oxygen-helium discharge and emitted line intensity

16 p2781 A69-32319

Increase or decrease in light absorption by plasma particles found dependent on laser intensity level

16 p2797 A69-32382

High intensity light adaptation effects on visibility of raster scan, TV type and avionic displays for symbol luminance needs

16 p2746 A69-32788

Time variation of optical intensity of Sco X-1 X ray source, evaluating photometric data by power spectral analysis

16 p2852 A69-32805

Line width and intensity correlation of laser radiation noting damping constant

17 p2980 A69-33012

Holography of intensities, discussing recording of self luminous body by modulation of scattered radiation using optical Q switch

17 p2973 A69-33113

Lunar surface brightness temperatures from IR observations, determining thermal emission directional characteristics to infer surface temperatures from Surveyor data

[AIAA PAPER 69-593]

17 p3033 A69-33302

Br molecular dissociation rate in argon excess determined, considering visible emission intensity behind shock front

18 p3176 A69-34465

Eyewitness data concerning bright bolide observed over Dzhaus /Uzbek SSR/, tabulating estimations for occurrence time, light duration, color, sound and trajectory azimuths

18 p3196 A69-34536

Intensity changes in visible sidelight emission from carbon dioxide laser switched on and off, calculating vibrational temperatures

18 p3153 A69-35243

Emission line spectrum for ionization and excitation in solar coronal structures, tabulating intensities from ground based eclipses observations

19 p3422 A69-36217

Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations

19 p3422 A69-36219

Collisional excitation of forbidden lines in planetary nebulae from 5537/5517 intensity ratio measurements, noting density and intensity relationship

19 p3422 A69-36221

Intensity variations of Eta Carinae emission lines

19 p3423 A69-36231

Spiral galaxy linear diameter relation to luminosity applied to Virgo galactic clusters, noting effect on distance modulus and Hubble constant

19 p3427 A69-36652

He-Ne laser output intensity saturations in presence of axial magnetic field, noting moving and fixed minima

20 p3553 A69-37433

Spectroscopic and photographic observations of compact galaxies, discussing distances, absolute magnitudes, linear dimensions, Hubble diagram position and correlations with objects showing similar characteristics

20 p3600 A69-37483

Lunar brightness variations during eclipse on 13 April 1968 measured photoelectrically, suggesting nonuniform diurnal distribution of atmospheric scatterers for observed asymmetry

20 p3601 A69-37510

Dynamic cathode ray tube spot size measurement by two slit technique, noting relationship to beam current and luminance

21 p3719 A69-38329

Rocket observation of ionospheric electron and positive ion densities and dayglow emission intensities in twilight conditions

21 p3702 A69-38355

Rocket photometer observations of midnight atomic oxygen glow at 6300 A during ascending and descending flights

21 p3703 A69-38360

Spectrum, latitude dependence and diurnal variation of night airglow emission, noting space and time correlation and magnetic activity relationship to luminous intensity

21 p3711 A69-38514

Luminous efficiency for electron induced molecular nitrogen bands, discussing thick- and thin-target measurements of fluorescent efficiencies

21 p3774 A69-38521

Optical observations of pulsar NP 0532, comparing light curves in IR and UV, noting polarization

21 p3799 A69-38645

Emission band intensities of carbonyl fluoride in 2.0-6.0 micron region with scanning spectrometer, comparing results for room and shock temperature with theoretical data

21 p3669 A69-38759

Arend-Roland comet head luminescence intensity, considering radiation scattering by dust component

21 p3804 A69-39080

Rotation effect of secondary principal axes in scattered light photoelasticity by dual observation method, deriving light intensity
21 p3844 A69-39317

Light sources with uniform variable luminance field designed for calibrating cameras used in space exploration
21 p3726 A69-39580

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem
21 p3717 A69-39656

Mode locked laser output intensity, studying effect of random phase variations on pulses
21 p3741 A69-39684

Quantitative analysis of light intensity dependent changes in optical rotation angle of isotropic media caused by laser beam
22 p3959 A69-40017

Low light level TV systems for military uses, describing design and operation of various image intensifier tubes
22 p3945 A69-40141

Cavity Q dependence of intensity of single mode He-Ne laser above threshold for quantum and semiclassical theories
22 p3961 A69-40415

Radio observations of elliptical and spiral noncluster galaxies, noting correlation between magnitude and radio emission in elliptical galaxies
22 p4025 A69-40639

Amplification coefficient, luminescence power and spacing between Fermi quasi-levels in GaAs diode injection lasers, using spectral absorption dependence
22 p3965 A69-40801

Local electroretinogram responses produced in cats by light intensity incremental changes
22 p3878 A69-40835

High intensity flash effects on local electroretinogram, late receptor and slow potentials and ganglion cell activity in area centralis of cat retina
22 p3883 A69-40882

Light field long term behavior in dispersive medium with finite optical thickness by asymptotic solution of unsteady transport equation
22 p3983 A69-41267

Nonlinear intensity transitions involving order of magnitude increases in visible luminosity of RF generated plasmas, noting inductive field and electron density influence
23 p4196 A69-41546

Autonomous circadian rhythm in man under complete isolation and light-dark cycles and illumination intensity changes
23 p4094 A69-42071

Rod signals elicited by flashes in human eye measured, deriving relation between nerve signal size in rods and flashes energy
23 p4099 A69-42119

IR excess of R CrB type variable star RY Sgr, noting visual brightness and radiation in 2.0-3.4 micron range
23 p4220 A69-42377

Physiological circadian rhythms in isolated and nonisolated Macaca Nemestrina living under varied light intensities, noting telemetered deep body temperature, urine volume and sodium, etc
24 p4261 A69-42707

Instrumentation and data interpretation method for particle size determination by low-angle light scattering
24 p4313 A69-42764

Laser granularity effects on brightness discrimination [AAS PAPER 69-464]
24 p4272 A69-42843

LUNAR ATMOSPHERES

Lunar surface gas adsorption mechanism for lunar atmosphere absence
05 p0824 A69-16062

Lunar atmosphere molecule and atom concentration from isotropic and uniform surface evaporation due to micrometeorite impact
10 p1783 A69-23921

Lunar surface gas adsorption mechanism for lunar atmosphere absence
15 p2680 A69-30261

Gas particle concentrations on moon due to solar wind, surface emissions and atmospheric contamination by lunar operations and rocket motor products
18 p3189 A69-34236

LUNAR BASES

Lunar surface power plants, considering weight constraint for various systems using nuclear power, solar cell/fuel cells and H₂O reactant regeneration
01 p0013 A69-11396

Stellar photometry during occultations by earth, discussing feasibility of lunar based observations
13 p2345 A69-27651

Lunar colony development, detailing construction of permanent lunar bases taking into account oxygen, food, water, power and transportation
13 p2240 A69-27906

Lunar soil as building material and extraction of water, oxygen and rocket propellants from lunar materials for lunar colony needs
13 p2352 A69-27907

Lunar based physics and chemistry, discussing exploration of and survival in lunar environment
18 p3112 A69-34235

Lunar laboratory physical and chemical experiments including scattering phenomena, molecular and atomic beams and gas cloud photochemistry
18 p3113 A69-34237

Metagalactic light measurements by lunar based night sky photography
18 p3189 A69-34242

Lunar based optical workshop and repair facility, using ion beam technique to polish and repair optical element surfaces
18 p3113 A69-34243

Manned lunar bases from legal viewpoint, discussing national jurisdiction, personnel policies, mineral rights, etc
20 p3637 A69-37119

Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc
23 p4211 A69-41477

Design, fabrication and evaluation of lunar base solar array power modules, emphasizing structural/dynamic, thermal vacuum and acoustic tests
23 p4072 A69-42288

Electrical power system synthesis for manned lunar base for surface explorations of increasing energy requirements and duration, discussing thermal control, reliability, etc
23 p4076 A69-42541

Manned facilities design, construction and maintenance on extraterrestrial bodies, discussing astrophysical and lunar surface data requirements [AAS PAPER 69-208]
24 p4296 A69-42875

Optimal design and materials for cryogenic storage of O and H on lunar surface [AAS PAPER 69-051]
24 p4296 A69-42882

LUNAR COMMUNICATION

Radio wave scattering characteristics of lunar surface in 3 cm wavelength by Luna 8 and Luna 9 automatic stations and Surveyor spacecraft
15 p2571 A69-31359

LUNAR COMPOSITION

Lunar composition analysis by measuring atomic and nuclear radiation emission from orbiter [AAS PAPER 68-197]
02 p0312 A69-11475

Surveyor 6 magnet experiment following lunar landing, noting presence of magnetic material in Sinus Medii indicating basaltic composition
02 p0317 A69-12015

Surveyor 5 alpha particle backscattering instrument measurement, TV pictures of lunar surface elemental composition and magnetic and mechanical measurements
02 p0317 A69-12023

Surveyor 5 Mare Tranquillitatis landing site similarity to Oceanus Procellarum sites, discussing surface material elemental composition and lunar structure
02 p0321 A69-12224

Large scale lunar surface photographs for estimating conical formations identified with terrestrial stratovolcanoes
03 p0507 A69-13093

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light
04 p0658 A69-14958

Possible evolution of earth continents and ocean basin, considering ultrabasic, basic, and intermediate to acidic lunar highlands chemical composition
06 p1000 A69-17006

Lunar rock composition monitored by Luna 9 and 13 soft landed lunar probes [UN PAPER 68-95769]
06 p1000 A69-17041

Origin of moon indicating pristine structure on basis of mascons, alpha scattering and crater formation
06 p1001 A69-17160

Cosmic ray induced radioactivity in lunar surface and meteorites calculated together with cosmic ray intensity variations
10 p1756 A69-22817

Lunar surface chemical composition using RF mass spectrometer
10 p1698 A69-24207

Densor material beneath lunar maria revealed by precise tracking of lunar orbiting spacecraft, discussing geology and evolution
11 p1953 A69-24339

Lunar surface pore water/or ice/ detection by active orbital or surface electromagnetic experiments, noting water effect on reflection coefficient
11 p1958 A69-24693

Moon internal structure, discussing aggregation origin of Moon parallel to earth and three layer model of nife core, sima mantle and porous sheath
12 p2160 A69-26896

Large scale lunar surface photographs for estimating conical formations identified with terrestrial stratovolcanoes
14 p2516 A69-28775

Spectral reflectivity differences /color differences/ on lunar surface in visible region, indicating compositional difference origins
17 p3037 A69-33653

Gas chromatograph-mass spectrometer combination for in situ analysis of lunar organic matter, describing instrument design and operation
18 p3113 A69-34238

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light
18 p3196 A69-34721

Lunar interior chemical heterogeneity determined from model taking into account pressure, temperature and composition effects
19 p3425 A69-36421

Mare Tranquillitatis surface chemical composition data from Surveyor 5, comparing element abundances with meteorites and terrestrial rocks
20 p3601 A69-37517

Moon composition and similarities to Mars explained by silicates in solar system raw material
20 p3604 A69-37563

Visible and IR spectral reflectivity of Apollo lunar landing sites, attributing reflectivity differences to compositional and/or mineralogical differences
21 p3815 A69-39586

Lunar rocks types determination by mass spectrometry, describing results of terrestrial rocks tests
22 p4034 A69-41106

Model of moon accumulated at low temperatures, discussing lunar surface layer characteristics
24 p4383 A69-42936

LUNAR CRATERS

NT TYCHO CRATER

Crater Copernicus photograph, discussing misinterpretation of Orbiter 2 lunar surface photograph on basis of effective temperature contours analysis
01 p0154 A69-10898

Lunar rays nature from terrestrial observations and surface photographs by lunar probes, noting high crater concentration structure
02 p0236 A69-11642

Lunar crater formation studied to explain distortion in large craters or maria, discussing mass concentrations indicated by positive residuals of gravimetric map
04 p0654 A69-14632

IR observations of lunar crater and maria enhanced thermal emission during eclipse, constructing model of cratered surface to analyze thermal behavior
04 p0654 A69-14656

Lunar craters compared with underground explosion craters on earth, determining criteria for identifying explosion craters on moon
04 p0656 A69-14670

Lunar intermare crater density variations data tabulation, presenting quantitative and qualitative estimates
04 p0656 A69-14671

Lunar crater count observations of mare surface and ejecta blanket in Orientale basin
04 p0656 A69-14672

Lunar premare and postmare craters distributions, discussing latitude independence and sources of impacting bodies
04 p0656 A69-14673

Lunar crater densities inside Tycho, Aristarchus and Copernicus
04 p0656 A69-14674

Statistics of central peaks in lunar craters drawn from catalog
04 p0656 A69-14675

Mountain structures surrounding lunar craters, discussing possible origin by impacting planetesimals shock waves
04 p0661 A69-15142

Mare Orientale basin satellite photographs suggest asteroid impact formation

04 p0664 A69-15421

Collapse theory of dimple craters, analogies with terrestrial sink holes and dimple craters as channels for gas escape from interior

05 p0818 A69-15589

Origin of moon indicating pristine structure on basis of mascons, alpha scattering and crater formation

06 p1001 A69-17160

Nature and origin of lunar far side Tsiolkovsky crater

06 p1003 A69-17386

Elastic limit of lunar outer layer determined from analysis of lunar crater dimensions variations as functions of diameter

07 p1212 A69-18600

Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density

07 p1213 A69-18604

Meteor explosion theory of origin of lunar craters and round maria, suggesting endogenic origin

10 p1784 A69-23960

Volcanic origin of lunar crater Dawes based on photogeological evidence obtained from Lunar Orbiter 5 photographs

11 p1952 A69-24264

Lunar far side craters profile and structure determined from Zond 3 photographs using photometric method

11 p1959 A69-24725

Lunar far side craters vertical profiles plotted from photometric cross sections of Zond 3 photographs

11 p1959 A69-24726

Lunar surface layer structure by statistical analysis of data concerning craters and stones distribution as shown by lunar orbiter photographs

12 p2154 A69-25816

Lunar thermal anomalies in various craters observed during lunar night by IR methods, with data suggesting hot and cold regions

12 p2171 A69-27092

Lunar craters circularity measurements relation to age, discussing fracture system and stress history associated with mare formation

13 p2344 A69-27645

Lunar surface evolution, discussing relationship between craters erosional stage and areal density

14 p2528 A69-29947

Lunar relief mechanism based on experimental cratering by pasty projectiles, proposing terrestrial magma genesis

15 p2698 A69-31373

Orientation in proximity of moon and on moon surface utilizing maria, craters, etc

16 p2855 A69-31929

Giant lunar craters, discussing lunar age and defining surface steady state

16 p2863 A69-32404

Lunar rotation elements determined from distances between Moesting A and limb craters, using Iakovkin position angle method

17 p3028 A69-32876

Directional characteristics of lunar IR radiation accounted for by crater model [AIAA PAPER 69-598]

17 p3033 A69-33285

Temperature distribution in shadowed lunar craters formulated in Fredholm integral equations, showing constant temperature and correction for soil thermal inertia

17 p3033 A69-33291

Far and near side lunar crater chains regularities in distribution and size

18 p3202 A69-35329

Lunar rivers as coalesced chain craters resulting from gas emission along fracture beneath lunar regolith

18 p3205 A69-35436

Standing waves on moon, discussing annular and radial structures of lunar craters and global tectonic patterns

20 p3604 A69-37565

Crater distribution and population curves for Surveyor 1 vicinity, discussing Flamsteed P ring floor characteristics

21 p3800 A69-38675

Lunar near side crater overlap, considering formation of Tycho Association

21 p3800 A69-38676

Ephemeris calculations and lunar craters and reference stars coordinates measured from photographic plates, using digital computers

22 p4024 A69-40610

Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data

23 p4211 A69-41388

LUNAR CRUST

Lunar surface mechanical properties at Surveyor 5 site

02 p0321 A69-12225

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

03 p0506 A69-13088

Penetration type soil analyzer used by Luna 13 automatic lunar station for mechanical strength of lunar surface

03 p0430 A69-13424

Lunar surface layer density measured radiometrically with scattered gamma rays by Luna 13

03 p0430 A69-13425

Lunar surface formation, emphasizing density variations and mass concentrations

04 p0654 A69-14633

Lunar surface material chemical composition in lunar mare and on Tycho crater north rim, noting Surveyors 5, 6, and 7 alpha analyses

04 p0655 A69-14658

Mathematical density-depth model proposed for lunar outermost layer compared to Matveev model, noting Surveyor estimates

04 p0655 A69-14659

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light

04 p0658 A69-14958

Sinuuous rill and water distribution on lunar surface from Orbiter 4 high resolution photographs

05 p0818 A69-15606

Lunar surface gas adsorption mechanism for lunar atmosphere absence

05 p0824 A69-16062

Lunar history reexamination including added mantle convection and recent rocket data

05 p0825 A69-16303

Elastic limit of lunar outer layer determined from analysis of lunar crater dimensions variations as functions of diameter

07 p1212 A69-18600

Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density

07 p1213 A69-18604

Hypotheses concerning mechanism of lunar maria formation, discussing molten rock layer below lunar crust

10 p1782 A69-23710

Lunar surface layer structure by statistical analysis of data concerning craters and stones distribution as shown by lunar orbiter photographs

12 p2154 A69-25816

Martian diagonal and longitudinal-meridional canals mapped into grid systems, noting differences between Martian and lunar crusts tectonic activity

13 p2337 A69-27533

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

14 p2515 A69-28770

Lunar surface gas adsorption mechanism for lunar atmosphere absence

15 p2680 A69-30261

Lunar mascon origin from collisions of large masses with lunar surface

15 p2698 A69-31328

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light

18 p3196 A69-34721

Chemical analysis of lunar surface by devices exploiting alpha particle backscattering and proton production by alphas placed by Surveyor 5, 6 and 7

22 p4012 A69-40088

Electrical conductivity of uppermost lunar surface layers, indicating dry powdered rocks with frequency independent dielectric loss tangent

22 p4023 A69-40570

Undulating dunelike deposits of surface debris similar to base-surge deposits in maar volcanoes and tuff rings, discussing underground ice existence

23 p4216 A69-42203

Model of moon accumulated at low temperatures, discussing lunar surface layer characteristics

24 p4383 A69-42936

LUNAR DUST

Cumulative flux of interplanetary and cislunar space dust particles by Mariner 4 and OGO 3 spacecraft, noting particle impact rate

15 p2699 A69-31394

Picogram dust particle flux in selenocentric space measurement by Lunar Explorer 35, showing enhancement during meteor showers

15 p2699 A69-31396

Geocentric orbital elements determination of lunar particles expelled into space by meteorite impact, using spheres of influence method

18 p3202 A69-35330

Lunar morphology evolution by dust transport on surface, discussing possibility of fluidization

23 p4221 A69-42392

LUNAR ECHOES

Directly backscattered light /echoes/ from dielectric plane surface with roughness and volume scattering, comparing indicatrices with moon echo

06 p0887 A69-17173

Lunar surface pore water /or ice/ detection by active orbital or surface electromagnetic experiments, noting water effect on reflection coefficient

11 p1958 A69-24693

Apollo 11 moon reflector-laser beam experiment, discussing range changes produced by axial rotation and orbital motion and use for earth-moon dynamics

19 p3339 A69-36766

Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength

24 p4384 A69-43197

LUNAR ECLIPSES

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

03 p0506 A69-13088

Lunar transient luminous events and eclipse anomalies, proposing solid surface and gas luminescence as explanation

04 p0653 A69-14615

Radiometric observations of moon during total lunar eclipse at 3.33 mm, noting decrease in equivalent black body disk temperature

10 p1789 A69-24132

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

14 p2515 A69-28770

Lunar brightness variations during eclipse on 13 April 1968 measured photoelectrically, suggesting nonuniform diurnal distribution of atmospheric scatterers for observed asymmetry

20 p3601 A69-37510

Radiometric measurement of lunar areas during eclipse of 18 October 1967 at mm wavelengths, considering temperature changes and cooling rates

20 p3613 A69-38247

Lunar libration point L4 photographs taken during 6 October 1968 eclipse showing no discrete objects or clouds

20 p3613 A69-38249

LUNAR EFFECTS

Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks

01 p0157 A69-11228

Lunar wake in solar wind at large distances, noting no satellite evidence of lunar magnetic field and evidence for lunar generated turbulence

03 p0514 A69-14007

Lunar laser ranging for testing Einstein and Brans-Dicke gravitational theories, discussing pulse transit time and dominant nonNewtonian correction

05 p0825 A69-16362

Lunar tide effect on height distribution and velocity of ionospheric electron density daily variations near magnetic equator

05 p0756 A69-16401

Lunar daily geomagnetic periodicities by periodogram or spectral analysis, comparing amplitudes obtained by spectral analysis to those by harmonic analysis

07 p1123 A69-18817

Lunar diurnal variation parameters at Irkutsk determined from IGY data concerning geomagnetic field components

10 p1687 A69-23918

Sea tides and ionospheric effects on lunar variation of geomagnetic field vertical component

12 p2161 A69-26957

Noon ionospheric absorption data for Freiburg on different frequencies for lunar variation of ionospheric absorption of radio waves

14 p2438 A69-29104

Literal algebra /SPASM/ computer program critical verification of Kozai short period lunar perturbations, discussing errors

15 p2699 A69-31381

Micropulsation records for full moon effect on hydromagnetic emission activity of magnetosphere, noting W and Kp indices

16 p2774 A69-31979

Sun and moon effects on earth satellite orbit

22 p4030 A69-40901

LUNAR ENVIRONMENT

Lunar surface vehicle mathematical models, discussing design influence of low gravity, atmosphere absence, temperature extremes and surface roughness

05 p0741 A69-15673

Lunar environment simulation, discussing space suit encumbrances on astronaut performance, gravity effects, surface texture, illumination, confinement and isolation

06 p0906 A69-17388

Apollo lunar TV camera for real time pictures during all phases of Apollo lunar landing mission, describing camera tube, circuitry and optics

07 p1133 A69-19137

Surveyor electronic engineering design for lunar environment, discussing vacuum and temperature effects

11 p1958 A69-24633

Lunar visual environment effects on astronaut control manipulation task performance, discussing solar illumination simulation facility

12 p2059 A69-26554

Lunar surface environmental factors including molecular gas behavior under weak gravity and low atmospheric density, radiation and temperature effects, meteorite bombardment, etc

13 p2352 A69-27904

Moon environment for scientific experiments, emphasizing lunar surface properties, lack of man-made electromagnetic waves, vacuum and weak gravity force

13 p2240 A69-27910

Orientation in proximity of moon and on moon surface utilizing maria, craters, etc

16 p2855 A69-31929

Solar system physical environments surveyed from exobiological viewpoint

17 p2907 A69-32968

Lunar based physics and chemistry, discussing exploration of and survival in lunar environment

18 p3112 A69-34235

Molecular beam experiments on moon, noting lunar environmental advantages for studies of beam-beam scattering, beam-surface interactions, beam-field deflection, etc

18 p3113 A69-34240

Lunar conditions differing from simulations in laboratories, examining surface, physicochemical properties and friction

18 p3113 A69-34241

Lunar origin, geological composition and water existence controversies from data gathered by various lunar probes

18 p3196 A69-34631

Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator

[AIAA PAPER 69-992] 22 p3893 A69-40370

Human habitation conditions on moon from viewpoint of solar and lunar radiation, vacuum and gravitation effects including solar energy utilization

23 p4111 A69-42213

LUNAR EVOLUTION

Lunar surface formation, emphasizing density variations and mass concentrations

04 p0654 A69-14633

Origin of moon indicating pristine structure on basis of mascons, alpha scattering and crater formation

06 p1001 A69-17160

Lunar mass concentrations /mascons/ origin and nature, postulating primordial lunar atmosphere and hydrosphere and carbon derived from primordial organic compounds

08 p1397 A69-20697

Meteor explosion theory of origin of lunar craters and round maria, suggesting endogenic origin

10 p1784 A69-23960

Moon internal structure, discussing aggregation origin of Moon parallel to earth and three layer model of nife core, sima mantle and porous sheath

12 p2160 A69-26896

Moon-earth system origin emphasizing mass distribution

13 p2352 A69-27902

Lunar geophysical features origin, noting mascons influence and surface rigidity

13 p2352 A69-27903

Chemical composition of earth, Venus, Mars, Mercury and moon calculated from mathematical models, constructing approximate equations of state at high pressure

14 p2526 A69-29878

Lunar origin theories, considering moon/earth mass ratio, earth-moon system angular momentum deficiency and differential volatilization in earth

14 p2527 A69-29882

Lunar surface evolution, discussing relationship between craters erosional stage and areal density

14 p2528 A69-29947

Lunar relief mechanism based on experimental cratering by pasty projectiles, proposing terrestrial magma genesis

15 p2698 A69-31373

Moon density and nucleation of planets, explaining low density and absence of heavy core by late aggregation from nonmetallic particles

16 p2865 A69-32808

Lunar origin, geological composition and water existence controversies from data gathered by various lunar probes

18 p3196 A69-34631

Catastrophic and noncatastrophic alternatives for earth capture of moon, discussing tidal action and spin-orbit resonance

18 p3198 A69-34823

Planetary cosmogony problems involving protoplanetary cloud origin, matter condensation, planets formation and moon origin, noting iron content in chondrites

18 p3205 A69-35437

Moon possible origin, discussing spin off from earth, accretion from same dust cloud or formed elsewhere and captured

20 p3603 A69-37559

Lunar Orbiter data for existence of unequal mass distributions in lunar interior confirmed by manned Apollo 8 and 10 flights, discussing origin

20 p3606 A69-37933

Lunar maria structure and evolution as homologous transient gravity wave systems from impact craters on crust

21 p3803 A69-38982

Lunar morphology evolution by dust transport on surface, discussing possibility of fluidization

23 p4221 A69-42392

Model of moon accumulated at low temperatures, discussing lunar surface layer characteristics

24 p4383 A69-42936

LUNAR EXPLORATION

Heat flow measurement from moon interior planned for Apollo missions to determine temperature increase rate with depth during lunar year

[AAS PAPER 68-207] 02 p0313 A69-11482

U.S. space program projections, discussing earth orbit operations, lunar and planetary explorations, costs and timetable

02 p0355 A69-11744

Lunar geoscience role in lunar mission planning, discussing costs, reduced gravity effects, sample mass limits and seismology

03 p0510 A69-13391

Lunar surface vehicle mathematical models, discussing design influence of low gravity, atmosphere absence, temperature extremes and surface roughness

05 p0741 A69-15673

Lunar studies and moon exploration noting moon motion, lunar rotation dependence on orbital motion, lunar figure and topography and mass distribution

05 p0820 A69-15835

Soviet explorations of moon, Venus, Mars and interplanetary space, noting objectives of future lunar explorations

[UN PAPER 68-95719] 06 p1000 A69-17055

Post-telescopic lunar exploration, discussing Apollo program and development of selenology

[JPL-TR-52-1399] 06 p1001 A69-17159

Lunar exploration sites selection based on telescopic studies and geological maps

06 p1001 A69-17161

Surveyor lunar scientific payload and results, discussing TV camera, soil mechanics and surface sampler, alpha scattering instrument, small magnets and surface analysis

06 p1001 A69-17162

Human expansion in space, discussing moon landing and exploitation

13 p2352 A69-27901

Lunar astronauts psychological problems, discussing isolation from outside world, gravitational and extreme light effects, protective space suits, etc

13 p2210 A69-27905

Lunar colony development, detailing construction of permanent lunar bases taking into account oxygen, food, water, power and transportation

13 p2240 A69-27906

Lunar soil as building material and extraction of water, oxygen and rocket propellants from lunar materials for lunar colony needs

13 p2352 A69-27907

Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles

13 p2352 A69-27908

Space travel and lunar exploration medical problems

13 p2210 A69-27909

Lunar physics and chemistry - IAA Conference, Belgrade, September 1967

18 p3112 A69-34234

Lunar based physics and chemistry, discussing exploration of and survival in lunar environment

18 p3112 A69-34235

Spacecraft lunar observations, especially data from Surveyor landings

18 p3205 A69-35410

Hopping transporter vehicle designs for lunar exploration providing low fuel consumption at high average speed

[AIAA PAPER 68-1139] 22 p3927 A69-40547

Apollo Extravehicular Communication Telemetry System for monitoring astronaut portable life support system, space suit performance and body functions on lunar surface

23 p4121 A69-41767

Manned lunar exploration programs and site evaluation concerning volcanic processes, chemical and mineralogical differentiation, atmosphere and protobiological materials

23 p4216 A69-42200

Planning lunar surface experiments in nets or at selected sites for optimum scientific return

[AAS PAPER 69-207] 24 p4381 A69-42874

LUNAR EXPLORATION SYSTEM FOR APOLLO

Medium temperature fuel cells, noting reliability and high efficiency leading to selection for lunar exploration vehicle of Apollo project

08 p1260 A69-21046

LUNAR FAR SIDE

Communications system considerations for lunar libration point relay satellite to support Apollo lunar far side mission

03 p0388 A69-13180

Selenographic technique for tying in lunar far side space photographs based on earth disk position measurements with respect to moon limb

05 p0763 A69-16055

Nature and origin of lunar far side Tsiolkovsky crater

06 p1003 A69-17386

Lunar far side craters profile and structure determined from Zond 3 photographs using photometric method

11 p1959 A69-24725

Lunar far side craters vertical profiles plotted from photometric cross sections of Zond 3 photographs

11 p1959 A69-24726

Lunar far side surface spectral inhomogeneities in UV from Zond 3 measurements

12 p2154 A69-25817

Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping

15 p2680 A69-30188

Surface structure asymmetry of near and far sides of moon, considering earth radiation and gravity pull

18 p3206 A69-35439

Linearization of equations of motion for three body problem, emphasizing lunar far side libration point as related to possible landing

19 p3402 A69-35961

Selenographic technique for tying in lunar far side space photographs based on earth disk position measurements with respect to moon limb

20 p3545 A69-37965

Cartographic tying-in of Zond 3 lunar surface photographs to verify maps of moon far side
20 p3608 A69-38051

LUNAR FLIGHT

Maximum capacity estimation for one way transportation systems to moon and Mars, analyzing technical and economic aspects
09 p1586 A69-21297

Aeronomic phenomena observed near Altair and theta Aquila ascribed to Apollo 8 lunar flight
11 p1957 A69-24411

Saturn 5 translunar payload capability enhancement by fuel biasing, propellant utilization systems, trajectory shaping and programmed mixture ratio scheme [AIAA PAPER 69-451]
16 p2839 A69-32669

Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure [AIAA PAPER 69-883]
21 p3764 A69-39409

Quasi-optimum control law for minimum-time bounded acceleration rendezvous in central force field using Friedland technique, with application to lunar flight
24 p4349 A69-43313

LUNAR GEOLOGY

Lunar surface early geologic evolution noting bearing on earth geologic history [AAS PAPER 68-202]
02 p0312 A69-11478

Lunar seismic velocity distribution data indicates broad low velocity zone together with possible extensive melting at depth [AAS PAPER 68-205]
02 p0312 A69-11480

Heat flow measurement from moon interior planned for Apollo missions to determine temperature increase rate with depth during lunar year [AAS PAPER 68-207]
02 p0313 A69-11482

Lunar geoscience role in lunar mission planning, discussing costs, reduced gravity effects, sample mass limits and seismology
03 p0510 A69-13391

Communications of lunar and planetary laboratory, Volume 7, covering lunar radiation, lunar craters, Vesta rotation, etc
04 p0655 A69-14668

Lunar crater densities inside Tycho, Aristarchus and Copernicus
04 p0656 A69-14674

Mountain structures surrounding lunar craters, discussing possible origin by impacting planetesimals shock waves
04 p0661 A69-15142

Lunar high density mass concentrations effect on Lunar Orbiters accelerations, discussing lunar gravity field determination
04 p0661 A69-15145

Lunar rock composition monitored by Luna 9 and 13 soft landed lunar probes [UN PAPER 68-95769]
06 p1000 A69-17041

Lunar exploration sites selection based on telescopic studies and geological maps
06 p1001 A69-17161

Lunar geology information obtained by Ranger space missions
06 p1001 A69-17163

Fine structure and geology of lunar surface from Luna, Ranger, Surveyor and Orbiter data
07 p1212 A69-18547

Lunar mass concentrations /mascons/ origin and nature, postulating primordial lunar atmosphere and hydrosphere and carbon derived from primordial organic compounds
08 p1397 A69-20697

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants
11 p1956 A69-24398

Lunar craters circularity measurements relation to age, discussing fracture system and stress history associated with mare formation
13 p2344 A69-27645

Lunar geophysical features origin, noting mascons influence and surface rigidity
13 p2352 A69-27903

Lunar surface features as observed by orbiting and landing craft, discussing particle layer, rocks, craters, effects of erosion, meteorite impact, etc
15 p2698 A69-31356

Faint lunar craters, discussing lunar age and defining surface steady state
16 p2863 A69-32404

Seismic regions location prediction on visible lunar side based on transient events, hot spots and gravity anomalies
18 p3193 A69-34363

Lunar origin, geological composition and water existence controversies from data gathered by various lunar probes
18 p3196 A69-34631

Lunar volcanism origin of tektite and pearlite, noting no cosmic ray effects
20 p3597 A69-37338

Alpha-scattering experiments by Surveyor missions, studying hypothesis regarding lunar origin of eucrites and howardites
20 p3597 A69-37341

Volcano-Tectonic origin of lunar mare terrain from Apollo 8 photograph showing faulting pattern identical with uppermost Pleistocene-Holocene faulting
20 p3604 A69-37570

Organic geochemical investigations of lunar rock samples based on analysis methods for carbonaceous meteorites and early Precambrian sedimentary rocks
20 p3476 A69-37616

Lunar Orbiter data for existence of unequal mass distributions in lunar interior confirmed by manned Apollo 8 and 10 flights, discussing origin
20 p3606 A69-37933

Data on mass distribution of terrestrial fragmented rocks to interpret lunar rock samples, noting origin of asteroids and meteorites
20 p3613 A69-38250

NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes
20 p3512 A69-38271

Papers of Lunar and Planetary Laboratory, Volume 8, covering lunar craters, rock fragmentation, stellar photometry, etc
21 p3799 A69-38674

Lunar near side crater overlap, considering formation of Tycho Association
21 p3800 A69-38676

Tektite origin theories, discussing Surveyor experiments effects on lunar geology and Tektite origin
22 p4012 A69-40086

Apollo lunar sample collection and analysis, discussing astronauts activity and equipment, sample types, laboratories for radioactive counting and gas analysis, etc
22 p3919 A69-40191

Jadeite /high pressure sodium aluminum pyroxene/ shock-induced phase assemblage from oligoclase, noting relevance to lunar rock samples investigation
22 p3941 A69-40569

Physicomachanical properties of tuff rock based on similarity to lunar surface rock, determining natural density, porosity and compression strength
22 p4034 A69-41105

Lunar rocks types determination by mass spectrometry, describing results of terrestrial rocks tests
22 p4034 A69-41106

Apollo 11 observations of lunar surface glazing, considering radiation heating due to solar outbursts, rocket exhaust effects, shock heating or volcanism, erosion, etc
23 p4216 A69-42202

Lunar rocks and fines samples physical, chemical, mineralogical and biological preliminary analysis at Lunar Receiving Laboratory
24 p4382 A69-42935

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants
24 p4390 A69-43788

LUNAR GRAVITATION

Lunar mascons, interpreting lunar gravitational field anomalies over maria in terms of near-surface slab-like model for maria structure
04 p0654 A69-14630

Lunar gravitational anomalies from internal density variation viewpoint, discussing isostasy in maria
04 p0654 A69-14631

Lunar gravitational field and figure, discussing astronomical observations based on trajectory measurements of Luna 10 lunar orbiter
09 p1589 A69-21375

Doppler tracking data from Lunar Orbiter missions for studying lunar gravity anomalies, plotting acceleration on lunar surface Mercator projection
15 p2697 A69-31313

Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics
15 p2699 A69-31405

Lunar localized subsurface mass concentration association with circular maria, noting two large mascon basins from gravity data and orbital photography
16 p2864 A69-32446

Lunar gravimetric data reprocessed to present in usable and readable form, plotting acceleration on Mercator projection of lunar surface
18 p3194 A69-34413

Lunar gravitational field and figure, discussing astronomical observations based on trajectory measurements of Luna 10 lunar orbiter
18 p3198 A69-34763

Lunar gravitational potential and lunar surface radius vector binomial series coefficients determination from Luna 10 data used for lunar surface shape calculations
20 p3596 A69-37308

Moments of inertia and gravity field of moon, noting application to earth tides
22 p4030 A69-40902

Lunar gravitational field data from Lunar Orbiter spacecraft reprocessed, discussing mascon effects on moon structure and evolution theories
24 p3379 A69-42785

LUNAR GRAVITATIONAL EFFECTS

Lunar gravity simulation effect on human performance, discussing fidelity requirements, self locomotion, metabolic rate and psychomotor task decrement
02 p0203 A69-12217

Lunar influences on meteoroid influx to earth, tabulating binomial distributions and probabilities of meteorite falls according to different lunar angles
04 p0655 A69-14663

Lunar high density mass concentrations effect on Lunar Orbiters accelerations, discussing lunar gravity field determination
04 p0661 A69-15145

Lunar environment simulation, discussing space suit encumbrances on astronaut performance, gravity effects, surface texture, illumination, confinement and isolation
06 p0906 A69-17388

Spacecraft trajectory using microthrust and lunar gravitational attraction for acceleration into heliocentric orbit
09 p1593 A69-21620

Secular perturbations of remote satellites within lunar gravitation field, comparing observations and analytical data
10 p1779 A69-23614

Circumpolar satellite orbits under lunar and solar perturbations based on two fixed centers problem, considering large amplitude disturbances
10 p1780 A69-23616

Solar and lunar effects on motions of polar orbiting satellites, discussing variable intermediate orbits
14 p2521 A69-29460

Lunar simulator for metabolic studies, using BPMU for assessing O consumption of test subjects at rest and various speeds of ambulation
17 p2914 A69-33187

Seismic regions location prediction on visible lunar side based on transient events, hot spots and gravity anomalies
18 p3193 A69-34363

Residuals from earth based coherent two way radio Doppler data from Lunar Orbiter three orders of magnitude larger than observations from spacecraft [AAS PAPER 68-131]
21 p3828 A69-39766

LUNAR GRAVITY SIMULATOR

Lunar simulator for metabolic studies, using BPMU for assessing O consumption of test subjects at rest and various speeds of ambulation
17 p2914 A69-33187

LUNAR LANDING

Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass
19 p3431 A69-36616

Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data
23 p4211 A69-41388

Lunar landing decision, analyzing American space policy making process with aid of Huntington model [AAS PAPER 69-500]
24 p4418 A69-42853

LUNAR LANDING MODULES

Electrical, thermal and mechanical requirements in design of Landing Radar Electronic Assembly for Apollo Lunar Module
10 p1663 A69-23537

Lunar surface temperature distribution measured by IR pyrometer, predicting temperature rise due to Lunar Excursion Module landing
13 p2341 A69-27583

Lunar colony development, detailing construction of permanent lunar bases taking into account oxygen, food, water, power and transportation

13 p2240 A69-27906

Apollo 10 lunar landing module, detailing weight, shape, electronic system and rendezvous radar

18 p3207 A69-34629

LASSO /modified S-4B/IU/ vehicle mission to place in orbit two unmanned Lunar Modules for landing of radio and optical telescopes on lunar surface

18 p3136 A69-34813

Apollo lunar module landing radar, discussing descent phases, operating modes, assemblies and Surveyor radar

19 p3267 A69-35797

Apollo 11 guidance and navigation systems involved in lunar landing, describing command and service modules design

24 p4295 A69-42550

LUNAR LANDING SITES

PostApollo lunar passive seismic experiments, discussing probable results of present program, exploration sites and additional network stations and instruments

[AAS PAPER 68-204] 02 p0312 A69-11479

Surveyor 5 Mare Tranquillitatis landing site similarity to Oceanus Procellarum sites, discussing surface material elemental composition and lunar structure

02 p0321 A69-12224

Lunar surface mechanical properties at Surveyor 5 site

02 p0321 A69-12225

Gray tone differences between undisturbed lunar surface and darker ejecta observed around Surveyor 1 footpads, discussing possible albedo differences

04 p0660 A69-15124

Photographic results of Lunar Orbiter program noting possible Apollo sites

05 p0822 A69-15858

Lunar exploration sites selection based on telescopic studies and geological maps

06 p1001 A69-17161

Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density

07 p1213 A69-18604

Surveyor lunar landing procedures and results including instrumentation, lunar topography, selenology, chemical and physical properties, solar corona and earth laser output observations

15 p2681 A69-30324

NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography

20 p3536 A69-36931

Spectral reflectivity and emissivity observations of proposed Apollo landing sites compared with other lunar localities and unmanned lunar probe data

21 p3815 A69-39585

Visible and IR spectral reflectivity of Apollo lunar landing sites, attributing reflectivity differences to compositional and/or mineralogical differences

21 p3815 A69-39586

Lunar surface IR emissivity comparison spectra including proposed Apollo landing sites, indicating Si-O ratio difference for Plato crater

21 p3815 A69-39587

Manned lunar exploration programs and site evaluation concerning volcanic processes, chemical and mineralogical differentiation, atmosphere and protobiological materials

23 p4216 A69-42200

Planning lunar surface experiments in nets or at selected sites for optimum scientific return

[AAS PAPER 69-207] 24 p4381 A69-42874

LUNAR LAUNCH

Apollo/Saturn 5 base at Kennedy Space Center and facilities and equipment supporting manned lunar mission, discussing site location choice and launch complex design concept

16 p2767 A69-32429

LUNAR LIMB

Tropospheric inhomogeneities properties and wind conditions in relation to lunar limb image deformations

01 p0156 A69-11182

Solar wind interaction with moon, discussing core/surface layer conductivity and lunar limb shock wave formation

03 p0502 A69-14006

Lunar libration constants determination based on Schluter heliometer observations using Bessel-Wichmann method, allowing for limb irregularities

17 p3028 A69-32875

Lunar rotation elements determined from distances between Moesting A and limb craters, using Iakovkin position angle method

17 p3028 A69-32876

Lunar libration point L4 photographs taken during 6 October 1968 eclipse showing no discrete objects or clouds

20 p3613 A69-38249

Bright lunar limb zenith distances measured by equal altitudes method, deriving Ephemeris- Atomic Time A3 and Ephemeris-TU2 time relations

23 p4208 A69-41289

LUNAR LOGISTICS

PostApollo lunar passive seismic experiments, discussing probable results of present program, exploration sites and additional network stations and instruments

[AAS PAPER 68-204] 02 p0312 A69-11479

LUNAR LUMINESCENCE

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence

03 p0506 A69-13089

Lunar transient luminous events and eclipse anomalies, proposing solid surface and gas luminescence as explanation

04 p0653 A69-14615

Lunar surface light scattering data cataloged for various phase angles from photometric observations of lunar features brightness

13 p2344 A69-27648

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence

14 p2516 A69-28771

Lunar surface characteristics, discussing light polarization, lunar radiation, solar radiation and meteorite impact effects, etc

16 p2856 A69-32069

Solar proton bombardment of lunar surface, discussing luminescence and chemical effects

22 p4012 A69-40089

LUNAR MAGNETIC FIELDS

Earth and lunar magnetic field studies in U.S.S.R., discussing Soviet earth satellite and lunar probe data

01 p0066 A69-10943

Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks

01 p0157 A69-11228

Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results

01 p0077 A69-11237

Lunar electrical parameters range determination using models

[AAS PAPER 68-199] 02 p0312 A69-11477

Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation

[AAS PAPER 68-206] 02 p0312 A69-11481

Lunar magnetic moment and surface field, discussing Explorer 35 field measurements

03 p0514 A69-14005

Soviet astronomical radio-astronomical probe and orbiter lunar studies including surface photography, gravitational and magnetic measurements and soft landed probes

13 p2336 A69-27353

Time dependent magnetic field induced inside rotating spherical conductor by external sources applied to moon

14 p2518 A69-29121

Lunar magnetic field measurements by Mariner 4 near sun-moon line extension, discussing search for lunar wake

16 p2856 A69-31986

Equations of transformation for hourly data harmonic terms used in computation and representation of solar and lunar daily magnetic variations

16 p2782 A69-32457

Lunar components in mean values of geomagnetic field daily variations, discussing lunar phase during selected quiet days

16 p2782 A69-32458

Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions

20 p3609 A69-38095

Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions

21 p3794 A69-38379

Homogeneous conducting moon-solar wind interactions, describing time dependent lunar magnetic and electric fields induced by interplanetary magnetic field variations

22 p4023 A69-40518

Critique of magnetic response model for interaction of moon and interplanetary plasma magnetic field proposed by Blank and Sill

24 p4384 A69-43190

Auroral activity and lunar phases correlation from IMP-1 measurements of lunar magnetic field

24 p4311 A69-43502

LUNAR MAPS

Geological-morphological mapping of moon interpretation and lunar surface structural peculiarities

03 p0505 A69-12898

Tectonic map compiled for visible and far sides of moon, noting correlations between earth and moon tectogenesis

03 p0505 A69-12899

Hypsometric contour map of lunar surface from absolute altitude measurements of 1200 points on lunar surface

03 p0512 A69-13689

Lunar shape hypsometric peculiarities, analyzing heights and asymmetry in relation to lunar equator, central meridian and image plane

04 p0662 A69-15249

Unified lunar control photogrammetric network produced by mapping satellite in 28 day polar orbit, using recurrent partitioning

05 p0819 A69-15628

Lunar exploration sites selection based on telescopic studies and geological maps

06 p1001 A69-17161

Lunar coordinate corrections from solar ring coronagraphic observations of 20 May 1966 annular solar eclipse

15 p2686 A69-30532

Relative heights on western moon half computed and compared to values of Schmidt, U.S. Army Map Service and USAF Aeronautical Chart Information Center

18 p3196 A69-34693

Cartographic tying-in of Zond 3 lunar surface photographs to verify maps of moon far side

20 p3608 A69-38051

Lunar surface photographic mapping by Ranger, Surveyor and Lunar Orbiter projects, emphasizing image resolution and coverage

21 p3719 A69-38325

LUNAR MARIA

Surveyor 5 Mare Tranquillitatis landing site similarity to Oceanus Procellarum sites, discussing surface material elemental composition and lunar structure

02 p0321 A69-12224

Magnetic experiment on Surveyor 5 revealing magnetic material presence in Mare Tranquillitatis, discussing analogy to powdered basalt

02 p0321 A69-12226

Lunar mascons size and depth calculated in terms of mare formed by low velocity iron meteorites impact

04 p0654 A69-14629

Lunar mascons, interpreting lunar gravitational field anomalies over maria in terms of near-surface slab-like model for maria structure

04 p0654 A69-14630

Lunar gravitational anomalies from internal density variation viewpoint, discussing isostasy in maria

04 p0654 A69-14631

Lunar crater formation studied to explain distortion in large craters or maria, discussing mass concentrations indicated by positive residuals of gravimetric map

04 p0654 A69-14632

Lunar intermare crater density variations data tabulation, presenting quantitative and qualitative estimates

04 p0656 A69-14671

Lunar crater count observations of mare surface and ejecta blanket in Orientale basin

04 p0656 A69-14672

Lunar premare and postmare craters distributions, discussing latitude independence and sources of impacting bodies

04 p0656 A69-14673

Mare Orientale basin satellite photographs suggest asteroid impact formation

04 p0664 A69-15421

Nondimensional Jeffreys number as ratio of Reynolds to Froude number for gravitational motion of viscous masses, with application to lunar maria and plastic ice

07 p1218 A69-19262

Lunar mass concentrations /mascons/ origin and nature, postulating primordial lunar atmosphere and

- hydrosphere and carbon derived from primordial organic compounds
08 p1397 A69-20697
- Primitive elemental abundances in solar system, discussing composition of sun, meteorites and lunar maria
08 p1403 A69-20914
- Hypotheses concerning mechanism of lunar maria formation, discussing molten rock layer below lunar crust
10 p1782 A69-23710
- Meteor explosion theory of origin of lunar craters and round maria, suggesting endogenic origin
10 p1784 A69-23960
- Denser material beneath lunar maria revealed by precise tracking of lunar orbiting spacecraft, discussing geology and evolution
11 p1953 A69-24339
- Modified Diggelen photometric method in lunar topography, analyzing surface brightness and inclinations in mare regions and Korolev thalassoid
11 p1959 A69-24724
- Lunar craters circularity measurements relation to age, discussing fracture system and stress history associated with mare formation
13 p2344 A69-27645
- Lunar surface and earth early satellite system, discussing maria distribution, satellite impacts and close passage collisions
13 p2345 A69-27654
- Lunar surface gamma radiation observed by Luna 10 spectrometer, suggesting basalt-like minerals composition of lunar maria
13 p2333 A69-28635
- Orientation in proximity of moon and on moon surface utilizing maria, craters, etc
16 p2855 A69-31929
- Lunar localized subsurface mass concentration association with circular maria, noting two large mascon basins from gravity data and orbital photometry
16 p2864 A69-32446
- Mare Tranquillitatis surface chemical composition data from Surveyor 5, comparing element abundances with meteorites and terrestrial rocks
20 p3601 A69-37517
- Convection within moon as explanation of maria on near side, presence of mascons, etc
20 p3603 A69-37561
- Lunar mascons and maria isostasy, discussing time requirements
20 p3604 A69-37564
- Volcano-Tectonic origin of lunar mare terrain from Apollo 8 photograph showing faulting pattern identical with uppermost Pleistocene-Holocene faulting
20 p3604 A69-37570
- Linear thermal anomaly on western margin of Mare Humorum, rejecting internal heating origin
21 p3797 A69-38535
- Lunar maria structure and evolution as homologous transient gravity wave systems from impact craters on crust
21 p3803 A69-38982
- Lunar regolith from Surveyor Program pictorial data of lunar maria
22 p4012 A69-40087
- LUNAR MOBILE LABORATORIES**
- Moon environment for scientific experiments, emphasizing lunar surface properties, lack of man-made electromagnetic waves, vacuum and weak gravity force
13 p2240 A69-27910
- LUNAR MODULE**
- Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
[AIAA PAPER 68-1166] 03 p0465 A69-13561
- System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
07 p1228 A69-18338
- Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature
[AIAA PAPER 69-312] 09 p1479 A69-22386
- Electron beam welding of Lunar Module Descent Engine, emphasizing variable area injector element and manifold assembly problems and techniques
12 p2102 A69-26621
- Thermal vacuum /TV/ manned test operations related to Apollo lunar module in simulated space environment
15 p2558 A69-30394

- Lunar module multilayer radiation insulation for thermal control, testing aluminum coated Mylar and Kapton sheets
[AIAA PAPER 69-609] 17 p3073 A69-33304
- Apollo Lunar Module Environmental Control System /LM/ECS/ steady state performance simulation techniques, discussing vacuum chamber data of LTA-8/LM-3
[AIAA PAPER 69-616] 17 p2903 A69-33307
- Halon 1301 fire extinguisher for burning spilled hypergol on Apollo/Saturn LM adapter, discussing concentration requirements and exposure hazards
18 p3094 A69-35062
- Apollo navigation, guidance and control systems in command module and lunar module, discussing inertial, optical and computer hardware operation
19 p3369 A69-35799
- Lunar module motion during optimal ascent from moon surface into circular orbit of command module, noting descent maneuver similarity
19 p3431 A69-36617
- Manual attitude control for Lunar Module employing directional stability, coordinated turn and attitude command
[AIAA PAPER 69-892] 21 p3824 A69-39417
- Encapsulation effects on piece parts in high density package, considering unexpected part failures elimination in Lunar Module Signal Conditioning Electronic Assembly
22 p3910 A69-39953
- Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters
[AIAA PAPER 69-991] 22 p3920 A69-40369
- LM descent engine behavior upon contact with lunar surface simulated, basing test condition on statistical trajectory analysis indicating fire until touchdown possibility
[AIAA PAPER 69-1020] 22 p3923 A69-40391
- Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
[AIAA PAPER 68-1166] 22 p3979 A69-40551
- Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data
23 p4211 A69-41388
- LUNAR OBSERVATORIES**
- Communications of lunar and planetary laboratory, Volume 7, covering lunar radiation, lunar craters, Vesta rotation, etc
04 p0655 A69-14668
- Lunar spherical astronomy, discussing coordinate transformations, precessional and nutational motions, etc
21 p3798 A69-38605
- LUNAR OCCULTATION**
- NT SOLAR ECLIPSES**
- Lunar occultations of radio source Sagittarius A observed at various frequencies between 230 and 2400 MHz, obtaining diameter, position and decimeter band flux densities
06 p1009 A69-17960
- Lunar occultations of galactic center region observed at 1667 MHz indicating OH absorption origin in uniform rotating cloud
06 p1009 A69-17961
- OH emission source in W24 during July 19, 1967 lunar occultation, obtaining better position for brighter OH emission feature
09 p1591 A69-21449
- Stellar occultations by moon observed with ear and eye method, not taking into account corrections to radio time signals
10 p1776 A69-23205
- Antenna for lunar occultation observations at 81.5 MHz, detailing experimental procedure and data reduction
10 p1779 A69-23606
- Sagittarius A occultation by moon, determining peak brightness and flux density of radio source
11 p1958 A69-24592
- Spectroscopic and eclipsing binaries in zodiac tabulated for photometric studies at lunar occultations
12 p2171 A69-27152
- Crab Nebula lunar occultation observed by Cassegrain array of deep space communication facility, finding radio brightness distribution similar to optical
15 p2687 A69-30539
- Lunar occultations analyzed to determine Moon position and ephemeris time, confirming adopted values of node and perigee motions
20 p3601 A69-37494

LUNAR ORBITER

- Lunar composition analysis by measuring atomic and nuclear radiation emission from orbiter
[AAS PAPER 68-197] 02 p0312 A69-11475
- Lunar Orbiter mission objectives and orbit design
[AIAA PAPER 68-47] 04 p0664 A69-15503
- Sinusoid rill and water distribution on lunar surface from Orbiter 4 high resolution photographs
05 p0818 A69-15606
- Photographic system in Lunar Orbiter spacecraft
05 p0829 A69-15857
- Photographic results of Lunar Orbiter program noting possible Apollo sites
05 p0822 A69-15858
- Spacecraft longitudinal control during reentry of lunar orbiter into atmosphere, analyzing final range prediction, trajectory tracking and accelerometers performance
13 p2355 A69-27681
- Meteoroid flux measured by Explorer 16 and Lunar Orbiter, analyzing penetration rate, average velocity and consistency with photographic meteors
13 p2349 A69-27820
- Doppler tracking data from Lunar Orbiter missions for studying lunar gravity anomalies, plotting acceleration on lunar surface Mercator projection
15 p2697 A69-31313
- Scientific space research program /1968-1978/ outlining advanced lunar orbiter and Mars, Venus and Mercury probes
18 p3193 A69-34360
- Lunar Orbiter Parts Program for selection and control of electronic and electrical parts, discussing reliability and flight failures
18 p3207 A69-34520
- Orbit parameters identification method based on given tracking data span applied to lunar orbiter tracking using Fourier analysis
19 p3401 A69-35916
- Lunar Orbiter data for existence of unequal mass distributions in lunar interior confirmed by manned Apollo 8 and 10 flights, discussing origin
20 p3606 A69-37933
- Lunar surface erosion processes revealed by Lunar Orbiter photographs of boulder concentrations
21 p3794 A69-38378
- Lunar Orbiter missions pre- and postflight error analyses compared to estimate dispersions from reference trajectory
[AAS PAPER 68-108] 21 p3805 A69-39220
- Residuals from earth based coherent two way radio Doppler data from Lunar Orbiter three orders of magnitude larger than observations from spacecraft
[AAS PAPER 68-131] 21 p3828 A69-39766
- Telecommunications performance of two lunar relay satellite system /LRSS/, determining operation capabilities with Apollo communications system
23 p4129 A69-42508
- LUNAR ORBITS**
- Optical ranging technique for studying lunar physical libration by measuring distance between earth observatory and two fixed points on lunar surface
01 p0158 A69-11311
- Lunar high density mass concentrations effect on Lunar Orbiters accelerations, discussing lunar gravity field determination
04 p0661 A69-15145
- Asymptotic solutions of restricted three body problem for one parameter periodic orbits in earth-moon synodic system, determining motion near moon
04 p0663 A69-15382
- Explorer 35 measurements of low energy plasma in lunar orbit made by planar multigrad sensor programmed as retarding potential analyzer
05 p0825 A69-16278
- Reentry trajectories from lunar surface and orbit obtained by computer with allowance for initial data spread
09 p1594 A69-21756
- Earth-moon and moon-earth trajectory parameters related to lunar orbit conditions for synthesizing lunar orbit trajectory
18 p3196 A69-34704
- Catastrophic and noncatastrophic alternatives for earth capture of moon, discussing tidal action and spin-orbit resonance
18 p3198 A69-34823
- Lunar occultations analyzed to determine Moon position and ephemeris time, confirming adopted values of node and perigee motions
20 p3601 A69-37494

Literal solution to equations of motion applied to lunar theory using electronic computer with series convergence

21 p3796 A69-38474

Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control
[AIAA PAPER 68-848]

21 p3828 A69-39760

Light pressure induced secular effect contributing to planetary satellites and lunar orbits evolution calculated by numerical integration

22 p4033 A69-41084

LUNAR PHASES

Lunar thermal radiation measurements at 8.6 and 3.2 mm wavelengths, noting brightness temperature-time relationship in curves and as Fourier components

02 p0327 A69-12717

Lunar surface spectral reflectivity variations with time, noting phase angle effects on color contrast

13 p2349 A69-27819

Lunar components in mean values of geomagnetic field daily variations, discussing lunar phase during selected quiet days

16 p2782 A69-32458

Auroral activity and lunar phases correlation from IMP-1 measurements of lunar magnetic field

24 p4311 A69-43502

LUNAR PHOTOGRAPHS

Crater Copernicus photograph, discussing misinterpretation of Orbiter 2 lunar surface photograph on basis of effective temperature contours analysis

01 p0154 A69-10898

Lunar rays nature from terrestrial observations and surface photographs by lunar probes, noting high crater concentration structure

02 p0236 A69-11642

Geological-morphological mapping of moon interpretation and lunar surface structural peculiarities

03 p0505 A69-12898

Large scale lunar surface photographs for estimating conical formations identified with terrestrial stratovolcanoes

03 p0507 A69-13093

Lunar crater count observations of mare surface and ejecta blanket in Orientale basin

04 p0656 A69-14672

Selenographic technique for tying in lunar far side space photographs based on earth disk position measurements with respect to moon limb

05 p0763 A69-16055

Lunar geology information obtained by Ranger space missions

06 p1001 A69-17163

Ranger pictures improvement by computer, eliminating image distortion due to electronic imaging systems

06 p0924 A69-17164

Relative lunar altitudes determination from shadow measures on earth based lunar photographs by direction-cosine method

07 p1225 A69-19770

Comparator measures for relative lunar altitudes on Yerkes lunar photographs, estimating selenographic positions from grids of orthographic atlas of moon

07 p1225 A69-19771

Selenodetic measurements on Yerkes lunar star trailed photographs, considering limb and star trail

07 p1225 A69-19772

Yerkes star trailed lunar photographs with ephemeris values of moon libration for selenodetic coordinates of secondary points, discussing errors and altitudes

07 p1225 A69-19773

Tucson selenodetic triangulation for coordinated points, considering measures on Yerkes star trailed plates

07 p1225 A69-19774

Lunar far side craters profile and structure determined from Zond 3 photographs using photometric method

11 p1959 A69-24725

Lunar far side craters vertical profiles plotted from photometric cross sections of Zond 3 photographs

11 p1959 A69-24726

Large scale lunar surface photographs for estimating conical formations identified with terrestrial stratovolcanoes

14 p2516 A69-28775

Moon pictures from Apollo 8 spacecraft including full moon, crater Tsiolkovsky and unidentified area showing volcanism

14 p2527 A69-29889

Apollo 8 photooptics, considering TV camera and broadcasts, photographic equipment and visual observation

15 p2609 A69-30469

Geometric shape of lunar profile from annular phase of 20 May 1966 annular solar eclipse coronagraph plates, applying Fourier series and Pascal limaçon approximation

15 p2686 A69-30531

NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing

18 p3133 A69-34336

Volcano-Tectonic origin of lunar mare terrain from Apollo 8 photograph showing faulting pattern identical with uppermost Pleistocene-Holocene faulting

20 p3604 A69-37570

Selenographic technique for tying in lunar far side space photographs bases on earth disk position measurements with respect to moon limb

20 p3545 A69-37965

Cartographic tying-in of Zond 3 lunar surface photographs to verify maps of moon far side

20 p3608 A69-38051

Lunar libration point L4 photographs taken during 6 October 1968 eclipse showing no discrete objects or clouds

20 p3613 A69-38249

Lunar surface photographic mapping by Ranger, Surveyor and Lunar Orbiter projects, emphasizing image resolution and coverage

21 p3719 A69-38325

Surveyor spacecraft instrumentation, describing TV camera design and operation, photographic requirements and techniques, lunar surface characteristics, etc

22 p4011 A69-40043

LUNAR PHOTOGRAPHY

Lunar Orbiter mission objectives and orbit design
[AIAA PAPER 68-47]

04 p0664 A69-15503

Sinuuous rill and water distribution on lunar surface from Orbiter 4 high resolution photographs

05 p0818 A69-15606

Photographic system in Lunar Orbiter spacecraft

05 p0829 A69-15857

Photographic results of Lunar Orbiter program noting possible Apollo sites

05 p0822 A69-15858

Absolute coordinates of 906 lunar features derived and tabulated, eliminating errors due to atmospheric turbulence by using 120 lunar negatives

07 p1213 A69-18612

Volcanic origin of lunar crater Dawes based on photogeological evidence obtained from Lunar Orbiter 5 photographs

11 p1952 A69-24264

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations

12 p2078 A69-25772

Soviet lunar probe Zond 6 achievements in controlled Earth landing and lunar surface photography

13 p2355 A69-27342

Soviet astronomical radio-astronomical probe and orbiter lunar studies including surface photography, gravitational and magnetic measurements and soft landed probes

13 p2336 A69-27353

Lunar surface light scattering data cataloged for various phase angles from photometric observations of lunar features brightness

13 p2344 A69-27648

Photogrammetric calibration of Surveyor 7 stereo mirror based on vector analysis

13 p2263 A69-28199

Extraterrestrial imagery, discussing earth based telescopes, IR imagery, moon mapping, lunar and planetary probes, Lunar Orbiter photos interpretation and sensors for detecting life

15 p2690 A69-30711

Lunar localized subsurface mass concentration association with circular maria, noting two large mascon basins from gravity data and orbital photography

16 p2864 A69-32446

Lunar rotation parameters determined from photographs and visual observations independent of moon profile

17 p3027 A69-32874

NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography

20 p3536 A69-36931

NASA Lunar Orbiter Program of lunar photography from orbiting spacecraft

21 p3794 A69-38377

Lunar surface erosion processes revealed by Lunar Orbiter photographs of boulder concentrations

21 p3794 A69-38378

Photogrammetric camera system developed from NASA requirements to document lunar surface environment during manned space flight exploration

22 p3948 A69-40989

Lunar photometric function near zero phase from Apollo 8 closeup photography, noting higher reflected brightness than at 1.5 degree phase angle

23 p4220 A69-42380

LUNAR PROBES

NT LUNIK LUNAR PROBES

NT LUNIK 9 LUNAR PROBE

NT LUNIK 10 LUNAR PROBE

NT LUNIK 12 LUNAR PROBE

NT LUNIK 13 LUNAR PROBE

NT RANGER LUNAR PROBES

NT SURVEYOR LUNAR PROBES

NT SURVEYOR 1 LUNAR PROBE

NT SURVEYOR 5 LUNAR PROBE

NT SURVEYOR 6 LUNAR PROBE

NT SURVEYOR 7 LUNAR PROBE

Earth and lunar magnetic field studies in U.S.S.R., discussing Soviet earth satellite and lunar probe data

01 p0066 A69-10943

Lunar rays nature from terrestrial observations and surface photographs by lunar probes, noting high crater concentration structure

02 p0236 A69-11642

Direct analysis of lunar surface chemical composition, considering soft landing probe and X ray isotope fluorescence method

11 p1832 A69-24629

Lunar orbital mission plans intended to optimize spacecraft procurement, flight schedules, science objectives and available funds

18 p3193 A69-34362

Spectral reflectivity and emissivity observations of proposed Apollo landing sites compared with other lunar localities and unmanned lunar probe data

21 p3815 A69-39585

LUNAR PROGRAMS

NT APOLLO PROJECT

NT SURVEYOR PROJECT

National space program management, discussing NACA and NASA, lunar mission planning, procedures and program flexibility and responsibility

01 p0178 A69-10468

Improved suit for lunar wear, noting production and qualifying schedule and astronaut tests

08 p1267 A69-21146

Manned lunar exploration programs and site evaluation concerning volcanic processes, chemical and mineralogical differentiation, atmosphere and protobiological materials

23 p4216 A69-42200

Technology flow for future manned earth orbit and lunar operations and planetary exploration

24 p4380 A69-42840

Planning lunar surface experiments in nets or at selected sites for optimum scientific return

24 p4381 A69-42874

LUNAR RADAR ECHOES

Specific effective scattering area on lunar surface using Luna 13 signals from Oceanus Procellarum measured with radar employing antenna with narrow radiation pattern

01 p0158 A69-11312

Millimeter wave lunar radar system component specifications and design with paraboloidal antenna, emphasizing reflectivity of moon

03 p0397 A69-13725

LUNAR RADIATION

Lunar thermal radiation measurements at 8.6 and 3.2 mm wavelengths, noting brightness temperature-time relationship in curves and as Fourier components

02 p0327 A69-12717

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

03 p0506 A69-13088

Lunar surface IR polarization measurements compared to visible and UV polarization

04 p0656 A69-14669

Gray tone differences between undisturbed lunar surface and darker ejecta observed around Surveyor 1 footpads, discussing possible albedo differences

04 p0660 A69-15124

LUNAR RAYS

Lunar radio emission polarization characteristics, considering knife-edge type radiation pattern effect of antenna array
08 p1391 A69-20423

Microwaves from celestial objects noting radio emission from sun, moon and Jupiter, cosmic fireball and pulsars
08 p1407 A69-21125

Lunar photon leakage spectrum due to photons from capture and inelastic scattering of neutrons by galactic cosmic rays
09 p1597 A69-22088

Radiometric observations of moon during total lunar eclipse at 3.33 mm, noting decrease in equivalent black body disk temperature
10 p1789 A69-24132

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants
11 p1956 A69-24398

IR spectroscopic observations of moon to interpret molecular vibration spectra in terms of molecular composition, discussing rock surface roughness effects
13 p2341 A69-27582

Lunar surface gamma radiation observed by Luna 10 spectrometer, suggesting basalt-like minerals composition of lunar maria
13 p2333 A69-28635

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission
14 p2515 A69-28770

Angular dependence of lunar nighttime IR radiation by invariant tensor techniques, noting surface roughness effect on radiation pattern
[AIAA PAPER 69-597] 17 p3032 A69-33276

Directional characteristics of lunar IR radiation accounted for by crater model
[AIAA PAPER 69-598] 17 p3033 A69-33285

Radio emission measurements of moon at 3.2 cm by artificial moon method, calculating radio temperature and phase amplitudes
20 p3608 A69-38052

Automatic planetary electrophotometer designed for earth atmosphere and lunar photometry, noting operational data
20 p3547 A69-38310

Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects
21 p3803 A69-38973

Thermal calculations of objects near lunar surface, considering IR emission directivity effects
24 p4385 A69-43254

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants
24 p4390 A69-43788

LUNAR RAYS

Lunar rays nature from terrestrial observations and surface photographs by lunar probes, noting high crater concentration structure
02 p0236 A69-11642

Lunar radio emission linear polarization radial dependence at 0.8-cm wavelength using radio telescope, determining dielectric constant of emitting layer
15 p2697 A69-31251

LUNAR RECEIVING LABORATORY

NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes
20 p3512 A69-38271

NASA Lunar Receiving Laboratory functional areas and physical, chemical, biological and quarantine activities for crew and lunar samples
21 p3690 A69-38896

Lunar rocks and fines samples physical, chemical, mineralogical and biological preliminary analysis at Lunar Receiving Laboratory
24 p4382 A69-42935

LUNAR ROVING VEHICLES

Predictive display technique for remote manual control of roving lunar and planetary surface vehicles
06 p0928 A69-17925

LUNAR SATELLITES

NT EXPLORER 18 SATELLITE
NT IMP

Artificial lunar satellite orbital motion calculated by numerical integration, including solar and lunar electromagnetic radiation pressure effects
04 p0662 A69-15251

Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics
15 p2699 A69-31405

Hill method for satellite motion with reference to rectangular rotating axes system with origin at moon center of gravity, obtaining intermediate orbits
16 p2855 A69-31656

Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements
19 p3402 A69-35934

Research satellite, commercial satellite, lunar spacecraft and military satellite missions, discussing Intelsat, Comsat, Early Bird, MOL and ESRO space program
19 p3432 A69-36750

**LUNAR SCATTERING
U DIFFUSE RADIATION**

LUNAR SEISMOGRAPHS

PostApollo lunar passive seismic experiments, discussing probable results of present program, exploration sites and additional network stations and instruments
[AAS PAPER 68-204] 02 p0312 A69-11479

Lunar seismic velocity distribution data indicates broad low velocity zone together with possible extensive melting at depth
[AAS PAPER 68-205] 02 p0312 A69-11480

Lunar seismology, discussing Apollo 11 instrumentation and experiments, moonquakes and travel times measurements and lunar tides
19 p3315 A69-36765

Apollo 11 passive seismic experiment design and objectives, describing seismometer characteristics and lunar interior
20 p3539 A69-37516

Miniaturized seismic refraction system for manned lunar landings consisting of geophones, three channel amplifier, calibrator and logarithmic compressor
23 p4162 A69-41533

LUNAR SHADOW

Moon effect on intensity and angular distribution of energetic electron and proton shadowing as observed by Explorer satellites
05 p0824 A69-16252

Lunar umbra interception by Titus rockets during solar eclipse, measuring UV and IR flux
06 p0986 A69-17101

LUNAR SHELTERS

Lunar shelter regenerative life support system performance and manned test
07 p1071 A69-19427

LUNAR SOIL

Penetration type soil analyzer used by Luna 13 automatic lunar station for mechanical strength of lunar surface
03 p0430 A69-13424

Lunar surface layer density measured radiometrically with scattered gamma rays by Luna 13
03 p0430 A69-13425

Lunar surface material chemical composition in lunar mare and on Tycho crater north rim, noting Surveyors 5, 6, and 7 alpha analyses
04 p0655 A69-14658

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light
04 p0658 A69-14958

Gray tone differences between undisturbed lunar surface and darker ejecta observed around Surveyor 1 footpads, discussing possible albedo differences
04 p0660 A69-15124

Surveyor lunar scientific payload and results, discussing TV camera, soil mechanics and surface sampler, alpha scattering instrument, small magnets and surface analysis
06 p1001 A69-17162

Lunar surface chemical composition using RF mass spectrometer
10 p1698 A69-24207

Direct analysis of lunar surface chemical composition, considering soft landing probe and X ray isotope fluorescence method
11 p1832 A69-24629

Moon environment for scientific experiments, emphasizing lunar surface properties, lack of man-made electromagnetic waves, vacuum and weak gravity force
13 p2240 A69-27910

Temperature distribution in shadowed lunar craters formulated in Fredholm integral equations, showing

constant temperature and correction for soil thermal inertia
[AIAA PAPER 69-595] 17 p3033 A69-33291

Lunar surface uppermost layer physical and mechanical properties investigated by soilmeter-penetrometer and radiation densimeter on Luna 13
18 p3113 A69-34239

Particulate thermophysical lunar soil model for measuring lunation nighttime and eclipse cooling, noting applicability to IR surface brightness temperature of Mercury hot pole
18 p3191 A69-34303

Lunar surface bulk density determined from laboratory and spacecraft measurements of static bearing capacity as functions of depth and solids percentage
18 p3193 A69-34366

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light
18 p3196 A69-34721

Correlating IR lunar nighttime temperature and bearing strength of lunar materials, using expressions of thermal conductivity and bearing strength of porous media in vacuo
20 p3613 A69-38248

Electrical conductivity of uppermost lunar surface layers, indicating dry powdered rocks with frequency independent dielectric loss tangent
22 p4023 A69-40570

Mass spectrometric analysis of lunar material from soil vaporization products ion component by electron beam
22 p4034 A69-41107

Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data
23 p4211 A69-41388

Lunar rocks and fines samples physical, chemical, mineralogical and biological preliminary analysis at Lunar Receiving Laboratory
24 p4382 A69-42935

Lunar surface material mechanical properties from Surveyor observations, analyzing grain size, rock density, internal friction, cohesion and bulk density compared to Luna observations
24 p4383 A69-42962

Shear load, cohesion and internal friction measurements of low bulk density particulate silicates of complex shape, noting significance for lunar comparison
24 p4383 A69-43040

LUNAR SPACECRAFT

NT APOLLO SPACECRAFT
NT EXPLORER 18 SATELLITE
NT IMP
NT LUNIK LUNAR PROBES
NT LUNIK 9 LUNAR PROBE
NT LUNIK 10 LUNAR PROBE
NT LUNIK 12 LUNAR PROBE
NT LUNIK 13 LUNAR PROBE
NT RANGER LUNAR PROBES
NT SURVEYOR LUNAR PROBES
NT SURVEYOR 1 LUNAR PROBE
NT SURVEYOR 5 LUNAR PROBE
NT SURVEYOR 6 LUNAR PROBE
NT SURVEYOR 7 LUNAR PROBE

Lunar surface features as observed by orbiting and landing craft, discussing particle layer, rocks, craters, effects of erosion, meteorite impact, etc
15 p2698 A69-31356

LUNAR SURFACE VEHICLES

Flight test evaluation of small one man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] 02 p0229 A69-12379

Lunar surface vehicle mathematical models, discussing design influence of low gravity, atmosphere absence, temperature extremes and surface roughness
05 p0741 A69-15673

Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles
13 p2352 A69-27908

Hopping transporter vehicle designs for lunar exploration providing low fuel consumption at high average speed
[AIAA PAPER 68-1139] 22 p3927 A69-40547

LUNAR TEMPERATURE

Lunar surface temperatures and thermal characteristics from Surveyor 5 thermal engineering data gathered during lunar days, eclipse and nights
02 p0321 A69-12227

IR observations of lunar crater and maria enhanced thermal emission during eclipse, constructing model of cratered surface to analyze thermal behavior
04 p0654 A69-14656

Radiometric observations of moon during total lunar eclipse at 3.33 mm, noting decrease in equivalent black body disk temperature

10 p1789 A69-24132

Lunar thermal anomalies in various craters observed during lunar night by IR methods, with data suggesting hot and cold regions

12 p2171 A69-27092

Lunar surface temperature distribution measured by IR pyrometer, predicting temperature rise due to Lunar Excursion Module landing

13 p2341 A69-27583

Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature

15 p2700 A69-31442

Lunar surface thermal characteristics revised from analysis of error sources in daytime lunar surface temperatures derived from Surveyor 5 compartment data [AIAA PAPER 69-594]

17 p3033 A69-33287

Lunar temperature prediction with emphasis on variable property models, noting assumptions about physical properties appearing in heat conduction equations

18 p3194 A69-34374

Book on thermal processes of earth and moon covering heat generation and transfer, internal temperatures, gravitational energy, etc

19 p3401 A69-35887

Convection within moon as explanation of maria on near side, presence of mascons, etc

20 p3603 A69-37561

Radiometric measurement of lunar areas during eclipse of 18 October 1967 at mm wavelengths, considering temperature changes and cooling rates

20 p3613 A69-38247

Correlating IR lunar nighttime temperature and bearing strength of lunar materials, using expressions of thermal conductivity and bearing strength of porous media in vacuo

20 p3613 A69-38248

Linear thermal anomaly on western margin of Mare Humorum, rejecting internal heating origin

21 p3797 A69-38535

LUNAR TIDES

Lunar tidal effects on F 2 critical frequency and height maximum, evaluating variations with altitude

01 p0063 A69-10424

Lunar tide effect on height distribution and velocity of ionospheric electron density daily variations near magnetic equator

05 p0756 A69-16401

Long range prediction of zonal westerlies based on lunar cycles or quasi-biennial oscillations, considering aliasing problem

07 p1175 A69-18945

Luni-solar tide interpretation in F2 critical frequency based on sum and difference frequencies production by nonlinear atmospheric response to forces

10 p1685 A69-23829

Cometary, lunar and solar effects on precipitation, considering joint influence of meteoric streams and moon

11 p1965 A69-25420

Ocean circulation as climate regulator, discussing role in redistributing climate-changing energy input from solar radiation or lunar tidal friction into atmosphere

12 p2067 A69-26333

Cyclic vector amplitude error from noisy data corrected for calculating geophysical lunar tidal effects

12 p2033 A69-26956

Semimonthly lunar variation in D region absorption, discussing phase reversal of lunar tides between equatorial and high latitudes

14 p2439 A69-29113

Tide dependent variations of critical frequencies of ionospheric layers minimal heights and maximum height of F 2 layer reflection

14 p2444 A69-29871

Lunar tidal variations of electron concentration in F 2 region near magnetic equator showing large latitudinal dependence

16 p2776 A69-32090

Lunar tidal oscillations in F 2 layer critical frequency and F region minimum virtual height at Huancayo during IGY/IGC to study solar cycle effects

16 p2784 A69-32613

Lunar seismology, discussing Apollo 11 instrumentation and experiments, moonquakes and travel times measurements and lunar tides

19 p3315 A69-36765

Lunar semimonthly variations in noon values of D region absorption at Singapore, noting opposite phases of lunar tides in D and F regions

22 p4035 A69-41211

Solar quiet and lunar electric current systems deduced from geomagnetic data, discussing electrical conductivities and wind models in dynamo region

23 p4160 A69-42427

LUNAR TOPOGRAPHY

Analytic photogrammetric determination of lunar control coordinates from Ranger photography

01 p0147 A69-10022

Lunar surface early geologic evolution noting bearing on earth geologic history [AAS PAPER 68-202]

02 p0312 A69-11478

Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation [AAS PAPER 68-206]

02 p0312 A69-11481

Selenodetic data results and calculations of moon visible physical surface do not agree

02 p0314 A69-11643

Lunar surface temperatures and thermal characteristics from Surveyor 5 thermal engineering data gathered during lunar days, eclipse and nights

02 p0321 A69-12227

Particle size frequency distributions and lunar surface materials, showing impossibility of distinguishing between impact fragmentation of surface and pyroclastic rock deposition

02 p0325 A69-12567

Geological-morphological mapping of moon interpretation and lunar surface structural peculiarities

03 p0505 A69-12898

Tectonic map compiled for visible and far sides of moon, noting correlations between earth and moon tectogenesis

03 p0505 A69-12899

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence

03 p0506 A69-13089

Large scale lunar surface photographs for estimating conical formations identified with terrestrial stratovolcanoes

03 p0507 A69-13093

Electron beam meter application as lunar surface electric field detector, discussing breadboard model and performance characteristics

03 p0429 A69-13221

Lunar surface layer density measured radiometrically with scattered gamma rays by Luna 13

03 p0430 A69-13425

Hypsometric contour map of lunar surface from absolute altitude measurements of 1200 points on lunar surface

03 p0512 A69-13689

Moon figure from meridional measurements of visible diameters at different angles of libration, deriving equation for polar and equatorial compression of lunar ellipsoid

03 p0512 A69-13690

IR observations of lunar crater and maria enhanced thermal emission during eclipse, constructing model of cratered surface to analyze thermal behavior

04 p0654 A69-14656

Quasi-specular bistatic radar measurements of oblique scattering properties of lunar surface using telemetry carrier from Explorer 35 as lunar orbiting radar beacon

04 p0655 A69-14657

Lunar glowing spots near Aristarchus considered volcanic eruptions of molten material

04 p0657 A69-14676

Lunar and Martian annular formations and structures, discussing classification, morphological characteristics, incidence frequencies and area sizes

04 p0658 A69-14959

Mountain structures surrounding lunar craters, discussing possible origin by impacting planetesimals shock waves

04 p0661 A69-15142

Lunar shape hypsometric peculiarities, analyzing heights and asymmetry in relation to lunar equator, central meridian and image plane

04 p0662 A69-15249

Mare Orientale basin satellite photographs suggest asteroid impact formation

04 p0664 A69-15421

Sinuuous rill and water distribution on lunar surface from Orbiter 4 high resolution photographs

05 p0818 A69-15606

Large mass concentrations /mascons/ effect on moon dynamical figure, considering production of asymmetries

05 p0820 A69-15762

Lunar studies and moon exploration noting moon motion, lunar rotation dependence on orbital motion, lunar figure and topography and mass distribution

05 p0820 A69-15835

Photographic results of Lunar Orbiter program noting possible Apollo sites

05 p0822 A69-15858

Polarization-albedo relationship for selected lunar maria, highlands and mountains in five passbands suggesting optical path length function of effective refractive index and particle size

05 p0829 A69-16663

Possible evolution of earth continents and ocean basin, considering ultrabasic, basic, and intermediate to acidic lunar highlands chemical composition

06 p1000 A69-17006

Lunar exploration sites selection based on telescopic studies and geological maps

06 p1001 A69-17161

Lunar geology information obtained by Ranger space missions

06 p1001 A69-17163

Fine structure and geology of lunar surface from Luna, Ranger, Surveyor and Orbiter data

07 p1212 A69-18547

Absolute coordinates of 906 lunar features derived and tabulated, eliminating errors due to atmospheric turbulence by using 120 lunar negatives

07 p1213 A69-18612

Lunar scattering of meter radio waves emitted by Luna 11 and 12 satellites, relating glide angle scattering coefficients to satellite altitude

07 p1087 A69-19615

Quantitative radar determinations of radio wave scattering cross section of lunar surface layer

07 p1087 A69-19621

Relative lunar altitudes determination from shadow measures on earth based lunar photographs by direction-cosine method

07 p1225 A69-19770

Comparator measures for relative lunar altitudes on Yerkes lunar photographs, estimating selenographic positions from grids of orthographic atlas of moon

07 p1225 A69-19771

Selenodetic measurements on Yerkes lunar star trailed photographs, considering limb and star trail

07 p1225 A69-19772

Lunar gravitational field and figure, discussing astronomical observations based on trajectory measurements of Luna 10 lunar orbiter

09 p1589 A69-21375

Relative heights on moon, tabulating lunar topography and comparing micrometric measurements and map data

10 p1782 A69-23697

Lunar atmosphere molecule and atom concentration from isotropic and uniform surface evaporation due to micrometeorite impact

10 p1783 A69-23921

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants

11 p1956 A69-24398

Modified Diggelen photometric method in lunar topography, analyzing surface brightness and inclinations in mare regions and Korolev thalassoid

11 p1959 A69-24724

Lunar far side craters profile and structure determined from Zond 3 photographs using photometric method

11 p1959 A69-24725

Lunar surface layer structure by statistical analysis of data concerning craters and stones distribution as shown by lunar orbiter photographs

12 p2154 A69-25816

Lunar surface layer temperature field dynamics obtained from stable periodic solution to parabolic differential equation with nonlinear nonautonomous boundary conditions

12 p2157 A69-26281

Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites

12 p2158 A69-26371

Lunar thermal anomalies in various craters observed during lunar night by IR methods, with data suggesting hot and cold regions

12 p2171 A69-27092

Soviet astronomical radio-astronomical probe and orbiter lunar studies including surface topography, gravitational and magnetic measurements and soft landed probes

13 p2336 A69-27353

Lunar surface temperature distribution measured by IR pyrometer, predicting temperature rise due to Lunar Excursion Module landing 13 p2341 A69-27583

Lunar topography harmonic analysis, noting sample point density and evenness variations effects on estimated coefficients 13 p2344 A69-27647

Lunar surface light scattering data cataloged for various phase angles from photometric observations of lunar features brightness 13 p2344 A69-27648

Lunar surface and earth early satellite system, discussing maria distribution, satellite impacts and close passage collisions 13 p2345 A69-27654

Lunar surface spectral reflectivity variations with time, noting phase angle effects on color contrast 13 p2349 A69-27819

Lunar geophysical features origin, noting mascons influence and surface rigidity 13 p2352 A69-27903

Lunar surface environmental factors including molecular gas behavior under weak gravity and low atmospheric density, radiation and temperature effects, meteorite bombardment, etc 13 p2352 A69-27904

Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles 13 p2352 A69-27908

Moon environment for scientific experiments, emphasizing lunar surface properties, lack of man-made electromagnetic waves, vacuum and weak gravity force 13 p2240 A69-27910

Lunar surface gamma radiation observed by Luna 10 spectrometer, suggesting basalt-like minerals composition of lunar maria 13 p2333 A69-28635

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence 14 p2516 A69-28771

Large scale lunar surface photographs for estimating conical formations identified with terrestrial stratovolcanoes 14 p2516 A69-28775

Vacuum chamber model for sinuous rilles on lunar surface produced by aqueous erosion under ice blanket 14 p2485 A69-28873

Visual orientation near moon and at surface, considering terrestrial and lunar objects reflectivity and light reflection at various angles of incidence 14 p2525 A69-29750

Lunar surface evolution, discussing relationship between craters erosional stage and areal density 14 p2528 A69-29947

Surveyor lunar landing procedures and results including instrumentation, lunar topography, selenology, chemical and physical properties, solar corona and earth laser output observations 15 p2681 A69-30324

Lunar surface features as observed by orbiting and landing craft, discussing particle layer, rocks, craters, effects of erosion, meteorite impact, etc 15 p2698 A69-31356

Radio wave scattering characteristics of lunar surface in 3 cm wavelength by Luna 8 and Luna 9 automatic stations and Surveyor spacecraft 15 p2571 A69-31359

Lunar relief mechanism based on experimental cratering by pasty projectiles, proposing terrestrial magma genesis 15 p2698 A69-31373

Laser measurements of earth-moon distance applied to determinations of earth axis motion and lunar shape, relief, dimensions and motion 16 p2788 A69-31624

Orientation in proximity of moon and on moon surface utilizing maria, craters, etc 16 p2855 A69-31929

Lunar surface characteristics, discussing light polarization, lunar radiation, solar radiation and meteorite impact effects, etc 16 p2856 A69-32069

Giant lunar craters, discussing lunar age and defining surface steady state 16 p2863 A69-32404

Directional characteristics of lunar IR radiation accounted for by crater model [AIAA PAPER 69-598] 17 p3033 A69-33285

Lunar surface brightness temperatures from IR observations, determining thermal emission directional

characteristics to infer surface temperatures from Surveyor data [AIAA PAPER 69-593] 17 p3033 A69-33302

Lunar photometric function determined using modified Hapke surface model and corrected Lommel-Seeliger law for surface roughness and crater distribution [AIAA PAPER 69-596] 17 p3033 A69-33308

Spectral reflectivity differences /color differences/ on lunar surface in visible region, indicating compositional difference origins 17 p3037 A69-33653

Lunar gravimetric data reprocessed to present in usable and readable form, plotting acceleration on Mercator projection of lunar surface 18 p3194 A69-34413

Relative heights on western moon half computed and compared to values of Schmidt, U.S. Army Map Service and USAF Aeronautical Chart Information Center 18 p3196 A69-34693

Lunar and Martian annular formations and structures, discussing classification, morphological characteristics, incidence frequencies and area sizes 18 p3197 A69-34722

Lunar gravitational field and figure, discussing astronomical observations based on trajectory measurements of Luna 10 lunar orbiter 18 p3198 A69-34763

Lunar rivers as coalesced chain craters resulting from gas emission along fracture beneath lunar regolith 18 p3205 A69-35436

Surface structure asymmetry of near and far sides of moon, considering earth radiation and gravity pull 18 p3206 A69-35439

Depth distribution of primary cosmic radiation fluxes and secondary nuclear-active particles in stone meteorites and surface layer of planets, moon and asteroids 19 p3410 A69-36092

Rivers on moon, discussing possibilities of water existence on lunar surface in view of temperature, gravity and atmospheric conditions 19 p3419 A69-36145

NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography 20 p3536 A69-36931

Lunar gravitational potential and lunar surface radius vector binomial series coefficients determination from Luna 10 data used for lunar surface shape calculations 20 p3596 A69-37308

Volcano-Tectonic origin of lunar mare terrain from Apollo 8 photograph showing faulting pattern identical with uppermost Pleistocene-Holocene faulting 20 p3604 A69-37570

Lunar surface scattering properties at 2.5 cm wavelength determined using computerized backscattering diagram and equations for obtaining scattering data 20 p3606 A69-37971

Cartographic tying-in of Zond 3 lunar surface photographs to verify maps of moon far side 20 p3608 A69-38051

Steady state sunlit lunar surface electrostatic charge and potential distributions, noting electrons photoemission and solar wind particles collection 20 p3609 A69-38077

Radiometric measurement of lunar areas during eclipse of 18 October 1967 at mm wavelengths, considering temperature changes and cooling rates 20 p3613 A69-38247

Lunar surface photographic mapping by Ranger, Surveyor and Lunar Orbiter projects, emphasizing image resolution and coverage 21 p3719 A69-38325

Lunar surface erosion processes revealed by Lunar Orbiter photographs of boulder concentrations 21 p3794 A69-38378

Figure and inhomogeneities relationship for moon, Mercury, Venus, Mars and earth, discussing circular basins and mascons 21 p3803 A69-38980

Lunar maria structure and evolution as homologous transient gravity wave systems from impact craters on crust 21 p3803 A69-38982

Lunar surface structure and formation, discussing impact craters, interplanetary collisions, volcanic traces, lunar soil, etc 21 p3811 A69-39514

Lunar surface IR emissivity comparison spectra including proposed Apollo landing sites, indicating Si-O ratio difference for Plato crater 21 p3815 A69-39587

Relative IR spectral reflectivity of selected lunar surface areas measured using double beam photoelectric filter photometer 21 p3815 A69-39588

Surveyor spacecraft instrumentation, describing TV camera design and operation, photographic requirements and techniques, lunar surface characteristics, etc 22 p4011 A69-40043

Lunar regolith from Surveyor Program pictorial data of lunar maria 22 p4012 A69-40087

Solar proton bombardment of lunar surface, discussing luminescence and chemical effects 22 p4012 A69-40089

Random processes correlation functions determined by stochastic differential equations applied to lunar surface statistical characteristics determination 22 p4033 A69-41092

Physicomechanical properties of tuff rock based on similarity to lunar surface rock, determining natural density, porosity and compression strength 22 p4034 A69-41105

Lunar morphology evolution by dust transport on surface, discussing possibility of fluidization 23 p4221 A69-42392

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants 24 p4390 A69-43788

LUNAR TRAJECTORIES

NT CIRCULUNAR TRAJECTORIES

NT EARTH-MOON TRAJECTORIES

NT MOON-EARTH TRAJECTORIES

Vehicle trajectory motion in transition region of three body problem, noting equations of motion, first order solutions, etc 03 p0505 A69-13001

Book on planetocentric, lunar and interplanetary transfer techniques covering communications and coordinate system selection, minimum fuel and time transfer and rendezvous, etc 04 p0652 A69-14458

Lunar Orbiter missions pre- and postflight error analyses compared to estimate dispersions from reference trajectory [AAS PAPER 68-108] 21 p3805 A69-39220

LUNATION

U MONTH

LUNEBERG LENSES

U RADAR CORNER REFLECTORS

LUNG MORPHOLOGY

Sheet geometry of lung blood vessel system, discussing histological evidence and fluid dynamic consequences of sheet flow 19 p3263 A69-36656

Air and saline P-V curves of rat lungs after hyperoxia, comparing hyperoxia effects to surfactant washout on pulmonary compliance 23 p4081 A69-41440

LUNGS

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen 05 p0709 A69-16514

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen 18 p3096 A69-34733

Pulmonary arterial pressure for perfusion of excised dog lungs after inflation not due to shunt channels through atelectasis areas 21 p3651 A69-38386

Ventilation-perfusion inequality increase effects on lung overall gas exchange, using digital model 21 p3662 A69-38388

Airway distensibility effect on elastic behavior of human lungs, noting compliance and resistance at different breathing frequencies for diseased lungs 22 p3873 A69-40205

Atelectatic and direct toxic effects of oxygen on human subjects 22 p3873 A69-40208

Lower body negative pressure /LBNP/ effects on ventilation and lung volumes, presenting lung model for pulmonary gas exchange changes 22 p3891 A69-40222

Carbon monoxide effect on dog lung volume, mechanical properties and diffusing capacity 22 p3874 A69-40224

Diffusion in biological systems by random walks with emphasis on gaseous diffusion in lung, noting probabilistic tree model

22 p3885 A69-40978

Effects of oxygen saturation variations of blood on rates of weight gain in isolated perfused canine lung, noting pulmonary edemogenesis

22 p3887 A69-41189

Pulmonary emphysema effect on expiratory flow limitation from static pressure-volume and flow volume curves during natural and forced deflation of hamster lungs

23 p4082 A69-41442

Sequential lung emptying at varying expiratory flow rates at increasing acceleration levels using expired nitrogen analysis

23 p4083 A69-41448

LUNIK LUNAR PROBES

Soviet lunar and planetary probes, reviewing payload characteristics, principal mission features and photographs associated with Luna, Mars, Venera and Zond series

01 p0162 A69-10938

Penetration type soil analyzer used by Luna 13 automatic lunar station for mechanical strength of lunar surface

03 p0430 A69-13424

Unannounced propellant weight and thrust of Soviet Luna spacecraft based on Luna 12 lunar orbit injection maneuver

08 p1409 A69-19969

Soviet lunar effort in Luna probe series, outlining characteristics, performance and missions

09 p1609 A69-21583

LUNIK 9 LUNAR PROBE

Luna 9 automatic station flight control complex, detailing communication, orientation and stabilization systems operation after separation from acceleration module

10 p1792 A69-24197

LUNIK 10 LUNAR PROBE

Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics

01 p0080 A69-10582

Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics

15 p2610 A69-30752

LUNIK 12 LUNAR PROBE

Low energy proton flux in neighborhood of Moon measured by Luna 12 satellite indicating magnetized plasma region effect on burst

09 p1577 A69-21773

LUNIK 13 LUNAR PROBE

Lunar surface uppermost layer physical and mechanical properties investigated by soilmeter-penetrator and radiation densimeter on Luna 13

18 p3113 A69-34239

LYAPUNOV FUNCTIONS

U LYAPUNOV FUNCTIONS

LYMAN ALPHA RADIATION

Scattered solar Lyman alpha radiation measurement by Vertical Space Probe station in upper atmosphere including UV radiation

01 p0152 A69-10577

Absorption coefficients of molecular oxygen at Lyman alpha line and vicinity measured by vacuum spectroscopy

01 p0076 A69-11230

Mariner 5 Venus Lyman alpha emission observations, noting atomic hydrogen and oxygen resonance radiation measurements and apparent presence of molecular hydrogen or deuterium

[AAS PAPER 68-220] 02 p0313 A69-11486

Electron impact excitation of Lyman alpha emission from 2p state of atomic H, noting discrepancy below 50 Mcv

02 p0283 A69-12466

Excited atomic H state radiative mean life measurements using beam-foil excitation method

03 p0469 A69-12920

Free excited H atom Lyman alpha radiation intensity study using beam-foil excitation method

03 p0471 A69-13167

Chromosphere fine structure in Lyman alpha intensity, compiling isophote map

03 p0515 A69-14039

Temperature dependence of O VIII Lyman alpha/Lyman beta radiation ratio in solar corona, noting coronal temperature

03 p0516 A69-14042

Solar hydrogen Lyman alpha line profile measurement by rocket-borne spectrophotometer, obtaining flux available for scattering by atomic hydrogen in geocorona

05 p0815 A69-16254

Lyman-alpha observations of Venus by Mariner 5 analyzed, assuming resonance scattering of flux by hydrogen or deuterium atoms in Venus atmosphere

05 p0815 A69-16255

Polarization of Lyman alpha radiation in hydrogen rare gas collisions calculated in Born and distortion approximations including rotational coupling

08 p1355 A69-20207

Inelastic transport cross sections for Lyman alpha transitions in hydrogen

08 p1357 A69-20814

Deuterium escape in Venus upper atmosphere to explain anomalous Lyman-alpha glow observed by Mariner 5

[SRCC-91] 09 p1594 A69-21696

Diurnal variation of D region electron production rates, discussing Lyman alpha ionization of nitric oxide

09 p1577 A69-21717

Radiation fields of Lyman alpha to Lyman 10 calculated for model planetary nebulas with constant and exponential density distributions in spherical symmetry

09 p1604 A69-22407

Lyman alpha wing opacity effect on temperature scale and helium content in F and G subdwarf atmospheres

09 p1607 A69-22431

Solar Lyman alpha radiation scattering into antisolar geocorona, noting inaccessibility of region to solar wind

09 p1583 A69-22760

Solar Lyman alpha, Lyman beta and Balmer alpha lines of He 2 for electron temperature and density and optical thickness of emitting layer

10 p1772 A69-22859

Venus and Jupiter low resolution UV spectra obtained with servocontrolled star tracking telescope in Aerobee rocket, noting Lyman alpha radiation characteristics

[JHU-TR-15] 10 p1788 A69-24121

D/H ratio in Venus exosphere, discussing isotopic fractionation mechanisms and Lyman alpha data from Mariner 5

11 p1962 A69-25145

Stellar atmosphere models of pure hydrogen in hydrostatic, radiative and statistical equilibrium, including Lyman-alpha and continua, discussing nonLTE deviations

13 p2338 A69-27560

Rocket observations of Lyman alpha anisotropic galactic radiation, noting distribution of neutral interstellar hydrogen near sun

14 p2516 A69-28952

Hydrogen Lyman alpha nightglow models, discussing solar photon scattering in geocorona and hydrogen vertical distribution

15 p2595 A69-30191

Scattered solar Lyman alpha radiation measurement by Vertical Space Probe station in upper atmosphere including UV radiation

15 p2691 A69-30747

Atomic H Lyman-alpha interstellar absorption line in theta Orionis spectrum, showing equivalent width relations to H column density and spin temperature

15 p2695 A69-30890

Pressure and wavelength dependence of molecular O absorption coefficient near 1215 A, utilizing UV emission from crossed beam atomic collision

15 p2656 A69-31031

D region ionizable constituent density /presumably nitric oxide/ measured, using blunt probe to detect changes in conductivity produced by Lyman alpha ionizing radiation

15 p2598 A69-31316

Geocoronal Lyman alpha short term and 27-day variations observed byOGO 4 spacecraft attributed to flux variability at solar emission line center

15 p2699 A69-31404

OGO 5 satellite measurements of intensity and width of Lyman alpha line scattered by hydrogen geocorona

15 p2699 A69-31412

Lyman alpha radiation ionization rate in lower ionosphere, noting various charged particle concentration parameters

15 p2605 A69-31438

Hydrogen bulge above springtime pole indicated by Lyman alpha radiation in earth geocorona, discussing hydrogen horizontal transport and hydrogen compounds dissociation as causes

18 p3129 A69-34956

Statistical relation between expansion velocities and radii of planetary nebulas due to Lyman-c and diffuse Lyman-alpha radiation

19 p3426 A69-36575

Upper atmospheric H and He observations, showing Lyman alpha, H alpha measurements and H abundance values relative to Kockarts-Nicolet model

21 p3714 A69-38529

Solar L alpha and X ray emission contribution to lower ionosphere ion production, discussing altitudinal, latitudinal and temporal variations

22 p4008 A69-41096

Lyman alpha radiation from electron collisions with simple H-containing molecules, finding dissociative excitation cross section role

24 p4351 A69-43033

LYMAN BETA RADIATION

Excited atomic H state radiative mean life measurements using beam-foil excitation method

03 p0469 A69-12920

Temperature dependence of O VIII Lyman alpha/Lyman beta radiation ratio in solar corona, noting coronal temperature

03 p0516 A69-14042

Solar Lyman alpha, Lyman beta and Balmer alpha lines of He 2 for electron temperature and density and optical thickness of emitting layer

10 p1772 A69-22859

Balmer alpha and Lyman beta intensities for multiple scattering calculated for hydrogen geocorona models by radiative transfer equations, discussing radiation transport through earth hydrogen atoms

18 p3128 A69-34943

LYMAN SPECTRA

Shock front structure in radiative relaxation region in atomic H, calculating Lyman continuum effects

01 p0122 A69-10125

Absorption oscillator strengths for rotational lines in Lyman transition vibrational bands of molecular hydrogen from equivalent widths measured photoelectrically

06 p0962 A69-17818

Radiation fields of Lyman alpha to Lyman 10 calculated for model planetary nebulas with constant and exponential density distributions in spherical symmetry

09 p1604 A69-22407

Rocket spectrographic observations of Alpha Virginis noting hydrogen Lyman absorption lines

13 p2338 A69-27555

Photodestruction rate of H molecules by absorption of Lyman or Weber band radiation in interstellar space calculated at various distances from early stars

18 p3204 A69-35351

Classical path approximation in line broadening theory to derive impact and one-electron theories, with application to Stark broadening of Lyman series in hydrogen

23 p4193 A69-41379

LYMPH

NT LYMPHOCYTES

Chronic congestive heart failure in dogs compared to pulmonary system, discussing effect on cardiac lymphatics

23 p4078 A69-41364

Enzymatic processes of glucose metabolism in immature rats lymphatic tissues during exercise-induced elevated corticosteroid secretion

23 p4080 A69-41405

LYMPHOCYTES

Macromolecular ring shaped components corresponding to hemagglutinin studied in Limulus polyphemus hemolymph by electron microscopy

16 p2742 A69-31864

Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, showing antibody producing cells number increase

22 p3877 A69-40277

Inoculum dose effect on complement-fixing antigen production, heat lability and separation from BHK-21 cells infected with lymphocytic choriomeningitis virus

24 p4263 A69-43336

LYOPHILS

U COLLOIDS

LYRAE CONSTELLATION

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness

11 p1955 A69-24391

Color excess and 21 cm line intensity of RR Lyrae stars at high latitudes, confirming correlation between dust and atomic hydrogen

12 p2063 A69-25808

Photoelectric observation of RR Lyrae stars in globular clusters to estimate reddening near galactic poles, considering color indices

12 p2172 A69-27157

RR Lyrae gap stellar model atmospheres including radiation spectra, temperature radiation and convection, etc

13 p2338 A69-27561

Solar UV radiation reflected from Echo satellites measured and compared with UV fluxes from Lyrae

14 p2447 A69-29408

Variability of period of RR Lyrae type stars in globular cluster M3, deriving seasonal moments of stellar maxima and light curve elements

15 p2683 A69-30511

Absolute spectrophotometric gradients determined from energy distribution in UV beta Lyr spectrum, confirming gradual variations in light curve shape and spectral characteristics

15 p2688 A69-30557

Monograph on proper motions of RR Lyrae variables, discussing data acquisition analysis

15 p2700 A69-31493

Hydrogen line profiles, equivalent widths and electron densities for peculiar alpha 2 CVn and gamma Lyr stars

16 p2864 A69-32594

Photometric and spectroscopic data for southern RR Lyrae variables, deriving period, light curves in three colors, mean radial velocity and spectral types

21 p3801 A69-38764

Photometric data for variable stars in Lyra and Cygnus including eclipsing variables

23 p4215 A69-42009

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness

24 p4390 A69-43781

LYSINE

Time of heating effect on thermal polymerization of L-lysine free base

13 p2218 A69-28439

Free lysine and dinitrophenyl /DNP/ derivatives determined quantitatively by ion exchange chromatography

17 p2917 A69-33651

Pyrimidine polyribonucleotides or purine polyribonucleotides binding to lysine- or arginine-rich proteinoids considered for abiogenesis

23 p4113 A69-41509

LYSOZYME

Long lived radicals produced in crystalline ribonuclease and lysozyme by 120-Mev protons studied by ESR spectroscopy

03 p0372 A69-13485
